Introduction

Welcome to Franklin College, a liberal arts college in the Indianapolis metropolitan area, about 20 miles from downtown Indianapolis. Our students thrive through intimate class sizes, individual mentorship and focused attention. Our location is ideal because we can benefit from the inclusivity and personality of a smaller setting, but we still have access to all the professional (and fun) opportunities of the big city whenever we like. We believe the liberal arts are as much an experience as an education. We know that many colleges offer a liberal arts curriculum, but at Franklin, we view the liberal arts as a transformative opportunity to expand passions and identify new interests. Through our curriculum, students gain more than just a well-rounded perspective. They graduate from Franklin equipped with a holistic worldview, leadership experience and focused skill set that translates into real-world jobs.

Faculty-student relationships are special at Franklin. Our professors work closely with students to identify their passions and strengths and then help them find research and internship opportunities that best fit their abilities and spark their interests. Our professors support students but they also challenge them to stretch beyond easy answers or just checking off requirements.

Be sure to visit www.FranklinCollege.edu and find Franklin College on Facebook and follow @FranklinCollege on Twitter.

MISSION

A Franklin College education fosters independent thinking, innovation, leadership, and action for ever-changing professions and a globally connected world.

VISION

Franklin College will be nationally recognized as a premier college for engaged learning in the liberal arts and sciences, inspiring students to think independently, to question critically, and to live, lead, and serve meaningfully.

VALUES

Franklin College-upholds a common set of values that enhances the community and sustains personal, spiritual, intellectual, and professional growth for a lifetime. We value:

People of INTEGRITY who exhibit
- honest and ethical conduct and speech
- responsibility in personal, academic, and professional lives

Commitment to INCLUSIVITY that honors
- all forms of diversity
- the dignity of self and others
- empathy, sincerity, and openness

Culture of INTELLECTUAL CURiosity that promotes
- deep reflection about knowledge, beliefs, and ideas
- the ability to recognize, formulate, and ask discerning questions
- independent thinking

Drive for INNOVATION and CREATIVITY that encourages
- a willingness to take risks
• adaptability to an every-changing world
• the ability to solve complex problems

Spirit of COMMUNITY that fosters
• a collaborative environment that is responsive to the needs of others
• a supportive, service-minded network
• respect for the personal beliefs, faiths, and convictions that give purpose and meaning to our lives

ACCREDITATION

Franklin College is accredited by the Higher Learning Commission of the North Central Association (30 North LaSalle Street, Suite 2400, Chicago, Illinois 60602-2504, Telephone: 1-800-621-7440), the Indiana Department of Education, and the Commission on Accreditation of Athletic Training Education. In addition, the college maintains memberships in numerous other professional associations for the purpose of upholding standards of educational excellence.

NON-DISCRIMINATION

It is the policy of Franklin College that all opportunities are to be made available on the basis of merit and without discrimination against any employee, applicant for employment, student, or applicant for admission because of race, color, religion, gender, disability, age, national origin, or sexual orientation. Grievances should be submitted to the equal opportunity officer.

Founded in 1834, Franklin College is the 102nd oldest institution of higher education in the U.S. and the first in Indiana to admit women. Generations of graduates have made positive contributions to their families, their communities, and their careers, as well as to the nation and the world.

Purpose of the Catalog
The material contained in the Course Catalog is for information only and does not constitute a contract between the student and the college. The catalog provides an overview of course offerings and content. It is not the official list of offerings for any given term (fall semester, immersive term, spring semester, or summer terms). Students should consult the online schedule of classes for specific term(s) for which they wish to register.

The college and its various units reserve the right to revise, amend, alter, and change from time to time its policies, rules, regulations, and financial charges including those related to admission, instruction, registration, and graduation. The college reserves the right to withdraw curricula and specific courses, alter course content, change the calendar, and withdraw or change programs and majors offered by the college.
Admission Policies

Franklin College seeks students who demonstrate intellectual ability and seriousness of purpose. To this end, the admissions committee evaluates each applicant’s academic record, standardized test scores, recommendations, essay, school and community activities and personal information supplied by the student. In keeping with our mission statement, applicants for admission to the college are individually considered. While the college does not require a prescribed set of high school subjects, a typical student will have completed a college preparatory program with good quality of achievement. A typical college preparatory program would ordinarily include four years of English, three to four years of mathematics, two or more years of science including a lab science, three years of social sciences and electives to meet graduation requirements. Foreign language is strongly recommended. Students entering Franklin College are required to take two semesters of foreign language unless they test out on Franklin College placement examinations.

Traditional incoming first-year students - The following documents are required in order to be considered for admission to Franklin College:
1. The completed application for admission submitted in either online, paper format or via the Common Application.
2. An official secondary school transcript
3. Results of the SAT or ACT examinations. If you have not taken the exam, please list Franklin College to receive access to your score report, by coding 1228 for the SAT and 1194 for the ACT.

The following documents are recommended for admission (both available online as part of the Franklin College Application for Admission and as part of the Common Application):
1. Recommendation Form
2. Personal Statement

General Education Diploma (GED) or High School Equivalency Diploma- If an applicant has not earned a diploma from a secondary program, an HSE or GED is required. The academic areas of the examination are reviewed in light of the general requirements for admission.

Admitted first-year students must submit a $200 enrollment deposit to secure their position in the incoming class. The enrollment deposit is refundable prior to May 1st.

Immersive Term enrollment – Franklin College’s preference is for students to start in the Fall or Spring semester. However, students may begin in Immersive Term. The deadline for receipt of all statements and applications for admission during Immersive Term will be no later than December 10th.

Spring Semester enrollment – All previously enrolled students who are interested in reapplying for admission and all new students who are interested in applying for admission to Franklin College during the Spring semester must submit their applications to the Franklin College Office of Admissions. The deadline for receipt of all applications for readmission and admission will be no later than January 8th.

Transfer students – The transfer student application must be submitted online. If a student is less than five years removed from high school the following documents are required: official transcript from each college or university attended, transfer student recommendation form, results of the SAT or ACT examination and the high school transcript. All other transfer students who have been out of high school longer than five years should contact the Office of Admissions to discuss documents that will be required. Admission decisions regarding transferring students are based upon the academic record at both the post-secondary institution and the secondary school. Students transferring to Franklin College must be in good standing both academically, socially and financially with
their previous institution. Transfer students who intend to enroll at the college must submit a $200 enrollment deposit to the Office of Admissions, which is refundable prior to May 1st.

Franklin College Transfer Credit Evaluation Policy
Franklin College will accept undergraduate transfer course work, credits by examination, and other non-traditional credits presuming the following:
- Transfer courses were completed at a regionally accredited institution
- The coursework is substantively equivalent to Franklin College coursework
- Proper, timely documentation is provided in the form of official transcripts, test scores, or the equivalent
- The grade awarded is equivalent to C- (1.67 on 4.00 scale) or above, or test score is equivalent to the requirement as outlined in the Academic Course Catalog
- Students must complete at least 48 credit hours at Franklin College to be awarded a degree
- Franklin College may award a maximum of 16 credit hours for documented armed forces credit
- Franklin College may award a maximum of 16 credit hours for documented nontraditional training or courses

Those students participating in an articulation agreement with Franklin College should refer to the guidelines of the specific agreement regarding transferability of credit hours and course equivalencies. Agreements are located in the Academic Records Office.

For complete guidelines regarding transfer work, please consult the Academic Records Office.

International students – Applicants are required to submit an application, international student supplement, all educational transcripts, financial records and evidence of all test results for various governmental examinations. There is a $40 application fee for the Common Application. International students are also required to take the Test of English as a Foreign Language (TOEFL), successfully complete level 112 in an English Language Service (ELS) Center, or submit an SAT or ACT test score. The TOEFL is given at centers throughout the U.S. and abroad at various times of the year. A minimum score of 550 on the paper based TOEFL or 213 on the computer based TOEFL or 79 on the internet based TOEFL is required. An essay detailing why the student is applying to Franklin College is also required. Furthermore, international students are required to complete several documents and participate in a Skype interview with the Office of Admissions. International students who intend to enroll must submit a $500 enrollment deposit and exchange students who intend to enroll must submit a $500 enrollment deposit.

Visiting Students/Part-time Non-Degree Seeking Applicants Students who are currently enrolled full time at another institution and wish to take a limited number of courses at Franklin during the summer or at a time when they are not enrolled, should complete the Part Time Non-Degree Seeking Application. This application has no fee and is only available via PDF online at: http://franklincollege.edu/wp-content/uploads/2016/01/Part-time-application.pdf. The application should be submitted with high school and/or college transcripts. A $200 enrollment deposit must be submitted to the Office of Admissions to register for courses. This deposit will go into a student account and be debited from the cost of the course(s).

Readmission Readmission applies to students who previously attended Franklin College and withdrew in a prior semester, but also applies to those students enrolled and withdrawn in the current semester. Any Franklin College student who withdraws or does not continue consecutive semester enrollment must apply for readmission and be readmitted to the college in order to enroll in any classes.

1. Previously enrolled students from a prior semester who are interested in reapplying for admission to Franklin College must submit their application for readmission to the Franklin College Office of Admissions. Students seeking readmission need to print a PDF of the Readmit application from http://franklincollege.edu/wp-content/uploads/2018/08/PDF-readmit_application_0.pdf. The deadline
for receipt of applications for readmission will be no later than one month prior to the beginning of classes for that semester or term.

2. A student who withdraws from the College in the current semester and wishes to re-enroll in the next subsequent semester is not required to fill out a new application. The student must inform the Office of Admissions of his or her intent to re-enroll.

3. Prior to official readmission by the Office of Admissions, the Office of Student Development, Academic Records Office, and Business Office must agree to the re-admittance.

4. Policies of the academic catalog:
   - If a student who has not been at the college for 1 (one) semester is granted readmission, the student can remain under his/her original academic catalog.
   - If a student who has not been at the college for 2 (two) or more semesters is granted readmission, the student will be under the academic catalog in current use.

5. If a student is readmitted after academic suspension, the student returns on academic probation and all the policies of the current academic catalog will apply automatically.

6. If a student is readmitted after being placed on academic probation, the student returns on academic probation and all the policies of the current academic catalog will apply automatically.

7. All students including those who attended another college(s) during their time away from Franklin College are required to submit all official college transcript(s), a statement outlining reason(s) for returning to the college, and a Transfer Student Recommendation Form(s) as part of the readmission process.

8. All students must submit a $200 enrollment deposit to the Office of Admission to confirm their intent to enroll. Students will not be permitted to register for courses until their enrollment deposit is received.

No previously enrolled student who has outstanding financial obligations to Franklin College will be readmitted until such obligations have been satisfied.

Personal Enrichment for the Mature Student - Local residents 65 years and older may enroll in courses as a non-degree seeking student. Interested residents should print the PDF of the Part-Time Non-Degree Seeking application available at: http://www.franklincollege.edu/admissions/apply-now/other-applicants/, and submit the application to the Office of Admissions. The cost per semester is $25 (except for summer school).

Franklin College Employees – Employees who are interested in courses for personal enrichment should complete the Employee Course registration form available at the Office of Employee Resources. Employees seeking academic credit should complete the Part-Time Non-Degree Seeking application and submit with high school and/or college transcripts for review by the Office of Admissions.

Running Start – This program offers qualified high school and home school students who are junior level status or higher the opportunity to take freshman level courses in English, math, humanities, and social and natural sciences. Students will receive college credit for these courses which can be applied toward a Franklin College degree or as transfer credit to any other college or university. Interested students can print off a Running Start application at http://franklincollege.edu/wp-content/uploads/2017/03/2017-Running-Start-Application.pdf. Follow the directions to submit your application and pay the $40 application fee. You must also contact your guidance counselor or home school advisor to complete the recommendation and send a copy of your high school transcript to the Office of Admissions. The cost per course is $435. Running Start students may enroll in summer courses but published Franklin College summer course rates will apply and no discount will be given.

If there are any questions or if additional information is needed, contact:

Fines range from a warning to $50. Please refer to the Franklin College Security Office for detailed information regarding vehicular regulations and violations.

Amount of fees are subject to change annually. Other fees may be incurred based on course enrollment. Additional fees not listed may be implemented.
Billing and Payment of Charges

All student billings and payments are administered by Tuition Management Systems (TMS) through the Student Account Center (SAC) portal (www.franklincollege.afford.com). **The College does not send account activity statements. All account activity will ONLY be available online through SAC.** Tuition, room and board, and fee charges are assessed by the college on an academic year basis. However, charges are payable on a semester schedule. The fall semester is due on August 15 and the spring semester is due January 20 each year. Students who arrive on campus with a balance after the due date and no arrangements made for payment of the balance may have their class registration dropped until a payment schedule is arranged with the business office (317-738-8033). Franklin College offers an extended payment plan through TMS (www.franklincollege.afford.com) or (800) 307-6838) as an alternative to the semester payment schedule. TMS charges $42 per semester for a monthly payment plan. Payment options can be found at: http://franklincollege.edu/admissions/online-bill-payment/

GI Bill Recipients

Students entitled to GI Bill benefits under Chapter 31 or 33 may participate in the course of education during the period beginning on the date on which they provide a Certificate of Eligibility or Statement of Benefits obtained from the Department of Veterans Affairs (VA) and ending on the earlier of the following dates: The date on which payment from the VA is made to the college, or 90 days after the date the institution certified tuition and fees following the receipt of the Certificate of Eligibility. The college will not impose any penalty, including late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual borrow additional funds, on any covered individual because of the individual’s inability to meet his or her financial obligations to the college due to the delayed disbursement funding from VA under Chapter 31 or 33.

Running Start Program

Specially qualified high school students may be admitted as part-time students under the Running Start Program. Running Start students are charged $435 per course. A student may take no more than two courses per semester. Running Start students taking courses with labs are charged a $75 lab fee. Courses over 4 credits will be charged an additional $105 per credit hour.

Mature Students

Tuition is free for students age 65 or older. Mature students are charged a $25 registration fee each semester. There is a maximum of 2 classes per semester.

Financial Clearance

Students will be denied registration privileges and housing applications if a balance is owed to the college in an amount greater than $500 as of the date for these activities. On August 15 and January 20, students owing an amount greater than $500 may be dropped from class schedules and housing assignments. No student will be granted a diploma, academic transcript, or financial aid transcript until financial obligations to the college have been satisfied. Delinquent bills for any recognized campus organization may result in withholding a student’s transcript, diploma, or registration.

Reduction of Fees

Registration constitutes a contractual agreement between the college and the student. If a student withdraws from all classes, he or she may be entitled to a reduction in tuition, room, board, and other charges. Adjustments are based on the date of official withdrawal as recognized by the Dean of Student Success and the Academic Records Office. The Fee Reduction policy is subject to change annually.

Proper withdrawal papers must be submitted to the Dean of Student Success. If withdrawal becomes necessary, please contact the Dean of Student Success for more information and to set up an exit interview. Students who are dismissed, suspended, or withdrawn for disciplinary reasons or excessive absences by the college are not
entitled to fee reductions. Students who fail to observe withdrawal regulations may place their eligibility for refunds in jeopardy.

In order to withdraw and receive a fee reduction of school charges, a student must comply with four withdrawal requirements. The student must:

1. Complete appropriate withdrawal process through the Dean of Student Success.
2. Receive confirmation of withdrawal from the Vice President of Academic Affairs (VPAA).
3. Clear all financial accounts through the Business Office.
4. Report to the Office of Financial Aid if the student received any financial aid (scholarships, grant, work, or loan).

Calculation of Fee Reductions

Fall and Spring Semesters
When a student has withdrawn from the college and is eligible for a fee reduction for fall or spring semesters, the tuition charges will be adjusted according to following table:

- Prior to or on the first day of classes, 100%
- After the first day, during the first week of classes, 90%
- During the second week of classes, 75%
- During the third week of classes, 60%
- During the fourth week of classes, 45%
- During the fifth week of classes, 30%
- No refund is given after the fifth week of classes

Board fee reductions will be 100% if the withdrawal occurs prior to or on the 14th day of the semester. There will be no reductions if withdrawal occurs after the 14th day of the semester. Information on Housing reduction policies is available at the Student Affairs Office.

Students who reduce their enrollment from full-time to part-time (less than 12 hours per semester) through the last day to drop a course may be eligible for a fee reduction based on the difference between full-time and part-time tuition charges. Students must be aware that a change to part-time status may put their athletic, housing, and financial aid eligibility in jeopardy.

Immersive Term
Board will be calculated on a pro-rata basis of 25% of immersive term charge per week. Cancellation of the board plan must be approved by student affairs. As there is no additional charge for immersive term room for those students enrolled full time in the fall semester, no fee reduction applies. No reduction of tuition or room is made to a student who does not attend or lives off campus during immersive term.

Summer School
When a student is eligible for a fee reduction for summer school, the tuition and room charges will be adjusted according to following table:

- Prior to or on the first day of classes, 100.0%
- After the first day, during the first week of classes, 50.0%
- No fee reductions will be given after the first week of classes.
**Refunds and Returns**

When a student has withdrawn from the college, a recalculation of any Federal, State and Institutional aid must be conducted to determine the amount of aid a student is eligible to retain. Return of funds will be issued to Federal and State financial aid sources first and then to Institutional sources. If a credit of aid retained remains only then will a refund be issued to the student. Refund calculations will be completed within 30 days of recognized withdrawal date.

**Housing contracts** may be terminated without penalty by the student if written notification is received by the Department of Residence Life on or before May 10th. Termination of the contract for any reason after May 10th but prior to occupancy will result in a $500 cancellation fee. Cancellation of the housing contract after a student has occupied the room and prior to the end of the contract will result in a penalty equivalent to 25% of the total housing contract obligation. Students who cease enrollment or receive an exception may receive a fee reduction for their room costs in accordance with the fee reductions schedule.

**Non-Refundable Charges** include activity fee, late payment fee, payment arrangement fee, private music lessons, art and theatre course fees, parking annual permit, audit fees, Running Start fees, room cancellation fee, study abroad cost, and immersive term travel.
Financial Aid Policies

Financial aid is defined as any financial resource used to pay for college expenses; this may include but is not limited to grants, scholarships, student loans and federal workstudy funding. It is not always possible to assist all eligible applicants to the full amount of financial need. Financial aid can be received from several sources (Franklin College, federal, state, and/or external awards) and must be coordinated by the Office of Financial Aid to ensure that total aid received does not exceed regulatory limits. Students and parents should contact the Office of Financial Aid with any questions regarding the aid application or awarding process.

Note: Students enrolled in a Franklin College graduate program are not eligible for institutional scholarships and grants.

General Financial Aid Information

Institutional Scholarship and Grant Assistance for Undergraduate Students
Franklin College offers a wide variety of scholarships and grants to qualified students. Most scholarships are based on academic achievement while most grants are based on financial need. Most undergraduate students are considered for scholarships upon admission to the college.

Enrollment—Students must be enrolled full-time (12 hours or more each semester) to be considered for Franklin College grants and scholarships, maximum State of Indiana grants, and maximum Federal Pell Grants. Part-time students (six to 11 hours) may only qualify for Federal grants and student loans. Students applying for financial aid by April 15 of each year will receive full consideration for all forms of financial assistance. Some scholarships, as noted, may require a separate application with an earlier deadline.

Application—The Free Application for Federal Student Aid (FAFSA) is required for all aid beyond a merit scholarship or tuition remission. The FAFSA can be filed at www.studentaid.gov and should be submitted by April 15 for each year that financial assistance is requested. Students filing the FAFSA after April 15 will not be considered for State of Indiana grant assistance, but will be considered for federal and institutional funding.

Adjustment to Financial Assistance—A financial aid award may be reviewed and adjusted at any time during the academic year contingent upon federal and state regulations. Students should promptly report family financial changes to the Office of Financial Aid. Students are required to report all financial aid received from external funding sources.

Financial Aid for Study Abroad—Students are invited to apply for study abroad assistance through the Office of Global Education. With the assistance of generous donors, Franklin College has established scholarships specifically for international travel. Additional information regarding specific scholarships available for international travel follows.

Satisfactory Academic Progress (SAP)—Students must make satisfactory progress toward graduation each academic year to be eligible to receive additional financial assistance for the following academic year. The detailed SAP policy is available from the Office of Financial Aid.

Appeal Procedures—Students concerned about financial aid awards may submit a written appeal to the financial aid office.
Scholarships for Travel Abroad

Raymond D. and Enid McCaslin Kelly Fund This fund was established in order to encourage Franklin College students to participate in educationally related travel experiences. Awards are used to underwrite airline expenses associated with official student travel. Students participating in semester-long study-abroad programs will be given first consideration, followed by those participating in a minimum three-week internship or study program through Franklin College. Participation in immersive-term travel, as well as other travel programs will only be considered if there are an insufficient number of qualified candidates for the first two types of program.

Selection Criteria
1. Student must be enrolled full time at Franklin College.
2. Student must be participating in a Franklin College-sponsored domestic or international travel experience.

David M. Davidsen Memorial Scholarship This scholarship will provide funds for Franklin College students to study abroad to promote cultural understanding and to help students become active and responsible members of the global community. The scholarship will provide a stipend to one or more deserving students who meet the criteria outlined below.

Selection Criteria
1. Franklin College sophomore or junior (when undertaking the program).
2. GPA requirement of 3.00.
3. Participating in a semester-long study-abroad program through Franklin College, or a summer study-abroad program that lasts at least 10 weeks.
4. Students must complete the study-abroad program before commencing their senior year at the College.

Jay and Susan DeVoss Endowed Scholarship for International Travel This scholarship provides income for students engaged in a study abroad experience through Franklin College. The scholarship will be awarded to a new applicant each year and, in particular, to those participating in a semester-long study abroad program, a summer study abroad program, or an Immersive Term study abroad program, in that order.

Selection Criteria
1. Students must complete the study-abroad program before commencing their senior year at Franklin College.
2. The recipient must meet full-time enrollment requirements at Franklin College.
3. Preference will be given to students with demonstrated financial need.
4. Preference will be given to students participating in a formal study-abroad experience at Franklin College.
5. Preference will be given to students who graduated from high schools in Adams, Allen and Johnson counties.

Intercultural Honors Experience (IHE) Students accepted into the IHE and who satisfy the requirements of the program (participation in required course activities and receipt of at least a B in the IHE spring seminar) are eligible to apply for scholarship funds to study abroad. The amount of the award will depend on the choice of program, student’s financial need, and quality of the application. Students must complete one semester at Franklin College following their semester abroad.

Selection Criteria for the IHE
1. Current Franklin College first-year student, sophomore or junior.
3. Application, essay, written exam, and interview.
**Branigin Foundation Endowed Scholarship** This scholarship is for entering students to help fund their education at Franklin College. Branigin Scholars are guaranteed a scholarship to study abroad. In years where funds are available, other upper-class students with majors and interests in Business, Modern Languages, and other international areas may apply for the scholarship. Branigin scholars may use the funds for an immersive-term or semester study-abroad program.

**Selection Criteria**
1. Business majors with an international emphasis (international business, modern languages, international relations, etc.)
2. Minimum GPA of 2.5

**Leonard Foreign Language Travel Endowed Award** This scholarship is designed to promote cultural understanding and foreign language fluency, and to engage Franklin College language majors and minors in countries where their target language is spoken. The scholarship will provide a stipend to one or more deserving students for a study abroad opportunity which will cover transportation and lodging costs.

**Selection Criteria**
1. French and Spanish majors and minors.
2. GPA requirement of 3.00.
3. Preference will be given to students with at least sophomore standing.
4. Students must be traveling to a country where their language of study is spoken.

**Scholarship for Immersive Term Travel only:**

**The Sonya Baker-Hallett Tri Delta Scholarship Fund** Established by a Franklin College Tri Delta alumna to fund one-time scholarships to Tri Deltas who exemplify the organization's mission of advancing women's education and philanthropy.

**Selection Criteria**
Preference will be given to Tri Deltas who:
1. are involved with philanthropy or community service;
2. are taking advantage of FC's travel programs;
3. have a minimum GPA of 3.00;
4. have residential ties to Johnson, Marion, or Clark counties.

**Scholarship for Summer Travel only:**

**Bridges Travel Prize** Established by Bill and Lynn Bridges to fund a summer trip for Franklin College students majoring in both journalism and a foreign language. Students are expected to undertake study opportunities, and spend the majority of the time in a country where their language specialties are spoken.

**Selection Criteria**
1. Must be a junior by February of the year the prize is to be used
2. Must have a 3.0 GPA in each major

**Federal Assistance Programs**

**Federal Pell Grant**—All students are considered for this federal grant by filing the FAFSA. Eligibility is based on federal need analysis criteria.

**Federal Supplemental Educational Opportunity Grant**—Federal Pell Grant recipients receive first priority for this federal grant awarded through Franklin College.
**Federal College Workstudy**—This is an employment program that is jointly funded by the federal government and Franklin College. Eligible students must have financial need and work on-campus or at an approved off-campus sites for approximately 5-20 hours per week.

**Army ROTC Scholarships**—Four, three, and two-year Army ROTC Scholarships will pay up to full tuition and fees at Franklin College. In addition, an annual payment of $450 for books and $1,500 general subsistence allowance are added for each school year the scholarship is in effect.

**Direct Subsidized Loan**—This is a loan program is funded by the federal government. It is a fixed rate program (interest rates set annually by the U.S. DOE) to assist students with financial need as demonstrated by the FAFSA. The interest is paid by the federal government while the student is enrolled, and repayment begins six months after graduation, withdrawal, or with enrollment of less than 6 credit hours. An estimated 1% fee is deducted from each loan prior to disbursement. First time borrowers must complete a loan entrance interview and a Master Promissory Note (MPN) at [www.studentaid.gov](http://www.studentaid.gov).

**Direct Unsubsidized Loan**—This is a loan program that is funded by the federal government. It is a fixed rate program to assist students who may or may not demonstrate financial need. Unlike the Direct Subsidized Loan, the interest accrued from the Direct Unsubsidized Loan is not paid by the federal government. An estimated 1% fee is deducted from each loan prior to disbursement. First time borrowers must complete a loan entrance interview and a Mater Promissory Note (MPN) at [www.studentaid.gov](http://www.studentaid.gov).

**Direct Parent PLUS Loan**—Parents who wish to borrow to help finance their student’s education may apply for this loan option. The interest rate is fixed and established annually by the U.S. DOE. Interest accrual will begin within 60 days of funds disbursement. Repayment may begin while the student is enrolled; however, the borrower may also request loan deferment until after the student graduates, withdraws, or is enrolled in less than 6 credit hours. Financial need is not required. Fees are deducted from each loan prior to disbursement. Apply by going to [www.studentaid.gov](http://www.studentaid.gov).

**State of Indiana Assistance**

The **Indiana Commission for Higher Education (ICHE)** awards need-based grant assistance to eligible Indiana residents.

Awards are based on demonstrated financial need as determined by the results of the Free Application for Federal Student Aid (FAFSA) and the cost of attendance. All students must file the FAFSA or Renewal FAFSA by April 15 each year. Full-time enrollment is required to receive many of these grants.

The Indiana CHE Division of Student Financial Aid also awards non-renewable Hoosier Scholar Awards to selected graduates of Indiana high schools. Recipients are selected by their respective high schools.

Students participating in the State of Indiana 21st Century Scholars Program are eligible to use their scholarship benefits at Franklin College. Award values are determined by the State of Indiana, and recipients must maintain eligibility for renewal based on State of Indiana criteria. Additional state assistance for minority (black or Hispanic) students seeking a career in education or any student seeking a career in special education is available. Applications are available via [https://www.in.gov/che/4498.htm](https://www.in.gov/che/4498.htm). Full-time enrollment is required to receive any of these awards.
Other Financial Aid

**Campus Employment** - Students work 5-15 hours per week in an office on campus. Franklin College funds this program for students.

**Vocational Rehabilitation** - This is funded by the State of Indiana, for students with disabilities, to help pay for educational expenses. Contact the local Indiana Vocational Rehabilitation Office for details.

**Veterans Benefits** – The Post-9/11 GI Bill pays up to $23,671.94 (2018-2019) in undergraduate tuition and fees for those who qualify based on certification from the VA. Tuition benefits are paid directly to the institution.

Yellow Ribbon Program – Under this program Franklin College guarantees up to 50% of the remaining tuition after the Post 9/11 GI Bill benefits. The other 50% is matched by the VA. These benefits are paid directly to the institution. Only individuals entitled to the maximum benefit rate (based on service requirements) may receive Yellow Ribbon funding.

Students will need to apply for VA benefits at [www.gibill.va.gov](http://www.gibill.va.gov). Eligible veterans should contact the veterans’ counselor in the academic records office at Franklin College (phone 317-738-8018).

**External Sources** - Many financial aid funds provided by sponsors such as business, industry, labor unions, service clubs, etc., may be used at Franklin College. Contact high school guidance counselors for information.

**Tuition Exchange** - Franklin College participates in two tuition exchange programs: The Tuition Exchange Inc. and The Council of Independent Colleges Tuition Exchange Program. Participation is contingent on the employment of a parent at an institution which also participates in these programs. Awards are valued at up to full tuition, depending on the student’s eligibility for other tuition specific awards or entitlement funding. Students selected to receive awards will receive a participation agreement form that further defines the rights and responsibilities of a program participant.
Student Life

The Student Development team is here to help you feel like Franklin College is your home away from home. The programs, activities, organizations, events, and support that are facilitated by the Student Development team will foster the sense of belonging that makes you feel like a Grizzly! You will have transformative learning experiences outside of the classroom that will complement your coursework and prepare you to be leaders in your professions and in the world. We work to foster a sense of community, engagement, inclusivity, support, and holistic wellness so that you can do your best academic work and become the best version of yourself!

As members of a community of learners, the college expects conduct that not only meets the expectations of laws and college regulations, but more importantly is consistent with the college’s values. Each member of the Franklin College community will develop a personal sense of responsibility as well as a concerned understanding for the rights and well-being of others.

All students are expected to know and observe the local, state, and federal laws as well as the college regulations as published in this catalog and in The Student Handbook: A Guide to Campus Life. The student handbook is published annually on the College’s website at http://www.franklincollege.edu/student-life/student-handbook.

Academic Resource Center
The Academic Resource Center, located on the first floor of Hamilton Library, provides students with opportunities to expand upon their knowledge and understanding in a collaborative and supportive environment. Popular ARC programs and services include the Write Place, Math Study Center and Supplemental Instruction. The ARC also coordinates accommodations for students with disabilities.

B.F. Hamilton Library
The primary goal of the library is to support and enhance the College’s academic programs. We do this by providing a wide variety of print and electronic resources based on the curriculum, along with guidance in the discovery, evaluation, and use of resources through classroom instruction and individual consultation. Research consultations are available in person and via e-mail. Personal service for the entire community is a high priority.

Hamilton Library houses three floors of resources with more than 90,000 books and 6,000 videos. Additionally, the library’s website provides access to more than 17,000 full-text journals and newspapers and over 14,000 streaming videos. The library offers a variety of seating options for 275 students, including study carrels, group study rooms, casual study areas, and two computer labs. Wireless networking throughout the building provides internet access to the Franklin College community for laptop computers and other wireless devices.

Also housed in Hamilton Library are the Archives and Special Collections, with three distinct components. The Franklin College Archives contain material related to Franklin College, while the Indiana Baptist Archives contain information pertaining to the American Baptist Churches of Indiana-Kentucky. The third collection consists of the gubernatorial and other related papers of Roger D. Branigin, a Franklin College alumnus and governor of Indiana (1965-1969). These are the only Indiana state governor’s papers to be housed outside the state archives.

Enhanced support for students is provided through cubbies on the second floor that facilitate group study but also provide specialized technology—a green wall for recording presentations in one, and a large monitor in the other to make collaboration easier. A “Zoom room,” suitable for conducting interviews, is also located on the second floor. HamiltonONE, on the first floor, is an innovative collaboration between the Academic Resource Center, the Center for Student Success and Retention, and the Library that provides a wide range of academic support to students.
**Career Development**
Selecting a career is an important decision requiring knowledge about career opportunities and about one’s own interests, abilities and personal values. In a mobile society, a person is likely to make from three to five major career changes. Thus, though an initial career choice may be made while in college, it is important that one learns about the many career options available and how to go about selecting a career. For this reason, Franklin College offers career planning services for all students through their undergraduate and graduate student years and for alumni.

The career development office provides services to complement the undergraduate and graduate student education. Individual and group advising are the core of the comprehensive program that also includes career fairs, speakers on different career areas, and workshops on practical job search skills. A career resources library is available, and the office maintains an online job-listing service. Part-time, summer employment and internship listings are also available online. These services are provided at no cost to students and alumni. The career development office also coordinates the immersive term, semester-long, and summer internship programs, except for education major internships which are coordinated through the director of teacher education, and exercise science internships which are coordinated through the exercise science department. Internships are excellent opportunities for students to gain direct knowledge of a career, develop a professional network, and to gain valuable, practical work experience in that field.

Specific questions concerning these activities and services may be answered by contacting the career development office, located in the Ruth Lilly Center for Exploration (phone 317-738-8803).

**Counseling Center**
The Student Counseling Center, located on the second floor of the Student Center, provides free services to all full time students. Students may seek counseling for a variety of psychological and emotional issues. The center offers workshops to classes and campus groups on such topics as stress and time management, alcohol and other drugs, sexual assault and a variety of other psycho-social topics.

**Disability Services**
Franklin College is committed to providing equal access to students with disabilities. Reasonable and appropriate accommodations will be provided to students with disabilities to ensure equal access to academic programs and other college-sponsored activities. It is the responsibility of the student to identify him/herself and formally request accommodations. The Academic Resource Center invites any student wishing to request reasonable accommodations to meet with an ARC staff member to discuss past use of accommodations and disability related barriers they anticipate or are experiencing at the college. The process for determining accommodations is a collaborative one and may or may not require documentation. Medical records, psychoeducational testing and school records (such as IEP or 504 plan) may help guide the conversation and support specific requests. If this type of information is available, please submit it or bring it to your first meeting with the ARC staff member. Please do not delay meeting with the Academic Resource Center out of concern for not having appropriate paperwork.

Disability documentation submitted by a student is confidential. Franklin College will not release any part of the documentation without the student's informed consent.

Students who do not demonstrate foreign language proficiency at the 200-level or higher on the Franklin College placement exam or similar exam must successfully complete a Franklin College course in a foreign language numbered 111 or higher or the equivalent at another institution. Students with a disability that impairs the ability to acquire a foreign language may apply for a substitution for the language requirement. While substitutions may be considered, waivers are never granted. If the foreign language substitution is granted, the student must take two alternate courses from the approved substitution list. Please note that an exemption from meeting foreign language requirements in high school or at another college or university does not guarantee a substitution at Franklin College.
Franklin College mathematics courses are designed to provide students with fundamental knowledge of and facility with concepts and processes in mathematics. In cases where a student has a disability that profoundly impairs academic performance in the quantitative area and precludes him or her from completing the mathematics requirement, the student may petition for a course substitution. Mathematics and the concepts learned in mathematics are considered essential components of many programs of study and substitutions may not be considered for all programs. Except in extraordinary circumstances, a petition will only be considered in programs of study where LA 103 is the terminal mathematics course. While substitutions may be considered, waivers are never granted. If the mathematics course substitution is granted, the student must take one alternate course from the approved substitution list. Please note that an exemption from meeting mathematics requirements in high school or at another college or university does not guarantee a substitution at Franklin College.

For further information regarding Disability Services please contact the Director of the Academic Resource Center or visit the ARC website.

Health Services
Health Services, located on the second floor of the Student Center, is prepared to assist students with health concerns. The Health Center is staffed by a registered nurse five days a week. All services are confidential and are offered to students at no charge. When appropriate, referrals may be made to medical or mental health agencies. The Health Center Coordinator also provides educational workshops on various health-related issues and is available to provide such programs to student organizations.

New Student Programs
Launch: Franklin College’s First Year Experience Program
College is the only time in your life purely devoted to self-discovery. At Franklin College, we know how life-changing these four years are – which is why we created Launch. Launch is a yearlong program that propels your transition into college and empowers your social, personal and academic growth. While every first-year student will participate in each aspect of Launch, your Launch experience is completely tailored to YOU.
You’ll be intellectually invigorated because you will take courses focused on topics that intrigue you. You’ll be inspired by a personal panel of advisers focused specifically on your success. You’ll get to know your character and the talents that make you different from everyone else. And you’ll have access to every resource and person you could ever need along the way. So buckle up and prepare for takeoff as you get ready to meet your best self, overcome new and exciting challenges and launch your success at Franklin College.

Registration Day
Registration Day is the kickoff to a time in your life that’s dedicated to becoming your best self. This day will set you up for success as you prepare for a four-year journey of self-discovery. During Registration Day, you’ll:
• Meet with a faculty Academic Adviser: Academic Advisers serve as personal mentors who will help turn your life goals into a four-year plan that prepares you to pursue your biggest dreams.
• Attend exploratory sessions: You’ll attend sessions that will grease your personal growth gears. In one, you’ll reflect on your educational past, what’s worked, what hasn’t and how to make the most of your college career. In another, you’ll look to the future and learn to empower yourself for success in your academic, social and professional lives.
• Meet a Launch Team: Like every first-year student, you have a personal panel of advocates to challenge you, inspire you and help you thrive. You’ll meet a Launch Team and learn more about the magical formula that makes this approach so successful.
• Welcome your parents to the community: Registration Day features several sessions specifically for parents. They can attend talks on topics like financial aid and how best to support you during the next four years.
• Take care of some logistics: Take your photo for your student ID, register for classes, preference your first-year seminar and get to know campus.

Welcome Week
Welcome Week is dedicated to setting you up for a successful first semester of college. Think of this week as sacred space reserved specifically for getting you ready for the next step in your life. In addition to moving in and getting oriented to campus, you’ll participate in several events, activities and workshops, including:

• Becoming a Part of Our Tradition: Celebrate the official start of your college career as you participate in legacies passed down for more than 180 years. Attend the Opening Convocation and Bell Ceremony, smile for the annual class photo and take a walk around Dame Mall to commemorate your Franklin College initiation.

• Building Community: Participate in a host of events designed specifically for you to meet your fellow classmates, faculty and staff and create a sense of belonging at a college that cares.

• Being Engaged: Check out the college’s 40+ student organizations at the Student Activities Fair, attend sessions that provide valuable tools and resources for success, meet your Launch Team and First-Year Seminar classmates for the first time.

• Pursuing Your Strengths: Take CliftonStrengths, an assessment used by more than 90 percent of Fortune 500 companies, as you identify your unique combination of 34 of the most prominent natural strengths. Then learn how to apply your abilities to succeed in college, in your career and in life.

• Learning the Ins and Outs: You’ll attend programs that share college expectations and policies, introduce you to technology we use on campus, check your academic schedule one more time before classes start and discover where everything is on campus.

First-Year Seminar
As part of your fall semester course load, you’ll take a three-credit First-Year Seminar, a class you’ll select solely based on your personal passions. While you examine a topic like religion and the Marvel universe, young adult literature and social change, or the culture of competitive sports, you’ll do so in the company of like-minded peers who share your interests. Find your tribe and have fun gaining skills that will aid you in your other classes, including:

• Critically reading and analyzing text
• Creating connections between course topics
• Asking meaningful questions
• Engaging in academic discourse

Launch Lab
Think of Launch Lab as your weekly personal growth hour. In this lab, you’ll gain personal development skills while creating community with people who are also building their best lives. Together you’ll learn how to advocate for yourselves, how to fail resiliently, how to center your body and mind and how to make the most of your strengths. While most weeks you’ll meet exclusively with your First-Year Seminar class, the entire first-year class will attend Launch Lab together three times during the semester during Community Hours, covering topics like:

• Transitioning to Franklin College: What to expect as you adjust to college life
• Taking Care of Yourself: Assessing and caring for your physical and emotional health
• Valuing Others: Expressing gratitude, fostering inclusivity and creating community

Pivot
Pivot is the college’s annual on-campus personal development summit that takes place at the end of Immersive Term. As an attendee, you’ll participate in a series of interactive and energizing workshops, honing skills you’ll need to succeed in the real world. Instead of centering on lectures and textbooks, Pivot workshops feature hands-on learning.
Don’t just read about cooking – master a new dish. Don’t just study art – knit your first scarf. As one of the only colleges in the country offering this kind of engaged learning, Franklin College curates a holistic collection of workshops that span three core areas:

- **Professional development**: Workshop topics include setting goals based on your strengths, standing out to employers and managing your social media brand.
- **Wellness**: Workshop topics include living with stress, getting quality sleep and expressing gratitude.
- **Inclusivity**: Workshop topics include gracefully discussing politics and religion, listening actively and leading wholeheartedly.

**Launch Team**
Get ready to meet your personal panel of success advisers. Your Launch Team is a hand-selected group of four people dedicated to helping you succeed at Franklin College. You’ll meet with your Launch Team often to review your personal and academic goals as they create a network of support for you and guide you through the launch of your adult life. Your Launch Team includes:

- **Your Academic Adviser** is a faculty member who is here to challenge and inspire you as you define your academic goals, develop a four-year plan to achieve them and adjust that plan to match your goals and vision for the future.
- **Your First-Year Seminar Instructor** already shares a passion with you; he or she has crafted a course around a topic that you get to select based on your own interests. On top of that, this person will get to know you deeply — both personally and academically — as you attend First-Year Seminar three times per week during fall semester.
- **Your Launch Mentor** will — as a fellow student who’s been there — help you successfully transition to college. This person is here to answer tactical questions about homework, classes and college life, but will also spark deeper conversations about your life goals and passions and how you can manifest them on campus and in the community.
- **Your New Student Advocate** facilitates the Launch Lab and will get to know other facets of you as you explore your strengths, passions and holistic wellbeing in a weekly lab that empowers your personal growth.

**HamiltonONE**
HamiltonONE is the college’s student success hub. Think of it as your one-stop-shop for all things related to your success at Franklin College. Located on the first floor of B.F. Hamilton Library, HamiltonONE is home to the supportive people you need to thrive at college, academic resources and a great place to hang out. Visit HamiltonONE to meet with the dean of student success and retention, dean of academic success, director of first-year engagement and library staff. You can access the college’s vast collection of student resources or simply swing by to study and hang out with your friends. Helpful resources located in HamiltonONE include:

- **Center for Student Success**: The official ‘Launch Headquarters’ and the team committed to seeing you personally, academically and socially thrive at Franklin College
- **FC Cares**: A cross-functional team of staff who work to help students who are struggling with anything that might be a barrier to success at college. This group creates individual action plans to help you thrive.
- **Launch Mentor office hours**: Need some advice or just a friendly face? Launch Mentors hold walk-in office hours 35 hours a week.
- **The Write Place**: A collective of your peers who can help you with any stage of the writing process, including structuring your thoughts, editing your final text and citing your sources
- **Math Study Center**: A community of tutors and professors who can collaborate with you as you prepare for math tests, work through homework assignments and face mathematical challenges
- **Supplemental instructors**: Course-specific peer tutors who excelled in the classes you’re taking and can guide you through homework assignments, test prep and effective study habits as you adjust to your college course load
• Library resources: People and technology here to support you as you access literary databases, leverage B.F. Hamilton Library’s vast collection of scholarly texts and learn information literacy

Center for Diversity and Inclusion
Committed to maintaining a diverse community in an atmosphere of mutual respect, Franklin College provides an opportunity for students to live and study among other races, cultures, sexual orientations, religions, gender identities, economic backgrounds and so forth. To be successful in a diverse environment, students can expect support from several administrative and academic departments, including the Center for Diversity & Inclusion where the vision is to be a catalyst dedicated to engaging all cultural communities at FC around the value of diversity. We aim to create an inclusive educational environment where understanding, dialogue, and the free exchange of ideas are celebrated. These efforts will contribute to the development of critically conscious global citizens at FC and beyond. The mission of the Center is to support students, faculty/staff and the community be promoting the value of diversity, broadening multicultural awareness, advancing cultural competence and encouraging cross-cultural collaborative relationships through education and advocacy. The Center for Diversity and Inclusion offers a wide variety of programs and services for the Franklin College campus including the B.O.S.S. (Building Opportunity through Support and Structure) Mentoring Program, Diversity Advocates, Brother to Brother, Sister to Sister, Diversity Workshops/Trainings, Resource Library, Diversity Programming Support/Consultation, Academic Assistance, Mentoring & Support, Safe Zone Training, Diversity Workshops, Multicultural Organization and Advisor Support and oversees the Multicultural Lounge and the Center for Diversity & Inclusion.

Parent/Guardian Notification Policy
Franklin College strives to create a partnership between parents/guardians, students, and the college to promote student success. As part of that partnership, Franklin College will notify the parents or guardians of dependent students* if the student is placed on academic probation or if the student’s education or on-campus housing is at risk for medical or disciplinary reasons. The college will also contact parents/guardians if a student is at risk of harm to self or others.  
*Dependent status is determined by the college’s financial aid office.

Religious Life Program
The Religious Life program welcomes all Franklin College students and strives to create a safe environment for students to put into practice the beliefs of their various religious and spiritual traditions. In addition to Christian worship services, students are invited to develop their spiritual lives through workshops, field trips, discussion groups, and programs designed to engage students of any religious background. Opportunities are also available for students who may be exploring their spiritual lives for the first time. The College Chaplain is also available to assist students in finding appropriate communities of worship in the local area. All Religious Life activities are optional, and students will not be asked to participate beyond their comfort level.

Rev. Hannah Adams Ingram serves as College Chaplain and is available to meet with members of the campus community to discuss spiritual life, religious questioning, vocational discernment, and more. Meetings can be scheduled by e-mail at HAdamsIngram@franklincollege.edu. The Religious Life offices and student lounge are housed on the second floor of the Chapel and are open daily for student use. There is also an interfaith prayer and meditation room available on the lower floor of the chapel. FC students, faculty, and staff may request to be added to the Religious Life mailing list in order to receive a weekly e-mail detailing Religious Life activities. They may also follow @FCChaplain on Twitter.
Residence Life
Franklin College firmly believes on-campus living offers unique opportunities for socialization and participation in community governance and the challenges of group living are a contributing factor in the overall education and personal development of students. Franklin College has four residence halls, three fraternity chapter houses, and two campus homes. All first-year students, sophomores, and juniors are required to live in one of these residences. Detailed residence life regulations are published in The Franklin College Student Handbook: A Guide to Student Life, located on the College’s website at https://franklincollege.edu/campus-resources/student-handbook/.

Residence halls are staffed by professional Area Coordinators and student paraprofessionals (Resident Assistants). Fraternity houses are staffed by student paraprofessionals (House Directors). All staff members are trained and supported by the staff of the division of student development to help students with their adjustment to campus.

Security
The Franklin College security department is dedicated to providing a safe and secure working/living environment. The office is located on the ground floor of the Napolitan Student Center and an officer can be reached by calling (317) 738-8888 or 8888 from a campus phone.

The security department consists of a director, five full-time officers, and one part-time officer. Additionally, the department employs students as security assistants. A full-time officer is on-duty 24 hours a day, every day of the year. In addition to the security officers, the security department employs off-duty police officers on a part-time basis. These police officers supplement the security force during high activity periods or as needed for special events.

Security officers make regular patrols of all campus buildings and grounds. During these patrols, officers enforce college policy, patrol parking lots, enforce parking regulations, lock doors, and check windows. The officers respond to calls for assistance from the campus community, to include providing a dusk until dawn escort service.

Center for Student Involvement
MISSION STATEMENT: Guided by the spirit of the Franklin College mission and values, the Center for Student Involvement serves students through engagement opportunities. We are mentors, advisers and educators. Through attentiveness to student needs, we seek to create transformative experiences, a vibrant community and life-long memories.

GUIDING PRINCIPLES:

- Support students in pursuit of their passions
- Preserve and celebrate Franklin College’s historic and new traditions
- Empower students to be active participants in the co-curricular experience
- Create accessible, diverse and inclusive opportunities and environments
- Help develop life-long skills, such as critical thinking, social responsibility, the valuing of difference, problem solving, communication and leadership
- Provide a fun, lively and community-driven atmosphere that enhances the Griz journey

VISION STATEMENT: The Center for Student Involvement will connect every student to Franklin College through purposeful engagement.
Academic Policies and Procedures

(Topics are arranged in alphabetical order)

Academic Dishonesty and Plagiarism

Students are expected to maintain high standards of personal integrity in their academic coursework. In all matters relating to academic dishonesty (including plagiarism), the initial level of communication toward resolution of the problem will be a personal conference between the student and the appropriate member of the faculty.

The faculty of Franklin College recognize the following as violations of academic honesty:

1. Dependence upon the assistance of others beyond that which is expressly approved by the instructor in writing papers, preparing laboratory reports, solving problems or carrying out other assignments.

2. Plagiarism. Plagiarism is the use, whether by paraphrase or direct quotation, of published or otherwise recorded materials or the unpublished work of another person without full and clear acknowledgment.
   a. Because electronic information is volatile and easily reproduced, respect for the work and personal expression of others is especially critical in computer environments. Violations of authorial integrity, including plagiarism, invasion of privacy, unauthorized access and trade secret and copyright violations are grounds for sanctions against members of the academic community. This includes, but is not limited to, purchasing or acquisition of term papers, speeches, and printed materials from “term paper mills.”
   b. It also includes appropriating portions of another’s work to use without attribution

3. Cheating on quizzes, tests, any kind of assessment or examinations by:
   a. Referring during the examination to books, papers, notes, and electronic devices not specifically authorized by the instructor.
   b. Receiving during the examination information from another person or communicating information to another person or attempting to receive or communicate information.
   c. Using a substitute to take a quiz, test or examination or acting as such a substitute.
   d. Buying, selling or stealing a copy of an examination in advance of its administration or referring to such an examination after it has been obtained by another.
   e. Obtaining through any means the tests of a professor that he or she normally does not let circulate.
   f. Participating in or attempting to practice any other form of deceit on a quiz, test, paper, speech or assignment of any kind.

4. Permitting another student to use one’s work as his or her own

5. Mutilating, stealing, hiding or illegally removing or keeping Franklin College library materials or materials made available for student use by a faculty member or a college department.

Procedures for Cases of Alleged Academic Dishonesty and Plagiarism

Upon detecting an instance of academic dishonesty, the faculty member will promptly discuss the matter with the student involved. Upon determination of responsibility, the faculty member must submit a full report of the offense, with sanctions requested, to the VPAA with a copy to the student or students involved. The VPAA will investigate the charge thoroughly. If the VPAA concurs with the faculty member’s determination, written notification will be sent to the student, with a copy to the faculty member, the registrar, and the dean of students. The letter will include the sanction(s) imposed as a result of the violation based on the following guidelines:

For the first offense, a student who is responsible for committing academic dishonesty as a minimum will receive a penalty of “F” grade or zero for the piece of work, examination, paper, lab work, etc., involved. Additional sanctions may be imposed. The maximum penalty will be for the course final grade to be lowered by not more than one letter grade, whether or not the “F” grade or zero on the assignment has already done so.
Determination of a second offense of this type at any time during the student’s academic career at Franklin College will usually result in the student being dismissed from the college. **Dismissal from the college is final, and the student is no longer eligible to apply for readmission.**

If the VPAA does not concur with the faculty member’s determination, written notification will be sent to both the student and the faculty member indicating that decision.

**Appeals:**
1. Either the student or the faculty member may appeal the decision of the VPAA within 5 calendar days of the receipt of notification. The appeal will be reviewed by the Academic Appeals Committee, which is comprised of the faculty members of the Student Life Committee and a designee of the Steering Committee. Appeals to this committee are submitted in writing to the Dean of Students.
2. In cases which involve a sanction of academic dismissal, the student may appeal his or her case to the president of the college within 5 calendar days of the receipt of the decision of the Academic Appeals Committee. The president’s decision is final.
3. All appeals and appellate decisions must be communicated in writing.

**Academic Majors and Advisors**
A major consists of a minimum of 24 semester hours in the major department and a minimum of 12 semester hours in one or more fields integrally related to the major. Courses required in the major field must be completed with a minimum grade of ‘C-’ or better, and a minimum grade point average of 2.00 (A=4.00) must be maintained within the major fields unless otherwise specified by individual departments. No course required for graduation in an academic major may be taken on a pass-fail basis. Many departments require a grade of ‘C-’ in related field courses also. This is noted in the major description of each department.

For specific courses required for a major or a minor, refer to the appropriate departmental listing. Courses listed in more than one department may be used for credit under either department, except where restricted by a departmental requirement.

Upon matriculation, all students are assigned an academic advisor. After the first semester of the first year, a student may request an advisor change and/or declare a major. In all cases, the major/minor declaration must be initiated by the student. **A major must be declared by the end of the sophomore year.** If a minor area of study is planned, it must also be declared. The procedure is to complete the major/minor declaration form online in myFC – Departments – Academic Records. Students will receive an e-mail notification of the completion of the advisor/major/minor change.

**Academic Probation, Suspension and Dismissal**
Student academic status is reported to the VPAA upon completion of each academic period (fall semester, immersive term, spring semester, and summer sessions). A student who has attempted at least 12 hours at Franklin College will be placed on academic probation when the following minimum academic standards are not met:

- **Freshman** 0 - 26 credits: cumulative grade point average of 1.60 (A=4.00) at the end of first semester;
- cumulative grade point average of 1.80 (A=4.00) beyond first semester (up to 26 credits)
- **Sophomore** 27-57 credits: cumulative grade point average of 1.90 (A=4.00)
- **Junior, Senior** 58+ credits: cumulative grade point average of 2.00 (A=4.00)

*The cumulative grade point average is computed exclusively on academic credit earned at Franklin College. A grade of S or U has no effect upon the cumulative grade point average.*
Franklin College reserves the right to suspend any student whose grade point average falls below 1.00 for any academic period.

When a student is placed on academic probation, the period of probation begins immediately. A student on probation may not participate in intercollegiate sports; hold office in student government, social organizations, clubs, political groups, or residence halls; or serve in a leadership position of any school publication or broadcast operation. Further, a student on probation may not participate in commencement exercises. Students placed on academic probation may have their course schedules administratively adjusted to add a required academic strategies course designed to assist students in returning to good academic standing. Other conditions for academic probation may be applicable as determined by the Office of Academic Affairs. If on probation during the fall or spring semester, it is recommended that a student take no more than 14 credit hours. Students who fail to achieve the minimum required grade point average after a period of academic probation will be subject to academic suspension. Should academic probation be extended as an alternative to immediate suspension, the student must then meet or exceed the minimum grade point average standards noted above at the conclusion of the extended probation.

Students who have demonstrated a past history of academic probation or whose GPA falls below a 1.00 for any academic period may be subject to academic suspension. Students who have been suspended are not permitted to enroll in any credit bearing course until after the end of the stated suspension period and must contact the Office of Admissions for readmission. A suspended student who is readmitted on academic probation must maintain the minimum academic standards stated above during each academic period following readmission. If a student who was suspended and readmitted does not return to good academic standing after one academic period, this student will normally be dismissed. Dismissal from the college is final, and the student is no longer eligible to apply for readmission.

Activity Courses
Activity courses are one-semester-hour courses in which a student participates in an organized activity on campus. Students may enroll for credit in, at most, two activity courses per semester. The graduation requirement of 120 semester hours must include at least 116 hours of credit other than that earned as activity credit.

Courses designated as activity courses are as follows: COR 003, 010; KIN 004, 009; MMJ 001, 002, 004, 005, 007; THE 001. All activity courses are graded on a pass-fail basis.

Add-Drop and Schedule Adjustment Procedures

Adding a course
Students may add a course prior to the first day of classes or during the first week of the semester. Once classes have begun, approval of the classroom instructor and the academic advisor are required. After the first week of classes, approval of the classroom instructor and the academic advisor and a special petition to the academic rules committee is also required. Additional fees may be due based on hours added.

Due to the special short-term nature of summer sessions and immersive term, a student can add a summer session or immersive term course through the second day of classes.

Dropping a course
Students may drop a course for any reason without academic penalty and have it deleted from their registration record through the 15th class day of the fall and spring semester, with the signature of the academic advisor and instructor. All student athletes participating in a sport during the semester in which they are dropping the course must also obtain the signature of the Faculty Athletic Representative (FAR), Professor Kerry Smith, before dropping
or withdrawing from the course. The FAR must sign the Schedule Adjustment Form before it is submitted to the Academic Records Office.

Please refer to the academic calendar for the specific drop dates for immersive term and summer sessions.

Students will be charged tuition and fees based on the Academic Records Office’s official drop date. Tuition and fees are adjusted according to the policy listed under "Expenses and Financial Policies: Refund of Charges."

**Withdrawing from a course**

A student may withdraw from a course with a grade of ‘W’ through the ninth week of the fall or spring semester, with the signature of the instructor and academic advisor. A student who withdraws from a course after the ninth week of a semester will normally receive a grade of ‘WF’. A grade of ‘W’ can be assigned for a specific course if the withdrawal is for medical reasons and is approved by the VPAA.

Due to the special short-term nature of summer and immersive term, a student withdrawing from a summer or immersive term course after the fourth calendar day from the beginning date will receive a grade of ‘WF’. See the annual academic calendar for additional information.

**Administrative Withdrawal Policy**

Under certain circumstances, Franklin College may administratively withdraw a student from a single class or multiple classes. The four classifications of administrative withdrawals follow.

**Academic Withdrawal**

The Registrar may administratively withdraw or drop a student from a course or courses for academic reasons such as, but not limited to, the following: academic probation, extended academic probation, academic suspension, academic dismissal and unapproved credit overload. A student may also be removed from a course for which all prerequisites have not been satisfactorily completed. An academic drop or withdrawal will be processed according to the established drop and withdrawal deadlines. A grade of “W” will be assigned in the case of a withdrawal. The student’s GPA will not be affected.

**Disciplinary Withdrawal**

As a result of college judicial proceedings, a student may be suspended or dismissed from the college for disciplinary reasons. In such cases, regardless of the timing during a semester, the student is withdrawn from classes, earns no credits for the semester and is assigned a grade of “W” for each class. The student’s grade point average is not affected. The judicial process is under the jurisdiction of the Dean of Students. The student will forfeit all tuition and fees for the semester or term regardless of when the sanction is imposed. Students wishing to return to the College must apply for readmission.

**Emergency Withdrawal**

As a result of medical necessity or other emergency, a student may be withdrawn from a class or classes. Such requests are made through the Dean of Student Success and approved by the VPAA. Such withdrawals will only be granted based on appropriate medical documentation. Once approved by the VPAA, the student is withdrawn from all applicable classes and is assigned a grade of “W.” The student’s grade point average is not affected. Where appropriate and with an instructor’s permission, a student could receive a grade of “I” (incomplete) in one or more classes. For more information on incomplete grades, see Grading and Credit System in the Academic Policies and Procedures section.

**Excessive Absence Withdrawal**

Students are expected to prepare for and participate in all classes for which they are registered and to act in a manner consistent with the College’s values of respect and responsibility while attending classes. When the college determines that a student has unapproved excessive absences, the student may be withdrawn. Administrative
withdrawal could significantly impact a student’s financial aid, athletic eligibility, academic standing and progress towards degree.

The Registrar, in consultation with the VPAA, may administratively withdraw a student from all courses or from individual courses for unapproved excessive absences. A student is considered excessively absent when he or she has missed two consecutive weeks of class. Such students will have seven calendar days to respond to e-mail and written notification that their continuation at the college or in the course is in jeopardy. Students are responsible for maintaining an accurate mailing address with the College. Failure to respond within the seven-day period and to correct the behaviors to the satisfaction of the faculty member(s) involved will result in an administrative withdrawal. Students wishing to return to the College after being withdrawn from all courses must apply for readmission.

If the withdrawal for excessive absences is processed prior to the established semester/term deadline to withdraw from classes, a grade of “W” will be assigned. This grade will not affect the student’s grade point average. If the withdrawal is processed after the established deadline to withdraw from classes, a grade of “WP” or “WF” will be assigned. The grade of “WP” is not calculated into the GPA. However, the grade of “WF” is calculated into the GPA as a grade of “F.” The student will forfeit applicable academic credit, tuition, and fees for the semester or term regardless of when the withdrawal is posted.

AP Credit
Franklin College will accept credit for selected College Entrance Examination Board Advanced Placement exams (AP). Franklin College does not administer the AP test. However, students may receive credit by examination by providing an official record of examination results. Franklin College requires a minimum score of 4 on all AP exams: those exams requiring a score greater than 4 are noted in the following table. The following table includes the examinations, passing scores, hours of credit allowed, and Franklin College course equivalences.

*Franklin College will accept AP credit for advance placement in foreign language; however, students should be aware that they can also get advance placement by taking the College’s foreign language placement tests. Please note further clarification listed under Spanish and French Curricula.

Franklin College does not award credit for College Level Examination Program (CLEP) subject exams; however, CLEP exams may be taken to demonstrate proficiency in the foreign languages.

Assessment
College-wide assessment of college learning outcomes is an essential activity at Franklin College. Students will be required to participate in regular assessment at various points during their careers at Franklin College. Incoming first-year students will be tested upon entrance. Students wishing to register for their senior year may be required to show evidence of participation in specific assessment activities in order to register.

Athletic Participation and Eligibility
All student-athletes must be enrolled full-time during the semester(s) of their sports participation. Full-time is defined as 12 or more semester hours of credit (excluding ASC 080 or 085). Student-athletes should note that current NCAA Division III regulations require that a student-athlete make satisfactory progress toward a degree and be in good academic standing to be eligible for participation in intercollegiate athletics. To be in good academic standing, a student must not be on academic probation, nor be the present subject of disciplinary action which restricts participation in extracurricular activities.

Satisfactory progress is defined under “Satisfactory Progress Toward a Baccalaureate Degree” in this section of the course catalog. To help ensure the student-athlete is making satisfactory progress toward a degree, he/she must earn 80% of the credit hours attempted. A student-athlete who falls below this expectation will need to provide the Academic Records office with a plan showing ability to complete a degree within the time constraints listed under satisfactory progress.

Attendance in Class
Since many classes at Franklin College involve active participation through discussions, small group or laboratory work, attendance is expected. Each student shall maintain satisfactory attendance in all scheduled classes in accordance with the policy announced by individual classroom instructors. There is no campus-wide attendance policy, but poor class attendance almost always leads to class failure. If a student is absent from a class, it is his/her responsibility to contact the instructor and make satisfactory arrangements to complete material due or make up
work missed. For additional information regarding excessive absences, see the Administrative Withdrawal Policy in the Academic Policies and Procedures section.

**Attendance at Commencement**
Candidates for degrees are required to be present at commencement exercises in the prescribed academic attire. Exceptions to this rule will be made only in extreme cases and upon petition to the VPAA. Degree candidates must be in good academic standing to participate in commencement exercises. Students who are within nine semester hours of completing the requirements for graduation may be included in the May commencement exercises. The student must petition the Academic Rules Committee to be listed in the commencement program. The petition must demonstrate proof as to how the remaining hours and requirements will be completed prior to August 31st. Diplomas will be presented only to those who have fully completed all requirements and have met all financial obligations to the college.

**Auditing Courses**
Students may audit up to two courses per semester. The fee per course, regardless of the number of credit hours, is $205. In all circumstances, auditing students will follow course established attendance policies. Auditing students are exempt from exams but are responsible for class assignments and projects. A grade of “AU” is given only for informational instruction obtained by attending the course. Students not satisfying course expectations may be given a grade of “U.” Student must elect to audit a course within the first week of classes and cannot take the course for credit thereafter. Although, students will not be awarded course credit for those courses they choose to audit, they will receive the same services as other students. Should the student not attend the course, the instructor may administratively withdraw the student from the audited course.

**Class Level**
A student’s class level is determined by the total number of credit hours successfully completed:
- Freshman: 0 - 26 credit hours completed
- Sophomore: 27 - 57 credit hours completed
- Junior: 58 - 90 credit hours completed
- Senior: 91 and above credit hours completed

**Class-Related Activities**
An instructor of a class may not require a student to attend an on-campus or off-campus activity that would result in the student missing one or more of her or his regularly scheduled classes. However, instructors are encouraged to be as flexible as possible about allowing a student to miss their class for activities scheduled in another course in order to significantly benefit the student.

**College-Sponsored Activities**
Wherever possible, college-sponsored activities (e.g., intercollegiate athletic competitions, music ensemble performances, etc.) that might conflict with classes should be scheduled before the beginning of the semester, and faculty should be informed of these schedules. In planning these schedules, coaches and directors of college-sponsored activities should avoid class conflicts wherever possible. Students who are participating in these activities are further obligated to inform their instructors of anticipated work missed. The professor, after conferring with the student, will make a reasonable effort to determine an appropriate plan for the student to make up the missed work, which may include completing alternative assignments.

**Consortium for Urban Education (CUE)**
During the fall or spring semester a student may want/need to take a class at one of the consortium schools with which Franklin College is affiliated (list is available in the Academic Records Office). A student may enroll in only one CUE course during a given semester. These courses are limited in seating and need to be requested well in advance. (CUE requests are not processed at the hosting schools until their students have completed registration.) Member
schools of the consortium require a student to enroll through their home school (Franklin College) and pay all tuition and fees through the student’s home school. Any other fees and books for the CUE courses are the responsibility of the student. The student will not receive a transcript from the host institution; instead the grade is sent to the Academic Records Office at Franklin College to be recorded on the Franklin College transcript and is entered as a grade; however, the student’s GPA is not impacted since the course was taken off campus. All questions should be directed to the Assistant Registrar in the Academic Records Office.

**Convocation Programs**
A convocation program, which is organized around an annual theme, provides regularly-scheduled opportunities for students and faculty to attend special events of significant cultural value that add variety to the educational experience at the college. Instructors are encouraged to require attendance at convocation programs as course assignments.

**Co-op Semester**
Students wishing an alternative to the normal, eight-semester program of study may apply for the cooperative semester program. Qualified students are placed in full-time, semester-long employment positions in a variety of fields, including accounting, business, computer science, and journalism. The program provides an excellent opportunity to gain practical experience and employment contacts with a minimal interruption in academic work.

The co-op semester is transcribed as “Franklin College Cooperative Semester in (field).” A minimal registration fee of $100 is charged instead of tuition. No credits are earned through this program, nor are grades given. A minimum cumulative grade point average of 3.00 (A=4.00) and junior class standing are required to register. Applications are available from the Director of Career Services. A resume and recommendations from previous internship supervisors and/or employers are required as part of the application. Applications will be reviewed by the Director of Career Services, the Registrar, and the chairperson of the student’s major department. Students may wish to discuss with academic departments the possibility of practicum credit for specific work done during the semester. Students need not apply for readmission to Franklin College upon completion of the cooperative semester. An appointment with the Director of Career Services is required for assistance in securing contacts and completing requirements for co-op registration.

**Course Load**
The normal course load is 12-19 hours per semester. To carry a load in excess of 19 hours for freshmen and sophomores or 21 hours for juniors and seniors requires special approval of the academic advisor and the academic rules committee. **There is an additional fee for each semester hour in excess of 20.** A student may not audit more than two courses per academic term.

The maximum course load during a summer session is two courses per summer session. Students must obtain the approval of the academic advisor and the academic rules committee to enroll in more than two courses per summer session. The maximum course load during immersive term is one course or one internship.

**Course Numbering**
The course numbering system is designed as an aid to students and academic advisors. The year in which a student should enroll in a course, and the way in which a course fits into the Franklin College curriculum, is described by the course number.

The year in which a course should be taken is traditionally described by the first digit in a course number:

- 000 - 050  Activity courses (any year)
- 051 - 099  Developmental courses
- 100 - 199  Freshman
- 200 - 299  Sophomore, or qualified freshman, unless otherwise indicated
Courses numbered 051 - 099 are classified by the faculty as developmental courses, credit for which applies to financial aid, housing, athletic eligibility, and other such purposes unless otherwise specified, but does not apply toward graduation requirements.

Credit Hour Definition
In accordance with federal regulations, Franklin College defines one credit hour as “an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is”

1. Not less than one hour (50 minutes) of classroom or direct faculty instruction and a minimum of two hours out of class student work each week for fourteen instructional weeks (15 calendar weeks with breaks) for one semester hour of credit.

2. At least an equivalent amount of work as required in # 1 above for other academic activities including laboratory work, internships, practica, service learning courses, undergraduate research, studio work, individualized studies, and other academic work leading to the awarding of credit hours. A valid internship will include a minimum of 30 hours' work at the job site for each credit hour awarded or, if teacher education, 20 full days at a school site for a 4-credit hour internship (a standard internship load).

Faculty supervising practica, service learning courses, undergraduate research, studio work, individualized studies, and other academic work leading to the awarding of credit must report scheduled meeting times to the Academic Records Office for record keeping and verification purposes.

The Director of Career Development and appropriate faculty members will work with internship supervisors to monitor student hours at internship sites. Verification of student hours will be reported on a final supervisor evaluation.

The Academic Records Office and the Academic Advisory Council will be responsible for monitoring credit hour accuracy for each standard semester or non-standard term.

Credit Hours for Engaged Learning
For learning that takes place in ways other than a formal lecture/seminar course (e.g. performance, research, internships, community based work and learning), credit hours will be assigned on the basis of at least 3 hours of work per week, for the duration of a 14-15 week semester, for 1 credit hour. It is expected that these hours will include some organized contact with an instructor to discuss/report on/enhance the experience. This contact need not occur during regular class times and may occur on a one-on-one basis, or as a group. The nature of the contact with the instructor should be outlined in the course syllabus.

Experiential courses may include a mix of the traditional lecture (with 2 associated preparatory hours) and added experiential work. To further clarify, we have provided some representative examples. These are not exclusive but are meant to illustrate how this formula might be appropriately applied.

Undergraduate Research
Students conduct research with a faculty member including work in a laboratory, library, or other research setting during a semester. Credit hours will be assigned on the basis of at least 3 hours of work per week, for the duration of a 14-15 week semester for 1 credit hour. Students are expected to meet with their research advisor on a
regular basis to discuss project results and plan future experiments, research, or presentations.

**Civic Engagement**
Community service that is connected with a class or course of study would also be eligible for credit under the auspices of experiential learning. For example, if students enrolled in a course on sustainability spend 1 full-time week during spring break working for Habitat for Humanity (ca. 40-45 hours), this may be the equivalent of 1 credit hour of the course requirements. Alternatively, students may be engaged in community-based work for three hours per week over the semester for 1 credit hour. Community work must be linked to the course’s academic content. Organized instructor contact/reporting is required. The mechanism for instructor contact/reporting should be outlined in the course syllabus.

**Travel Courses**
Instruction and student work for the purposes of credit hour computation in travel seminars includes the following types of activities that advance the learning objectives of the course:

- Course meetings before, during, and after the dates of travel
- Time to read/view assigned texts
- Lectures (from the course instructor, guest lecturers, faculty/staff/students at partner institutions, guides, local residents, etc.)
- Discussion meetings (with course instructors, guest lecturers, faculty/staff/students at partner institutions, guides, local residents, peers, etc.)
- Museum, clinical, business, governmental, or other site visits
- Organized cultural excursions and performances
- Service learning projects
- Student presentations
- Synthesis/processing/reflection time (may be used for writing, discussion, or production of creative work which may take many forms including but not limited to journals, formal papers, blogs, art, music, etc.)

For example, a 3-credit course should require the equivalent of 9 hours of combined direct instruction and student work per week for the equivalent of a 14-week semester. Given that the “course hour” is 50 minutes, this would be a baseline of 105 total hours for the course.

**Internships**
Internships are hands-on experiences designed to provide the student with pre-professional work projects under the guidance of a practicing professional supervisor. Each internship can be between three and twelve credit hours; however, typical internships carry four hours of credit, are graded on a satisfactory/unsatisfactory basis, and require approval of the director of career development and the student’s faculty advisor or, if teacher education related, the director of teacher education. A valid four credit hour internship will include a minimum of 120 hours’ work at the job site or, if teacher education, 20 full days at a school site. Other requirements may be included by the Franklin College supervisor in conjunction with the internship site supervisor. Internships may be taken during the immersive term, where they also count as immersive term credit. Internships may also be taken during fall, spring, and summer sessions with permission from the director of career development or appropriate faculty internship supervisor.

**Dean’s List**
The Dean’s List is a published announcement of high academic achievement for the fall and spring semesters. To be eligible for this honor, a student must complete **12 or more regular-graded** credit hours for the semester (courses taken on a pass/fail basis are not included in the 12 hours) and achieve a semester grade point average of...
3.5000 to 3.9999 (A=4.00). Students who achieve a semester grade point average of 4.00 (A=4.00) will be placed on the President’s List (see President’s List in this section of the catalog).

**Degree Applications and Audits**

An application for degree must be filed with the Academic Records Office before the student is considered for graduation. The application should be filed at the beginning of the spring semester (Feb. 21st) prior to the following December, or January, May, or August of the next calendar year graduation date. At the time the student applies to graduate, the Academic Records Office will audit the student’s academic progress. The student is responsible for updating the audit once it has been emailed. Audits will be emailed to students’ Franklin College email address. Audits conducted prior to this first official audit are expected to be completed by the student and his/her academic advisor.

**Federal Family Educational Rights & Privacy Act (FERPA)**

The 1974 Federal Family Education Rights and Privacy Act was designated to protect the privacy of educational records, to establish the rights of students to inspect and review their educational records, to provide students some control over the disclosure of information from their records, and to provide guidelines for the correction of inaccurate or misleading data through informal and formal hearings. Students also have the right to file complaints with The Family Educational Rights and Privacy Act office concerning alleged failures by the institution to comply with the Act.

A summary of Franklin College’s statement of compliance with FERPA (or the Buckley Amendment), a copy of the amendment, and the full statement of compliance are available in the Academic Records Office for your review. The offices and departments at the college which collect and maintain academic, financial, academic advising, personal counseling, disciplinary, placement, and other information about students shall adhere to the following policy regarding the release of such information. For students wishing to review their educational records, a Student Request to Inspect Educational Records form must be completed in the Academic Records Office. Information will then be accessible to the student for review within 30 working days from receipt of the written request. At its discretion, the college may disclose directory information in response to inquiries about individual students.

Items considered directory information include:

1. Name, local address, local phone number, photo and campus e-mail address
2. Date and place of birth
3. Home (permanent) address
4. Confirmation of current enrollment (or admittance) including class level and major
5. Dates of attendance
6. Full or part-time status
7. Awards and honors received, including Dean’s and President’s list, degrees conferred and dates
8. Previous institutions attended
9. Past and present participation in officially recognized college activities, including athletics
10. Physical and performance statistics of members of athletic teams

Students may, if they desire, request that certain or all directory information not be released except upon their written consent. To make such a request a student must complete a Request to Prevent Disclosures of Directory Information form in the Academic Records Office by June 15th of the prior academic year. (New students are notified of this policy upon admittance.) Please consider very carefully the consequences of any decision by you to withhold any “Directory Information.” Should you decide to inform the institution not to release any or all of the “Directory Information,” any future request for such information from non-institutional persons or organizations will be refused. This request is void upon a student’s departure from the college.
The institution will honor requests to withhold any “Directory Information.” However, Franklin College does not assume responsibility to contact you for subsequent permission to release this information. Regardless of the effect upon you, the institution assumes no liability for honoring your instructions that such information be withheld.

All other information about students is restricted information. Non-directory or restricted information may be released to parents and/or guardians of students defined as dependent by the Internal Revenue Service or to parents of those students who have self-identified as dependent. For all other purposes, written consent of the student must be obtained before the release of restricted information to any person, office, or agency without a legitimate educational interest.

A school official is one of the following: a person employed by Franklin College in an administrative, supervisory, academic, research or support staff position; a person serving on an institutional governing body; a person or agency employed by (or under contract to) Franklin College to perform a special task, such as an attorney or auditor; or a student serving on a committee or assisting another school official in fulfilling his or her professional responsibilities. A school official is determined to have a legitimate educational interest if the information requested is necessary for that official to: perform appropriate tasks that are specified in his/her position description or by a contract agreement; perform a task related to a student’s education; perform a task related to the discipline of a student; or provide a service or benefit relating to the student or student’s family, such as health care, counseling, job placement or financial aid. Access to this information does not constitute authorization to share this information with a third party.

Please do not hesitate to contact the Academic Records Office with any questions you may have or to clarify details of this federal law.

**Final Exam Information**

The VPAA has developed the following clarifications regarding the issues of class activities prior to exams and students scheduled with more than two final exams on a single exam day:

There are no restrictions on any class activities during the two weeks prior to final exam week. Each faculty member’s charge during that period is the same as it is for the rest of the semester, to make appropriate use of the instructional time made available to the students.

As always, faculty are expected to meet each class during final exam week and have the students engage in substantive work for a substantial portion of the two-hour period assigned to the class. Adjustments to scheduled exam times or places must be approved in advance by the VPAA.

Students who are scheduled to take three exams in one day may seek relief. If a student is seeking relief, s/he should notify each of the three instructors of the conflict by presenting, in writing, a listing of the conflict along with a listing of the three instructors who are involved. If one of the instructors is willing to re-schedule the exam, the problem is solved. If it is not settled in this manner, the VPAA should be notified and the faculty will be convened to discuss a solution. Students seeking relief do not have the right to stipulate when an exam will be rescheduled.

There is no expectation that instructors will provide a review day for any test or final exam. Many classes will have a test during the last week of classes over the material most recently covered, particularly when the final exam is cumulative in nature.

Questions regarding these matters should be directed to the VPAA.
Foreign Language Requirement
Students who upon matriculation do not demonstrate proficiency equivalent to satisfactory completion of a Franklin College foreign language course numbered 111 or higher or the equivalent at another institution must complete such a course prior to graduation.

Students who completed secondary education in a primary language of instruction other than English may petition the Academic Rules Committee to have the foreign language requirement waived. An official letter from the secondary education institution documenting the language of instruction is required. Requests must be made by students before they commence their sophomore year. Further, no college course or proficiency credit will be awarded for that language.

Grading and Credit System
A semester hour of credit is the equivalent of one recitation a week throughout a semester. As a rule, one hour of credit is gained for two to three hours of laboratory or studio work.

The college employs the following grading system, based on a 4.00 grading scale:

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Description</th>
<th>Point Value per Credit Hour</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Exceptional, excellent in all respects</td>
<td>4.00</td>

Grading Reference
(1) I (incomplete) indicates there is still a possibility for credit after further work. It is used by the classroom instructor when a definite grade cannot be given because of a student’s illness or because of some justifiable delay in the completion of the work. The student initiates the process by filling out a petition to be granted an incomplete grade; these forms are available in the Academic Records Office. The course instructor then approves the written appeal after having reviewed the circumstances, and indicates in writing how the incomplete may be resolved, and
establishes, in consultation with the student, a definite but reasonable completion date for all course work, usually as early as possible. The Academic Rules Committee must then approve all requests and may modify the due date after discussing the matter with the appropriate faculty member. When an incomplete grade is granted, it is the student’s responsibility to consult with the instructor involved and to determine exactly the instructor’s expectations regarding the fulfillment of the course work. The grade of “I” is not calculated into the grade point average. The “I” changes to an “F” if the work is not satisfactorily completed by the specified time, or no later than six weeks after the beginning of the next semester.

(2) NG (no grade) is used for reporting mid-semester grades for practica, seminars, and individual studies, or may be used administratively by the Academic Records Office. The NG may also be assigned to labs with no separate credit awarded.

(3) AU (audit) grade is given only for informational instruction obtained by attending the course. The student must elect to audit a course within the first week of classes and cannot take the course for credit thereafter. Students will not be awarded course credit for those courses they choose to audit. Should the student not attend the course, the instructor may administratively withdraw the student from the audited course. Students may only audit two courses during a given semester.

(4) S and U grades are used in pass-fail courses and in activity courses. The S grade indicates satisfactory work and implies the grade is in the A through C-range. Neither the S nor U contributes to or detracts from the grade point average.

A course may be taken on a pass-fail basis provided:
   a. it is not a graduation requirement,
   b. it is not a course used to satisfy the requirements of the student’s major, related field or minor,
   c. the student has completed all requirements for the major before taking a pass/fail course in the major department,
   d. the student has achieved junior class standing,
   e. it is not an education course,
   f. the student has filed a pass-fail form in the Academic Records Office within the first week of class.

(5) W (withdrawal) grade: See Add/Drop and Schedule Adjustment Procedures in this section of the catalog. A grade of “W” is not calculated into the grade point average.

(6) In the event of a withdrawal from the college after the ninth week of classes, the student will receive either a “WP” or a “WF” based on the grade earned up to the time of withdrawal. A grade of “WP” is not calculated into the grade point average. A grade of “WF” is calculated into the grade point average as an “F.”

(7) The CR is used to denote credit awarded to a student according to performance upon certain nationally standardized examinations or departmental examinations. Credit hours are awarded and course equivalences determined; however, the placement does not affect the grade point average.

(8) Many courses may be repeated. If a student completes the course with a grade of C- or better, the department chair and the Registrar must approve the repeat. The earlier grade will not be purged from the record; however, the student will be given the benefit of the later grade for grade point average purposes in the semester when the course is repeated. The two grades will not be averaged for grade point average purposes; the latter grade will prevail. If the earlier grade is a D- or better, thus earning the student credit for the course, the student may not earn additional credit upon repeating the course. Courses taken off campus will not replace the original grade in the GPA calculations.

(9) Grades followed by an * earn a student credit for financial aid and housing for a particular semester or term. The credit does not apply to the 120 semester hours required for a degree.

Grading Changes and Challenges
A grade change may be made only by the faculty member who conducted the original evaluation of the student or by the VPAA if the faculty member is unavailable. A grade change is the alteration of a final grade, once the official and clerically accurate recording of such a grade has been accomplished in the Academic Records Office. Grade changes for clerical reasons will be processed by the faculty member and the Academic Records Office. After a grade change has been made, notification will be sent to the student with a copy to the advisor. [Note: Any grade changes
a student feels needs to be made must be initiated with his or her professor according to the grade challenge procedure.]

**Grade Challenges**

A grade challenge may be initiated by any student who believes that he or she has been evaluated inaccurately or with undue prejudice in the determination of the final grade in a course. This is a serious charge and the student must bear in mind that the faculty member has both the right and the responsibility to render a fair and critical judgment regarding the scholarly quality of the academic work performed.

**Grade Challenge Procedure**

1. A grade challenge may be initiated in writing by the student to the VPAA within 30 calendar days following the on-line posting of the final grade in a course by the Academic Records Office and only after personal consultation with a faculty member involved.
2. The VPAA will consult with both parties together or separately in an effort to resolve the problem.
3. Should the resolution be unsatisfactory to the student or faculty member, either party may submit a written appeal to the Academic Appeals Committee of the faculty within 10 calendar days of the decision of the VPAA.
4. After meeting with the faculty member, the student and VPAA, the Academic Appeals Committee will rule on the case. The student and faculty member have the right to be accompanied in these hearings by an advisor of their own choosing from within the faculty, staff or student body of Franklin College.

**Graduation Honors**

For students who have completed at least 90 semester hours of work in residence:

**Cum Laude**

A student whose Franklin record reflects a cumulative grade point average of 3.50 (A=4.00) or higher may receive the bachelor’s degree cum laude.

**Magna Cum Laude**

A student whose Franklin record reflects a cumulative grade point average 3.75 (A=4.00) or higher may receive the bachelor’s degree magna cum laude.

**Summa Cum Laude**

A student whose Franklin record reflects a cumulative grade point average of 3.90 (A=4.00) or higher may receive the bachelor’s degree summa cum laude.

Transfer students who complete at least 60 but less than 90 semester hours at Franklin College shall be eligible for the graduation honors of cum laude, magna cum laude, and summa cum laude subject to the following provisions:

1. Cumulative study completed at a prior college or university must reflect a 3.5 (A=4.00) cumulative grade point average.
2. The honors grade point average will be based solely upon grades earned at Franklin College.

**Independent Study Courses**

Most of Franklin College’s academic departments offer independent study learning experiences in which students receive a grade and academic credit for pursuing an individual research and/or reading project in the department’s particular discipline. Normally, the subject is not sufficiently or appropriately covered in departmental course offerings. Upper-division credit in the department is a normal prerequisite.

The courses are designed to encourage student initiative and to provide a degree of flexibility in the departmental program. **It is not intended that such a course be used to relieve schedule conflicts which have resulted from failure to take required courses in proper sequence.**
Independent studies may not replace catalog courses in fulfilling specific degree requirements except by permission of the department whose major is involved in any particular case and by permission of the academic rules committee. Permission must be secured before the individualized study begins.

Requirements of independent studies are defined by the individual faculty member and the student, with the implication of faculty supervision and regular consultation. The student must complete a form, available from the Academic Records Office, defining the independent study. The form must be signed by the student, the student’s independent study professors, the student’s advisor, and the chair of the department granting credit for the independent study. Independent studies with the immersive term designation must also be approved by the academic rules committee.

Independent studies may be taken for one or two semester hours of credit. Students wishing to enroll in more than two semester hours of credit must petition the department chair and the academic rules committee. Every credit given will represent approximately 30 to 40 hours of student work on the project.

**Individualized Major**

An individualized major offers highly motivated and self-directed students an opportunity to develop a program of study tailored to meet their special talents, academic interests, and career goals. An individualized major is designed for a student who is able to document the absence of an existing major that satisfactorily meets his/her specific educational and professional objectives. A student may design an individualized major for a first or second major. However, those seeking a second major via this process may not duplicate any courses with his/her first major.

Individualized Majors are designed by students in conjunction with their academic advisor and at least two other faculty sponsors, one of whom must be the chair of the sponsoring department. Two of the three members of this Individualized Major (IM) Committee should reflect the student’s educational objectives and career interests. An academic department must also sponsor the proposal. See “Individualized Major” in the academic majors sections of the catalog.

**Individualized Minor**

Franklin College students may apply to create an individualized minor that develops their special talents and interests. Such a minor can include regular catalog courses, immersive term courses and experiences, off-campus courses, individualized studies, special topics courses, practica, and internships (LA courses taken to satisfy an LA requirement cannot be counted). A minimum of 15 credit hours is required with no more than 12 hours taken as independent studies courses. A maximum of four credit hours may overlap between the student’s major course requirements and those proposed for the individualized minor. Examples of possible individualized minors include: women’s studies, medical ethics, African American studies, East Asian studies, Latino studies.

Students with an interest in an individualized minor must have achieved a minimum GPA of 2.00 (A=4.00). They must submit a proposal, which has the support of a faculty sponsor. Detailed information on these requirements and an application may be obtained from the Academic Records Office. Final approval must come from the academic rules committee.

**International Baccalaureate (IB) Examination Credit**

The International Baccalaureate (IB) is an advanced international educational programme for high school students. Franklin College recognizes credit from the International Baccalaureate academic programme and encourages students to submit IB exam scores to the Academic Records Office for evaluation.

Course credit may be granted for IB credit meeting both of the following guidelines.

a. IB credits taken in the Diploma Programme
b. IB credits granted for the Higher Level (HL) Examination with scores of 5, 6, or 7.

*Philosophy and Psychology credit for either Subsidiary Level (SL) or HL Examinations.

For more information on the IB, visit their website at [www.ibo.org](http://www.ibo.org). For more information on Franklin College’s IB policy, contact the Registrar, at 317-738-8018.

The following table includes the IB courses, passing scores, hours of credit allowed, and Franklin College course equivalences.

**Internship Program**

Internships are hands-on experiences designed to provide students with pre-professional work projects under the guidance of a practicing professional supervisor. Each internship can be between one and twelve credit hours, but typically carries four hours of credit, is graded on a satisfactory/unsatisfactory basis, and requires approval of the director of career development, the departmental faculty of record, and the student’s faculty advisor or, if teacher education related, the director of teacher education or, if in the area of exercise science, the internship supervisor in the department of exercise science. A valid four credit hour internship will include a minimum of 120 hours’ work at the job site or, if teacher education, 20 full days at a school site. Other requirements may be included by the supervisor in conjunction with the faculty of record and the director of career development. Internships may be taken during the immersive term, where they also count as immersive term credit. Internships may also be taken during fall, spring and summer sessions with permission from the director of career development or appropriate faculty internship supervisor. Students may not register for internships online. Students must meet with the director of career development to obtain an internship information form and add/drop forms must be signed by a faculty of record and must have approval of the faculty advisor.
SNT 489 internships may be completed during the spring of the junior year, the summer prior to the senior year during the senior year, or earlier when deemed appropriate by an academic department. These internships typically carry three to twelve hours of credit depending upon the nature of the experience, the hours involved, and the duration and must be directly related to a student’s major. SNT 489 internships or their departmental equivalents must be approved in advance by either the department or the student’s faculty advisor and, if applicable, the director of career development.

Students must plan ahead. Internships require time to arrange. For example, immersive term internships must be arranged early in the fall semester, and summer session internships must be arranged early in the spring semester. Interested students should contact the director of career development, the director of teacher education, or the intern supervisor in the department of exercise science as soon as possible. At the latest, arrangements must be completed by posted deadlines during registration of the semester prior to the desired internship. The college cannot guarantee that a suitable internship can be arranged for all students. The internship program is an experiential education opportunity. It is primarily the responsibility of the student, with the help of the internship director and appropriate faculty members, to establish and plan an internship with a company or organization. Invaluable experience and future employment contacts may be derived from the internship program and all students are encouraged to participate. Students should have sophomore, junior, or senior class standing to be eligible for the internship program.

Students must register for immersive term internships by the final class day of the fall semester. The internship information form, the agreement between the student, the internship site, and the faculty of record, must be submitted to the Career Development Office by the last day of finals of the fall semester. Those not submitting the internship application prior to the end of the first day of immersive term may be administratively dropped from the internship.

The Franklin College internship program is designed to provide students two lasting experiences: hands-on work in their major field and the personal experience of conducting a successfully guided mini-job search prior to graduation. Academic departments strongly encourage students to experience as many internships as possible during their college careers. Students may complete up to sixteen hours of internship credit which count towards graduation.

Internships or field experiences which are completed off-campus are required in all majors. Please note there is a sliding grade point average prerequisite to be eligible to register. At the time of application, students must meet the following grade point average requirements (see department of education for education requirements):

- Sophomores 2.50 grade point average overall
- Juniors 2.25 grade point average overall
- Seniors 2.00 grade point average overall

Higher grade point averages in a student’s major field will not be accepted in place of the overall grade point average.

**Midterm Grades**

Midterm grades are issued to students after the midpoint of the semester and are not recorded on a student’s transcript. These grades are intended to serve only as advisory reports on academic progress. Midterm grades are only reported during the fall and spring semesters.
Modern Language Placement Tests
Franklin College offers modern language placement tests for French, German, and Spanish. See the French and Spanish curricula in this catalog for detailed information on how to receive credits for courses relating to the placement exam. All students who have taken coursework in French, German, or Spanish are required to take the appropriate modern language placement test or sign the foreign language placement test waiver upon admittance to the college. Those with experience in other foreign languages should take an assessment off campus and send the results to the Academic Records Office. College Level Examination Program (CLEP) subject exams may be taken to demonstrate proficiency in a particular foreign language.

Non-traditional Credit
Franklin College may award a maximum of 16 credit hours for documented nontraditional training or courses. Academic credit may be awarded for successful completion of non-collegiate courses or training programs which are recommended for credit by the American Council on Education as reported in either The Directory of the National Program on Non-Collegiate-sponsored Instruction (College Credit Recommendations) or The National Guide to Educational Credit for Training Programs.

Off-Campus Courses
All requests from matriculated students to take courses off campus must be approved by the advisor, the chair of the instructional department, and the Academic Registrar. If such credit is to be used to meet teacher licensure requirements, the teacher licensure officer must also give approval. The off-campus course request form is available in the Academic Records Office.

Workshops will not ordinarily be accepted for credit. Correspondence study through a regionally accredited institution may be accepted, but must have prior approval by the advisor, the instructional departments affected, and by the Associate Registrar.

Before submitting the form to the Academic Records Office for final approval, the student should consult with his/her advisor and attach the necessary course description to the request form. Courses transferred from another institution will not impact the student’s GPA.

Students taking courses during the fall, spring, or summer terms as a guest student at another institution are responsible for all arrangements and registration activities at the hosting institution. All tuition, fees, and books are the student’s responsibility. At the completion of the course, the student needs to request that an official transcript be sent to the Franklin College Academic Records Office for processing transfer credit.

Petitions
Occasionally circumstances occur when a student needs a change or a waiver of a college requirement. That student can submit a petition requesting that change or waiver to the Academic Rules Committee for review. Changes to departmental requirements must be approved by the faculty in the department. All changes or substitutions must be communicated to the Academic Records Office.

Practica
Practica are learning experiences in which students receive a grade and academic credit for using skills learned in the classroom in a practical context outside the classroom. Every credit given will represent approximately 30 to 40 hours of student work on the project. Many practica require the student to document the process of the application of these skills. Departments may define specific requirements of their respective practica with the implication of faculty supervision and regular consultation.
Pre-professional Programs
The faculty of Franklin College advise students who are interested in graduate or professional schools, such as dentistry, medicine, law, engineering, optometry, podiatry, medical technology, pharmacy, physical therapy, occupational therapy, physician’s assistant, and veterinary medicine, to learn the specific course requirements of the schools of interest to them. Professional schools do not require students to graduate with a specific major. They seek individuals who show competence in selected areas of knowledge, who can think analytically, and who can express themselves effectively. As one of the ways to aid students in achieving their professional goals, Franklin College has developed pre-professional programs that meet most of the general entrance requirements of the professional schools. These programs, however, are not majors, and students must complete the requirements for at least one of the college’s majors in order to graduate from Franklin College.

The college’s pre-law advisors, Professors Allison Fetter-Harrott and Randall Smith, should be consulted about best practices in preparation for law school. A student from any major, with the right skills and preparation, may attend law school. The college’s Academic Catalog provides the plan for students obtaining a pre-law designation. Students should contact a prelaw advisor early in their career at Franklin College to ensure they are following the proper course requirements.

The college’s pre-medical advisor, Professor Sarah Mordan-McCombs maintains lists of recommended courses for students preparing for entrance to medical school or other health care related professional schools. This information can also be obtained from the College Health Professions Program web page on the college’s website. Since the specific admission requirements of schools of medicine, optometry, veterinary medicine, dentistry, and pharmacy differ, students should consult with the appropriate pre-professional advisor during their first year to ensure they are enrolled in the proper courses.

The college’s pre-engineering advisor, Dr. John Boardman, maintains five year plans for Franklin’s cooperative “3+2” program with the Purdue University School of Engineering and Technology at Indiana University-Purdue University Indianapolis (IUPUI). Students in this program earn a B.A. degree from Franklin College in Applied Mathematics and a B.S. degree from Purdue University in one of three engineering fields, typically in the span of five years. The engineering degrees available through this program are: Computer Engineering, Electrical Engineering, and Mechanical Engineering. Students should consult with the pre-engineering advisor during their first year to ensure they are enrolled in the proper courses. See the engineering section of this catalog for further details.

Prerequisites
All prerequisite courses must be completed with a grade of C- or better unless otherwise noted in the course description.

President’s List
The President’s List is a published announcement of high academic achievement for the fall and spring semester. To be eligible for this honor, a student must complete 12 or more regular-graded credit hours for the semester (courses taken on a pass/fail basis are not included in the 12 hours) and achieve a semester grade point average of 4.00 (A=4.00).

Readmission
All previously enrolled students who are interested in reapplying for admission to Franklin College must submit their application for readmission to the Franklin College Office of Admissions. Students seeking readmission need to print a PDF of the Readmit application from http://franklincollege.edu/wp-content/uploads/2018/08/PDF-readmit_application_0.pdf. The deadline for receipt of applications for readmission will be no later than one month prior to the beginning of classes for that semester or term.

1. Any Franklin College student who withdraws or does not continue consecutive semester enrollment must apply for readmission and be readmitted to the college in order to enroll in any classes.
2. Policies of the academic catalog:
   - If a student who has not been at the college for 1 (one) semester is granted readmission, the student can remain under his/her original academic catalog.
   - If a student who has not been at the college for 2 (two) or more semesters is granted readmission, the student will be under the academic catalog in current use.
3. If a student is readmitted after academic suspension, the student returns on academic probation and all the policies of the current academic catalog will apply automatically.
4. If a student is readmitted after being placed on academic probation, the student returns on academic probation and all the policies of the current academic catalog will apply automatically.
5. All students including those who attended another college(s) during their time away from Franklin College are required to submit all official college transcript(s), a statement outlining reason(s) for returning to the college, and a Transfer Student Recommendation Form(s) as part of the readmission process.
6. All students must submit a $200 enrollment deposit to the Office of Admission to confirm their intent to enroll. Students will not be permitted to register for courses until their enrollment deposit is received.

No previously enrolled student who has outstanding financial obligations to Franklin College will be readmitted until such obligations have been satisfied.

Registration
Students must formally register every term or semester they are in attendance. Course planning and scheduling for each semester and term are done in consultation with the student’s academic advisor. All necessary financial arrangements must be made with the business office prior to official registration. Registration is held during a published, designated time one semester prior to the semester of attendance and no later than the day prior to the first day of classes. Note: The college reserves the right to administratively adjust any student’s schedule.

Satisfactory Progress toward a Baccalaureate Degree
Regularly enrolled full-time students are expected to follow a program of study which would lead to a baccalaureate degree within four to six years. Such students will be considered to be making satisfactory progress toward a baccalaureate degree. Students whose programs do not meet this goal will be expected to justify to the Registrar the need for a longer time period.

Students who are receiving financial assistance are reminded that financial aid packages are awarded on the assumptions of a student’s maintaining full-time status and completing a degree in no more than eight semesters for Franklin College and State of Indiana assistance and six years for federal assistance. A student should consult the Financial Aid office if he/she has questions about satisfactory progress for financial aid purposes.

Second Bachelor’s Degree
An individual who holds a bachelor’s degree from another regionally accredited college or university (not Franklin College) and has participated to a significant degree in an academic program in the liberal arts and sciences may earn a bachelor of arts degree from Franklin College. **Requirements are successfully completing a minimum of 48 semester hours of coursework at Franklin College which includes all major requirements.** If the previous degree was awarded by Franklin College, the student cannot earn a second degree from Franklin College.

Senior Competency Practicum
Prior to graduation, each student must demonstrate that he or she has achieved competency in the outcomes specified by the department for the student’s major. The department may require that competency be demonstrated in any of the following ways:
1. A written examination given separately or as part of a course;
2. An oral examination given separately or as part of a course;
3. A standardized examination given separately or as part of a course;
4. A capstone project completed independently or as part of a course.
5. Successful completion of a senior seminar or other capstone course within the major. The student must receive a passing grade on the exam or project or in the course of which either is a part in order to graduate.

**Senior Residence**
The college grants degrees only to those who have completed a minimum 48 semester hours, usually the final 48 semester hours, at Franklin College or who have secured, in advance, permission of the VPAA to spend the year in a professional school. Those taking part of their final 48 semester hours off-campus must petition the Academic Rules Committee: students studying abroad do not need to petition. Students must enroll at Franklin College for at least one course during the semester immediately preceding degree completion. In special cases, exceptions may be made by petitioning the academic rules committee. Service members on active duty are subject to a different residence policy; consult the Veterans and Military Affairs, Services, and Policies topic later in this section for details.

**Testing Out of Courses**
There may be an occasion when a student believes past experience or knowledge would make attendance in a regular college course unnecessary. The student must obtain departmental approval and petition the Registrar for permission to attempt a departmental exam. No department is required to provide an exam for this purpose. If the department and Registrar grant permission, an appropriately-qualified faculty member, appointed by the chairperson, devises and schedules an exam. Faculty members designated by the chairperson will grade the test and assign a satisfactory or unsatisfactory grade. These exams are offered on a department-by-department basis. They may not be taken for credit but a successful score may exempt a student from a requirement.

**Transfer Policy (abbreviated)**
Franklin College will consider undergraduate credits in transfer from all courses taken through a regionally accredited College or University (post-secondary institution) when it can be shown that each course considered has been satisfactorily completed with a grade of C- (1.67) or better and that the course was comparable in content, nature, and intensity of course(s) offered at Franklin College. Grades attained at another institution are not transferable and are not used in computation of the Grade Point Average (GPA) at the Franklin College. Students must complete a minimum of 48 credit hours at Franklin College. No more than 16 credit hours of non-traditional credit may be awarded. No more than 16 hours of armed forced credit may be awarded.

The Academic Records Office will evaluate all undergraduate, post-secondary school education presented from outside Franklin College. College transcripts, official test scores, signed military documentation, or the equivalent are evaluated after a student is admitted to Franklin.

Transfer courses eligible for transfer credit will be documented on the Evaluation of Transfer Credit form. A course may transfer as an equivalent, as undistributed credit within a department, or as general undistributed credit. Undistributed credits are those courses which are acceptable for transfer credit but have no Franklin College equivalent. These courses are indicated on the Evaluation using the notation “XXX”. When the evaluation is complete, the student receives, by mail or e-mail, a written confirmation of the evaluation detailing transfer credits received. Often times, the evaluation will ask for additional information from the student such as a course syllabus. Upon receipt of this information the evaluation will be reconsidered, updated accordingly, and re-sent to the student. No transfer of credit is official until approved by the Academic Records Office.

Please consult the Academic Records Office for a copy of the comprehensive Franklin College transfer policy.
In no case will transfer grades received from other institutions be included in the Franklin College grade point average.

**Veterans and Military Affairs, Services, and Policies**

The Academic Records Office houses official veterans/military files, certifies students for benefits, and updates academic progress with the VA. Please communicate all changes to academic plans to the Veterans Affairs Certification Officer in the Academic Records Office. Those wanting additional information should contact the Veterans Affairs Certification Officer in the Academic Records Office located on the first floor of Old Main.

**Armed Forces Credit**

Franklin College may award a maximum of 16 credit hours for armed forces credit. The most recent edition of the American Council on Education’s *Guide to Evaluation of Educational Experiences in the Armed Forces* recommends credit hour equivalencies. One semester hour of physical education credit may be awarded for every year of active military service, up to a maximum of two semester hours. Active military service must have been honorable and terms of service must be officially documented.

**Military Withdrawal/Financial Reimbursement**

If a student is deployed or transferred for military service during the semester or term, the student is responsible for contacting the academic advisor and Academic Records Office to determine the best course of action regarding the withdrawal from classes or the issuance of incomplete grades before leaving. The student may decide to withdraw from classes or file for an incomplete on an individual course basis. In the case of incomplete grades, individual faculty will be consulted to determine the feasibility of completing all coursework. Fees will be reversed if the student is deployed or transferred in the middle of the semester or term and is forced to withdraw from all classes.

**Residence Policy for Active Duty Service members**

Franklin College understands the unique situation that service members on active duty face when trying to complete their degree, and values the sacrifices that these service members must make. Active duty service members must complete a minimum of 32 semester hours at Franklin College to be eligible for a degree. Those hours are recommended, but not required, to be the final 32 semester hours. It is the responsibility of the service member to notify the Registrar if he/she is pursuing a Franklin College degree while completing his/her degree requirements elsewhere, and to ensure all degree requirements are met according to the catalog under which he/she entered.

**Withdrawal from College**

A student may withdraw from the college with grades of “W” through the ninth week of the semester. In the event of a withdrawal after the ninth week, the student will receive either a “WP” or a “WF” based on the grades earned up to the time of withdrawal. A grade of “WF” is calculated into the GPA as an “F.” No withdrawals will be permitted after the final examination period begins.

If the student withdraws or is suspended from the college before final examinations, as opposed to dropping or withdrawing from a course, the permanent record will note the date of withdrawal unless special permission to exclude course enrollment from the permanent record has been granted by both the Dean of Student Success and the VPAA for circumstances beyond the student’s control.

Before withdrawing from the college, a student must complete the appropriate withdrawal process through the Dean of Student Success, as well as secure clearance in the Business Office. Failure to do so may result in loss of possible refunds, as well as receiving grades for the semester rather than “WP”s or “WF”s. If a student is under the age of 18, it is the responsibility of the student to procure parental acknowledgment of the withdrawal.
To return to Franklin College after withdrawing, a student must submit an application for readmission, available online and in the Office of Admissions, which must be processed at least one month prior to the beginning of the term to which he/she seek readmission. Students absent from Franklin College for two consecutive academic semesters will be held to degree requirements of the catalog in place upon return. Students who have outstanding financial obligations to Franklin College will not be readmitted until such obligations have been satisfied.

*Information about adjustments to tuition, board, fees and financial aid can be found in the Expenses and Financial Policies: Reduction of Fees section of this catalog.*
Cooperative Programs

Cooperative Program Costs and Financial Aid
Students should be aware that the cost of many of these cooperative programs frequently exceeds what is normally spent for a semester at Franklin College. These programs may change their fees each semester. Students will be responsible for the amount these programs charge in lieu of Franklin College charges for tuition, room, board, and activity fee. A limited amount of need-based financial aid may be available for those who wish to enroll in cooperative programs. Students are invited to apply for off-campus financial assistance through the Office of Financial Aid.

Accelerated Master of Public Health
Franklin College offers an accelerated Master of Public Health Program (AMPH) in the form of a 3 + 2 combined Bachelor of Arts (3 years) and Master of Public Health (2 years) degree with the IUPUI Richard M. Fairbanks School of Public Health. Upon successful completion of a minimum of 105 credit hours (in three years) of baccalaureate instruction at Franklin College and the core requirements of the Master of Public Health degree (in the 4th year) at IUPUI (15 credit hours), the student will be eligible to receive a baccalaureate degree from Franklin College. After completion of the required credits in the MPH program, the student will then be eligible to receive the MPH degree from IUPUI. For a complete list of requirements, refer to the section on Accelerated Master of Public Health and contact the AMPH faculty advisors: Jason Jimerson, Arbin Thapaliya, Allison Fetter-Harrott, and Kristin Flora.

Army Reserve Officer Training Corps (ROTC) Program
Franklin College students may participate in the Army Reserve Officer Training Corps (ROTC) at the Indiana University-Purdue University Indianapolis (IUPUI) campus. IUPUI, located in downtown Indianapolis, is approximately 35 minutes from the Franklin College campus.

Through a cooperative program called the Consortium for Urban Education, Franklin College students may pursue the Reserve Officer Training Corps (ROTC) program which leads to a commission in the U.S. Army, Army National Guard, or Army Reserves. Franklin College is a cross-enrolled school through the Army ROTC Program. All ROTC classes taken and passed with a C- or above are applied as general elective credits at Franklin College.

The leadership and management classes are open to men and women who are full-time students. Students may take the first two years of Army ROTC without a military obligation. The first two years are exploratory in nature and offer one to two hours of academic credit per semester. Students who want to continue through the program and receive a commission upon graduation apply for admission into the advanced program at the end of the second year of ROTC. Selection is competitive. Franklin College students who are eligible for scholarships can receive significant scholarship assistance through participating in this program. There are no restrictions on majors for students interested in ROTC. Students who do not continue with the ROTC program may still use credits as electives earned toward any major.
Phone: 317-274-2691. E-mail: armyrotc@iupui.edu
Website: http://www.iupui.edu/~armyrotc/
Students interested in participating should consult the Assistant Registrar in the Academic Records Office.

Engineering - Purdue University School of Engineering and Technology (IUPUI)
Franklin College maintains a cooperative “3+2” program with the Purdue University School of Engineering and Technology at Indiana University-Purdue University Indianapolis (IUPUI). Students in this program earn a B.A. degree from Franklin College in Applied Mathematics and a B.S. degree from Purdue University in one of three engineering fields, typically in the span of five years. The engineering degrees available through this program are: Computer Engineering (B.S.Cmp.E.), Electrical Engineering (B.S.E.E.), and Mechanical Engineering (B.S.M.E.).
Students pursuing an Engineering degree will declare a major in Applied Mathematics and follow that degree program as stated in the catalog.

Students following the 3+2 program will be required to make certain selections in their liberal arts core and for major courses currently listed as electives in order to satisfy the engineering requirements at IUPUI. See the engineering section of this catalog for further details.

Medical Technology – Indiana University Health Methodist & Franciscan St. Francis Health Hospitals
Franklin College has a combined degree program in medical technology conducted in cooperation with Indiana University Health Methodist Hospital and Franciscan St. Francis Health Hospital, both in Indianapolis, Indiana. After completion of three years of college work and fulfilling graduation requirements, students may receive a Bachelor of Arts degree upon completion of a 12-month course in medical technology. For a complete listing of requirements, refer to the section on medical technology and contact Professor Arbin Thapaliya.

Professional School Degree Program
Under conditions approved by the major department and the Registrar, Franklin College will award the BA degree to a student who completes all degree requirements and at least 100 hours in three years at Franklin College combined with the first year of work at a recognized school of law, dentistry, optometry, occupational therapy, physical therapy, pharmacy, veterinary medicine, or medicine. A student must complete the 100 semester hours with a cumulative grade point average of 2.00 (A=4.00). The student must complete graduation requirements and that portion of the major which will be consistent with the professional training and the combined degree. A petition to the Registrar must be submitted during the last semester at Franklin College.
Global Education Programs

Intercultural Honors Experience (IHE)
The Intercultural Honors Experience is a competitive program designed to help students build a solid intercultural foundation, introduce them to interdisciplinary learning, and provide them with opportunities and incentives to study abroad.

The core element of the program is completed in the spring: students take a seminar which focuses on a topic or issue of global interest. As part of this course, students present a research paper at a symposium open to the campus community and the public.

After completing all the elements of the program and receiving at least an 80% in the seminar, students are eligible to apply for scholarships that they can use to study abroad for a semester or a summer program. The amount each student receives will be based on the number of applicants, each student’s financial need, the cost of their program, and the quality and amount of planning put into their application. While the selection committee strives to help all students as much as possible, the amount of funding each student will receive cannot be guaranteed. It is strongly recommended that all students work with the Office of Global Education to find a study abroad program that is affordable.

Applicants will be evaluated based on an interview, their academic achievement in high school (for first-year students) and at Franklin College, their community involvement, extra-curricular activities, reference letters, and an exam. For more information on this and all international programs at Franklin College, please go to http://franklincollege.edu/academics/engaged-learning/global-education/intercultural-honors-experience-ihe-new/

The course will serve to show students how the humanities, social sciences and natural sciences all contribute to an in-depth understanding of a major global issue or world region. Topics will vary depending on faculty interest and with approval of the Vice President of Academic Affairs. Students who successfully complete this course will receive credit for the international requirement.

Global Education Opportunities
Franklin College recognizes the value of carefully planned study abroad for students who are qualified and interested in such opportunities. A list of Franklin College’s preferred provider programs is below. More details on each program can be found at http://www.franklincollege.edu/academics/global-education/ or at the Office of Global Education.

Students must be in good standing at Franklin College to study away. The program must be approved in advance by the student’s major advisor. Upon return, students are expected to present evidence, via an official transcript, of satisfactory achievement (C- or above) in all courses presented for transfer credit. It is preferable for students to complete their final semester of study at Franklin College in order to ensure that courses are transferred in time for graduation.

Costs and Financial Aid
Students should be aware that the cost of studying abroad will vary. Semester study away students must travel overseas through a preferred provider program. Semester students will pay the program fee for tuition and accommodation charged by the partner program plus a $1000 Franklin College administration fee. Both the administration fee and the partner program costs will be billed to the student by Franklin College for semester programs. Summer study away students can travel abroad through approved Franklin College programs. Summer
students will pay all program fees directly to the overseas program. With the assistance of generous donors, Franklin College has established scholarships specifically for international travel. For additional information regarding specific scholarships available for international travel contact the Office of Global Education.

ISEP Direct – Multiple Destinations
CIS-Multiple Destinations
The Curriculum

Majors and Minors
A student may earn the Bachelor of Arts degree upon completion of requirements in a program of liberal arts and a specialized field of study. Franklin College offers majors in a variety of traditional academic disciplines, as well as fields that uniquely blend the study of traditional liberal arts and sciences with pre-professional preparation.

Franklin College currently offers majors in the following fields:

- Accounting
- Art History
- Art Studio
- Biology
- Business
- Chemistry
- Computer Science
- Creative Writing
- Economics
- English
- Exercise Science
- French
- History
- Mathematics
- Multimedia Journalism
- Music
- Neuroscience
- Philosophy
- Political Science
- Psychology
- Public Relations
- Religious Studies
- Sociology
- Software Engineering
- Spanish
- Sports Communication
- Theatre
- Individualized Major

In addition, a student may complete an optional minor in the following fields:

- Accounting
- American Studies
- Art History
- Art Studio
- Biochemistry
- Biomedical Physics
- Biology
- Business
- Canadian Studies
- Chemistry
- Coaching
- Computer Science
- Creative Writing
- Economics
- Education Studies
- English
- Environmental Science
- Fitness
- French
- History
- International Relations
- Leadership
- Mathematics
- Multimedia Journalism
- Music
- Neuroscience
- Nonprofit Leadership
- Philosophy
- Political Economy
- Political Science
- Professional Writing
- Psychology
- Public Relations
- Quantitative Methods
- Religious Studies
- Rhetoric
- Sociology
- Software Engineering
- Spanish
- Theatre
- Visual Communications
- Individualized Minor

Teaching major:
- Elementary Education

Cooperative Programs:
- Dentistry
- Medical Technology
- Engineering
- Pharmacy
- Public Health

Pre-Professional Programs:
- Pre-Dental
- Pre-Occupational Therapy
- Pre-Physician’s Assistant
- Pre-Law
- Pre-Optometry
- Pre-Podiatry
- Pre-Medical
- Pre-Pharmacy
- Pre-Veterinary
- Pre-Medical Technician
- Pre-Physical Therapy
Degree Requirements

Franklin College requires students to complete the following requirements for the Bachelor of Arts degree:

1. **Total Credit Hours:** A minimum of 120 hours with a cumulative grade point average of 2.00 (A=4.00) or higher. Education majors, designated tracks in some majors, as well as double or triple majors may require more than 120 hours and enrollment beyond a fourth year. A maximum of 16 credit hours of internship credit may be applied toward the minimum 120 semester hours required for graduation.
2. **LA Requirements:** Successful completion of the liberal arts requirements.
3. **Major Requirements:** Successful completion of all requirements for an academic major with a grade of ‘C-’ or better per course in the major field. However, a minimum grade point average of 2.00 (A=4.00) is required in the major field, unless otherwise specified by individual departments. All majors require at least 24 semester hours in addition to those hours used to satisfy the liberal arts requirements.
4. **Minor Requirements:** A grade of ‘C-’ or better in all courses required for the minor. However, a minimum grade point average of 2.00 (A=4.00) is required in the minor field, unless otherwise specified by individual departments. A minor is not required for graduation.
5. **Foreign Language Requirement:** Students who upon matriculation do not demonstrate proficiency equivalent to satisfactory completion of a Franklin College foreign language course numbered 111 or higher or the equivalent at another institution must complete such a course prior to graduation.
6. **Undergraduate Research Requirements:** Successful completion of the scaffolded undergraduate research experience administered by the academic department in which the student completes a major. (See Expectations and Outcomes in the UGR section.)
7. **Professional Requirements:** Successful completion of the professional development program administered by the academic department in which the student completes a major. Students with multiple majors need only complete professional development requirements in one major, to be determined in consultation with the departments involved and, if necessary, the director of professional development. (See additional details in the Integrated Professional Development section.)
8. **Immersive-Term Immersive Experiences:** Students must complete a minimum of two immersive experiences during the three-week immersive term (at least 6 credit hours). One of these two experiences must be an on-campus, immersive course during the student’s first year at Franklin College. The second must be an off-campus immersive experience, such as an internship (which may be a new experience, a continuation of a fall internship, or in conjunction with a spring internship), field experience, practicum, study away experience, undergraduate research opportunity, community-based project, or other approved off-campus, credit-bearing experience or independent study. Students cannot take a second on-campus immersive course to satisfy their second immersive-term experience. The number of immersive term credit hours required of transfer students will be determined by the number of hours completed prior to entering Franklin College. All students must enroll in an immersive-term immersive experience during their first year at Franklin College. Students wishing to study abroad during their first year on campus may do so if they are accepted into the course. This study away experience will satisfy the on-campus immersive course requirement. Students may do two study away experiences to satisfy both immersive-term experiences.
9. **Pivot:** Students must complete a minimum of two Pivot conferences. Included workshops are designed as applied experiences focused on personal and professional skill development. One Pivot conference (two or three days in length) must be completed during the student’s first year at Franklin College.
10. **Senior Competency Practicum:** Successful completion of the senior competency practicum administered by the academic department in which the student completes a major. Students complete the senior competency practicum in the last year during which course requirements for the major are completed. Double and triple majors are required to complete a senior competency practicum in all majors.
11. **Final 48 Credit Hours:** The last 48 credit hours, as a minimum, must be completed at Franklin College.

*Note:* Students seeking teacher licensure may have different requirements than those listed above. Please refer to the education department section for details.
The Pursuit Curriculum

Liberal Arts Coordinator: A. Heikens

Mission: The relevant & responsive liberal arts curriculum is the heart of a Franklin College education. An education that nurtures personal and professional development. The program is designed to provide a breadth of experience in the liberal arts while preparing students to think critically; communicate effectively; apply knowledge and skills; solve problems; and reflect on events, actions, and behaviors in a rapidly changing world. The curriculum scaffolds foundational skills yet permits each student to design a learning experience that best suits individual needs, strengths, and interests.

Student Learning Outcomes of the Relevant and Responsive Liberal Arts Curriculum:

- The curriculum offers a developmental and experiential liberal arts program of study. As a result of engaging in this learning experience, students will:
  - Demonstrate discernment,
  - Apply learning, and
  - Express ideas clearly.

These overarching outcomes will be measured via five key student behaviors:

1. **Employ critical thinking**
   By developing the ability to think critically, students habitually explore many facets of an issue, idea, artifact, composition, piece, study, and/or event before accepting an opinion or formulating a conclusion.

2. **Communicate effectively**
   Effective communication ensures that students present information clearly resulting in enhanced knowledge or understanding.

3. **Evaluate issues and systems of personal and public concern**
   This evaluation allows students to engage with and reflect on policies, philosophies, issues, and systems, governmental and non-governmental, that guide society and empower students to act for the public good.

4. **Apply knowledge of global contexts**
   As students apply knowledge of global contexts, they demonstrate the ability to examine and explore multifaceted global challenges and their historical roots.

5. **Solve problems**
   Today’s ambiguous environment requires student to adapt to constantly changing problems and parameters. Problem solving requires students to explore alternatives, break complex components into understandable pieces, and implement tested strategies to answer complex questions.
Liberal Arts Core Curriculum

The full liberal arts core curriculum includes six core courses, seven exploratory courses and a foreign language requirement. Courses with an LA prefix may not be used to satisfy exploratory requirements and vice versa.

*Courses with Technology Integration. In the contemporary workforce, employers expect students to have experience with basic technologies. Awareness and appropriate use of technologies can aid in decision making and facilitate virtual teamwork. It is critical that students understand the benefits and drawbacks of using technology in various contexts.

The First-Year Seminar is a reading-intensive course that invites students to explore provocative topics, ask meaningful questions, and engage in academic discourse. This course helps lay the foundation of the undergraduate research experience by asking students to evaluate and effectively use information sources. Throughout the course, students will strengthen connections with the college and each other. This course is to be taken during the student's first semester on campus. Students may not transfer in credit for this course. (Sections will be designated for transfer students as needed. Students must pass the course with a D- or better to graduate. Students wishing or needing to retake the course must do so in the subsequent semester the course is offered.)

A systematic examination of the individuals, groups, ideas, institutions, and events that shaped world societies from 1750 to the present. The course will cover political, economic, social, religious, intellectual, and cultural developments with special emphasis on the connections between the historical evolution of the modern world and major contemporary issues. Incorporates research using electronic and print resources.

Note: placement based upon mathematics placement criteria

Students will be introduced to quantitative approaches and mathematical tools for understanding the world, thinking critically about quantitative and logical information, and making informed decisions about issues in everyday life. This course emphasizes connections with a variety of other disciplines. Incorporates use of spreadsheets. Course satisfies liberal arts core curriculum mathematics requirement. *Note: Students may be placed in ASC 082 concurrently with LA 103 based upon mathematics placement criteria.*

Prereq: C- or better in LA 101 and sophomore standing

A writing-intensive topics course in literature designed to help students understand literature, think metaphorically, and support literary interpretations through critical reading of texts. Each instructor will choose a specific theme and/or set of readings to accomplish this goal. (Specific course topics and descriptions are available online in Self-Service.) This course should be completed by the end of the sophomore year.
**Exploratory Courses**

As one component of a liberal arts education, exploratory courses are designed to broaden students’ curiosity and enthusiasm for a diverse set of disciplines; introduce students to alternative ways of understanding themselves, others, and the world; and give students tools to innovate, lead, and serve in ever-changing professions in a globally connected world.

Students are required to take at least one course from each of the following seven categories: civic learning, creative arts, diversity, human behavior, international, reasoning & values, and scientific thinking. Permitted substitutions are listed at the end of the exploratory course options. Students may take up to two courses with the same departmental prefix, including courses that fulfill major requirements. One course may satisfy up to two exploratory requirements if it is listed in both categories.

**Notes:**
- Throughout the catalog, odd and even years refer to the start of the academic year. Thus, 2019-20 is an odd academic year.
- Courses with prerequisites are in *italics*.
- To review course descriptions, see the respective major departments.

**Civic Learning (3-4 hours credit)**

Recognizing the historic and contemporary relationship between education and the maintenance of our democratic traditions, this category empowers each student to build a bridge from academic study to the role of an adult citizen. To thrive, our civil society requires engaged and educated individuals who will serve the public in a government role and/or engage with government toward the public good. Similarly, civically literate adults enjoy the ability to solve complex public and private problems, to assert their rights, and to effectively articulate informed opinions to public decision-makers. The experience equips students with the tools needed to understand and impact policy and governmental structures that guide our society and prepares students to use informed decision-making to evaluate governmental action/inaction. This experience will not indoctrinate students in the values of one party or political viewpoint. A designated course in the major may satisfy this requirement. **Transfer courses may not fulfill this exploratory requirement unless approved.**

Creative Arts (3-4 hours credit)
Students will explore the creative arts as a means of creativity that can transcend barriers of time, space, language, and culture. Students may fulfill this requirement with any theory or studio course in the following list.

**ART 116** History of Art I (Fall) 4 credit hours
**ART 117** History of Art II (Spring) 4 credit hours
**ART 130** Color and Design (Fall & Spring) 3 credit hours
**ART 140** Graphic Design I (Fall & Spring) 3 credit hours
**ART 160** Drawing I (Fall & Spring) 3 credit hours
**ART 170** Painting I (Fall & Spring, even years) 3 credit hours
**ART 175** Ceramics I (Every Fall and Spring, odd years) 3 credit hours
**ART 190** Digital Fine Art Photography I (Fall & Spring) 3 credit hours
**ART 230** Modern Art (Fall) 3 credit hours
**CWR 150** Introduction to Creative Writing (Fall and spring) 4 credit hours

(Concurrent or prior enrollment in LA 101 recommended but not required)

**MUS 110** Theory and Musicianship I (Fall) 3 credit hours
**MUS 119** Introduction to Music (Fall & Spring) 4 credit hours
**MUS 219** World Music (Fall) 4 credit hours
**MUS 331** Music History I (Fall) 4 credit hours
**MUS 330** Music History II (Spring, even years) 4 credit hours
**THE 110** Theatre Appreciation (Fall & Spring) 3 credit hours
**THE 125** Script Analysis and Theory (Fall) 3 credit hours
**THE 170** Theatre History (Spring, even years) 3 credit hours
**THE 190** Film Appreciation (Spring, odd years) 3 credit hours

As an alternative, students may fulfill this requirement by earning total of four credits in either of the two following music course combinations:

**MUS 170 & MUS 171** Class Guitar I and II (Fall and Spring) 2 credit hours
**MUS 180 & MUS 181** Class Piano I and II (Fall, Spring) 2 credit hours

As an alternative, students may fulfill this requirement by earning a total of four credits in one or more of the following music ensembles (courses can be repeated):

**MUS 121** Franklin College Singers (Fall & Spring) 1 credit hour
**MUS 122** Men’s Chorus (Fall & Spring) 1 credit hour
**MUS 123** Women’s Chorus (Fall & Spring) 1 credit hour
**MUS 124** Franklin College Band (Fall & Spring) 1 credit hour
**MUS 125** String Ensemble (Fall & Spring) 1 credit hour
**MUS 127** Percussion Ensemble (Spring) 1 credit hour

Diversity (3-4 hours credit)
Diversity courses at Franklin College address one or more forms of physical, cultural or social differences between groups of people and will engage students in the study of a topic or issue that allows for exploration of the challenges of creating a diverse society including: (1) comparison of multiple perspectives, (2) understanding of power relations that influence intergroup relations and (3) building skills for effective interaction across differences. The diversity requirement allows students to develop knowledge of intergroup dynamics and the competencies of empathy and effective communication that are necessary for success in an increasingly diverse environment. Students can fulfill this requirement with any course in the following list.
ART 230  Modern Art (Fall)  4 credit hours
ART 350  Eastern Thought in Western Art (Spring)  4 credit hours
**CAN/ENG 235**  Native North American Literature (Spring, even years)  4 credit hours
  Prerequisite: LA 101
EDU 315  Human Diversity in the Classroom (Fall & Spring)  3 credit hours
  Prerequisite: Admitted to El. Ed. or officially declared Ed. St. minor
ENG 234  African American Literature (Spring, odd years)  4 credit hours
  Prerequisite: LA 101
ENG 236  Gender and Sexuality in Literature (Fall, even years)  4 credit hours
  Prerequisite: LA 101
ENG 238  American Minority Literature (Fall, even years)  4 credit hours
  Prerequisite: LA 101
EXE 425  Exercise Prescription for Special Populations (Fall)  3 credit hours
  Prerequisites: ANAT 210/210L, ANAT 220/220L, EXE 234, EXE 372/372L & EXE 375
FRE 211  Intermediate French II (Spring)  4 credit hours
  Prerequisite: C- or better in FRE 210 or equivalent
GEO 220  Human World Geography (Fall & Spring)  3 credit hours
HIS 214  The South Atlantic World, 1400-1824 (Spring, even years)  4 credit hours
HIS 231  African American History (Fall, even years)  4 credit hours
HIS 340  Global Military History (Fall, even years)  4 credit hours
KIN 310  Diversity and Inclusion in Sport (fall and spring)  3 credit hours
LEA 330  Leadership in a Multicultural Context (Fall, odd years)  3 credit hours
POL 120  Introduction to International Relations (Spring)  4 credit hours
PSY 315  Psychology of Diversity (Fall, even and Spring, odd years)  4 credit hours
  Prerequisite: PSY 117
REL 225  Religion in America II: Contemporary Religious Experience (Fall, odd years)  4 credit hours
SOC 210  Criminal Justice (Fall)  4 credit hours
  Prerequisite or corequisite: SOC 118
SPA 211  Intermediate Reading, Writing, and Discussion  4 credit hours
  Prerequisite: C- or better in SPA 210 or equivalent
THE 125  Script Analysis and Theory (Fall)  3 credit hours

**Human Behavior (3-4 hours credit)**
Students explore the nature of human social behavior, learning to recognize recurring patterns in behavior and belief and the forces that shape them. Students may fulfill this requirement with any course in the following list.

ECO 115  Principles of Economics (Fall & Spring)  3 credit hours
GEO 220  Human World Geography (Fall & Spring)  3 credit hours
**HIS/WST 332**  History of Women in the United States (Fall, odd years)  4 credit hours
  Prerequisite: HIS 120, HIS 121, or consent of instructor
LEA 220  Leadership: Foundations, Theory and Practice (Spring)  3 credit hours
POL 110  American National Government (Fall, & Spring even years)  4 credit hours
POL 120  Introduction to International Relations (Spring)  4 credit hours
POL 130  Introduction to Comparative Politics (Fall)  4 credit hours
PSY 117  General Psychology (Fall & Spring)  4 credit hours
SOC 118  Introduction to Sociology (Fall & Spring)  4 credit hours
WST 101  Introduction to Women’s Studies (Spring, even years)  4 credit hours
**International** (3-4 hours credit)

International courses and learning experiences provide students the opportunity to study the larger world and increase their appreciation of non-US cultures. Courses may be global in scope or may focus on a particular nation or region outside the US and will foster an understanding of complex international/global issues and the role that culture plays in these issues. Students may fulfill this requirement through an international study away experience, a foreign language course at the 200-level or higher or by completing a course from a list of approved international courses.

*Note: A second course in this category may not be used to satisfy the diversity requirement unless the course also appears on the diversity course list.*

**Reasoning and Values** (3-4 hours credit)

Through the study of philosophy and religion, students explore their values and beliefs in relation to those of others. Students may fulfill this requirement with any course in the following list.
BIO 225  Bioethics (Spring)  3 credit hours

Prerequisite: BIO 114 or BIO 134

PHL 116  Introduction to Philosophy (Fall & Spring)  4 credit hours

PHL 120  Knowledge and Reality (Spring, odd academic years)  4 credit hours

PHL 210  Logic (Fall)  4 credit hours

PHL 220  Principles of Ethics (Spring)  4 credit hours

PHL 230  Philosophy of Language (Fall, even years)  4 credit hours

PHL 314  History of Philosophy (Spring, odd years)  4 credit hours

Prerequisite: One additional PHL course

REL 114  Introduction to Religion (Fall & Spring)  4 credit hours

REL 210  Religion and the Environment (Fall & Spring)  3 credit hours

REL 215  Religion in America I: History of Religion in America (Fall, even)  4 credit hours

REL 220  Old Testament Life and Literature (Fall)  3 credit hours

REL 225  Religion in America II: Contemporary Religious Experience (Fall, odd)  4 credit hours

REL 230  New Testament Life and Literature (Spring)  3 credit hours

REL 240  Giving in Religion (Fall, even years)  3 credit hours

REL/PHL 250  Living Religions East (Spring, even years)  4 credit hours

REL 260  Living Religions West (Spring, odd years)  4 credit hours

Scientific Thinking (4-5 hours credit)
Through theoretical study and laboratory work, students have the opportunity to explore the scientific method as one of the primary ways of explaining the natural world. Students will cultivate the ability to use scientific methodology to clarify problems in their daily lives and develop a better understanding of the role of science in a global world. Students may fulfill this requirement with any course in the following list.

ANAT 220 & 220L  Applied Human Physiology (Spring)  4 credit hours

Prerequisite: ANAT 210 & 210L

AST 110  Astronomy (Fall, odd years)  4 credit hours

BIO 114  General Biology (Fall & Spring)  4 credit hours

BIO 134  Principles of Biology (Fall)  4 credit hours

CHE 112  Introductory Chemistry (Fall or Spring)  4 credit hours

CHE 121 & 123  General Chemistry I & Lab (Fall)  5 credit hours

ESC 118  Earth Science (Fall & Spring)  4 credit hours

PHY 201 & 203  General Physics I – Algebra & Lab (Fall)  5 credit hours

PHY 211 & 203  General Physics I – Calculus & Lab (Fall)  5 credit hours

Prerequisite: MAT 135

Exceptions and Substitutions for LA Core and Exploratory Requirements
- LA 103 may be satisfied by CMP 130, MAT 135, MAT 181, or MAT/SOC 224

Immersive Term

Degree Expectations
Students entering Franklin College as first-year students are required to complete a minimum of two immersive experiences during the three-week immersive term (at least 6 credit hours total) to meet graduation requirements. One of these two experiences must be an on-campus, immersive course during the student’s first year at Franklin College. The second must be an off-campus immersive experience, such as an internship (which may be a new experience, a continuation of a fall experience, or in conjunction with a spring internship), field experience, practicum, study away experience, undergraduate research opportunity, community-based project, or other
approved off-campus, credit-bearing experience or independent study. Students cannot take a second on-campus immersive course to satisfy their second immersive term requirement. Students wishing to study abroad during their first year on campus may do so if they are accepted into the course. This study away experience will satisfy the on-campus immersive requirement. Students may do two study away experiences to satisfy both immersive-term immersive experiences. Transfer students entering Franklin College as sophomores (fewer than 58 hours) must satisfactorily complete six hours of immersive term experiences. Entering juniors (58-90 hours) must complete three hours of immersive term experiences at Franklin College. A student entering with 91 hours or more has no immersive term requirement and needs to fulfill only 120 total hours for graduation. Note: A transfer student may petition the registrar for reconsideration of immersive term requirements if the requirements will impede normal progression toward graduation.

The same grading system shall be used in immersive term as in the regular semester, except that internships will be graded on a pass-fail basis. Students who fail an immersive term experience and who do not have time to complete all the required immersive term credits before scheduled graduation must either:

1. wait one year and take a course in the next immersive term, or,
2. obtain approval from the Registrar for a substitution course which will not count as part of the normal 120 semester hours for graduation or for any other regular requirements.

Because of the special short-term nature of immersive term, a student withdrawing from an immersive term course after the fourth class day of the term will receive a grade of F.

In order to be consistent with the academic purpose of the college and with normal practice during the fall and spring semesters, all students residing in the residence halls during the immersive term must be registered officially in an approved immersive term course, independent study, internship experience, or prescheduled institutional activity which requires on-campus residence. Withdrawal from an immersive term course requires leaving the residence halls within 48 hours.

No additional tuition and room fees are charged to students who are enrolled full-time in the fall. If students are enrolled full time for the spring semester and wish to begin coursework during immersive term, they should refer to the section “Expenses and Financial Policies” for tuition, room, and board costs. Part-time tuition fees are charged to students who are not enrolled in either the fall or spring semester full-time. Immersive term board is charged to all students living on campus during the immersive term. Some individual courses may require additional course fees. No refunds for or reductions in tuition and room are allowed for those students not enrolled in immersive term or who reside off-campus during immersive term.

Courses and Experiences

Held during the month of January, immersive term offers an opportunity for three weeks of intense, uninterrupted participation in one topic of the student’s choice. Since full time is devoted to a single project, it can be explored in greater depth than is possible during the fall or spring semesters. Courses offered during the immersive term are different from the fall and spring courses offered.

Immersive term courses are defined as on-campus courses, travel courses, on-campus independent study, off-campus independent study, internships, and cooperative programs offered by other institutions. All immersive term courses carry three hours of credit, and internships carry four hours of credit.

On-campus courses are problem- or question-based and address some aspect of a contemporary issue, topic, or event. For a minimum of 2/3 of the course time, immersive courses either (1) engage students with community partners or Professional Practitioners on campus or off campus, (2) engage students in an off-campus setting or settings (e.g. museums, sporting events, concerts, speakers, parks, schools, government offices, non-profits, missions), or (3) a combination of the two. Faculty schedule immersive course components to best meet student
needs and course goals. All courses include a personal and societal reflection component. Immersive courses taught during the immersive term do not require prerequisites and are not departmental or liberal arts courses. The one exception is study abroad, which may qualify for international exploratory status.

**Travel courses** involve Franklin College faculty taking groups of students on study tours of particular foreign countries or other regions and cities of the United States. These courses have a thematic focus. Students can satisfy the international exploratory requirement with a foreign travel course over immersive term. Additional fees are charged for travel courses.

**Independent study** shall take the form of reading or research activity in a specific area by a student under the guidance of a faculty advisor. At least two weeks prior to registration, the student and the faculty advisor shall submit to the department chair and the Registrar a description of the project. Independent study may be pursued on or off campus. Off-campus independent study is open only to juniors and seniors, while sophomores, juniors, and seniors may participate in an on-campus independent study.

Some students may be interested in enrolling in immersive term courses on other campuses, including foreign study courses. Arrangements should be made early in the fall, and the student must have approval of the Associate Registrar.

**Scaffolded Undergraduate Research**

Through mentored experiences within the liberal arts and major-specific curricular offerings, students will incrementally develop skills that will facilitate the exploration and execution of a meaningful intellectual project or creative product. This experience empowers students to innovate and explore their interests. Within the LA Curriculum, components of the undergraduate research experience are integrated into First-Year Seminar, Reading and Writing Critically, Public Speaking, and the student’s math course. Students may work on individual or group research projects as designated by the departmental structure. Within the major, undergraduate research elements and associated technologies are integrated into a minimum of three courses across the span of no less than two years. The goal is to create a truly scaffolded student experience.

**Research, Scholarship, or Creative (RSC) Work Outcomes**

- Students will demonstrate the ability to organize a professional-grade project proposal.
- Students, with the guidance of a faculty/staff mentor, will demonstrate the ability to employ standards of RSC consistent with the standards of the project’s discipline(s) as defined by the faculty.
- Students will demonstrate understanding and practice of research ethics within a disciplinary framework.
- Students will demonstrate the ability to articulate what they have learned from the RSC experience in a public forum in a way that
  - reflects critical thought,
  - clearly outlines the research, scholarship, or creative work accomplished,
  - summarizes any major findings and their relationship to the student’s expectations, and
  - explains how the project will impact the student’s future work.

**Note:** The above demonstration does not need to be an off-campus experience.
Integrated Professional Development

At Franklin College, professional development is not an “add on” to the academic experience. Professional knowledge and skills are intentionally integrated throughout the liberal arts curriculum and all academic disciplines, allowing students to transfer learning to professional, civic, and other academic environments. Faculty collaborate with internal and external partners to ensure students are prepared for the next opportunity. One key collaborator in the Integrated Professional Development student experience is the Practitioner Partner. All academic departments will provide students, at some point during their four years at Franklin, the opportunity to engage with a qualified Practitioner Partner. A qualified Practitioner Partner working or having recently worked in the field brings this experience into the classroom to enrich the learning environment.

These opportunities and experiences, in addition to the services, programs, courses, and activities offered by the director of professional development and employer relations, the director of career development, and the office of alumni engagement throughout students’ four years at Franklin, are designed to help students make a confident and successful transition from college to the professional workplace or to graduate/professional school.

The Franklin College Integrated Professional Development program provides opportunities for students to be successful in the professional workplace or graduate/professional school. While Career Development helps students find a job by teaching resume writing and interviewing, Professional Development teaches skills and competencies critical for success for students participating in an internship or for graduates beginning a job, such as decision-making, networking, professional behavior and etiquette, communications, and teamwork. Professional Development activities increase students’ awareness of: (1) workplace issues, such as office politics, diversity, employee rights and responsibilities, compensation and benefits, and business etiquette; and (2) personal adjustment and practical issues encountered in the transition to internships and post college life, such as balancing work and personal schedules, managing personal finances (budgets, banking, credit, insurance, investing, buying versus leasing, etc.), relocating, social graces, and managing stress.

The overarching theme of Professional Development is the continuous improvement of self, organization, and society. We strive to develop each student’s mental, physical, moral, social, and financial competence to a level that allows immediate success in the workplace or graduate school, as well as long term success in life.

In addition to the Integrated Professional Development program, students have myriad opportunities to develop self-awareness and professional skills through exploration of and participation in experiences facilitated by Career Development, Global Education, Leadership Studies, The Hive, and Undergraduate Research, all of which, combined, make up the Engaged Learning Department and are housed in the Ruth Lilly Center for Exploration. Specific professional development opportunities include the following:

**Professional Competencies**
At Franklin College, we believe that the many liberal arts skills that we teach and model are key skills which the workplace requires. In the classroom, as well as in co-curricular activities, we teach and assess competencies related to personal qualities, interpersonal abilities, communication skills, and cognitive abilities. Through an emphasis on professional development, we strive to enable students to translate and transfer these competencies to other settings, including the workplace.

**Awareness of Real World Issues**
In order to feel confident in making the transition from college to the “real world,” students need an awareness of a variety of issues that they will face. Through workshops, presentations in classes, guest speakers, and resources, Professional Development keeps real world issues in front of students.
Workplace Issues
Professional Development stays abreast of current, major issues in the workplace so that students can be informed and prepared to respond to these issues as they interview for jobs and enter the workplace. Issues may range from diversity to organizational culture to professional networking.

Transition Issues
As students leave a fairly structured college environment to face living on their own, maybe for the first time, an awareness of lifestyle issues is critical to making a successful adjustment. Transition issues include anything from managing money, relocating, and insurance to burn out and time and stress management.

Business Etiquette and Protocol
Many businesses regard a polite, professional manner as a key component of quality. Today’s changing business environments necessitate an updating of students’ awareness of etiquette so that they can respond confidently in their interactions with new colleagues and customers. Additionally, students must consider their online presence and the increasing importance of how social media may affect their ‘professional brand’ and personal reputation.

As part of the integrated professional development program at Franklin College, all students will

1. Complete the liberal arts curriculum focused on critical thinking, global awareness, effective communication, problem solving, and systems knowledge. These skills are needed in complex, ambiguous, ever-changing professional environments.

2. Acquire professional skills (All are required for students to access alumni networks and official college recruiting activities.):
   a) construct an approved, by the student’s academic department or a designee, professional resume (may undergo various iterations throughout a students’ Franklin experience);
   b) participate in at least one official mock interview;
   c) establish a professional online profile (as defined by the academic department); and
   d) use available technology appropriately.

3. Participate in professional experiences:
   a. at least one off-campus, credit-bearing (1) internship, (2) field experience, or (3) undergraduate research experience approved by the academic advisor and
   b. a networking opportunity as defined by the academic department in consultation with the Office of Career and Professional Development (e.g. departmental alumni/professional panels, speakers, or dinners; alumni engagement networking events; internship-related networking opportunities).

4. Articulate, in a culminating, reflective experience, the relevance of liberal arts, disciplinary, and applied experiences at Franklin College.

Additional Opportunities:

Workshops
Career Development and Professional Development offer several workshops open to all students each semester as well as provide workshops for various student activities and groups. Topics include Job Interviewing, Networking, Goal Setting, Learning from Feedback, Presenting Ideas Effectively, Business Etiquette, and Systems Thinking, among others.
Internships
Internships provide excellent opportunities for students to gain direct knowledge about a career, to apply knowledge from classroom experiences, and to gain valuable, practical work experience in that field. The Career Development office coordinates the fall semester, immersive term, spring semester and summer term internship programs, except for education and exercise science majors’ internships. For details, see the Career Development section under Student Life in this catalog.

Fine Arts Activities
Professional Development, through its financial support of the Fine Arts series, provides opportunities for Franklin College students to develop an appreciation of the arts by experiencing various artistic works first-hand. Attending and/or participating in fine arts events enables students to articulate a personal response to the arts and to value the contributions which various styles of art, music and theatre have made to society.

<tr>
<td></td>
<td>This course is designed for sophomores and juniors preparing for an internship experience. Among the subjects covered will be self-assessment of career objectives and internship goals; exploration of resources and techniques for finding, researching and evaluating potential internships; resume writing; interview techniques; reflection as a strategy to maximize learning in an internship; professional communication and correspondence; building a personal and professional network; and techniques for learning during and after the internship experience. This course WILL NOT provide students with a ready-made internship but will provide the opportunity to develop the skills and competencies that will facilitate a successful internship experience. Due to the experiential design of the course, out-of-class experiences are required and will include at least one mock interview, a resume writing workshop, an Internship Fair experience, a networking event or etiquette dinner, and possibly other out-of-class speakers/workshops. Course fee: $25.</td>

<td></td>
<td>Prereq: CMP 130, CMP 141, PDP 200 &amp; either BUS 371 or MAT/PSY/SOC 224, plus junior level standing</td>
</tr>
</tbody>
</table>

A course designed to provide students with experience in working with big data in a setting featuring many of the characteristics of a professional workplace. The course includes preparatory classroom instruction in data collection, storage, visualization, and model fitting with cross-validation. Students will work in teams, each under the coaching of an alumni professional who will provide the data for the project, serve as an advisor during the project, lead discussions regarding the demands of the professional workplace, and provide individual feedback on the degree to which each student displays professional skills and dispositions. Most of the project work will be conducted in an online environment to provide students with a taste of the conditions experienced by telecommuting professionals.
Academic Success and Opportunity Courses

Success in college and success after college depend upon a series of intangible skills and values, e.g., time and stress management, individual responsibility, leadership, ability to work in diverse problem-solving teams, love of learning, etc. These skills and values are cultivated in many parts of the Franklin College curriculum and in all of our academic departments. In addition, they are directly targeted for development in a series of classes.

This course exposes students to essential steps in designing a career plan. This course is divided into three broad sections. First is self-assessment so that students gain an understanding of how their skills, interests, work values, and personalities lead to career interests. Second, based on self-assessment, the student will identify career options and learn vocational research techniques. Third, students will learn the basics of internship and career search skills such as résumé and cover letter writing, networking and interviewing. This course will emphasize preparation for gaining work experience via internships, cooperative study, and seasonal employment. First-year student and sophomore enrollment preferred. Graded on a pass/fail basis.
Accounting

Department: Economics, Business, and Accounting
Department Chair: S. Scheer
Department Members: C. Everts, C. Fleming, E. Jones, S. Scheer, J. Squires

Major: Accounting
Minor: Accounting

The department provides theoretical and practical education in these programs: economics, business, and accounting. Majors and minors are offered in each of these programs.

The accounting curriculum is designed to prepare majors with a strong technical, analytical, and personal understanding of how the financial, managerial, tax, and auditing concepts of accounting are used to process financial information and to communicate this information clearly, logically, and persuasively. The program courses require textbook readings, problem assignments, cases, and classroom presentations that develop this understanding. Although one internship is required, two internships are recommended. Students completing the major will be prepared for professional accounting employment and, with sufficient credits, to take the Certified Public Accounting examination.

Accelerated Track Information and Requirements
A full semester internship is possible in the spring of the junior year only if the accounting curriculum is started in the first year and the student is willing to take extra coursework prior to and after the full semester internship. A 3.0 cumulative GPA is required at the end of the first year to continue on the accelerated track. In addition, a 3.3 average GPA in ACC 221 and ACC 222 is required to continue on the accelerated track. Students on this challenging track may need to take a few courses out-of-sequence which may require instructor permission to register.

A major or minor in accounting requires the student to have a minimum graduation GPA of 2.00 (A=4.00) in all required major/minor courses and to complete with grades of C- or better all coursework for the major, minor, and related field. Furthermore, regardless of major, all students taking accounting courses must complete all prerequisites with a C- or better.

Students who excel in the program have the opportunity to join Delta Mu Delta, the national business honor society. Juniors and seniors who have earned an overall 3.3 GPA at the time of invitation are eligible to join. Additionally, many scholarships are available to students who excel in the program.
**Accounting Major**

A major in accounting requires the student to have a minimum graduation GPA of 2.00 (A=4.00) in required major courses. Accounting majors must complete all courses in the major with a ‘C-‘ or better. All students majoring in accounting must be at the sophomore class level in order to enroll in any 300-level accounting major courses.

**Core Requirements**

- ACC 221 Principles of Accounting I
- ACC 222 Principles of Accounting II
- ACC 235 Data Management and Analysis
- ACC 311 Intermediate Accounting I
- ACC 312 Intermediate Accounting II
- ACC 321 Managerial-Cost Accounting
- ACC 341 Introduction to Taxation
- ACC 342 Advanced Taxation
- ACC 420 Auditing
- ACC 431 Advanced Accounting
- ACC 475 Strategic Implementation Project
- ACC 499 Senior Competency Practicum
- ECO 115 Principles of Economics
- ECO 221 Intermediate Microeconomics
- ECO 223 Intermediate Macroeconomics
- MAT 131 Introduction to Quantitative Analysis

**Related field requirements**

- BUS 341 Business Law I
- BUS 351 Business Finance
- CMP 130 Introduction to Computing
- MAT 224 Basic Applied Statistics

**Two of the following courses**

- BUS 352 Investments
- BUS 361 Contemporary Marketing

A study of accounting procedures for partnerships, trusts, estates, mergers, and consolidations. Also includes government and nonprofit institution accounting. Stress is on consolidation of financial statements for corporations. *To be taken during year of graduation.*

### ACC 475 Strategic Implementation Project
**3 credit hours**

<table>
<thead>
<tr>
<th>Fall</th>
<th>Prereq: ACC majors with senior standing having completed all other accounting core requirements with a grade of “C-“ or better. Non-EBA majors must have senior standing and consent of instructor. Non-EBA majors who wish to have ACC 475 substitute for their major or departmental capstone course must have senior standing, consent of instructor, and consent of department chair in their major field.</th>
</tr>
</thead>
</table>

This course is the senior capstone for accounting majors. Students will work in teams to solve complex business problems in a simulated boardroom setting as they address and solve a real-life business challenge that has been presented to them by Franklin College Alumni or others who have current and relevant projects to complete. Students are expected to synthesize material in all business, economics, and accounting courses in preparing solutions to these problems, and to present their solutions with a formal oral and written report directly to the business owners/managers who tasked them with the project. Teams will be expected to defend their solutions/suggestions, and prepare any follow-up work requested by the business owners/managers. Some time will be spent on resume development and job search/interview strategies. Depending upon project and project sponsor’s wishes, this course may be followed in the subsequent spring semester by an optional SNT 489 (Senior Internship Project, 1-3 credit hours, Spring) serving as a Strategic Implementation Project Follow-Up Internship.

### ACC 482 Accounting Practicum
**1-2 credit hours**

<table>
<thead>
<tr>
<th>Fall and Spring</th>
<th>Prereq: Senior class standing</th>
</tr>
</thead>
</table>

A supervised, pre-approved experience which allows a student to pursue specific learning goals and/or be involved in a field experience during the regular academic semester.

### ACC 490 Independent Study
**1-2 credit hours**

<table>
<thead>
<tr>
<th></th>
<th>Prereq: Departmental consent</th>
</tr>
</thead>
</table>

Course is designed to encourage student initiative and to provide a degree of flexibility in the departmental program. Normally the subject is not sufficiently or appropriately covered in regular departmental course offerings.
<table>

Satisfactory performance on simulated CPA Exam. Passing grade ‘C-’ or better.
American Studies Program

Department: History
Department Chair: M. Clark-Wiltz
Teaching Faculty: M. Clark-Wiltz, C. Crane, A. Fetter-Harrott, J. Jimerson, R. Smith

Minor: American Studies

American Studies rests upon the important assumptions that a culture should be investigated in its entirety and that a breadth of study leads to a depth of understanding. In keeping with these assumptions, American Studies at Franklin College is an interdisciplinary program. From a broad variety of disciplinary perspectives, the American Studies student will seek to understand the social, cultural, and intellectual forces which shape American culture.

The goals of the American studies program are:
• To give the student a better understanding of social forces that have influenced American culture;
• To present in a logical, meaningful pattern those writings of importance that have shaped Americans and the America of today;
• To foster and to cultivate the awareness of the rich heritage that is uniquely American;
• To stimulate a lively interest in and a sympathetic understanding of the development of the differing philosophies which have produced a variety of American thought;
American Studies Minor
All courses and prerequisites for courses taken to satisfy the American Studies minor must be completed with a grade of ‘C’ or better. Student must have a minimum graduation GPA of 2.00 (A=4.00) in required minor courses. Students are strongly encouraged to take diversity and international exploratories that consider the place of the United States in an increasingly globalized world.

Required Courses
   HIS 121 U.S. History Since 1877
   HIS 325 History of American Thought
   POL 110 American National Government

Two of the following courses – must have different prefixes
   ENG 234 African American Literature
   ENG 235 Native North American Literature
   ENG 238 American Minority Literature
   ENG 355 Early American Literature
   ENG 359 Realist and Modernist American Literature
   ENG 360 Contemporary American Literature
   HIS 231 African American History
   HIS 250 Indiana History
   HIS/WST 332 History of Women in US
   POL 225 State and Local Government
   POL 234 American Political Participation
   POL 410 American Constitutional Law I
   POL 420 American Constitutional Law II
   SOC/NPL 222 Social Problems & Nonprofit Responses

Individualized Majors in American Studies
In addition to the three required courses for the American Studies minor, students would need to include in the major a capstone academic experience, an internship, and additional courses approved by the director of the program so that the number of hours would total at least 33.

Complete course descriptions for each of these offerings may be found elsewhere in this catalog under the appropriate major headings.
Art

Department: Art
Department Chair: S. Rakić
Art Faculty: D. Cunningham, S. Rakić,

Majors: Art History, Art Studio (Tracks: Ceramics, Digital Fine Art Photography, Graphic Design, & Painting)
Minors: Art History, Art Studio

The art department at Franklin College provides theoretical and practical education in a variety of options for completing an art major or minor program.

The art program is designed to develop students’ broad appreciation of art and their ability to create art through curricular offerings of art history and art studio experiences. Both art major and art minor programs allow two possible tracks: one primarily focusing on the study of art history and the other on developing studio skills. The goal of both options is to develop students’ understanding of the major periods/styles in visual arts and to encourage students to explore their own creativity in drawing, painting, sculpting, and designing. The art history program offers a study of visual concepts and the major art movements within the historical period which produced them and gives students an understanding and appreciation of artistic endeavor and experience. The art studio major is designed to develop students’ skills for creating art/design while developing an appreciation of art/design and an understanding of art history.

Major Requirements
A major in art requires the student to have a minimum graduation GPA of 2.00 (A=4.00) in required major courses. All courses for majors must be completed with a grade of C- or better. A grade or C- or better is required for all prerequisite courses regardless of academic major.

**Related Field Requirements**
- **Music** – 3 hours minimum of courses with a MUS prefix
- **Theatre** – one 3 credit hour course with a THE prefix
- **Additional courses** approved by the art faculty for a total of 12 credit hours in the related field
Art Studio: Painting

Core Requirements
ART 116 History of Art I: Ancient and Medieval Art
ART 117 History of Art II: Renaissance to Modern Art
ART 130 Color and Design
ART 140 Graphic Design I
ART 160 Drawing I
ART 170 Painting I
ART 175 Ceramics I
ART 499 Senior Comprehensive Exam

Professional Development Requirements
ART 498 (Art Studio) Senior Portfolio Review
PDP 210 Professional Practices in Fine Arts
SNR/SNT 489 (Art Studio) Senior Experience

Track Requirements
ART 270 Painting II
ART 370 Painting III
ART 470 Painting IV

One of the following courses
ART 190 Digital Fine Art Photography I
ART 240 Graphic Design II
ART 260 Drawing II
ART 275 Ceramics II
ART 300 Topics in Art
WIN XXX IT Course/Art Studio

One of the following courses
ART 230 Modern Art
ART 235 Issues in Contemporary Art
ART 340 Selected Issues in Art
ART 350 Eastern Thought in Western Art
WIN XXX IT Course/Art History

Related Field Requirements
Music – 3 hours minimum of courses with a MUS prefix
Theatre – one 3 credit hour course with a THE prefix
Additional courses approved by the art faculty for a total of 12 credit hours in the related field
**Art History Minor**

A minor in art requires the student to have a minimum graduation GPA of 2.00 (A=4.00) in required courses. All courses and prerequisites must be completed with a grade of C- or better. A grade or C- or better is required for all prerequisite courses regardless of academic major.

**Required courses**

- ART 116 History of Art I: Ancient and Medieval Art
- ART 117 History of Art II: Renaissance to Modern Art
- ART 230 Modern Art
- ART 235 Issues in Contemporary Art
- ART 350 Eastern Thought in Western Art

**One of the following courses**

- ART 130 Color and Design
- ART 340 Selected Issues in Art
- WIN XXX IT Course/Art History

**One of the following courses**

- Music – 3 hours minimum of courses with a MUS prefix
- Theatre – one 3 credit hour course with a THE prefix

**Art Studio Minor**

A minor in art requires the student to have a minimum graduation GPA of 2.00 (A=4.00) in required courses. All courses and prerequisites must be completed with a grade of C- or better. A grade or C- or better is required for all prerequisite courses regardless of academic major.

**Required courses**

- ART 116 History of Art I: Ancient and Medieval Art
- ART 117 History of Art II: Renaissance to Modern Art
- ART 130 Color and Design
- ART 160 Drawing I

**Three of the following courses**

- ART 140 Graphic Design I
- ART 170 Painting I
- ART 175 Ceramics I
- ART 190 Digital Fine Art Photography I
- ART 240 Graphic Design II
- ART 260 Drawing II
- ART 270 Painting II
- ART 275 Ceramics II
- ART 290 Digital Fine Art Photo. II
- ART 370 Painting III
- ART 375 Ceramics III
- ART 390 Digital Fine Art Photo. III
- MMJ/PRL 180 Publication Design
**Art Course Descriptions**

<th>Credits</th>
<th>Term(s)</th>
<th>Delivery Method</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ART 116</td>
<td>History of Art I: Ancient and Medieval Art</td>
<td>4</td>
<td>Fall</td>
<td>Creative Arts exploratory</td>
<td>A history of painting, sculpture, and architecture of the Ancient World and the Middle Ages - from Egyptian to Gothic art.</td>
</tr>
<tr>
<td>ART 117</td>
<td>History of Art II: Renaissance to Modern Art</td>
<td>4</td>
<td>Spring</td>
<td>Creative Arts exploratory</td>
<td>A history of painting, sculpture, architecture and photography in Europe and America from the 15th century to the present.</td>
</tr>
<tr>
<td>ART 130</td>
<td>Color and Design</td>
<td>3</td>
<td>Fall and Spring</td>
<td>Creative Arts exploratory</td>
<td>In this class you will learn the visual principles behind the creation of historic and contemporary masterpieces through lecture and hands on work with collage materials. Figure-ground relationships, afterimage, optical mixture, and transparency illusions, and color theory are a few of the color concepts to be studied. Using simple cut and paste collage materials, we will explore a variety of historic and contemporary composition and design methodologies. Studio format with lectures, demonstrations, group critiques, and individualized instruction. Additional materials required.</td>
</tr>
<tr>
<td>ART 140</td>
<td>Graphic Design I</td>
<td>3</td>
<td>Fall and Spring</td>
<td>Creative Arts exploratory</td>
<td>This course combines studio work with classroom instruction. Fundamental components of design theory and typography are incorporated with problem definition to provide students with valuable experience in the ideation, research, execution and presentation of projects. Lectures and visual media provide a broad introduction to the visual communication professional field.</td>
</tr>
<tr>
<td>ART 160</td>
<td>Drawing I</td>
<td>3</td>
<td>Fall and Spring</td>
<td>Creative Arts exploratory</td>
<td>An introduction to drawing techniques and media. Emphasis on perceptual issues (use of line through contour drawing; perception of positive and negative spaces; perception of lights and shadows.) Studio classes supplemented with lectures, demonstrations, group critiques, and individualized instruction. Subject matter includes still life, interior, landscape and portraits as well as copying the drawings of old masters. Additional fee for required materials.</td>
</tr>
<tr>
<td>ART 170</td>
<td>Painting I</td>
<td>3</td>
<td>Every Fall, and Spring even academic years</td>
<td>Creative Arts exploratory</td>
<td>An introduction to painting techniques, materials, and history. Studio format with lectures, demonstrations, group critiques, and individualized instruction. Fee: $100 nonrefundable for cost of all materials.</td>
</tr>
</tbody>
</table>
### ART 175 Ceramics I

<table>
<thead>
<tr>
<th>Creative Arts exploratory</th>
<th>3 credit hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Every Fall, and Spring odd academic years</td>
<td></td>
</tr>
</tbody>
</table>

This class is an exploration of functional and sculptural ceramic forms using traditional and contemporary hand-building techniques. This class assumes that the student has no previous knowledge of clay, glazes, or firing and thus requires students to learn a broad range of skills to be able to translate their ideas successfully into the clay medium. Studio format with lectures, demonstrations, group critiques, and individualized instruction. Fee: $75 nonrefundable.

### ART 190 Digital Fine Art Photography I

<table>
<thead>
<tr>
<th>Creative Arts exploratory</th>
<th>3 credit hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall and Spring</td>
<td></td>
</tr>
</tbody>
</table>

This course provides the technical skills and ideological understanding necessary for the creation and appreciation of digital fine art photography. The semester is designed to build, cumulatively, from the absolute basics of camera controls, composition and light, to more advanced topics of the relationship between artist, audience and artwork. Studio format with lectures, demonstrations, group critiques, and individualized instruction. Digital camera is required. Fee: $10 nonrefundable.

### ART 230 Modern Art

<table>
<thead>
<tr>
<th>Diversity &amp; Creative Arts exploratory</th>
<th>4 credit hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall</td>
<td></td>
</tr>
</tbody>
</table>

A history of painting, sculpture, architecture, and photography of the 20th century.

### ART 235 Issues in Contemporary Art

<table>
<thead>
<tr>
<th>3 credit hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Spring, odd academic years</td>
</tr>
</tbody>
</table>

This class will look at current trends in contemporary art such as the influence of museums and galleries, who determines what is art and what is the criteria, censorship, and postmodern philosophy. Class format includes lectures, group discussion, and trips to museums and galleries.

### ART 240 Graphic Design II

<table>
<thead>
<tr>
<th>3 credit hours</th>
</tr>
</thead>
</table>
| Fall | Prereq: ART 140  

Through lectures, demonstrations, and studio work, students are introduced to all aspects of typography, from its historical precedents to its current use. Creative thinking is encouraged, along with prescribed techniques and media. Students will gain a thorough understanding of the nature of vector and raster-based digital file development, as well as an in-depth study of the applications used to create them. Projects and assignments will focus on an exploration and understanding of the applications, applying color, tools, techniques, and printing options.

### ART 260 Drawing II

<table>
<thead>
<tr>
<th>3 credit hours</th>
</tr>
</thead>
</table>
| Fall and spring | Prereq: ART 160 or consent of the instructor  

A continuation of ART 160, with added emphasis on the use of value and the logic of light in drawing. Students are expected to bring together all of the basic component skills of drawing: perception of edges, spaces and shapes, relationships of angles and proportions, lights and shadows, and the skills of crosshatching and continuous tone. Studio format with lectures, demonstrations, group critiques, and individualized instruction. Subject matter includes still life, interior, landscape, and human figure. Additional materials required.

</tbody>
</table>
ART 498 (ART STUDIO) Senior Portfolio Review  
No credit
Fall and spring
This senior year experience is fulfilled by putting up a personal art show of best works done in the major track field. Pass/Fail.

ART 499 (ART HISTORY or ART STUDIO) Senior Comprehensive Exam  
No credit
Fall and spring  
Co-req: SNR/SNT 489
Students will take a written or oral exam which covers information from core requirements for the major. Letter graded.

PDP 210 Professional Practices in Fine Arts  
2 credit hours
Spring
This course is designed to prepare students to manage their career as they approach graduation (i.e. designers, artists, musicians, theatre artists, and journalists). Students will learn how to effectively promote their skills, price their work, and define their goals to create a plan for success. Emphasis is placed on developing a job search strategy, how to make connections in the industry, how to negotiate salary, how to prepare for an interview, and how to use the student portfolio in an interview. Topics covered will include: how to develop and maintain a resume/curriculum vitae, cover letter, professional photographs of work, artist bio and statement, how to build a professional quality portfolio for presentation to a potential employer or client (various media), grant applications, and writing.

SNR/SNT 489 (ART HISTORY) Senior Experience  
2-5 credit hours
Fall and Spring  
Co-req: ART 499
*May replace ONE of the electives if 5 credit hours are completed.
This senior or junior year experience is fulfilled by completing a significant project in the field of art history. An internship with an arts organization may also be used. The student must complete at least 70 hours of documented time in practical application and/or research to earn one credit and will meet on a regular basis with the practicum advisor. Pass/Fail.

SNR/SNT 489 (ART STUDIO) Senior Experience  
1-5 credit hours
Fall and Spring  
Co-req: ART 499
This senior or junior year experience is fulfilled by completing a significant project in the field of studio art. An internship with an arts organization may also be used. The student must complete at least 70 hours of documented time in practical application and/or research to earn one credit and will meet on regular basis with the practicum advisor. Students must earn at least a grade of C.
The biology program at Franklin College is designed to provide students with knowledge of the content of the various disciplines of biology. The program will provide experiences that help students better understand the nature of science and the role of scientists in society. To fulfill this mission, the program provides courses that stress the important areas of cellular, organismal, systemic and environmental biology. Through laboratory, lecture, and discussion, science is presented not simply as a collection of facts but also as a process by which concepts may be generated. Upon completion of the major, students will have a well-rounded knowledge of biology as well as an understanding of the way to use scientific methodology to solve problems.
Biology Major
Completion of the Biology major will require students to complete one of the three following tracks or a Cooperative 3+ Program in Biology. Only one program or track will be recorded on the student’s transcript. Two tracks share a common core (Standard and Ecology/Conservation), and each track has additional biology, chemistry, and related field requirements, plus a Professional Development Program/Senior Year Experience. Cooperative 3+ Programs in Biology have a common core (different from the core for biology tracks) and additional specific requirements for each cooperative program. All biology courses must be completed with a grade of C- or better.

Core Requirements (required for both Standard and Ecology/Conservation tracks)
- BIO 134 Principles of Biology
- BIO 140 Cell Biology
- BIO 221 Botany
- BIO 230 Zoology
- BIO 350 Genetics
- BIO 360 Animal Physiology OR BIO 215 Human Anatomy and Physiology
- BIO 470 Senior Seminar
- BIO 499 Senior Comprehensive Experience

Related Field Requirements for Biology Major (required for all biology tracks)
A grade of D- or better satisfies the requirement for successful completion of the related field courses in math and chemistry.
- CHE 121 General Chemistry I
- CHE 122 General Chemistry II
- CHE 123 General Chemistry I Lab
- CHE 124 General Chemistry II Lab

Mathematics Related Field Requirement for Biology Major
One of the following math options (grade of D- or better required).
- Option 1: MAT 135 Calculus
- Option 2: LA 103 Quantitative Reasoning and MAT 224 Basic Applied Statistics
- Option 3: CMP 130 Introduction to Computing and MAT 224 Basic Applied Statistics
- Option 4: MAT 131 Introduction to Quantitative Analysis and MAT 224 Basic Applied Statistics
- Option 5: MAT 224 Basic Applied Statistics (only if previously placed into MAT 135)

Biology Professional Development Program/Senior Year Experience
- BIO/CHE 390 Professional Development Planning
- INT XXX Internship (≥ 3 hours of credit)
  (INT XXX must be completed during the summer prior to or during the senior year. BIO 390 is a prerequisite for INT XXX.)
**Biology Major - Standard Biology Track**

In addition to the core and PDP/SYE requirements, students must take the following:

**One of the following courses**
- BIO 240 Ecology
- BIO 322 Ornithology
- BIO 335 Plant Communities

**Plus:** A minimum of 6 hours from Biology courses numbered BIO 210-392 (except BIO 390). Students may count one cross-listed course taught by another department toward their 6 hours (i.e., only one of the following: BIO 372/372L, BIO 387/387L, or BIO 355). Students may count either BIO 215 or BIO 360 as part of this 6-hour requirement, but not both.

**Biology Major - Ecology/Conservation Track**

In addition to the core and PDP/SYE requirements, students must take the following:

- BIO 240 Ecology
- BIO 320 Conservation Biology
- BIO 322 Ornithology
- BIO 335 Plant Communities
- BIO 365 Geographic Information Systems
- ENG 228 Advanced Composition
- ESC 118 Earth Science
- MAT 224 Basic Applied Statistics

**One of the following domestic travel courses (See Self Service for modest course fee)**
- BIO 342 Ecosystem Management
- BIO 380 Field Biology

**One of the following courses**
- POL 225 State and Local Government
- POL 336 Introduction to Public Policy

**Recommended courses**
- BIO 375 Undergraduate Research in Biology or Chemistry
- BIO 382 Comparative Animal Behavior
- CMP 130 Introduction to Computing
- REL 210 Religion and the Environment
**Biology Major – Biomedical Sciences Track**

**Students in this track must maintain a GPA of 3.25 or better to remain in the track. Students who do not maintain this GPA must switch to the Standard Biology Track.**

**Required courses**
- BIO 134 Principles of Biology
- BIO 140/140L Cell Biology + Lab
- BIO 215 Human Anatomy and Physiology II OR BIO 360 Animal Physiology
- BIO 221 Botany OR BIO 230 Zoology
- BIO 225 Bioethics
- BIO 310 Immunology
- BIO 350 Genetics
- BIO 373 Microbiology
- BIO 374 Advanced Cell and Molecular Biology OR BIO 392 Techniques in Biochemistry and Biotechnology
- BIO 375 Undergraduate Research
- BIO 470 Senior Seminar
- BIO 499 Senior Comprehensive Exam

**Related field courses**
- CHE 121/123 General Chemistry I + Lab
- CHE 122/124 General Chemistry II + Lab
- CHE 221/223 Organic Chemistry I + Lab
- CHE 222/224 Organic Chemistry II + Lab
- CHE 334 Biochemistry
- PHY 201/203 General Physics I (Algebra-based)+Lab
- PHY 202/204 General Physics II (Algebra-based)+Lab
- MAT 224 Basic Applied Statistics
- PSY 117 General Psychology
- SOC 118 Introduction to Sociology

**Biomedical Sciences Professional Development Program/Senior Year Experience**
- BIO 390 Professional Development Planning
- INT 151 Medical Internship (minimum of 3 credits)

**Recommended courses**
- BUS 101 Introduction to the Business Mindset
- BUS 102 Development of the Entrepreneurial Mindset
- FRE 210 or SPA 210 Intermediate French I or Intermediate Spanish I
- PHY 355/BIO 355 Ultrasonography
- PHY 357 Biomedical Optics
- PSY 416 Health Psychology
Neuroscience Major
Please see separate Neuroscience section in this course catalog.

Biology Minors
All courses must be completed with a grade of C- or better.

Standard Biology Minor

Core Requirements
- BIO 134 Principles of Biology
- BIO 140 Cell Biology

Plus - An additional 14 credits from BIO 210-392
(BIO 225 cannot count towards both a Biology minor and the Reasoning and Values exploratory course). These 14 hours may include either BIO 372 or BIO 387, but not both. Only 8 of the 14 hours can come from BIO 210, BIO 215, and BIO 360.

Biochemistry Minor
(Available to non-biology and non-chemistry majors only)

Required courses
- BIO 134 Principles of Biology
- BIO 140 Cell Biology
- BIO/CHE 334 Biochemistry
- BIO/CHE 392 Techniques in Biotechnology & Biochemistry
- CHE 222 Organic Chemistry II
- CHE 224 Organic Chemistry Lab II

One of the following courses
- BIO 215 Human Anatomy and Physiology II or BIO 360 Animal Physiology
- BIO 373 Microbiology

Recommended Course
- BIO 375 Undergraduate Research in Biology or Chemistry
Environmental Science Minor
(Available to non-biology majors only)

Core Requirements
- BIO 134 Principles of Biology
- BIO 240 Ecology
- BIO 320 Conservation Biology
- BIO 380 Field Biology
- ESC 118 Earth Science
- INT XXX Environmental Science Internship

One of the following courses
- BIO 322 Ornithology
- BIO 335 Plant Communities

One of the following courses
- ECO 115 Introduction to Economics
- POL 110 American National Government
- SOC 118 Introduction to Sociology

Neuroscience Minor
Please see separate Neuroscience section in this course catalog.
**Pre-Health Professions Programs**
Franklin College offers pre-health professions advising to students who are interested in applying to medical school or other health-related professional schools. For more information or questions, please contact the respective faculty member for each profession. Additional information regarding pre-professional program requirements are located on the Franklin College website at [http://www.franklincollege.edu/academics/division-of-natural-science/health-professions/](http://www.franklincollege.edu/academics/division-of-natural-science/health-professions/)

- Pre-Med (allopathic and osteopathic) and Pre-podiatry - Dr. Yount
- Pre-Pharmacy and Pre-Dentistry - Dr. O’Neal
- Pre-Veterinary Medicine - Dr. O’Neal
- Pre-Optometry - Dr. Thapaliya
- Pre-Physician’s Assistant – Dr. Heikens
- Pre-Medical Technology - Dr. Thapaliya
- Pre-Physical Therapy – Dr. Heikens
- Pre-Occupational Therapy - Dr. Heikens

**Cooperative Programs in Biology**
All cooperative programs for the biology major consist of a common core and specific courses required for each particular program. After completion of three years of college work in one of these programs and fulfilling Franklin College graduation requirements (except total graduation hours), students may receive a bachelor of arts degree from Franklin College upon completing one year at the cooperating institution, for a total of 120 semester hours. Successful completion of the first year in the cooperative program satisfies the internship or senior year experience requirement for the major. Any student following these programs who is not accepted by the cooperating institution after the third year could return to Franklin College and receive a bachelor of arts in biology by completing: 1) all of the remaining requirements for the biology major standard program, and 2) 120 total semester hours required for graduation. (*Students with a declared enrollment in the aforementioned cooperative programs will be given priority during registration in subsequent semester(s)*).

**Cooperative Programs in Health-related Professions**

**Core Requirements**
- BIO 134 Principles of Biology
- BIO 140 Cell Biology
- BIO 350 Genetics
- BIO 390 Professional Development Planning
- BIO 470 Biology Seminar
- BIO 499 Senior Competency Practicum
- CHE 121 & 123 General Chemistry I & Lab
- CHE 122 & 124 General Chemistry II & Lab

**Mathematics Requirement**
One of the following math options

*Option 1: MAT 135 Calculus*

*Option 2: LA 103 Quantitative Reasoning and MAT 224 Basic Applied Statistics*

*Option 3: CMP 130 Introduction to Computing and MAT 224 Basic Applied Statistics*

*Option 4: MAT 131 Introduction to Quantitative Analysis and MAT 224 Basic Applied Statistics*

*Option 5: MAT 224 Basic Applied Statistics (only if previously placed into MAT 135)*
One of the following courses
- BIO 221 Botany
- BIO 230 Zoology
- BIO 240 Ecology

Biology/Chemistry Professional Development Program/Senior Year Experience
Successful completion of the first year in the cooperative program satisfies the internship or senior year experience requirement for the major.

Plus additional specific program requirements - choose one of the four following programs

A. Medical Technology at *Franciscan St. Francis Health or IU Health Methodist Hospital Clinical Laboratory Science Program*
   - BIO 215 Human Anatomy and Physiology II or BIO 360 Animal Physiology
   - BIO 373 Microbiology
   - BIO/CHE 334 Biochemistry
   - CHE 221 & CHE 223 Organic Chemistry I and Lab
   - CHE 222 & CHE 224 Organic Chemistry II and Lab
   - Plus: Completion of the clinical program at Franciscan St. Francis Health or IU Health Methodist Hospital.

B. Doctor of Pharmacy at *Purdue University*
   - BIO 215 Human Anatomy and Physiology II
   - BIO 373 Microbiology
   - CHE 221 & CHE 223 Organic Chemistry I and Lab
   - CHE 222 & CHE 224 Organic Chemistry II and Lab
   - ECO 115 Principles of Economics
   - MAT 140 Introduction to Mathematical Sciences
   - MAT 142 Calculus II
   - PHY 201 or 211 & 203 General Physics I and Lab
   - BIO 310 Immunology

C. Dentistry at most accredited dental schools
   - BIO 215 Human Anatomy and Physiology II
   - BIO/CHE 334 Biochemistry
   - CHE 221 & CHE 223 Organic Chemistry I and Lab
   - PHY 201 or 211 & 203 General Physics I and Lab
   - PHY 202 or 212 & 204 General Physics II and Lab
   - PSY 117 General Psychology
   - Plus completion of the DAT no later than the fall of the junior year.

   *IU Dental School strongly suggests*
   - BIO 373 Microbiology
   - BIO/CHE 392 Techniques in Biotechnology and Biochemistry

D. Masters of Public Health at *IUPUI Richard M. Fairbanks School of Public Health*
   - BIO 215 Human Anatomy and Physiology II
   - BIO 230 Zoology
   - BIO 373 Microbiology
   - BIO electives (6 hours)
   - CHE 221 & CHE 223 Organic Chemistry I and Lab
**Post-Baccalaureate Nursing Programs**

The most direct, and efficient route to a career in nursing is to enroll in a college with an accredited nursing program. Franklin College does not offer such a program. For students desiring the benefits of an undergraduate degree in biology plus professional training in nursing, several schools in the Midwest offer post-baccalaureate programs in nursing that may be completed in 18-24 months after finishing an undergraduate degree. Students interested in such a career path should consult with their academic advisor.

**Pre-Physician Assistant (PA) Studies at Franklin College**

Franklin College offers all of the prerequisite courses required for application to the current PA programs in the State of Indiana and for most of the PA programs throughout the country. Those courses (required and recommended) are listed below. These courses must be completed in addition to any courses required for your major or for graduation from Franklin College. Only one prerequisite course can be in-progress when you submit your application (all other required classes should already be completed and passed with at least a C), but must be completed by the end of that semester (usually Fall, Senior year).

Franklin College has a PA program. Please reference the appropriate section of this course catalog for the specific required and recommended courses, as well as additional admission guidelines for the Franklin College PA program.

**Required Classes for PA School**

The following are specific pre-requisites necessary for admittance to the current PA graduate programs in the State of Indiana (in addition the ones required for your major)

**Required Classes**

* BIO 215 Human Anatomy & Physiology II
* BIO 134 & BIO 140 – General Biology (2 semesters)
* BIO/CHE 334 Biochemistry (Butler & USF), BIO 334 has a CHE 222 prerequisite
* BIO 373 Microbiology
* CHE 121, 122, 123 & 124 General Chemistry I and II with labs (2 semesters)
* CHE 221 & CHE 223 – Organic Chemistry I and lab (1 semester – only offered in the fall)
* KIN 121 Medical Terminology and Documentation
* MAT 224 Basic Applied Statistics (offered each semester)
* PHY 201 General Physics I (certain schools but none in Indiana)
* PSY 117 General Psychology (offered each semester)
* PSY elective – 1 additional behavioral/social science class (USF/Butler requires 6 credit hours)

**Recommended Classes**

* BIO 225 Bioethics
* BIO 350 Genetics – spring every year (ISU requires this or BIO 225)
* BIO 374 Advanced Cell and Molecular Biology (offered alternate years)
* CHE 222 & CHE 226 Organic Chemistry II (ISU/Butler/USF)
* CPR certification

* PA perquisites often change and differ from school to school. It is the responsibility of the applicant to carefully check the specific program prerequisites for any PA program that they intend to apply.
**GPA**
The **minimum** GPA for most schools (both cumulative and Math/Science GPA) is 3.0 (Butler is 3.4). However, admission to PA programs is **highly** competitive and a **much higher** than the minimum is normally required for admission.

**Possess direct patient care experience**
*(required for: FC/IUPUI/USF and recommended for Butler/ISU)*

- Check with school that you are applying to what constitutes direct-care hours.
- The most direct and responsible forms of patient care come from experience in a compensated position and are preferred.
- Clinical components of the educational experience required for other health care professions are considered, but may not totally fulfill this requirement.
- Volunteer activities and/or appropriate life experience will be considered, but will not totally fulfill this requirement.
- Some schools require some PA shadowing hours – check with schools that you are applying to.

**GRE**
Most schools require the GRE (Graduate Record Examination) while some schools will accept MCAT (Medical College Admissions Test) scores in place of GRE scores. Check with each school that you apply to for specific details.

Students will assist a faculty member in setting up the labs, lab instruction, research, or maintaining biological facilities. While doing this, students will learn proper laboratory procedure techniques. The course is highly recommended for graduate school bound students or students interested in science teaching. Counts as an activity course credit.

Explores the functional and organizational principles of life from the cellular to the ecosystem level using evolutionary theory as the unifying framework. Topics in human and plant biology are used to illustrate basic biological concepts. Three hours lecture, two hours laboratory.

This course presents a basic study of medical terminology. Prefixes, suffixes, root words, combining forms, special endings, plural forms, abbreviations, and symbols are included in the content. This course is intended to assist those studying in medical and allied health-care fields by learning a system for defining, using, spelling, and pronouncing medical words. Basic principles of documentation and the various forms used by allied health-care professionals are also encompassed in this course. Same as KIN 121.

This course is the first semester of a two semester sequence in biology for biology and chemistry majors. The purpose of this course is to provide science majors with a basic understanding of biology and aid in the development of critical thinking skills. Topics including Mendelian and population genetics, natural selection and evolution will be discussed. Four hours lecture and discussion, two hours laboratory.

A detailed understanding of cells will be developed in relationship to the following topics: ultra structure, biochemistry, metabolism, reproduction, molecular genetics, gene regulation, membrane transport, photosynthesis and respiration. Four hours lecture and discussion, two hours laboratory. Must be taken concurrently with BIO 140L.

Lab portion of Cell Biology. Must be taken concurrently with BIO 140.

### BIO 310 Principles of Immunology

<table>
<thead>
<tr>
<th>3 credit hours</th>
<th>Fall, odd academic years</th>
</tr>
</thead>
</table>

A foundational course in immunology, which explores how human health depends on the immune system’s ability to detect and destroy invading pathogens. Mechanisms of innate and adaptive immunity will be emphasized. The course is targeted towards students interested in pursuing careers in biotechnology, medicine, and health-related research.

### BIO 320 Conservation Biology

<table>
<thead>
<tr>
<th>3 credit hours</th>
<th>Fall, odd academic years</th>
</tr>
</thead>
</table>

In this course, students will be immersed into the principles of conservation biology. Important topics include species diversity, habitat preservation, habitat management, invasive species, endangered species, ecological economics, global climate change, and various legislation that impacts conservation biology. As a Civic Learning course, we will also examine government authorities associated with conservation biology and learn how to effectively communicate/advocate to stakeholders and decision-makers.

### BIO 322 Ornithology

<table>
<thead>
<tr>
<th>3 credit hours</th>
<th>Spring, even academic years</th>
</tr>
</thead>
</table>

A comprehensive study of birds with an emphasis on morphology, taxonomy, identification, evolution, ecology, and conservation. Two hours lecture, three hours laboratory.

### BIO 334 Biochemistry

<table>
<thead>
<tr>
<th>3 credit hours</th>
<th>Spring</th>
</tr>
</thead>
</table>

An introduction to the chemistry of biomolecules, metabolism, and biosynthesis. Three hours lecture. Note: This course may count toward either a Biology major or a Chemistry major, but not both. Same as CHE 334.

### BIO 335 Plant Communities

<table>
<thead>
<tr>
<th>3 credit hours</th>
<th>Fall, even academic years</th>
</tr>
</thead>
</table>

An introduction to the plant communities in Indiana with emphasis on plant identification, plant associations, and exotic species. Two hours lecture, three hours laboratory.

### BIO 342 Ecosystem Management

<table>
<thead>
<tr>
<th>3 credit hours</th>
<th>Spring, even academic years</th>
</tr>
</thead>
</table>

An immersive, field-based study of the natural resources and socioeconomic realities of complex ecosystems such as the Mississippi Delta and associated coastal marshes of Louisiana. Students will gain firsthand knowledge of the methods used by contemporary biologists to study and conserved plants and wildlife. This course includes a week-long field trip over spring break with significant amounts of travel, hiking, wading, boating, kayaking, angling, and time outdoors.

### BIO 350 Genetics

<table>
<thead>
<tr>
<th>4 credit hours</th>
<th>Spring</th>
</tr>
</thead>
</table>

A study of the principles of heredity, including Mendelian, molecular, and population genetics. Three hours lecture, two hours laboratory.
**BIO 355 Ultrasonography**  
3 credit hours  
Spring, odd academic years, rotating with PHY 365  
Prereq: BIO 210 & 215 or ANAT 210 & 220 or BIO 360 or consent of instructor

Ultrasound is integrated in the health professions and medical education curriculum extensively because of its non-invasive nature and diagnostic utility. The course is divided into four sections: introductory ultrasonography, musculoskeletal, cardiovascular, and abdominal ultrasonography. The course provides hands-on training for proper utilization and appropriate operation of ultrasound equipment to assess various regions of the body, as well as a review of Focused Assessment with Sonography in Trauma (FAST) assessment. Same as PHY 355.

**BIO 360 Animal Physiology**  
4 credit hours  
Fall, even academic years  
Prereq: BIO 140; CHE 121 and 122

Explores the chemistry and physics of the living animal. Topics include cellular physiology, metabolism, organ systems, and mechanisms of control. Emphasis is placed on specific adaptive mechanisms of the animal to its environment. The course stresses interpretation of experimental results both in the lecture and lab. Three hours lecture, three hours laboratory.

**BIO 365 Geographic Information Systems**  
3 credit hours  
Spring, odd academic years

An experiential study of spatial analysis and cartography using geographic information systems (GIS). Students will engage in project-based learning to develop the fundamental skills needed to use the industry’s leading software tool, ArcGIS. As technical consultants, we will create maps and conduct spatial analyses to assist local non-profit organizations in their conservation objectives.

**BIO 372 Exercise Physiology**  
3 credit hours  
Fall  
Prereq: BIO 215 or ANAT 210/210L and ANAT 220/220L and admittance into the Exercise Science or Education program or consent of instructor  
Co-req: BIO 372L

Exercise physiology is the study of acute and chronic adaptations of the body’s physiological systems to movement and physical conditioning. Physiological foundations and the development of physiological fitness components will be discussed. A laboratory component is integrated into class sessions. Same as EXE 372.

**BIO 372L Exercise Physiology Lab**  
No credit  
Fall  
Co-req: BIO 372

Lab component to BIO 372 Exercise Physiology. Same as EXE 372L.

**BIO 373 Microbiology**  
4 credit hours  
Fall  
Prereq: BIO 140 and consent of instructor

Morphology, classification, physiology, genetics, and cultivation of bacteria. The relationship of micro-organisms to human health and the human immune system is discussed in detail. Three hours lecture, three hours laboratory.

**BIO 374 Advanced Cell and Molecular Biology**  
3 credit hours  
Spring, odd years  
Prereq: BIO 140 is required, BIO 350 is preferred but not required.

This course is an in-depth, advanced look at cellular and molecular processes applicable to both research and medicine. Mechanisms of DNA repair, transcription and translation regulation, cell communication and cellular transport will be discussed. Much of this course will rely on the analysis of primary literature and interpretation of experimental data to understand cell biology in the context of cancer and other cellular dysfunctions. The course is 3 hours of lecture with no laboratory component.
**BIO 375 Undergraduate Research in Biology or Chemistry**

2 credit hours

Prereq: consent of instructor

To receive academic credit for an undergraduate research experience students must complete a project proposal endorsed by a sponsoring science faculty member. The application will contain an overview of the project, specific project goals, deadlines for the completion of the project, and specific project outcomes that will be evaluated and used to determine the final grade. All projects must meet the following criteria: a) spending an average of 6 hours/week during the semester (for 2 credits) working on the project; b) writing a scientific paper summarizing the results of the study; c) preparing an electronic poster of the project results; d) maintaining a lab notebook, and e) presenting the results of the project to an audience. The project must be approved by the Chair (or designee) of the sponsoring department.

**BIO 380 Field Biology**

2 credit hours

Spring, odd academic years

Prereq: BIO 134 and consent of instructor

This course meets once a week for the entire semester and has a one week field trip during Spring Break to a distinctive ecosystem (e.g., Smokey Mountains). Natural history and ecological analysis of animal and plant communities are emphasized. Students conduct a research project that is presented to the class and public in addition to keeping a detailed journal that includes both scientific information and reflections of the experience. Hiking and other outdoor skills are required.

**BIO 382 Comparative Animal Behavior**

3 credit hours

Spring, odd academic years

Prereq: BIO 140

A study of how and why animals do what they do (i.e., the proximate and ultimate cause of animal behavior). Students investigate the genetic and sensory/motor mechanisms of behavior, the possible evolutionary histories of behavior, the effects of behavior on fitness, and the role of behavioral ecology in conservation.

**BIO 387 Biomechanics**

3 credit hours

Spring

Prereq: BIO 215 or ANAT 210/210L and ANAT 220/220L, and EXE 372/372L

Co-req: BIO 387L

The course will provide the student with a mechanical examination of the motion of the human body. Application of anatomical, physiological and mechanical data will be used to explain and predict movements of the body to improve technique or prevent injury. A laboratory experience is integrated into class sessions. Same as EXE 387.

**BIO 387L Biomechanics Lab**

No credit

Spring

Co-req: BIO 387

Lab component to BIO 387 Biomechanics. Same as EXE 387L.

**BIO 390 Professional Development Planning**

1 credit hour

Spring

The primary objective of this course is to prepare students for the Professional Development Experience and chosen careers. Students will participate in professional development workshops. Course Fee: $20.
### BIO 392 Techniques in Biotechnology and Biochemistry

<table>
<thead>
<tr>
<th>Course Description</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Spring, even years</td>
<td>3</td>
</tr>
</tbody>
</table>

Prereq: BIO 140, CHE 121, & CHE 122

Students in this course will investigate the myriad of technology available to study DNA, RNA and proteins covering both the theories and applications in research, medical, and industrial settings. Techniques covered will include use of prokaryotic and eukaryotic organisms in recombinant DNA technologies, gene expression microarrays, protein analysis by Western blot, and protein interaction analysis in yeast and higher eukaryotes. Lab work involves using techniques which are the foundation for research in molecular biology. Four hours laboratory. Note: This course may count toward either a Biology major or a Chemistry major, but not both. Same as CHE 392.

### BIO 470 Biology Seminar

<table>
<thead>
<tr>
<th>Course Description</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall and spring</td>
<td>2</td>
</tr>
</tbody>
</table>

Prereq: At least junior class standing and prerequisites of BIO 221, BIO 230 and BIO 390 Coreq: BIO 499

Students explore and summarize the scientific literature related to an individual topic and present their findings in a formal review paper and a public presentation.

### BIO 482 Biology Practicum

<table>
<thead>
<tr>
<th>Course Description</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1-2</td>
</tr>
</tbody>
</table>

Prereq: instructor permission

A supervised, pre-approved experience which allows a student to pursue specific learning goals and/or be involved in a field experience during the regular academic semester.

### BIO 490 Independent Study

<table>
<thead>
<tr>
<th>Course Description</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1-2</td>
</tr>
</tbody>
</table>

Prereq: Departmental consent is required

Course is designed to encourage student initiative and to provide a degree of flexibility in the departmental program. Normally the subject is not sufficiently or appropriately covered in regular departmental course offerings.

### BIO 499 Senior Competency Practicum

<table>
<thead>
<tr>
<th>Course Description</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>No credit</td>
</tr>
</tbody>
</table>

Coreq: BIO 470

An examination (i.e., Major Field Test) covering basic biological principles. Grade of D- or better required.

### PDP 301 Medical School Admission Preparation

<table>
<thead>
<tr>
<th>Course Description</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1</td>
</tr>
</tbody>
</table>

Spring

This course will help students to prepare for application to medical school. Topics covered will include: 1) the medical school admissions/application process, 2) the medical school interview, 3) alternative careers to medicine, and 4) preparation for the standardized admissions test to medical school (MCAT). The latter topic will be a major emphasis in the course. Pass/Fail.
Business

**Department:** Economics, Business, and Accounting  
**Department Chair:** S. Scheer  
**Department Members:** C. Everts, C. Fleming, E. Jones, S. Scheer, J. Squires, J. VanAndel

**Major:** Business (Concentrations: Finance, Marketing, Management, Economics, Accounting, Non-Profit Administration, and Individualized)  
**Minor:** Business

The department provides theoretical and practical education in these programs: economics, business, and accounting. Majors and minors are offered in each of these programs.

The business curriculum is designed to provide students with a working knowledge of economics, accounting, and the major applied disciplines of management, marketing, and finance, as well as specialized expertise in one of the seven concentrations open to business majors. Students completing the major will be prepared for employment in managerial, marketing, or financial positions, or for graduate study in business. The department requires students to complete one internship and encourages students to do two.

A major or minor in business requires the student to have a minimum graduation GPA of 2.00 (A=4.00) in all required major/minor courses and to complete with grades of C- or better all coursework for the major, minor, and related field. Furthermore, regardless of major, all students taking business courses must complete all prerequisites with a C- or better.

Students who excel in the program have the opportunity to join Delta Mu Delta, the national business honor society. Juniors and seniors who have earned an overall GPA of 3.3. at the time of invitation are eligible to join. Additionally, many scholarships are available to students who excel in the program.
Business Major - Finance Concentration

Note: Business majors must complete BUS 101, BUS 102, ECO 115, ECO 221, ECO 223, ACC 221, ACC 222, ACC 235, MAT 131, and MAT 224 with a ‘C-‘ or better before enrolling in 300 or 400-level course in the department.

Core Requirements

BUS 101 Introduction to The Business Mindset
BUS 102 Development of the Entrepreneurial Mindset
BUS 341 Business Law I
BUS 351 Business Finance
BUS 361 Contemporary Marketing
BUS 371 Operations Management
BUS 475 Strategic Implementation Project
BUS 499 Senior Competency Practicum
ACC 235 Data Management and Analysis
ECO 115 Principles of Economics
MAT 131 Introduction to Quantitative Analysis
MAT 224 Basic Statistics

Professional Development Requirements

BUS 498 Portfolio
INT XXX Business Internship (Senior Year Experience)
PDP 200 Preparing for Your Internship

Related Field Requirements

ACC 221 Principles of Accounting I
ACC 222 Principles of Accounting II
ECO 221 Intermediate Macroeconomics
ECO 223 Intermediate Microeconomics
CMP 130 Introduction to Computing

Concentration Requirements

BUS 352 Investments
BUS/ECO 380 Econometrics

Three of the following courses (a maximum of one (1) course from the list of electives may be used to fulfill electives of additional business concentrations)

ACC 321 Managerial-Cost Accounting
ACC 341 Introduction to Taxation
BUS/ECO 350 International Business & Finance
BUS 353 Principles of Risk and Insurance
ECO 330 Money and Banking
SNT 489 Senior Internship Project

Note: Many non-business courses that can be used for business tracks have prerequisites. Students who plan to take non-business courses should take care to schedule the prerequisites.
Business Major - Marketing Concentration

Note: Business majors must complete BUS 101, BUS 102, ECO 115, ECO 221, ECO 223, ACC 221, ACC 222, ACC 235, MAT 131, and MAT 224 with a ‘C-‘ or better before enrolling in 300 or 400-level course in the department.

Core Requirements

- BUS 101 Introduction to The Business Mindset
- BUS 102 Development of the Entrepreneurial Mindset
- BUS 341 Business Law I
- BUS 351 Business Finance
- BUS 361 Contemporary Marketing
- BUS 371 Operations Management

- SOC 323 Organizations
- SNT 489 Senior Internship Project

Note: Many non-business courses that can be used for business tracks have prerequisites. Students who plan to take non-business courses should take care to schedule the prerequisites.
Business Major – Individualized Concentration

Students may create a concentration to be approved by the Economics, Business, and Accounting faculty. Majority approval (3 out of 5) is required. Students should use the following criteria when proposing an individualized area of concentration:

1. A thorough explanation and justification of how this concentration will relate to student’s career path.
2. A thorough explanation and justification of how courses picked relate to one another within the area of concentration.
3. A thorough explanation of why one of the existing concentrations does not fit the needs of the student.
4. A minimum of 4 courses will be required as part of the concentration with the following guideline:
   a. 100-level courses may not be part of the individualized concentration.
   b. A maximum of one course at the 200-level.
   c. A minimum of three additional courses at the 300 or 400-level.

Business Minor

Note: Business minors must complete BUS 101, ECO 115 and ACC 221 with a C- or better before enrolling in 300 or 400 level courses in the department.

ACC 221 Principles of Accounting I
BUS 101 Introduction to the Business Mindset
BUS 102 Development of the Entrepreneurial Mindset
ECO 115 Principles of Economics

Three of the following courses:

ACC 222 Principles of Accounting II
BUS 340 Business Organization and Public Policy
BUS 351 Business Finance
BUS 361 Contemporary Marketing
BUS 362 Consumer Behavior
BUS 371 Operations Management
ECO 221 Intermediate Macroeconomics
ECO 223 Intermediate Microeconomics

</table>
### BUS 341 Business Law I 3 credit hours
Fall
The purpose of this course is to enable the student to comprehend the legal significance of decisions made within the corporate organization. It acquaints the student with the American legal system and the concepts and processes through which law develops and disputes are resolved. The focus of this course will be on contract law, sale of goods (UCC Article 2), and property law.

### BUS 350 International Business and Finance 3 credit hours
Spring, even academic years  Prereq: ECO 221 and ECO 223
Surveys the theories of international trade, investment, and finance. The balance-of-payments statement, tariffs and other forms of protectionism, multinational enterprises, foreign-exchange markets, and the international financial system are all topics of discussion. Same as ECO 350.

### BUS 351 Business Finance 3 credit hours
Fall  Prereq: ECO 115, ACC 221 and ACC 222, or consent of instructor
The course is designed to acquaint students with the basic strategies available to large corporations and small businesses for obtaining and deploying funds. Key areas include: time value of money, interest rate determination, types of debt and equity securities, venture capital financing, leverage, capital budgeting techniques, efficient markets, short-term financial management, and business firm valuation.

### BUS 352 Investments 3 credit hours
Spring  Prereq: BUS 351 or consent of instructor
This course analyzes personal investment opportunities from the viewpoint of the individual investor, stockbroker, and investment analyst. Emphasis is placed on selection of investment portfolios consistent with investor goals and market conditions. Special focus is placed on risk minimization and interpreting commonly available market data. The role of the stockbroker as a marketer is stressed, and material necessary to pass stockbroker exams will be reviewed.

### BUS 353 Principles of Risk and Insurance 3 credit hours
Fall, even academic years  Prereq: MAT 224 or consent of instructor
The course introduces students to risk and insurance from the viewpoint of the purchaser, seller and designer. Various types of insurance are discussed, and the student is prepared for insurance sales license exams.

### BUS 360 Labor Economics and Management 3 credit hours
Spring  Prereq: ECO 221 and ECO 223
Examines the operation of labor markets and the economic framework of employer-employee relations. Particular labor issues, labor legislation, and our government regulations pertaining to labor are discussed. Same as ECO 360.

### BUS 361 Contemporary Marketing 3 credit hours
Fall and Spring  Prereq: ECO 115, ACC 221 or consent of instructor
The purpose of the course is to introduce the student to the practice of strategic marketing, the art and science of interfacing producers and consumers in a dynamic environment. Key areas of focus include product development, pricing, promotion, distribution, market segmentation, market research, and retailing.
BUS 362 Consumer Behavior  3 credit hours
Spring  Prereq: BUS 361
The course is designed to furnish students with basic information necessary to understand consumer reaction to marketing stimuli. The emphasis is on gaining knowledge about consumers in order to achieve effective interface of producers and consumers. The course is highly interdisciplinary, drawing heavily on psychology and sociology, and the focus throughout is on the link between consumer behavior and marketing strategy. Same as ECO 362.

BUS 371 Operations Management  3 credit hours
Fall and Spring  Prereq: BUS 101, BUS 102, and ACC 221
This course will review and build upon basic management and leadership techniques introduced in BUS 101 and BUS 102. The primary emphasis will be to examine operations management as a tool for the firm to achieve maximum value for the customer through the utility maximizing principles achieved in form, time, place, and possession utilities. The course will explore how managers can achieve optimal output and firm profit through effective conversion of firm acquired inputs such as material, labor, and capital into value-added outputs/outcomes. This will be done by addressing operations management in areas such as logistics, supply chain, production, retail operations, and service industries. The course will address the historical background of operations management, and will have a significant emphasis on the quantitative and qualitative analysis of critical decision-making tools used in operations management. Topics will include production planning, quality control, inventory control, facility layout, supply chain management, and labor management. Students will also complete a business-perspective self-evaluation portfolio. All students in the class are required to obtain a 15-week subscription to the Wall Street Journal.

BUS 380 Econometrics  4 credit hours
Fall  Prereq: ECO 115 and MAT/PSY/SOC 224, or consent of instructor
This course is designed for students who obtained basic statistical concept and elementary econometrics through MAT 224. The course provides students with an advanced level of research methodology to analyze business and economic problems. The course focuses on departing Gauss-Markov assumptions and learning non-linear regression model, time series (including serial correlation), panel data, simultaneous equations model, and generalized least squares (GLS) methodology, so that students can conduct research analysis correctly. During the course students will use actual data of business and/or economics to conduct a research analysis, for which students use the statistical software, STATA, most commonly used in universities and the business field. Same as ECO 380.
This course is the senior capstone for accounting majors. Students will work in teams to solve complex business problems in a simulated boardroom setting as they address and solve a real-life business challenge that has been presented to them by Franklin College Alumni or others who have current and relevant projects to complete. Students are expected to synthesize material in all business, economics, and accounting courses in preparing solutions to these problems, and to present their solutions with a formal oral and written report directly to the business owners/managers who tasked them with the project. Teams will be expected to defend their solutions/suggestions, and prepare any follow-up work requested by the business owners/managers. Some time will be spent on resume development and job search/interview strategies. Depending upon project and project sponsor's wishes, this course may be followed in the subsequent spring semester by an optional SNT 489 (Senior Internship Project, 1-3 credit hours, Spring) serving as a Strategic Implementation Project Follow-Up Internship.

A supervised, pre-approved experience that allows a student to pursue specific learning goals and/or be involved in a field experience during the regular academic semester. Course is designed to encourage student initiative and to provide a degree of flexibility in the departmental program. Normally the subject is not sufficiently or appropriately covered in departmental course offerings.

The portfolio requirement will be met by creating the portfolio required in BUS 371. Students will develop a comprehensive portfolio documenting skills learned and assessment of such skills. See BUS 371 or complete description.

Satisfactory performance on the ETS major field test in business. Passing grade: D- or better.
Canadian Studies Program

Department: History
Director: 
Teaching Faculty:

Minor: Canadian Studies

Canada is the United States’ most important trading partner. Despite the close and growing partnership between the two countries, Canada remains fundamentally different from the United States in terms of culture, society, and politics. Many of its political, social, and economic values and institutions reflect those of European countries and stand in contrast to those of the United States. Thus, the study of Canada enables students to gain a greater appreciation of the United States’ largest neighbor and exposes them to values and institutions widely shared among developed countries other than the United States.

The Canadian studies program is designed to develop in students an understanding of the history, society, political institutions, economy, and culture of Canada. The Canadian Studies curriculum places particular emphasis on examining the differences and similarities between Canada and the United States; Canadian-American relations; and the often conflict-ridden relationship between the largely French-speaking province of Quebec and the largely English-speaking rest of the country.

Students trained in Canadian Studies will be able to speak, write, and do research on issues related to Canada. In addition, they will possess knowledge and skills to enable them to function well in an environment requiring international awareness and understanding of cross-cultural exchange.

All prerequisites must be completed with a grade of “D” or better. However, students minoring in Canadian Studies must maintain the minimum grade point average of 2.00 (A=4.00) in the minor field and must complete all course requirements for the academic minor with a grade of “C-” or better.
Canadian Studies Minor
(all instruction in English)

Required courses
   CAN 130 Introduction to Canada
   CAN/HIS 230 History of Canada
   CAN/POL 355 Comparative Politics in Developed Countries

One of the following courses
   CAN/ENG 235 Native North American Literature
   CAN/FRE 340 Francophone Canadian Literature

Three additional hours earned through one of the following options
   1. The alternative literature course from above
   2. An immersive term dealing with a Canadian topic
   3. Participation in the Acadia exchange program
   4. SOC 221 Marriage and the Family
   5. An internship in Canada or at Canadian government offices
   6. Other appropriate class activities (such as CAN 300 Topics in Canadian Studies) as arranged with the Canadian Studies director.
Canadian Studies Course Descriptions

**CAN 130 Introduction to Canada**
4 credit hours
Fall and Spring  
International exploratory

This international course provides an overall look at Canada and Canadians. It introduces students to various features of Canadian geography, history, society, politics, and culture.

**CAN 230 History of Canada**
4 credit hours
Fall, even academic years  
International exploratory  
Prereq: CAN 130 or HIS 120 or consent of instructor

This course traces Canada’s historical evolution from colonial times to the present. It introduces students to the political, economic, social, and cultural history of Canada. Same as HIS 230.

**CAN 235 Native North American Literature**
4 credit hours
Spring, even academic years  
Diversity exploratory  
Prereq: LA 101

A study of multicultural novels, plays, short stories and poems by Native American and First Nations authors, exploring the North American experiences and literatures of Native peoples. Same as ENG 235.

**CAN 300 Topics in Canadian Studies**
3 credit hours

Topics will vary depending on faculty interest and student demand. The course will be offered upon the request of a faculty member and with approval of the Vice President of Academic Affairs.

**CAN 340 Francophone Canadian Literature**
4 credit hours
Spring, odd academic years  
Prereq if taught in English: CAN 130 or consent of instructor. Prereq if taught in French: FRE 211 and CAN 130, or consent of instructor

A literary analysis of representative works by Quebec and other Francophone authors from the colonial period to the present. Same as FRE 340. *Successful completion of FRE 314 and 315 is recommended before taking this class.*

**CAN 355 Comparative Politics in Developed Countries**
3 credit hours
On demand  
Prereq: CAN 130 or POL 130 or consent of instructor

This course examines the political cultures, governmental institutions, and current policy debates in Canada, France and Germany. Relations between these countries and the United States will also be examined. Same as POL 355.

**CAN 482 Canadian Studies Practicum**
1-2 credit hours

A supervised, pre-approved experience which allows a student to pursue specific learning goals and/or be involved in a field experience during the regular academic semester.

**CAN 490 Independent Study**
1-2 credit hours

This course is designed to encourage student initiative and to provide a degree of flexibility in the departmental program. Special reading or research in a field of the student’s interest not sufficiently covered in regular courses.
Chemistry and Physics

Department: Chemistry and Physics
Department Chair: A. Thapaliya
Department Members: H. Florian, J. P’Pool, A. Thapaliya, W. Wei

Major: Chemistry (Tracks: Standard, Environmental Science, Biochemistry, and Industry/Graduate School)
Minors: Chemistry, Biochemistry, and Biomedical Physics
Related Major: Neuroscience
Pre-Professional Programs: Pre-Dental, Pre-Medical, Pre-Medical Technician (See Medical Technology section of the catalog), Pre-Optometry, Pre-Pharmacy, Pre-Physical Therapy, Pre-Physician Assistant, Pre-Veterinary
Cooperative Programs: Health-related Professions: Medical Technology, Pharmacy, Public Health

The undergraduate program in chemistry introduces students to the collection of chemical principles, theories, and facts that have evolved in the more than 200 years that chemistry has existed as a science. The program gives students an opportunity to collect, analyze, and critically evaluate data in the laboratory, and to appreciate the relationship of factual data to scientific purposes, laws, and theories. The body of knowledge acquired and the experience gained in the use of modern instrumentation to collect and to analyze data, prepares students for further study in chemistry at the graduate level, for the pursuit of a career in industrial chemistry or in a health science, and also serve as a chemistry knowledge base necessary for the study of other sciences, including medicine, pharmacy, optometry, biology, toxicology, and environmental science. Finally it is the aim of the department to help the student better understand the natural and the synthetic products and the processes that are encountered in everyday life, thus to satisfy the student’s curiosity about the physical world.

The physics program at Franklin College is designed to provide students with a working knowledge of physics to support and enhance their study in their major discipline. The program provides experiences that enable students to understand the nature of physics and to use physics as a problem-solving tool. The program concentrates on the development of critical thinking.

The students who minor in biomedical physics and chemistry will be well supported for their major course of study and better prepared for success in graduate or professional schools, or immediate employment. Student abilities that are fostered by this curriculum include: understanding the nature of scientific reasoning in considerable depth, understanding the concepts and methods of physics and chemistry, and being able to synthesize information from basic topics and applying it to solve real world problems.
Chemistry Major
Completion of the Chemistry major will require students to complete one of the four following tracks (standard, environmental, graduate school/industry, and biochemistry) or a Cooperative 3+ Health Professions Program in Chemistry. All tracks will share a common core and each track will have additional biology, chemistry, and related field requirements. Cooperative 3+ Programs in Chemistry have a common core (different from the core for the other chemistry tracks) and additional specific requirements for each cooperative program.

Core Requirements (required for all chemistry tracks)
- CHE 121 General Chemistry I
- CHE 122 General Chemistry II
- CHE 123 General Chemistry I Lab
- CHE 124 General Chemistry II Lab
- CHE 221 Organic Chemistry I
- CHE 222 Organic Chemistry II
- CHE 223 Organic Chemistry Lab I
- CHE 224 Organic Chemistry Lab II
- CHE 227 Analytical Chemistry
- CHE 341 Physical Chemistry I
- CHE 343 Physical Chemistry Lab I
- CHE 472 Chemistry Seminar
- CHE 499 Senior Competency Practicum

Related Field Requirements for Chemistry Major (required for all chemistry tracks)
A grade of D- or better satisfies the requirement for successful completion of the related field courses in biology and math. A grade of C- or better satisfies the requirement for successful completion of the related field courses in physics.
- BIO 134 Principles of Biology
- BIO 140 Cell Biology
- MAT 135 Calculus
- MAT 140 Intro to Mathematical Sciences
- PHY 201 or 211 & 203 General Physics I and Lab
- PHY 202 or 212 & 204 General Physics II and Lab

Chemistry Professional Development Program/Senior Year Experience
All Chemistry majors must complete the requirements of either Plan A or Plan B.

Plan A   BIO/CHE 390 Professional Development Planning
SNR 489 Professional Development Research Experience
To receive permission to do Plan A, students must complete an SNR 489 proposal sponsored by a faculty member who will oversee their project. This proposal must be approved by the Chemistry and Physics Department prior to the start of the project. SNR 489 must be completed during the summer prior to or during the senior year. BIO/CHE 390 is a prerequisite for SNR 489.

Plan B   BIO/CHE 390 Professional Development Planning
INT XXX Internship
(INT XXX must be completed during the summer prior to or during the senior year. CHE 390 is a prerequisite for INT XXX.)
**Standard Chemistry Track**
In addition to the core and PDP/SYE requirements, students must take the following:

**A minimum of six credit hours from the following options**
Note: CHE 375 or CHE 490 may count toward the 6 hours, but not both.
- BIO/CHE 334 Biochemistry
- BIO/CHE 392 Techniques in Biotechnology and Biochemistry
- CHE 300 Topics Course
- CHE 322 Spectroscopic Methods of Analysis
- CHE 342 Physical Chemistry II
- CHE 344 Physical Chemistry Lab II
- CHE 375 Undergraduate Research
- CHE 434 Advanced Inorganic Chemistry
- CHE 448 Instrumental Analysis
- CHE 490 Independent Study

**Environmental Science Track**
In addition to the core and PDP/SYE requirements, students must take the following:

- BIO 240 Ecology
- BIO 320 Conservation Biology
- ECO 115 Principles of Economics
- ENG 228 Advanced Composition
- ESC 118 Earth Science
- POL 110 American National Government
- POL 336 Introduction to Public Policy

**Two of the following courses**
Note: CHE 375 or CHE 490 may count toward the two chemistry courses, but not both.
- BIO/CHE 334 Biochemistry
- CHE 342 Physical Chemistry II
- CHE 375 Undergraduate Research
- CHE 448 Instrumental Analysis
- CHE 490 Independent Study – Research

**Recommended Courses**
- BIO 221 Botany
- BIO 322 Ornithology
- BIO 335 Plant Communities
- BIO 373 Microbiology
- BIO 380 Field Biology
- CMP 130 Introduction to Computing
- REL 210 Religion and the Environment
- SOC 118 Introduction to Sociology
- SOC/NPL 222 Social Problems & Nonprofit Responses
Industry and Graduate School Track
In addition to the core and PDP/SYE requirements, students must take the following:

- BIO/CHE 334 Biochemistry
- CHE 342 Physical Chemistry II
- MAT 142 Calculus II

One of the following courses
- CHE 300 Topics Course
- CHE 322 Spectroscopic Methods of Analysis
- CHE 344 Physical Chemistry Lab II
- CHE 375 Undergraduate Research
- BIO/CHE 392 Techniques in Biotechnology and Biochemistry
- CHE 434 Advanced Inorganic Chemistry
- CHE 448 Instrumental Analysis
- CHE 490 Independent Study

Biochemistry Track
In addition to the core and PDP/SYE requirements, students must take the following:

- BIO/CHE 334 Biochemistry
- BIO 350 Genetics
- BIO/CHE 392 Techniques in Biotechnology and Biochemistry
- MAT 142 Calculus II

One of the following courses
- CHE 342 Physical Chemistry II
- CHE/BIO 375 Undergraduate Research
- CHE 448 Instrumental Analysis

One of the following courses
- BIO 215 Human Anatomy and Physiology II
- BIO 360 Animal Physiology
- BIO 374 Advanced Cell and Molecular Biology
- CHE/BIO 375 Undergraduate Research

Note: Students may take CHE 375 or BIO 375, but not both to fulfill the above requirements.
**Chemistry and Physics Minors**

All courses for the following minors must be completed with a grade of C- or better.

**Chemistry Minor**

CHE 121 General Chemistry I  
CHE 122 General Chemistry II  
CHE 123 General Chemistry I Lab  
CHE 124 General Chemistry II Lab  
CHE 221 Organic Chemistry I  
CHE 222 Organic Chemistry II  
CHE 223 Organic Chemistry Lab I  
CHE 224 Organic Chemistry Lab II  
CHE 227 Analytical Chemistry

**One of the following options**

*Option 1:* MAT 135 Calculus  
*Option 2:* MAT 224 Basic Applied Statistics and LA 103 Quantitative Reasoning  
*Option 3:* MAT 224 Basic Applied Statistics and MAT 131 Introduction to Quantitative Analysis  
*Option 4:* MAT 224 Basic Applied Statistics (only available if placed into MAT 135)

*Note:* It is expected that CHE 121 and 123 would be used to satisfy the laboratory science exploratory requirement, and that MAT 135 would replace LA 103 in the prescribed liberal arts curriculum.

**Biochemistry Minor**

(Available to non-biology and non-chemistry majors only)

BIO 134 Principles of Biology  
BIO 140 Cell Biology  
BIO/CHE 334 Biochemistry  
BIO/CHE 392 Techniques in Biotechnology and Biochemistry  
CHE 222 Organic Chemistry II  
CHE 224 Organic Chemistry Laboratory II

**One of the following courses**

BIO 215 Human Anatomy and Physiology II  
BIO 360 Animal Physiology  
BIO 373 Microbiology

**Recommended courses**

BIO/CHE 375 Undergraduate Research
**Biomedical Physics Minor**

PHY 201 or 211 & PHY 203 General Physics I – Algebra or Calculus and Lab  
PHY 202 or 212 & PHY 204 General Physics II – Algebra or Calculus and Lab  
BIO 210 Human Anatomy and Physiology I  
Or  
ANAT 210 & ANAT 210L Applied Human Anatomy and Lab  
BIO 215 Human Anatomy and Physiology II  
Or  
ANAT 220 & ANAT 220L Applied Human Physiology and Lab

**Two of the following courses:**

- PHY 355 Ultrasonography
- PHY 357 Radiation and Health
- PHY 365 Biomedical Optics

**Neuroscience Major**

Please see separate Neuroscience section in this course catalog.

**Pre-Health Professions Programs**

Franklin College offers pre-health professions advising to students who are interested in applying to medical school or other health-related professional schools. For more information or questions, please contact the respective faculty member for each profession. Additional information regarding pre-professional program requirements are located on the Franklin College website at [http://franklincollege.edu/academics/majors/division-of-natural-science/health-professions/](http://franklincollege.edu/academics/majors/division-of-natural-science/health-professions/)

- Pre-Med (allopathic and osteopathic) and Pre-Podiatry – Dr. Yount  
- Pre-Pharmacy – Dr. Wei  
- Pre-Veterinary Medicine and Pre-Dentistry – Dr. O’Neal  
- Pre-Optometry and Pre-Medical Technology – Dr. Thapaliya  
- Pre-Physical/Occupational Therapy and Pre-Physician Assistant – Dr. Heikens

**Cooperative Programs in Health-Related Professions – Chemistry/Physics**

All cooperative programs for the chemistry major consist of a common core and specific courses required for each particular program. After completion of three years of college work in one of these programs and fulfilling Franklin College graduation requirements (except total graduation hours), students may receive a bachelor of arts degree from Franklin College upon completing one year at the cooperating institution, for a total of 120 semester hours. Successful completion of the first year in the cooperative program satisfies the senior year experience or internship requirement for the chemistry major. Any student following these programs who is not accepted by the cooperating institution after the third year could return to Franklin College and receive a bachelor of arts in chemistry by completing: 1) all of the remaining requirements for the chemistry major standard program, and 2) 120 total semester hours required for graduation. *(Students with a declared enrollment in the aforementioned cooperative programs will be given priority during registration in subsequent semester(s)).*
Cooperative Programs in Health-related Professions

Core Requirements
- CHE 121 General Chemistry I
- CHE 122 General Chemistry II
- CHE 123 General Chemistry I Lab
- CHE 124 General Chemistry II Lab
- CHE 221 Organic Chemistry I
- CHE 222 Organic Chemistry II
- CHE 223 Organic Chemistry Lab I
- CHE 224 Organic Chemistry Lab II
- CHE 227 Analytical Chemistry
- CHE 341 Physical Chemistry
- CHE 343 Physical Chemistry Lab
- CHE 390 Professional Development
- CHE 472 Chemistry Seminar
- CHE 499 Senior Competency Practicum
- MAT 135 Calculus
- PHY 201 or 211 & 203 General Physics I and Lab
- PHY 202 or 212 & 204 General Physics II and Lab

Chemistry Professional Development Program/Senior Year Experience
Successful completion of the first year in the cooperative program satisfies the senior year experience or internship requirement for the major.

Plus additional specific program requirements – choose one of the three following programs

A. Medical Technology at Franciscan St. Francis Health or IU Health Methodist Hospital Clinical Laboratory Science Program
- BIO 140 Cell Biology
- BIO 373 Microbiology
- BIO/CHE 334 Biochemistry
- Plus 8 Additional Hours of BIO credit
  (preferably BIO 210 and BIO 215 – Human Anatomy and Physiology I and II)
- Plus: Completion of the clinical program at Franciscan St. Francis Health or IU Health Methodist Hospital

B. Pharmacy at Purdue University or University of Cincinnati
- BIO 210 Human Anatomy and Physiology I
- BIO 215 Human Anatomy and Physiology II
- BIO/CHE 334 Biochemistry
- BIO 373 Microbiology
- ECO 115 Principles of Economics
- LA 201 Analyzing Literature
- MAT 140 Introduction to Math Sciences
- MAT 142 Calculus II
- Immunology - is required by the Purdue University School of Pharmacy. It can be taken online during a summer term after completing sophomore year.
- Diversity or social ethics is required for the University of Cincinnati.
Recommended
BIO/CHE 392 Techniques in Biotechnology and Biochemistry

Plus completion of 30-35 credits by the end of the first year of pharmacy program

C. Master of Public Health at IUPUI Richard M. Fairbanks School of Public Health

BIO 134 Principles of Biology
BIO 140 Cell Biology
BIO 210 Human Anatomy and Physiology I
MAT 224 Basic Applied Statistics

Plus completion of one of the following MPH classes in the first year at IUPUI
A519 Environmental Health
A609 Air Pollution & Health
A614 Water Quality Management
A661 Environmental Toxicology

</tbody>
</table>
CHE 342 Physical Chemistry II

Spring, odd academic years

Prereq: PHY 201 or PHY 211 and 203

Elementary quantum mechanics, group theory, and atomic and molecular structure and spectroscopy. Three hours lecture. Same as PHY 342.

CHE 343 Physical Chemistry Lab I

Fall

Prereq: CHE 227 (or consent of instructor), MAT 135, and CHE 341 (or concurrently)

An introduction to the types of laboratory instrumentation and methods used every day by professional physical and inorganic chemists in research and industry. Substantial emphasis is placed on individual and team responsibility, careful and thoughtful planning, experimentation, data interpretation, and effective communication of results. Experiments will be closely associated with thermodynamics, chemical equilibrium, and include some spectroscopy of primarily inorganic compounds. Four hours laboratory (including pre-lab lecture). Same as PHY 343.

CHE 344 Physical Chemistry Lab II

Spring

Prereq: CHE 341 and 343

An introduction to the types of laboratory instrumentation and methods used every day by professional physical and inorganic chemists in research and industry. Substantial emphasis is placed on individual and team responsibility, careful and thoughtful planning, experimentation, data interpretation, and effective communication of results. Experiments will be closely associated with kinetics, electrochemistry, computational chemistry, and a continuation of spectroscopy. Three hours laboratory. Same as PHY 344. Current or past enrollment in CHE 342 is highly recommended.

CHE 357 Radiation and Health

Fall, even academic years

Prereq: CHE 121 & CHE 122

This course will provide students with an introduction to the principles of radioactivity and its applications in medical diagnosis. A study of basic physics and chemistry as it applies to radiation and the human body (radiobiology) is followed by an overview of major topics in the field of medical physics: x-rays and their uses in medical imaging, physics of nuclear medicine imaging, ultrasound imaging, magnetic resonance imaging, and radiation therapy for cancer. The course will also include a summary of basic principles for measuring radiation exposure, and different methods of monitoring and protecting against chronic exposure to radiation. Same as PHY 357.

CHE 375 Undergraduate Research in Biology, Chemistry or Physics

1-3 credit hours

Prereq: instructor permission

To receive academic credit for an undergraduate research experience students must complete a project proposal endorsed by a sponsoring science faculty member. The application will contain an overview of the project, specific project goals, deadlines for the completion of the project, and specific project outcomes that will be evaluated and used to determine the final grade. All projects must meet the following criteria: a) spending an average of 3 hours per week per credit hour (i.e. 6 hours/week during the semester for 2 credits) working on the project; b) writing a scientific paper summarizing the results of the study; c) preparing an electronic poster of the project results; d) maintaining a lab notebook, and e) presenting the results of the project to an audience (at least once per year). The project must be approved by the Chair (or designee) of the sponsoring department.

CHE 390 Professional Development Planning

Fall and spring

1 credit hour

The primary objective of this course is to prepare students for the Professional Development Experience and chosen careers. Students will participate in professional development workshops and write a proposal for their senior year experience. Course Fee: $20.
CHE 392 Techniques in Biotechnology and Biochemistry  
3 credit hours  
Spring, even academic years  
Prereq: BIO 140, CHE 121, & CHE 122

An advanced investigation of genetic engineering and recombinant DNA technology, this course will investigate the theory and principles behind the new biological revolution in molecular biotechnology. Medical and industrial applications as well as ethical concerns will be discussed. Lab work will involve learning recombinant DNA techniques that are the cornerstone of molecular biology. Two hours lecture, three hours laboratory. Note: This course may count toward either a Chemistry major or a Biology major, but not both. Note: this course may count toward either a Chemistry major or a Biology major but not both. Same as BIO 392.

CHE 434 Advanced Inorganic Chemistry  
3 credit hours  
Spring, even academic years  
Prereq: CHE 222, CHE 227, and MAT 135 or consent of instructor

Theoretical principles of inorganic chemistry. Topics include atomic and molecular structure, group theory, chemical bonding, coordination compounds, and the periodic classification of the elements. Three hours lecture.

CHE 448 Instrumental Analysis  
3 credit hours  
Spring, even academic years  
Prereq: CHE 227, or consent of instructor

Introduction to the theory and practice of modern analytical instrumentation. Chromatography, quantitative spectrometry, electroanalytical, and other instrumental techniques are discussed. Representative samples are analyzed using instrumental methods. Two hours lecture, four hours laboratory.

CHE 472 Chemistry Seminar  
2 credit hours  
Fall  
Prereq: Junior standing or consent of instructor

Presentation of current and historical topics in chemistry. This course emphasizes practice and presentation of oral and written reports.

CHE 482 Chemistry Practicum  
1-2 credit hours  
Prereq: instructor permission

A supervised, pre-approved experience which allows a student to pursue specific learning goals and/or be involved in a field experience during the regular academic semester.

CHE 490 Independent Study  
1-2 credit hours  
Prereq: consent of department

Independent investigation of some problem in one of the fields of chemistry by students who have completed the minimum requirements for a major in chemistry.

CHE 499 Senior Competency Practicum  
No credit

An examination taken by senior majors to assess their knowledge of the field of chemistry and their ability to apply this knowledge to solve practical problems. Normally given during the fall term of the student’s senior year. Consists of an oral examination and/or a written Major Field Test from the Educational Testing Service. Passing grade D- or higher.

PDP 301 Medical School Admission Preparation  
1 credit hour  
Spring

This course will help students to prepare for application to medical school. Topics covered will include: 1) the medical school admissions/application process, 2) the medical school interview, 3) alternative careers to medicine, and 4) preparation for the standardized admissions test to medical school (MCAT). The latter topic will be a major emphasis in the course. Pass/Fail.
**SNR/SNT 489 Professional Development Experience – BIO, CHE & PHY**

Prereq: MAT 131 or MAT 135 and permission of the instructor (successful completion of a math pretest); Co-req: PHY 203

An introductory course of a two-semester sequence of algebra-based physics that covers the following topics: linear motion, vector methods, Newton’s laws of motion, forces, gravitation, circular motion, work and energy, momentum, rotational motion, equilibrium, fluids, vibrations, waves, periodic motion and sound, fluids and solids. The course is appropriate for biology and chemistry majors and pre-professional students (pre-med, pre-dental, pre-optometry, exercise science, etc.). Four hours lecture, two hours laboratory.

**PHY 202 General Physics II – Algebra**

Prereq: MAT 135; Co-req: PHY 203

An introductory course of a two-semester sequence of calculus-based physics that introduces the theories, concepts, and techniques of mechanics (kinematics, work and energy, dynamics, rotation, gravitation, and waves) and the application of mechanics to heat flow, called thermodynamics. The course is appropriate for chemistry, physics, mathematics and engineering majors. Four hours lecture, two hours laboratory.
PHY 212 General Physics II – Calculus 5 credit hours
Spring
Prereq: PHY 211 and PHY 203; Co-req: PHY 204
A second course of a two-semester sequence of calculus-based physics. Topics of study include: electricity and magnetism, DC and AC circuits, and geometrical and physical optics, light, and atomic physics. Four hours lecture, two hours laboratory. The course is appropriate for chemistry, physics, mathematics and engineering majors. Four hours lecture, two hours laboratory.

PHY 240 Modern Physics 3 credit hours
On demand
Prereq: PHY 202
An examination of the breakdown of classical physics and the rise of quantum theory. Topics include: special and general relativity, the kinetic theory of gases, an introduction to quantum mechanics and its application to atomic structure, solid state physics, and nuclear physics. The course includes laboratory study of relativistic beta spectroscopy, black body radiation, and the photoelectric effect.

PHY 300 Topics in Physics 3 credit hours
A topic of current interest in physics will be taught. Topics will vary depending on faculty and student interest. The course will be offered upon the request of a faculty member and with approval of the Vice President of Academic Affairs.

PHY 341 Physical Chemistry I 3 credit hours
Fall
Prereq: CHE 122, MAT 135, PHY 202 or PHY 212

PHY 342 Physical Chemistry II 3 credit hours
Spring, odd academic years
Prereq: PHY 201/203 or PHY 211/203
Elementary quantum mechanics, group theory, and atomic and molecular structure and spectroscopy. Three hours lecture. Same as CHE 342.

PHY 343 Physical Chemistry Lab I 2 credit hours
Fall
Prerequisites: CHE 227 (or consent of instructor), MAT 135, and CHE 341 (or concurrently)
An introduction to the types of laboratory instrumentation and methods used every day by professional physical and inorganic chemists in research and industry. Substantial emphasis is placed on individual and team responsibility, careful and thoughtful planning, experimentation, data interpretation, and effective communication of results. Experiments will be closely associated with thermodynamics, chemical equilibrium, and include some spectroscopy of primarily inorganic compounds. Four hours laboratory (including pre-lab lecture). Same as CHE 343.

PHY 344 Physical Chemistry Lab II 1 credit hour
Spring
Prereq: CHE 341 and 343
An introduction to the types of laboratory instrumentation and methods used every day by professional physical and inorganic chemists in research and industry. Substantial emphasis is placed on individual and team responsibility, careful and thoughtful planning, experimentation, data interpretation, and effective communication of results. Experiments will be closely associated with kinetics, electrochemistry, computational chemistry, and a continuation of spectroscopy. Three hours laboratory. Same as CHE 344. (Current or past enrollment in CHE 342 is highly recommended).
Ultrasound is integrated in the health professions and medical education curriculum extensively because of its non-invasive nature and diagnostic utility. The course is divided into four sections: introductory ultrasonography, musculoskeletal, cardiovascular, and abdominal ultrasonography. The course provides hands-on training for proper utilization and appropriate operation of ultrasound equipment to assess various regions of the body, as well as a review of Focused Assessment with Sonography in Trauma (FAST) assessment. Same as BIO 355.

This course will provide students with an introduction to the principles of radioactivity and its applications in medical diagnosis. A study of basic physics and chemistry as it applies to radiation and the human body (radiobiology) is followed by an overview of major topics in the field of medical physics: x-rays and their uses in medical imaging, physics of nuclear medicine imaging, ultrasound imaging, magnetic resonance imaging, and radiation therapy for cancer. The course will also include a summary of basic principles for measuring radiation exposure, and different methods of monitoring and protecting against chronic exposure to radiation. Same as CHE 357.

This course will be broadly divided into three categories: geometrical, physical, and visual optics that are pertinent to human-eye-related biomedical and clinical applications. It will begin with the discussion of foundations of geometrical optics describing the behavior of light as rays during reflection, refraction, and dispersion, as well as analyzing optical images, designs and systems and the associated aberrations. The physical-optics aspect of this course introduces the wave model of light propagation and applies it in describing various phenomena like refraction and reflection, dispersion, interference, polarization, and diffraction. This will be followed by a concise deliberation of a few topics related to the quantum nature of light and quantum optics. The final part of the course will address the optics of human eye emphasizing the propagation and interactions of light in biological tissues and physiology of a visual system.

To receive academic credit for an undergraduate research experience students must complete a project proposal endorsed by a sponsoring science faculty member. The application will contain an overview of the project, specific project goals, deadlines for the completion of the project, and specific project outcomes that will be evaluated and used to determine the final grade. All projects must meet the following criteria: a) spending an average of 3 hours per week per credit hour (i.e. 6 hours/week during the semester for 2 credits) working on the project; b) writing a scientific paper summarizing the results of the study; c) preparing an electronic poster of the project results; d) maintaining a lab notebook, and e) presenting the results of the project to an audience (at least once per year). The project must be approved by the Chair (or designee) of the sponsoring department.

Supervised, pre-approved academic credit awarded for qualified work in an industrial, government, or academic research laboratory.

Computing

**Department:** Mathematics and Computing  
**Department Chair:** J. Boardman  
**Department Members:** R. Beasley, J. Boardman, D. Callon, P. Fonstad, J. Gash, S. Hoehn, K. Smith, A. Walls

**Majors:** Computer Science, Software Engineering  
**Minors:** Computer Science, Software Engineering

Courses and majors in mathematics and computing are designed to provide students with fundamental knowledge of and facility with concepts and processes in mathematics and computing. Also, the program is intended to help develop interpersonal and lifetime learning skills so students can adapt to new challenges and situations in their personal and professional lives. The department seeks to promote active learning in the classroom through the implementation of cooperative learning, discovery learning, and the incorporation of technology in a variety of hands-on experiences.

All required courses for a major or minor in mathematics or computing, including all related field and prerequisite requirements, must be completed with a C- or better. Prerequisites for non-majors must also be completed with a C- or better. Education students should consult the education department for minimum requirements.

**Majors in Computing**

Two separate majors are available in the computing field: computer science and software engineering. Both programs provide professional education within the liberal arts setting in the rapidly developing field of computing.

A **major in computer science** provides the student with a knowledge of both computer applications and higher mathematics that will allow the student to pursue a career as a computer programmer or as a network administrator immediately following graduation or to enter graduate school.

A **major in software engineering** is intended to provide preparation for a student who wishes to pursue a career as a software developer in business, industry, or government.
**Computer Science Major**

**Computing Core Requirements**

Computing Course Descriptions

**CMP 130 Introduction to Computing**
3 credit hours
Fall and spring
Fulfills LA 103 requirement
Note: Placement into LA 103 or above based upon mathematics placement criteria
An introduction to the field of computing and the use of software applications to enhance quantitative reasoning, problem-solving, and decision-making. Topics include data storage, data manipulation, operating systems, networking and the Internet, algorithms, programming languages, software engineering, data abstractions, database systems, artificial intelligence, and the theory of computation. Hands-on experience with applications, such as spreadsheets and database management systems, is included.

**CMP 141 Computing I**
3 credit hours
Fall
Prereq: knowledge of high school algebra
An introduction to computers and structured programming using the Python programming language. Topics include: problem-solving strategies, algorithm formulation, primitive data types, expressions, control structures, proper coding style, debugging, testing, and documentation.

**CMP 142 Computing II**
3 credit hours
Spring
Prereq: CMP 141
An introduction to object-oriented design and programming using the Python programming language. Topics include: object-oriented design, encapsulation, inheritance, polymorphism, exception handling, file input and output, abstract classes, interfaces, binary I/O, and recursion.

**CMP 150 Computer Tools for Problem Solving**
2 credit hours
Spring
Prereq: MAT 135 or consent of instructor
A course in which students learn to apply professional scientific computing software to mathematical problems. Topics will include matrices and matrix operations; random number generation; plotting graphs of functions; and curve fitting and interpolation. Students will also learn and apply basic elements of computer programming (relational and logical operators, conditional statements, and loop structures) within MATLAB and R.

**CMP 283 Web Software Construction and Testing I**
3 credit hours
Fall
Prereq: CMP 141 or consent of instructor
An introduction to the fundamental concepts of web software construction and testing. Topics include the client-server model and server-side programming languages (e.g., ASP.NET, C#.NET).

**CMP 285 Web Software Construction and Testing II**
3 credit hours
Spring
Prereq: CMP 283 or consent of instructor
An advanced study of the concepts of web software construction and testing. Topics include database connectivity and client-side programming languages (e.g., JavaScript).

**CMP 300 Topics in Computing**
1-3 credit hours
Spring, odd academic years
Prereq: CMP 142 and junior standing, or consent of instructor
A topic of current interest in computing will be taught. Topics will vary depending on technological developments and faculty interests. Offered at the request of a faculty member and with approval of the Vice President of Academic Affairs.
CMP 325 Operating Systems
3 credit hours
Spring, odd academic years
Prereq: CMP 142
Introduces the fundamentals of operating systems design and implementation. Topics include an overview of the components of an operating system, mutual exclusion and synchronization, implementation of processes, scheduling algorithms, memory management, and file systems.

CMP 337 Programming Languages
3 credit hours
Spring, odd academic years
Prereq: CMP 142
An introduction to programming languages and the major paradigms. The structure of the languages as well as their approach to problem-solving will be studied. Topics may include imperative, functional, object-oriented, and logic-based languages.

CMP 348 Computer Architecture and Organization
3 credit hours
Spring, even academic years
Prereq: CMP 142
This course is an introduction to computer architecture and organization. Topics include: digital logic, circuit design, machine-level representation of data, assembly-level machine organization, memory system organization and architecture, interfacing and communication, and functional organization. Additional topics on multiprocessing, alternative architectures, and performance measurements may be included.

CMP 352 Data Structures
3 credit hours
Fall, odd academic years
Prereq: CMP 142
This is an advanced course in the use, development, and analysis of data structures and the algorithms that operate on them. Students will gain a firm understanding of the fundamental data structures of arrays and linked lists and how they are used to implement other formal data structures such as stacks, queues, binary search trees, and graphs. This course will particularly emphasize data encapsulation of such structures, as well as include significant experience with tree and graph representations. Multithreaded and parallel programming will be introduced. Complete and detailed algorithm analyses will also be introduced.

CMP 360 Operations Research
3 credit hours
Fall, odd academic years
Prereq: MAT 135, MAT 181, MAT/PSY 224, or BUS 265, or consent of instructor
Introduction to the field of operations research. PERT, linear and integer programming, use of statistical reasoning, and computer methods are included.

CMP 370 Database Design and Processing
3 credit hours
Fall, odd academic years
Prereq: CMP 142 and junior standing, or consent of instructor
An introduction to database concepts. Topics include file systems and databases, the relational database model, structured query language, entity relationship modeling, database table normalization, transaction management and concurrency control, and data warehouses.

CMP 372 Computer Networks and Security
3 credit hours
Fall, even academic years
Prereq: CMP 142 or consent of instructor
This course is an introduction to computer networks and security. Topics include: methods of data transmission, data encoding and error correction, internet and transport protocols, routing algorithms and flow control, network design, internetworking, and security. Students will learn and develop network applications.
**CMP 385 Software Engineering I: Analysis and Design**  
3 credit hours  
Fall, even academic years  
Prereq: CMP 285 and junior standing, or consent of instructor  
An introduction to the concepts associated with the analysis and design activities of the software engineering process. Topics include software activities and tasks, process models, methodology development and tailoring, project scheduling, monitoring, and control, requirements analysis, project estimation, decision analysis, back-end design, front-end design, and component design.

**CMP 387 Software Engineering II: Implementation and Maintenance**  
3 credit hours  
Spring, even academic years  
Prereq: CMP 385 and junior standing, or consent of instructor  
An introduction to the concepts associated with the implementation and maintenance activities of the software engineering process. Topics include software quality assessment, quality control, measurement, metric construction, configuration management, change control, construction, testing, system conversion, and maintenance.

**CMP 470 Senior Software Maintenance Project**  
No credit  
Fall  
Prereq: senior standing and departmental consent  
A supervised, pre-approved experience which requires the student to select an existing system maintenance project from a pool of requests and perform the necessary activities to solve the maintenance problem.

**CMP 473 Senior Software Development Project**  
6 credit hours  
Spring  
Prereq: CMP 470, senior standing, and departmental consent; Co-req: CMP 499  
Requires the selection and completion of the senior project, which involves the analysis, design, implementation, and delivery of a fully-functioning computer system as well as the development of all relevant technical documentation.

**CMP 482 Computer Practicum**  
1-2 credit hours  
Prereq: instructor permission  
A supervised, pre-approved experience which allows a student to pursue specific learning goals and/or be involved in a field experience during the regular academic semester.

**CMP 490 Independent Study**  
1-2 credit hours  
Prereq: departmental consent  
Courses are designed to encourage student initiative and to provide a degree of flexibility in the departmental program. Normally the subject is not sufficiently or appropriately covered in departmental course offerings. Course work is planned by student and instructor jointly to meet student’s individual needs.

**CMP 499 Senior Competency Practicum**  
No credit  
Spring  
Co-req: CMP 473  
The senior competency practicum consists of two components. The first component, the written part of the senior competency requirement, is written documentation from the senior project completed in CMP 473. The second component, the oral part of the senior competency requirement, is a formal presentation of the senior project. A team of at least four individuals will judge the student’s skill in presentation, knowledge of the system, and ability to communicate with the audience. Students must earn a C- or higher.
Economics

Department: Economics, Business, and Accounting
Department Chair: S. Scheer
Department Members: C. Evert, C. Fleming, E. Jones, S. Scheer, J. Squires

Major: Economics (Tracks: Traditional and Graduate School Preparation) and Political Economy
Minor: Economics and Political Economy

The department provides theoretical and practical education in these programs: economics, business, and accounting. Majors and minors are offered in each of these programs.

The economics curriculum is designed to provide majors with sufficient knowledge, skills, and experiences in their chosen discipline so they can understand and apply economic analysis. The program offers courses that survey the various sub disciplines within economics, develop the analytical skills necessary to “do” economics, and provide, by way of assignments and experiences, opportunities for using the knowledge and skills. Students completing the major will then be in a position to take the next step in their careers, whether it be employment in business or government, continued education in law or other graduate schools, or family and community service.

Franklin College’s interdisciplinary major, the political economy examines the relationship between politics and economics in modern societies and focuses on problems of both domestic and international policy. Students study the political and economic factors that affect, and are affected by, systems of production, exchange, and distribution, that is, political economy analyzes how international and domestic political factors interact with micro- and macro-economic factors to determine outcomes in a wide variety of areas including globalization, international trade and finance, regulation, development, taxes, and income distribution. As a result, students will be able to think logically and analytically about the problems that face humankind internationally and domestically. They will be prepared for law school, graduate school and employment by private sectors and government at the local, state, and federal levels, as well as careers in teaching.

A major or minor in economics or political economy requires the student to have a minimum graduation GPA of 2.00 (A=4.00) in all required major/minor courses and to complete with grades of C- or better all coursework for the major, minor, and related field. Furthermore, regardless of major, all students taking economics courses must complete all prerequisites with a C- or better.

Students who excel in the program have the opportunity to join Delta Mu Delta, the national business honor society. Juniors and seniors who have earned an overall GPA of 3.3 at the time of invitation are eligible to join. Additionally, many scholarships are available to students who excel in the program.

Note: Economics and Political Economy majors and minors must complete MAT 131 (except Graduate School Preparation Track), ECO 115 and ECO 225 with a ‘C-’ or better before enrolling in 300 or 400 level course in the department.
**Economics Major – Traditional Track**

This track provides students with a broader and deeper view of primary area of study in economics.

**Core requirements**

- ECO 115 Principles of Economics
- ECO 221 Intermediate Microeconomics
- ECO 223 Intermediate Macroeconomics
- ECO 380 Econometrics
- ECO 475 Strategic Implementation Project
- ECO 499 Senior Competency Practicum
- MAT 131 Introduction to Quantitative Analysis

**Four of the following courses**

- ECO 300 Topics in Economics
- ECO 330 Money and Banking
- ECO/BUS 340 Business Organization and Public Policy
- ECO/BUS 350 International Business and Finance
- ECO/BUS 360 Labor Economics and Management
- ECO/BUS 362 Consumer Behavior
- BUS 351 Business Finance
- PHL 220 Principles of Ethics

**Professional Development Requirements**

- ECO 498 Portfolio
- PDP 200 Preparing for Your Internship
- INT XXX Internship in Economics or related field

**Related field courses required**

- ACC 221 Principles of Accounting I
- ACC 235 Data Management and Analysis
- MAT 224 Basic Applied Statistics
- CMP 130 Introduction to Computing
**Economics Major – Graduate School Preparation Track**
This track is designed for students who are interested in graduate school (PhD in economics). Students become ready for graduate work in economics (PhD level) once they complete the track. Note that this track does not require students to apply for graduate school.

**Core requirements**
- ECO 115 Principles of Economics
- ECO 221 Intermediate Microeconomics
- ECO 223 Intermediate Macroeconomics
- ECO 380 Econometrics
- ECO 475 Strategic Implementation Project
- ECO 499 Senior Competency Practicum

**Four of the following courses**
- ECO 300 Topics in Economics
- ECO 330 Money and Banking
- ECO/BUS 350 International Business and Finance
- ECO/BUS 360 Labor Economics and Management
- ECO/BUS 362 Consumer Behavior
- BUS 351 Business Finance

**Professional Development Requirements**
- ECO 498 Portfolio
- PDP 200 Preparing for Your Internship
- INT XXX Internship in Economics or related field

**Related field**

**Statistics Requirement:**
- MAT 224 Basic Applied Statistics

**Mathematics Requirement: all of the following courses**
- MAT 135 Calculus
- MAT 142 Calculus II
- MAT 233 Linear Algebra
- MAT 253 Calculus III
- MAT 256 Differential Equations

**Political Economy Major**
*Cannot be combined with Economics and/or Political Science majors and/or minors*

**Core requirements**

**Political Science Field**
- POL 110 American National Government
- POL 120 Introduction to International Relations
- POL 130 Introduction to Comparative Politics
- POL 336 Introduction to Public Policy
- POL 360 Social and Political Thought
Economics Field
- ECO 115 Principles of Economics
- ECO 223 Intermediate Macroeconomics

Statistics Field
- ECO 380 Econometrics

Senior Capstone Courses
- ECO 475 Strategic Implementation Project
- ECO 499 Senior Competency Practicum or POL 499 Senior Competency Practicum

Elective courses
Political Science Field – choose three courses from the following
- POL 316 American Presidency
- POL 317 American Congress
- POL 320 International Security and Conflict Management
- POL 341 International Law and Organizations
- POL 350 Public Administration
- POL 390 American Foreign Policy
- POL 410 American Constitutional Law I: Powers and Duties
- POL 420 American Constitutional Law II: Civil Rights and Liberties

Economics Field – choose two courses from the following
- ECO 330 Money and Banking
- ECO 350 International Business and Finance
- ECO 360 Labor Economics and Management

Professional Development Requirement
- PDP 200 Preparing for Your Internship
- INT XXX Internship in Economics or related field (4 credits) or SNR/SNT489 (POL) Senior Internship/Project (4-6 credits)
- ECO 498 Portfolio or POL 498 Portfolio (take with POL 470)

Related Field Requirement
- MAT 131 Introduction to Quantitative Analysis
- MAT 224 Basic Applied Statistics

Two of the following courses
- ACC 341 Introduction to Taxation
- BUS 341 Business Law I
- PHL 220 Principles of Ethics
- PSY 320 Social Psychology
- SOC 210 Criminal Justice
- SOC 321 Criminology
Other course approved by faculty from both political science and economics
**Economics Minor**

**Required courses**
- ECO 115 Principles of Economics
- ECO 221 Intermediate Microeconomics
- ECO 223 Intermediate Macroeconomics

**Three of the following courses**
- ECO 300 Topics in Economics
- ECO 330 Money and Banking
- ECO/BUS 340 Business Organization and Public Policy
- ECO/BUS 350 International Business and Finance
- ECO/BUS 360 Labor Economics and Management
- ECO/BUS 380 Econometrics

**Political Economy Minor**

*Cannot be combined with Economics and/or Political Science majors and/or minors*

**Core requirements**

**Political Science Field**
- POL 110 American National Government
- POL 120 Introduction to International Relations
- POL 336 Introduction to Public Policy

**Economics Field**
- ECO 115 Principles of Economics
- ECO 223 Intermediate Macroeconomics

**Elective courses**

**Political Science Field** – choose one course from the following
- POL 130 Introduction to Comparative Politics
- POL 225 State and Local Government
- POL 316 American Presidency
- POL 317 American Congress
- POL 360 Social and Political Thought

**Economics Field** – choose one course from the following
- ECO 330 Money and Banking
- ECO 350 International Business and Finance
- ECO 360 Labor Economics and Management
## Economics Course Descriptions

The course is designed to furnish students with basic information necessary to understand consumer reaction to marketing stimuli. The emphasis is on gaining knowledge about consumers in order to achieve effective interface of producers and consumers. The course is highly interdisciplinary, drawing heavily on psychology and sociology, and the focus throughout is on the link between consumer behavior and marketing strategy. Same as BUS 362.

**ECO 380 Econometrics**

<table>
<thead>
<tr>
<th>Fall</th>
<th>4 credit hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prereq: ECO 115 and MAT/PSY/SOC 224, or consent of instructor</td>
<td></td>
</tr>
</tbody>
</table>

This course is designed for students who obtained basic statistical concept and elementary econometrics through MAT 224. The course provides students with an advanced level of research methodology to analyze business and economic problems. The course focuses on departing Gauss-Markov assumptions and learning non-linear regression model, time series (including serial correlation), panel data, simultaneous equations model, and generalized least squares (GLS) methodology, so that students can conduct research analysis correctly. During the course students will use actual data of business and/or economics to conduct a research analysis, for which students use the statistical software, STATA, most commonly used in universities and the business field. Same as BUS 380.
**ECO 475 Strategic Implementation Project** 3 credit hours

Fall

Prereq: ECO majors with senior standing having completed all core requirements with a grade of “C-” or better. Non-EBA majors must have senior standing and consent of instructor. Non-EBA majors who wish to have ECO 475 substitute for their major or departmental capstone course must have senior standing, consent of instructor, and consent of department chair in their major field.

This course is the senior capstone for economics majors. Students will work in teams to solve complex business problems in a simulated boardroom setting as they address and solve a real-life business challenge that has been presented to them by Franklin College Alumni or others who have current and relevant projects to complete. Students are expected to synthesize material in all business, economics, and accounting courses in preparing solutions to these problems, and to present their solutions with a formal oral and written report directly to the business owners/managers who tasked them with the project. Teams will be expected to defend their solutions/suggestions, and prepare any follow-up work requested by the business owners/managers. Some time will be spent on resume development and job search/interview strategies. Depending upon project and project sponsor’s wishes, this course may be followed in the subsequent spring semester by an optional SNT 489 (Senior Internship Project, 1-3 credit hours, Spring) serving as a Strategic Implementation Project Follow-Up Internship.

**ECO 482 Economics Practicum** 1-2 credit hours

A supervised, pre-approved experience which allows a student to pursue specific learning goals and/or be involved in a field experience during the regular academic semester.

**ECO 490 Independent Study** 1-2 credit hours

Prereq: departmental consent

Course is designed to encourage student initiative and to provide a degree of flexibility in the departmental program. Normally the subject is not sufficiently or appropriately covered in regular departmental course offerings.

**ECO 498 Portfolio** No credit

Spring

The portfolio requirement will be met by creating the portfolio. Students will develop a comprehensive portfolio documenting skills learned and assessment of such skills.

**ECO 499 Senior Competency Practicum** No credit

Spring

Satisfactory performance on ETS major field test in economics. Passing grade ‘D-’ or better.
Education

Director of Teacher Education: S. Ingles
Accreditation Coordinator: S. Ingles
Department Chair: A. Schulz
Coordinator of Field Experiences: A. Schulz
Teacher Licensing Advisor: C. Prather
Department Members: K. Deppe, S. Hall, S. Ingles, A. Schulz

Major: Elementary Education (requires a minor or concentration as noted below) The program is currently under review for state approval.

Minor: Education Studies (open to all majors except Elementary Education); English as a New Language (ENL) non-teacher licensure minor is only available to those Elementary Education majors formally admitted to the Elementary Education program prior to August 1, 2020.

Minor or Concentration Area Required for Elementary Education Licensing:
A candidate for Elementary Teacher Licensing in Indiana must complete the Elementary Education major and a minor or concentration area as defined in the state of Indiana Elementary Education Curriculum Requirements. Proof of completed minor or concentration areas is reported to the Teacher Licensing Advisor. Acceptable college minors and concentration areas are those in the following areas: Language Arts, Mathematics, Science (Chemistry, Life Science, Physics), Social Studies (Economics, Government and Citizenship, Historical Perspectives, Psychology, Sociology), Physical Education, Health Education, Fine Arts (Instrumental and General Music, Theater Arts, Visual Arts, Vocal and General Music), World Languages (French, Spanish), Computer Education, and Journalism.

Concentration areas are only for Elementary Education majors. A concentration is intended to strengthen the licensing candidate in an area related to teaching in an elementary school. A concentration area consists of a minimum of 9 hours within another major area of study, with a required grade of 2.0. Any course with a LA/EDE/EDU prefix is excluded. Activity courses and those with pass-fail designations do not count towards the 9 hours. Concentration areas required for Indiana teacher licensing are tracked by the candidate with the assistance of the candidate’s academic advisor and the Education Department.

The Teacher Education Program at Franklin College focuses on preparing competent, caring decision makers. It is an outgrowth of the liberal arts structure of the college. The foundation of the Franklin College Education Program is the extensive practical experience that students gain by working with children and experienced teachers in accredited school classrooms. Each Franklin College Elementary Education Department methods course is tied to a co-requisite field experience. Students acquire knowledge of how children learn, methods of teaching, and the workings of a school community through these experiences. Depth of knowledge is provided by the college’s rich and rigorous liberal arts and departmental curricula.

Compliance with regulations established by the Indiana Department of Education and state and national accreditors may alter the Education Department policies, curricula, and course content regardless of the date of enrollment at Franklin College. Candidates are advised to work closely with the Education Department academic advisors to keep abreast of any and all changes.

Academic Advising
Every candidate has an academic advisor who assists with curricular and class scheduling matters and some phases of career planning. While the academic advisors and other personnel are available for assistance, the
primary responsibility for taking appropriate and required courses to meet graduation and licensure requirements rests with the candidate.

**Admission Requirements for Elementary Education Major**
To be considered for admission into the Teacher Education Program for fall of the junior year, candidates must submit a formal application to the Education Department. Registration for junior-level courses and application to the program do not guarantee admission to the program. Admission to the Teacher Education Program is a prerequisite all 300/400 level professional education courses, field experiences, and internships.

The Education Department evaluates each application according to the admission criteria described with greater specificity in the *Teacher Education Department Handbook*. Admission criteria include:

- cumulative GPA of 3.0 (A=4.00)
- no grade below a “C” in any professional education course
- satisfactory grades in all education field experiences/internships
- passing scores on the department’s dispositional evaluations
- documentation of passing scores on nationally-normed, basic skills tests in the areas of Reading, Writing, and Mathematics
- successful completion of the following courses: EDU 124, EDU 210, EDU 222, EDE 225, EDU 230, EDE 235, EFE 284, PSY 117, LA 103 or equivalent, and LA 111

Candidates admitted to the Teacher Education Program are monitored regularly to ensure that satisfactory progress is being made toward graduation and licensure. To advance in the program, candidates must continue to meet all standards established by the Education Department as delineated in the *Teacher Education Department Handbook*.

**Transfer Credit for Elementary Education Program**
EDU 124: Critical Skills for Educators, junior-level courses, and senior-level courses are not subject to transfer credit approval.

**Minimum Grades for Elementary Education Program**
A teacher education candidate must receive a grade of a “C” or better in any professional education course.

**Minimum Grades for Education Studies Minor**
A “C” minimum is required for the minor courses.

**Background Clearance Reports for Clinical Field School Placements**
Candidates enrolled in Education Department courses will have many interactions with P-12 students during clinical field experiences and are therefore expected to be law-abiding citizens who can satisfactorily pass the P-12 school’s requirements for a criminal history check. If a clinical field school experience placement request is rejected due to issues with the candidate’s criminal history report or background check, Franklin College has no further obligation regarding placement for that term.

**Acceptance for Elementary Education Student Teaching**
Student Teaching applications must be submitted to the Coordinator of Field Experiences during the junior year. A Student Teaching placement will be sought only for those candidates who have successfully met all program requirements to date and have been approved for a Student Teaching placement by the Elementary Education Department faculty.
**Additional Fees**
All Education Department clinical field and internship experiences carry a fee as well as many Education Department courses. Fees can be found in the annually updated fees section of the academic catalog. It is the responsibility of the candidate to pay any fees associated with P-12 school experiences. Also, it is the responsibility of the candidate to pay the fees associated with nationally standardized tests that are required for admission to the Elementary Education program; the Indiana pedagogy licensing practice test (prior to graduation); and the Indiana content and pedagogy licensing tests.

**Indiana Licensing Requirements for Elementary Teachers**
Successful completion of the Elementary Education Program enables a program graduate to be eligible for an initial K-6 Elementary Generalist teaching license. To be recommended for an Indiana State teaching license by the Teacher Licensing Advisor, a graduate must submit an on-line license application after meeting all state licensing requirements. The state licensing requirements include, but are not limited to:

- Satisfactory completion of 10 or more consecutive weeks of Student Teaching
- Passing scores on all standardized tests required for licensing
- Proof of current CPR/Heimlich/AED certification per licensing guidelines
- Proof of satisfactory completion of Suicide Prevention Training per licensing guidelines
- Proof of satisfactory completion of all college and elementary teacher education program requirements including a minor or concentration area

Note: Official licensing test scores, CPR/Heimlich/AED certification, and Suicide Prevention Training certification must be on file at the Franklin College Education Department along with proof of minor or concentration area completion.
**Elementary Education**

The elementary teaching program is based on a broad general education background with a major in elementary education. The program is tightly structured. Consequently, interested students must work closely with their advisors to complete related-area requirements in a timely, sequential manner. Two immersive term internships are required for elementary education majors.

**Elementary Education Major**

**Professional Education Requirements:** *Students must earn at least a “C”*

- EDU 124 Critical Skills for Educators
- EDU 210 Educational Philosophy, Law, & Ethics
- EDU 222 Child Development and Educational Psychology
- EDE 225 Standards-Based Planning & Digital Learning
- EDU 230 Survey of Exceptional Children
- EDE 235 Teaching English Language Arts-Elementary
- EDU 315 Human Diversity in the Classroom
- EDE 330 Teaching Exceptional Children-Elementary
- EDE 337 Teaching Science-Elementary
- EDE 344 Scientifically Based Reading Instruction (K-3)
- EDE 345 Scientifically Based Reading Instruction (Grades 4-6)
- EDE 366 Teaching Math-Elementary
- EDE 424 Teaching Health & Wellness-Elementary
- EDE 443 Interdisciplinary Unit Planning and Teaching: STEAM-Elementary
- EDE 444 Teaching Social Studies-Elementary
- EDE 456 Seminar in Student Teaching
- EDE 457 Assessment and Classroom Management-Elementary
- EDE 499 Senior Competency Practicum

**The following course**

- PSY 117 General Psychology

**Optional Coursework**

- EDE 401 CPR/AED/Heimlich Certification for Education Majors

**Field Experiences:** *A grade of Satisfactory “S” is required in all field experiences. Students must earn at least a grade of “C” in EST 489 Student Teaching.*

- EFE 284 Field Experience in Elementary Education
- EFE 384 Field Experience in Elementary Education
- EFE 385 Field Experience in Elementary Education
- EFE 484 Field Experience in Elementary Education
- EST 489 Student Teaching in Elementary Education

**Immersive Term:** *A grade of satisfactory “S” is required in all internships*

- INE 200 Internship in Education
- INE 300 Internship in Education
Elementary Education Major – Required Minor or Concentration
Acceptable college minors and concentration areas are those in the following areas: Language Arts, Mathematics, Science (Chemistry, Life Science, Physics), Social Studies (Economics, Government and Citizenship, Historical Perspectives, Psychology, Sociology), Physical Education, Health Education, Fine Arts (Instrumental and General Music, Theater Arts, Visual Arts, Vocal and General Music), World Languages (French, Spanish), Computer Education, and Journalism. See section introduction for more information.

Education Studies Minor (non-licensure): Courses and internships combined equal 18 hours of credit.
The Education Studies Minor may be combined with any major outside of elementary education. All minor courses must be completed with a grade of “C” or better. The courses may be completed in any sequence except for those required as prerequisites for the second internship.

Core Requirements (15 total credit total)
- EDU 210 Educational Philosophy, Law, and Ethics (3 credits)
- EDU 222 Child Development and Educational Psychology (2 credits)
- EDU 315 Human Diversity in the Classroom (3 credits)
- EDU 328 Instructional Strategies, Educational Technology, and the Learning Process (3 credits)
- EDU 422 Content Reading (2 credits)
- EDU 457 Effective Methods for Assessment and Evaluation (2 credits)

Plus, two Immersive Term Internships: A grade of satisfactory “S” is required for all internships. (3 total credit hours)
- INS 200 Internship in Secondary Education (1 credit)
- INS 300 Internship in Secondary Education (2 credits)

Civic Learning exploratory

School professionals and education policymakers must understand the complex contexts in which students learn in U.S. schools. Accordingly, students in this course will consider the legal, social, and ethical challenges facing teachers and other school professionals. The course will address philosophical underpinnings of the American system of education. Additionally, students in the class will learn about significant legal frameworks that govern teaching and learning in U.S. schools, with a keen eye toward professional competence in classroom and school leadership. Course will survey historic and contemporary issues in school law, ethics, and educational philosophy.

This course focuses on methods for planning, delivering, and assessing evidence-based science instruction that fosters students' understanding of the natural sciences: physical science, life science, and earth science. Candidates will prepare and teach elementary science lesson plans based on state and national standards. Points of emphasis include hands-on experiences, inquiry, and practice.
**EDE 344 Scientifically Based Reading Instruction (K-3)**

| Junior year | Prereq: Admission to the Elementary Education program  
Co-req: EFE 384 |
---|---|

This course focuses on methods for planning, delivering, and assessing reading instruction--grounded in scientifically based reading research (SBRR)--for early elementary classrooms (K-3). Major theoretical, conceptual, and evidence-based components of reading development will be examined, including concepts of print, phonemic awareness, phonics, fluency, vocabulary, and text comprehension. Foundations of language acquisition and literacy development, including cognitive, linguistic, cultural, social, and motivational factors that affect language acquisition and literacy development will be explored. Points of emphasis include direct, explicit, multi-sensory interventions and extensions; systematic observation and documentation; and progress monitoring practices.

**EDE 345 Scientifically Based Reading Instruction (Grades 4-6)**

| Junior year | Prerequisites: EDE 344, EDE 366, EFE 384, & admission to the Elementary Education program  
Coreq: EFE 385 |
---|---|

This course focuses on methods for planning, delivering, and assessing reading instruction, grounded in scientifically based reading research (SBRR) for upper elementary classrooms (Grades 4-6). Candidates will examine the major components of reading development and demonstrate the ability to provide assessment, instruction, intervention, extension, and ongoing progress monitoring in reading. Points of emphasis include fluency, vocabulary, text comprehension, and effective differentiated reading instruction (RtI) to match students' evidence-based strengths and needs in reading.

**EDE 366 Teaching Math-Elementary**

| Junior year | Prereq: Admission to Elementary Education program  
Coreq: EFE 384 |
---|---|

This course focuses on methods for planning, delivering, and assessing evidence-based math lessons that foster elementary students' understanding of mathematics. Candidates will prepare and teach mathematics lesson plans based on state and national standards. Points of emphasis include alternative assessment techniques, problem-solving skills, use of manipulatives, and the development of student-centered learning environments that integrate with other subjects in the curriculum as well as the child’s real world.

**EDU 401 CPR/AED/Heimlich Certification for Education Majors**

| Senior year | Prereq: Admission to Elementary Education Program or officially declared Education Studies minor or consent of the instructor |
---|---|

This American Red Cross certification class is an opportunity for graduating education majors to meet the Indiana Department of Education licensing requirement IC 20-28-5-3(c) which requires applicants to hold a valid certification in each of the following procedures: 1) cardiopulmonary resuscitation that includes a test demonstration on a mannequin, 2) removing a foreign body causing an obstruction in an airway, and the Heimlich Maneuver; and 3) the use of an automated external defibrillator (AED).
**EDE 424 Teaching Health & Wellness-Elementary**

</tbody>
</table>

Taken concurrently with student teaching, this course supports candidates’ transitions from the role of a college student to the role of a professional educator. Points of emphasis include the state teacher evaluation process, collaboration strategies with families and communities, job-embedded professional development, PLCs, and job-seeking strategies.
EDE 457 Assessment and Classroom Management - Elementary

2 credit hours

Senior year

Prereq: Admission to Elementary Education Program and all course required in the major except EDE 456, EDE 499, INE 300, & EST 489
Coreq: EDE 484

This course explores the fundamental concepts and strategies that support effective assessment and classroom management. Candidates will prepare evidence-based assessment plans and classroom management plans for their intended level of licensure. Points of emphasis include formative and summative assessments, the use of RTI to track and support student learning, and effective classroom management strategies.

EDE 490 Independent Study

1-2 credit hours

Prereq: offered with consent of instructor

Courses are designed to encourage student initiative and to provide a degree of flexibility in the departmental program. Normally the subject is not sufficiently or appropriately covered in departmental course offerings.

EDE 499 Senior Competency Practicum

No credit

Senior year

Coreq: EDE 456 & EST 489

Completion of Senior Competency Practicum with a grade of “C” or higher.

EFE 284 Field Experience in Elementary Education

1 credit hour

Sophomore year

Prereq: EDU 124 or consent of the instructor
Coreq: EDE 225 & EDE 235

Active participation in an elementary classroom one full day each week across 12 weeks. Special emphasis is given to observation of general teaching and management principles.

EFE 384 Field Experience in Elementary Education

1 credit hour

Junior year

Prereq: Admission to the Elementary Education program
Coreq: EDE 344 & EDE 366

Active participation in an elementary classroom one full day each week across 12 weeks. Special emphasis is given to beginning instructional delivery practices (facilitating learning activities) for elementary school learners.

EFE 385 Field Experience in Elementary Education

1 credit hour

Junior year

Prereq: EFE 384 & Admission to the Elementary Education program
Coreq: EDE 330, EDE 337 & EDE 345

Active participation in an elementary classroom one full day each week across 12 weeks. Special emphasis is given to more advanced proficiency in the instructional delivery of learning activities for elementary school learners.

School professionals and education policymakers must understand the complex contexts in which students learn in U.S. schools. Accordingly, students in this course will consider the legal, social, and ethical challenges facing teachers and other school professionals. The course will address philosophical underpinnings of the American system of education. Additionally, students in the class will learn about significant legal frameworks that govern teaching and learning in U.S. schools, with a keen eye toward professional competence in classroom and school leadership. Course will survey historic and contemporary issues in school law, ethics, and educational philosophy.

Promotes curricular and instructional techniques and approaches for culturally diverse classrooms, including strategies for working with English Language Learners. To promote overall student well-being, candidates will learn effective strategies for cross-cultural communication involving students and families. Provides opportunities to explore and learn about ideas, people, cultures, and biases that impact how teachers conceptualize the world, and includes a student-directed culturally responsive teaching project.

Develops evidence-based instructional strategies for grades 5-12 pre-service teachers. Students will focus on meeting the multiple needs of learners while developing skills related to lesson planning and curricular mapping that meet state and national standards. Emphasis is placed on teaching skills and strategies that develop critical- and creative-thinking skills in learners and on the development of integrated curriculum approaches. Students will employ educational technology and knowledge of information literacy to enhance learning processes and student learning outcomes. Topics include classroom management and methods of assessment.

Engineering
Cooperative Program in Engineering with
Purdue University School of Engineering and Technology (IUPUI)

Cooperative Advisor: J. Boardman (jboardman@franklincollege.edu)

Franklin College maintains a cooperative “3+2” program with the Purdue University School of Engineering and Technology at Indiana University-Purdue University Indianapolis (IUPUI). Students in this program earn a B.A. degree from Franklin College in Applied Mathematics and a B.S. degree from Purdue University in one of three engineering fields, typically in the span of five years. The engineering degrees available through this program are:
- Computer Engineering (B.S.Cmp.E.)
- Electrical Engineering (B.S.E.E.)
- Mechanical Engineering (B.S.M.E.)

Students will declare a major in Applied Mathematics and follow that degree program as stated in the catalog. Students with a declared enrollment in the 3+2 engineering program will be given priority during registration in subsequent semester(s).

Students following the 3+2 program will be required to make certain selections in their liberal arts core and for major courses currently listed as electives in order to satisfy the engineering requirements at IUPUI. Those choices are as follows:

**Computer Engineering**
- CHE 121 General Chemistry I
- CMP 142 Computing II
- ECO 115 Principles of Economics*
- MAT 181 Discrete Mathematics I
- MAT 182 Discrete Mathematics II
- PHY 211 & 203 General Physics I and Lab
- PHY 212 & 204 General Physics II and Lab

**Electrical Engineering**
- CHE 121 General Chemistry I
- CMP 142 Computing II
- ECO 115 Principles of Economics*
- PHY 211 & 203 General Physics I and Lab
- PHY 212 & 204 General Physics II and Lab

**Mechanical Engineering**
- CHE 121 General Chemistry I
- CMP 142 Computing II
- ECO 115 Principles of Economics*
- PHY 211 & 203 General Physics I and Lab
- PHY 212 & 204 General Physics II and Lab
*ECO 115 Principles of Economics satisfies the Human Behavior exploratory requirement at Franklin College and the economics requirement for the IUPUI Engineering Program.

**Note:** IUPUI recommends CHE 122 General Chemistry II for each of these engineering programs, but it is not a requirement.

For students intending on pursuing Computer, Electrical, and Mechanical Engineering degrees and who are therefore majoring in Applied Mathematics:

- The courses indicated in the tables above satisfy the “9 additional credit hours” requirement for the major as well as the Laboratory Science exploratory requirement for the liberal arts core.
- CMP 130 Introduction to Computing and PDP 200 Preparing for Your Internship are both waived as requirements for the Applied Mathematics degree for students in the engineering program.
- INT 261 may be satisfied by an internship in engineering done through IUPUI if the student chooses.

Information on specific coursework in these programs is available at [http://www.franklincollege.edu/academics/majors/engineering](http://www.franklincollege.edu/academics/majors/engineering).

During the sophomore and junior years in the engineering program at Franklin College, students take one course each semester at IUPUI through the Consortium for Urban Education (CUE), also referred to as cross-registration. These courses are limited in seating and need to be requested through the Academic Records Office at Franklin College well in advance. (CUE requests are not processed at the hosting schools until their students have completed registration.) Member schools of the consortium require a student to enroll through their home school (Franklin College) and pay all tuition and fees through the student’s home school. Any other fees and books for the CUE courses are the responsibility of the student. The student will not receive a transcript from the host institution; instead the grade is sent to the Academic Records Office at Franklin College to be recorded on the Franklin College transcript and is entered as a grade; however, the student’s GPA is not impacted since the course was taken off campus. If your request for cross-registration gets denied for any reason, please see Dr. John Boardman immediately because we can usually obtain special permission to enroll our engineering students. All questions regarding CUE/cross registration should be directed to the Assistant Registrar in the Academic Records Office.
English and Creative Writing

**Department:** English  
**Department Chair:** G. Phillips  
**Department Members:** C. Buchen, K. Burpo, S. Crisafulli, R. Erable, C. Moody, G. Phillips, K. Schmidt

**Major:** English, Creative Writing  
**Minors:** English, Creative Writing, Professional Writing

The English and Creative Writing majors are designed to develop students who can read, write, speak, and argue intelligently and sensitively, and who know the great artistic achievements and profound insights into human experience which our literary heritage provides. Both majors call for extensive preparatory work in the foundations of writing and literature, particularly British and American. Upper-division courses offer specialized work in periods, genres, literary research and scholarship, written expression, and the history and structure of English. Students who complete these majors develop proficiency in reading, writing, and thinking critically, and have a well-rounded knowledge of English literature; thus, they acquire the skills needed to pursue a variety of graduate programs and/or a variety of careers—in public service, business, law, education, and publishing.
**English Major**

English majors must earn a *C* or better in LA 201 and ENG 210. They must earn a *C-* or better in all other ENG and prerequisite courses.

**Core Requirements**

- ENG 117 World Literature I
- ENG 118 World Literature II
- ENG 210 Intro to Literary Research
- ENG 410 Senior Seminar
- ENG 485 Communication Consulting Project
- ENG 499 Senior Competency Practicum

**One course from each of the following categories**

*Category A: Topics in Literature*
- ENG 231 Global Literature
- ENG 232 Greek Literature
- ENG 234 African American Literature
- ENG 235 Native North American Literature
- ENG 236 Gender & Sexuality in Literature
- ENG 238 American Minority Literature

*Category B: Language*
- CWR 150 Introduction to Creative Writing
- ENG 224 Introduction to Linguistics
- ENG 227 Advanced Grammar
- ENG 228 Advanced Composition

*Category C: Pre-1800 Historical & Cultural Contexts*
- ENG 307 Early Modern & Enlightenment British Literature
- ENG 308 Old & Medieval British Literature
- ENG 333 Shakespeare
- ENG 355 Early American Literature

*Category D: Post-1800 Historical & Cultural Contexts*
- ENG 312 Romantic & Victorian British Literature
- ENG 314 Modern & Contemporary British Literature
- ENG 359 Realist & Modernist American Literature
- ENG 360 Contemporary American Literature

**Additional required coursework**

English majors are required to take an additional three to four credits at the 200 level or higher. Choices include the category courses above, plus:

- ENG 300 Topics in English
- ENG 375 Dramatic Literature I
- ENG 376 Dramatic Literature I
- CWR 210 Journal Editing Leadership
- CWR 211 Journal Publishing Leadership
- CWR 270 Fiction I
- CWR 280 Poetry I
- CWR 280 Poetry I
- CWR 290 Creative Nonfiction
- THE 245 Playwriting
Students may also count toward the English major one four-credit, upper-level French or Spanish literature course; this course will count as four undistributed ENG credit hours.

**Professional Development Requirements**

**ENG 385** Professional Development in English

**One of the following courses**

**ENG 482** English Practicum (approved as a PDP experience for 2-4 hours)

**SNR/SNT 489 (ENG)** Professional Development Experience in English

**Related field requirement**

Twelve semester hours from related fields are to be selected in consultation with the student’s departmental advisor. (Note: The agreed list of courses must be submitted to the Academic Records Office, in writing, by the academic advisor). English majors may use the Creative Writing major or minor as a related field. All related field requirements must be completed with a grade of C- or better.

**Creative Writing Major**

Creative Writing majors must earn a C or better in CWR 150, LA 201, and ENG 210. They must earn a C- or better in all other CWR, ENG, and prerequisite courses.

**Core Requirements**

**CWR 150** Introduction to Creative Writing

**CWR 270** Fiction I

**CWR 280** Poetry I

**CWR 499** Senior Competency Practicum

**ENG 118** World Literature II

**ENG 210** Introduction to Literary Research

**ENG 360** Contemporary American Literature

**One of the following courses**

**CWR 370** Fiction II

**CWR 380** Poetry II

**One of the following courses**

**ENG 231** Global Literature

**ENG 232** Greek Literature

**ENG 234** African American Literature

**ENG 235** Native North American Literature

**ENG 236** Gender & Sexuality in Literature

**ENG 238** American Minority Literature

**Additional required coursework**

Creative Writing majors are required to take two additional CWR and/or ENG courses at the 200-level or higher. Choices include those listed above, plus:

**CWR 210** Journal Editing Leadership

**CWR 211** Journal Publishing Leadership

**CWR 290** Creative Nonfiction

**CWR 300** Topics in Creative Writing

**ENG 312** Romantic & Victorian British Literature

**ENG 314** Modern & Contemporary British Literature

**ENG 333** Shakespeare

**ENG 355** Early American Literature
ENG 224 Introduction to Linguistics   ENG 359 Realist & Modernist American Literature
ENG 227 Advanced Grammar   ENG 360 Contemporary American Literature
ENG 228 Advanced Composition   ENG 375 Dramatic Literature I
ENG 307 Early Modern & Enlightenment British Lit   ENG 376 Dramatic Literature II
ENG 308 Old & Medieval British Literature   THE 245 Playwriting

Professional Development Requirements
CWR 385 Professional Development in Creative Writing

One of the following courses
CWR 482 Creative Writing Practicum (approved as a PDP experience for 2-4 credits)
SNR/SNT 489 (CWR) Professional Development Experience in Creative Writing

Related field requirement
Twelve semester hours from related fields are to be selected in consultation with the student’s departmental advisor. (Note: The agreed list of courses must be submitted to the Academic Records Office, in writing, by the academic advisor). Creative Writing majors may use the English major or minor as a related field. All related field requirements must be completed with a grade of C- or better.

English Minor (19 hours)
English minors must earn a C or better in LA 201 and ENG 210. They must earn a C- or better in all other ENG and prerequisite courses.

Core Requirements
ENG 117 World Literature I
ENG 118 World Literature II
ENG 210 Introduction to Literary Research

Additional required coursework
An additional 8 hours of ENG course work at the 200-level or higher.

Creative Writing Minor
Creative Writing minors must earn a C or better in CWR 150. They must earn a C- or better in all other CWR, ENG and prerequisite courses.

Core Requirements
CWR 150 Introduction to Creative Writing

Two of the following courses
CWR 270 Fiction   CWR 370 Fiction II
CWR 280 Poetry I   CWR 380 Poetry II
CWR 290 Creative Nonfiction   THE 245 Playwriting

Additional Required Coursework
Creative writing minors are required to take an additional 7-8 credits of ENG course work at the 200 level or higher.
Professional Writing Minor (15-17 hours)

Core Requirements
   ENG 227 Advanced Grammar
   ENG 485 Communications Consulting Project

One of the following courses
   CWR 150 Introduction to Creative Writing
   ENG 228 Advanced Composition

Two of the following courses
   CWR 110 Journal Editing
   CWR 111 Journal Publishing
   MMJ 115 Reporting, Interviewing, and Newswriting
   MMJ 135 Editing for Print and Online

ENG 410 Senior Seminar
Fall, senior year
Prereq: At least two 300-level courses
Coreq: ENG 499
Senior capstone course focusing on undergraduate research. Under faculty supervision, students will significantly revise a major writing project from a 300-level course into an expanded and more fully researched undergraduate thesis. Students will also write reflections and will publicly present their project or a narrative of their research process.

ENG 482 English Practicum
Fall, senior year
Prereq: instructor permission
A supervised, pre-approved experience that allows a student to pursue specific learning goals and/or be involved in a field experience during the regular academic year. Students with junior or senior standing who wish ENG 482 to count as the required Professional Development Experience in English (SNR/SNT 489 [ENG]) must gain departmental approval of their proposal.

ENG 485 Communications Consulting Project
Fall, senior year
Civic Learning exploratory
An examination of the ways in which students can apply their skills in the workplace and serve their communities. Students will work in teams on a communications consulting project for a local nonprofit or similar organization. Special emphasis given to professional development skills, particularly communication, project management, and consulting. Same as NPL 485.

ENG 490 Independent Study
Fall, senior year
Prereq: instructor permission
Courses are designed to encourage student initiative and to provide a degree of flexibility in the departmental program. Normally the subject is not sufficiently or appropriately covered in departmental course offerings.

ENG 499 Senior Competency Practicum
Fall, senior year
Coreq: ENG 410
The composing of a well-articulated and researched literary analysis and the public presentation of that work.

SNR/SNT 489 Professional Development Experience in English
Fall, junior year
Prereq: junior or senior standing
Coreq: ENG 385
An internship experience related to the field of English that calls upon skills in critical thinking, writing, reading, and analysis. Pass-Fail.

Creative Writing Course Descriptions

CWR 110 Journal Editing
Fall
2 credit hours
An introduction to the process of editing a literary magazine, including the selection process, advertising, and editing. First part of a two-semester sequence. Concurrent or prior enrollment in LA 101 recommended but not required.

Exercise Science

Department Chair: K. Noerr
Department Members: M. Adolphs, M. Britner, K. Eiler, A. Heavrin, K. Noerr

Major: Exercise Science
Minors: Fitness; Coaching

Exercise science is the study of physiological and functional adaptations to movement. The exercise science major at Franklin College provides unique hands-on opportunities to be involved in clinical and community programs which provide exercise-related services to a variety of populations. Through the curriculum, students will develop the knowledge to describe the relationship among physical activity, functional capacity, health and disease across the life span. It will also prepare students for positions in exercise testing and prescription or in clinical settings, such as health clubs, corporate fitness facilities or cardiac rehabilitation centers. An exercise science degree will provide a solid foundation for entry into graduate school in related disciplines such as physical therapy and rehabilitation, biomechanics, nutrition, exercise physiology, sports medicine, chiropractics, or other healthcare fields.

Admission to Exercise Science Program
The application process for admittance to the Exercise Science will begin in April of each year. After final grades are received in the spring, all application materials will be reviewed by the Exercise Science review committee. A decision is reached on each candidate’s acceptance/declination into the Exercise Science Program by June 1st. Candidates will be notified of their acceptance/declination by email. Candidates will be asked to send e-mail notification confirming acceptance into the Exercise Science Program. The maximum number of students accepted into the program each graduation year will not exceed 25.

Admissions Process for 1st Year Students
1. Receive a grade of “C” or higher in EXE 234 and EXE 244
   a. Each candidate must have taken or be currently taking EXE 234 Introduction to Exercise Science and EXE 244 Introduction to Strength and Conditioning Methods. A grade of ‘C’ or higher in each course is required. If taking either of the courses during the spring semester, admission into the Exercise Science Program is contingent on a grade of ‘C’ or higher at the end of the course.

2. Obtain an overall minimum GPA of 2.5 (A = 4.00)
   a. A minimum cumulative GPA of 2.5 (A = 4.00) must be achieved and maintained upon admittance to the program. Admission into the Exercise Science Program is contingent on an overall GPA of 2.5 (A = 4.00) at the completion of the spring semester. Students must receive a 2.0 GPA or above by the end of immersive term to be offered an interview.

3. Complete at least one job observation within the health field for a minimum of two hours
   a. Each candidate is required to complete one job observation within the health field. The job observation should be a minimum of two hours in duration. Candidates should observe the skills needed to be a dedicated professional. Documentation forms to confirm observations may be obtained from the Exercise Science lab and must submitted as part of the application materials. Students will be expected to answer questions regarding the job observation during the interview. The observation should be completed no earlier than September 1 and must be completed prior to submitting the application.
4. Submit an application, resume and personal statement
   a. As part of the process for acceptance into the program, each candidate must submit an application, up-to-date resume, and a personal statement. Professionalism and written communication skills in these materials will be part of the assessment by the Exercise Science Review Committee.

5. Complete an interview and demonstrate understanding of the cognitive (knowledge), psychomotor (skills) and affective (abilities) competencies needed to become a strong professional in the health field
   a. Upon receipt and review of all proper application materials (application, resume, personal statement, and job observation documentation form), candidates will be asked to sit for an interview with the Exercise Science Program Review Committee. As part of the interview, candidates will be asked to demonstrate awareness and understanding of cognitive (knowledge), psychomotor (skills) and affective (abilities) competencies needed within the field of Exercise Science as identified by the job task analysis domains produced by the American College of Sports Medicine.

6. Demonstrate ability to perform clinical skills specifically associated to the health-related components of fitness
   a. Candidates should be able to demonstrate clinical health assessments on a subject to display interpersonal skills and confidence to work with clients or patients within the profession. These assessments will occur during the interview portion of the application process. Candidates will be asked to perform skill(s) learned in the prerequisite courses, EXE 234 and EXE 244.

Admissions Process for 2nd Year and Transfer Students

1. Meet the minimum admission standards for 1st year students
   a. 2nd year or transfer student candidates will need to meet the minimum standards by the time of application in spring.

2. Students must have completed ANAT 210 Applied Human Anatomy and ANAT 220 Applied Human Physiology with a “C-” or above by the end of sophomore year to graduate within the intended four year plan of study. ANAT 210 and ANAT 220 are prerequisite courses for junior-level exercise science courses. Sophomore level students and above who have not successfully completed ANAT 210 and ANAT 220 may apply but graduation may be extended by a minimum of 1 semester.

Please refer to the Transfer Student section of this catalog for the College’s requirements.

Continuance in Exercise Science Program

Students in the Exercise Science Program are expected to maintain the following minimum program standards:
- cumulative minimum GPA of 2.5 (A = 4.00) at the end of each academic semester/term
- no grade below a “C” in Exercise Science core required courses
- no grade below a “C-“ in related field required courses
- a grade of “S” in all field practicums, experiences and internships

Final grades will be reviewed for each student in the Exercise Science Program each semester.
**Probation within Exercise Science Program**

If a student does not meet the program standards, the student will be placed on probation.

1. If probation is due to not meeting the GPA minimum program standard, the student will have one semester to improve GPA to the minimum program standard. Upon completion of the subsequent semester, students must submit an application for reinstatement to the program. If the GPA does not improve by the end of the subsequent semester, the student will be dismissed from the Exercise Science Program. The student will not be able to participate in a field practicum, experience or internship until probationary status has been removed.

2. If probation is due to receiving a grade lower than “C” in an Exercise Science core required course or a grade lower than a “C-” in a related field required course, the student will have one opportunity to retake the course. The student will remain on probation until completion of the course with a satisfactory grade meeting minimum program standards. Departmental consent is required if the student is retaking the course from an institution other than Franklin College. The student will not be able to participate in a field practicum, experience or internship until probationary status has been removed. If a student is placed on probation for a grade lower than a “C” in one of the core sequenced courses (EXE 372, EXE 372L, EXE 375, EXE 425), the ability to progress through the curriculum within 4 years will be impacted. A student who is required to retake a core sequence class will delay graduation by a minimum of 1 semester. If the student does not improve the grade after the 2nd attempt, the student will be removed from the Exercise Science Program.

3. If probation is due to receiving a ‘fail’ in a field practicum, experience or internship, the student will be placed on probation. The student will have one opportunity to retake the field practicum, experience or internship and receive a satisfactory grade. If the student does not receive the satisfactory grade within one year, the student will be removed from the program.

4. Students who are placed on probation a second time, for any reason, will be automatically dismissed from the Exercise Science Program.

5. Students who receive a “C-” or below in the related-field courses of ANAT 210 or ANAT 220, or a “C” or below in EXE 372, EXE 375, or EXE 401 and placed on probation may not continue through the sequenced courses. If a student receives a “C-” or below in any other non-sequenced EXE courses, the student may continue to take EXE classes for one year. If the EXE grades do not improve to a “C-” or above in ANAT 210 or ANAT 220 or “C” or above in the sequenced courses within one (1) year, the student will be removed from the Exercise Science Program.

**Transportation to Engaged Learning Sites**

The Exercise Science Program will include service learning, experiential learning and internships. Many engaged learning opportunities will be off-campus for more varied experiences. Students in the Exercise Science Program are expected to have access to transportation to engaged learning sites and partnerships.
Exercise Science Program Expenses

The students within the Exercise Science program will incur additional expenses outside of the typical college costs. Please see below for expected costs within the Exercise Science Program:

<table>
<thead>
<tr>
<th>Type of Expense</th>
<th>Expected Time of Expense</th>
<th>Approximate Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>TB test and flu shot*</td>
<td>If required by specific engaged learning sites, typically hospital settings</td>
<td>$5 - $70</td>
</tr>
<tr>
<td>Professional attire specifically FC Exercise Science polo</td>
<td>During entire program</td>
<td>Varies</td>
</tr>
<tr>
<td>Background check*</td>
<td>If required by specific engaged learning sites, typically school systems</td>
<td>$7 - 25</td>
</tr>
<tr>
<td>Transportation to off-campus engaged learning sites</td>
<td>During entire program</td>
<td>Varies</td>
</tr>
<tr>
<td>First Aid and CPR recertification</td>
<td>Bi-annually for CPR and First Aid</td>
<td>$35-40 for each certification</td>
</tr>
<tr>
<td>Exercise Science basic clinical equipment: stethoscope, sphygmomanometer, pedometer, tape measure, heart rate monitor, and skinfold caliper</td>
<td>Transfer students who transfer in credit from another institution for EXE 234 will be expected to have the equipment used in EXE 234. Students in the Exercise Science Program are expected to keep the equipment from EXE 234 throughout the duration of the program in functioning condition.</td>
<td>$110-175</td>
</tr>
<tr>
<td>NSCA CSCS or ACSM EP-C certification examination*</td>
<td>Spring of graduation year</td>
<td>NSCA $260-445</td>
</tr>
<tr>
<td></td>
<td></td>
<td>ACSM $219-279</td>
</tr>
</tbody>
</table>

*Some expenses may be optional based upon the career goals of the student.
**Exercise Science Major**

All core requirements for the major must be completed with a grade of C or better. All related field requirements for the major must be completed with a grade of C- or better.

**Core Requirements**

- EXE 119 Concepts of Wellness
- EXE 208 Basic Principles of Nutrition
- EXE 222 First Aid and CPR/AED for the Professional Rescuer
- EXE 234 Introduction to Exercise Science
- EXE 244 Introduction to Strength and Condition Methods
- EXE 251 Muscles and Movement
- EXE 341 Organization and Administration of Health Programs
- EXE 372 Exercise Physiology
- EXE 372L Exercise Physiology Lab
- EXE 375 Exercise Testing and Prescription
- EXE 382 Motor Learning
- EXE 385 Sport and Exercise Psychology
- EXE 387 Biomechanics
- EXE 387L Biomechanics Lab
- EXE 401 Research Methods in Exercise Science I
- EXE 402 Research Methods in Exercise Science II
- EXE 425 Exercise Prescription for Special Populations
- EXE 499 Senior Competency Practicum and Professional Development Course

**One of the following courses**

- BIO 310 Immunology
- EXE 321 Advanced Strength and Conditioning Methods
- EXE 322 Pediatric Exercise Physiology
- EXE 323 Diagnostic and Laboratory Testing
- KIN 310 Diversity and Inclusion in Sport
- PHY 355 Ultrasonography
- PHY 357 Radiation and Health

**Professional Development Requirements**

- EXE 489 Professional Development Experience
- EXE 498 Professional Development Portfolio
- PDP 200 Preparing for Your Internship

**Related Field Requirements**

- ANAT 210 Applied Human Anatomy
- ANAT 210L Applied Human Anatomy Lab
- ANAT 220 Applied Human Physiology
- ANAT 220L Applied Human Physiology Lab
- KIN 315 Health/Wellness Issues & Trends in Society
- MAT 224 Basic Applied Statistics
- PSY 117 General Psychology

**MSAT Substitutions**

- MSAT 543 fulfills EXE 401 requirement
MSAT 544 fulfills EXE 402 requirement
MSAT 553, 551, & 550 fulfills EXE 489 requirement

**Fitness Minor**

**Core Requirements**

- EXE 119 Concepts of Wellness
- EXE 208 Basic Principles of Nutrition
- EXE 222 First Aid and CPR/AED for the Professional Rescuer
- EXE 244 Introduction to Strength and Conditioning Methods
- EXE 372 Exercise Physiology
- EXE 372L Exercise Physiology Lab

**One of the following courses**

- EXE 480 Fitness Internship
- EXE 483 Fitness Practicum
- KIN 480 Fitness Internship
- KIN 483 Fitness Practicum

**Related Course Requirements**

- ANAT 210 Applied Human Anatomy
- ANAT 210L Applied Human Anatomy Lab
- ANAT 220 Applied Human Physiology
- ANAT 220L Applied Human Physiology Lab

**Coaching Minor** (not a licensure area)

**Core Requirements**

*Students must earn at least a ‘C’*

- EXE 119 Concepts of Wellness
- EXE 222 First Aid and CPR/AED for the Professional Rescuer
- EXE 244 Introduction to Strength and Conditioning Methods
- EXE 385 Sport and Exercise Psychology
- PED 234 Introduction to Teaching and Coaching Physical Activities
- PED 480 Coaching Practicum

**Four hours from the following courses**

*Students must earn at least a ‘C’*

- EXE 208 Basic Principles of Nutrition
- LEA 100 Introduction to Personal Leadership Skills
- PED 110 Lifeguard Training
- PED 112 Water Safety Instructor
- PED 115 Officiating in Volleyball
- PED 116 Officiating in Basketball
- PED 333 Coaching Baseball and Softball
- PED 334 Coaching Basketball
- PED 335 Coaching Football
- PED 336 Coaching Volleyball
- PED 337 Coaching Track and Field
PED 338 Coaching Soccer
PED 339 Coaching Swimming
PED 490 Independent Study (other coaching classes by student interest)
**Exercise Science Course Descriptions**

<td></td>
<td>This course will prepare students to identify muscles commonly used in training and therapy and the function of the specific muscles. Emphasis will be on progression and modification of movements using machines, free weights, body weight, and other forms of exercise equipment along with proper stretching techniques.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
This course focuses on advanced techniques of strength and conditioning as it relates to enhancing human performance. Topics presented will include program design for enhanced resistance and conditioning techniques, along with advanced exercise performance assessment techniques. At the conclusion of the course students will have an understanding of how to assess current physiologic markers of high level performances, and how to design exercise programs for that target population. This course will also prepare students to successfully acquire the Certified Strength and Conditioning Specialist certification through the National Strength and Conditioning Association.

This course will examine the development of the pediatric population from a physical perspective. Emphasis will be on motor development, system development, and performance development. Physiological responses to exercise will be investigated as well as current issues specific to the population including thermoregulation, genetic regulation, and early specialization.

This course will discuss the knowledge and skills needed for basic diagnostic testing measures used by exercise physiologists. Students will focus on the skills needed for medical communication and interpretation. Topics presented will include blood studies, electrocardiography, ultrasound, x-rays, and nuclear scanning. The rationale and clinical implications of the tests will be investigated.

This course will provide the necessary knowledge and skill of organization and administration in various exercise science settings and fields. Additionally, students will gain the knowledge and skills in professional development and responsibility necessary to function as a professional in exercise science related fields. Same as PED 341.

Exercise physiology is the study of acute and chronic adaptations of the body’s physiological systems to movement and physical conditioning. Physiological foundations and the development of physiological fitness components will be discussed. A laboratory component is integrated into class sessions. Must be taken concurrently with EXE 372L. Same as BIO 372.

Lab component to EXE 372 Exercise Physiology. Same as BIO 372L.

This course will introduce students to the research process in the various areas of exercise science. Students will learn the various elements associated with the design and process of both qualitative and quantitative research, including the process of reviewing relevant literature, the development of a researchable question, and the design of a method to solve a research question. Students will also learn to become selective consumers of published research through the process of literature review and learn the ethical issues associated with research and progress to the human subject protection application with the college’s Institutional Review Board (IRB).

The course is designed to help prepare students to become a professional within the health field. This is accomplished through a series of practical experiences, participation in professional organizations, volunteer and service activities, attending workshops, seminars, cooperative activities, community involvement, etc. that actively involve students throughout their senior year. Exercise science majors will finalize materials for their professional development portfolio. Artifacts from each of the Exercise Science core classes as well as the professional development experiences should be included in the portfolio.
EXE 499 Senior Competency Practicum and Professional Development Course  
No credit  
Fall and Spring  
The Senior Competency Practicum is designed to help the student grow professionally by applying the knowledge and skills acquired in the major. The student is required to successfully pass either the National Strength and Conditioning Association’s Certified Strength and Conditioning Coach® certification, the American College of Sports Medicine Certified Exercise Physiologist certification or a comprehensive practice test for the certifications. Successful completion of the senior competency practicum also meets the professional development course component for the senior year experience.

</table>
Students who participate in a varsity sport(s) as a player, manager, cheerleader or dance team member may take PED 009. A student may receive only one credit for a particular sport each academic year.

**PED 110 Lifeguard Training**
Spring, on demand
The American Red Cross Lifeguard Training program provides lifeguards with the skills and knowledge necessary to keep patrons of aquatic facilities safe in and around the water. **Skill Prerequisite:** Must be able to swim 300 yards, tread water for 2 minutes, and retrieve a 10lb object from a 7-10 ft. depth in 1 minute, 40 seconds. **Course Fee:** $50. Graded Pass/Fail.

**PED 112 Water Safety Instructor**
Fall and Spring, on demand
The American Red Cross Water Safety Instructor course provides instructor candidates the training needed to teach courses in the American Red Cross Swimming and Water Safety Program by developing their understanding of how to use the course materials, how to conduct training sessions and how to evaluate participants’ progress. **Prerequisite:** Candidates must be at least 16 years old (proof of age required) by last class session and successfully complete the basic skills test the first night of class. **Basic Skills Strokes:** Front Crawl, 25 yds.; Back Crawl, 25 yds.; Sidestroke, 25 yds.; Breaststroke, 25 yds.; Elementary Backstroke, 25 yds.; Butterfly, 15 yds. Candidates must also maintain position on back for 1 minute in deep water and tread water for 1 minute.

**PED 115 Officiating in Volleyball**
Fall, on demand
Responsibilities, mechanics, and techniques of officiating volleyball are learned through practical experience. IHSAA certification is available. **Course fee:** $50 (fee also covers PED 116).

**PED 116 Officiating in Basketball**
Spring, on demand
Responsibilities, mechanics, and techniques of officiating basketball are learned through practical experience. IHSAA certification is available. **Course fee:** $50 (fee also covers PED 115).

**PED 234 Introduction to Teaching and Coaching Physical Activities**
Fall
This course serves as an introduction for students who may enter a profession that includes the teaching and/or coaching of physical activities. Students will be presented with history, philosophies, and principles underlying the current status and nature of physical activity and sport within the school curriculum and society. The course will introduce background information and include discussion on sport psychology, pedagogy, and physiology.

**PED 333 Coaching Baseball and Softball**
Spring, odd academic years (second seven weeks)
A study of offensive and defensive strategies and techniques, practice and game responsibilities, rules and related coaching concepts and ideas are covered. **PED 234 is highly recommended as a prerequisite.**

**PED 334 Coaching Basketball**
Spring (first seven weeks)
A study of individual player’s offensive and defensive skills, different offensive and defensive systems of play and other coaching responsibilities. **PED 234 is highly recommended as a prerequisite.**
PED 335 Coaching Football 1 credit hour
Fall (first seven weeks)
History, rules, offensive and defensive systems of football, current trends, and coaching methods are covered. PED 234 is highly recommended as a prerequisite.

PED 336 Coaching Volleyball 1 credit hour
Fall, even academic years (second seven weeks)
A study of team strategy, systems of play, rules, mechanics of skill development, team selection, practice organization, drills, scouting, and team statistics. PED 234 is highly recommended as a prerequisite.

PED 337 Coaching Track and Field 1 credit hour
Spring, even academic years (second seven weeks)
A study of the coaching techniques for each of the track and field events including the organization and administration of track meets, daily practice structures, and psychology of coaching track and field event competition. PED 234 is highly recommended as a prerequisite.

PED 338 Coaching Soccer 1 credit hour
Fall, odd academic years (second seven weeks)
A study of team strategy, systems of play, rules, mechanics of skill development, team selection, practice organization, drills, scouting, and team statistics. PED 234 is highly recommended as a prerequisite.

PED 339 Coaching Swimming 1 credit hour
On demand – Fall or spring (seven weeks)
This class is designed to teach students how to develop a comprehensive swimming program. Course content will include the practical development of coaching philosophy, swimming skills and progressions, training principles, practice organization, fundamentals of diving and how to develop an overall season plan. The course will also include an introduction to swimming software.
French

Department: Modern Languages
Department Chair: D. Alsop

Major: French
Minor: French

The challenges of today's world require men and women educated within a multilingual and multicultural perspective. The department of modern languages is dedicated to meeting those challenges by offering programs that open career opportunities in journalism, international business, law, Foreign Service, social and medical services, tourism, and teaching.

The department offers majors and minors in French and Spanish. The possibility of pursuing an individualized minor in language studies or other related areas can be investigated through the individualized minor program.

One semester of a modern foreign language at the 210 course level or higher will satisfy the international exploratory requirement. One semester of a modern language at the 211 course level will satisfy the diversity exploratory requirement.

Advanced Placement
Students who upon matriculation do not demonstrate proficiency equivalent to satisfactory completion of a Franklin College foreign language course numbered 111 or higher or the equivalent at another institution must complete such a course prior to graduation. If a student takes the French or Spanish placement test and places above the first-semester level, the student is eligible to receive credits for the courses below the level into which they placed, provided they successfully complete with a grade of C- or above, at Franklin College, the course into which they placed. Students may earn up to 12 hours for French or Spanish placement. Example: Students who place into the 300 level of French will receive 12 credit hours for FRE 111, 210 and 211 upon the successful completion of a 300-level course by earning a grade of C- or better. Students who place into the 200 level of French will receive eight credit hours for FRE 110 and 111 upon the successful completion of a 200-level course by earning a grade of C- or better. Credits for FRE 210 and 211 count toward the French major and minor and toward the 120 credit hours required for graduation. Advanced Placement credit for FRE 210 will fulfill the International exploratory, and Advanced Placement credit for FRE 211 will fulfill the Diversity exploratory. Credits for FRE 110 and FRE 111 only apply toward the 120 credit hours needed for graduation.

Note: Students must receive a grade of C- or better in a class in order to continue to the next level.
French Major

The minimum requirement for a modern language major is 28 semester hours, numbered above 111. Students must take at least one literature course and must receive a grade of C- or better in all 28 semester hours. The courses chosen by the student for the related field requirement must have department approval.

A maximum of 8 hours of transfer credit, AP credit, and/or advance-placement credit can be applied to the 28 hours of coursework at the 200-level or above required for the French major. In order to complete the French major, students must therefore complete at least 20 credit hours of French coursework at the 200-level or above at Franklin College, including a literature or culture class.

A French major completing a semester or more of approved study abroad can apply up to 8 additional credit hours as determined by the department toward the total 28 credit hours required for the major.

Minimum of 28 credit hours from the following courses
Must include at least one literature course
- FRE 210 Intermediate French I
- FRE 211 Intermediate French II
- FRE 300 Topics in French
- FRE 314 Career French
- FRE 315 Advanced Writing and Grammar
- FRE 331 French Civilization
- FRE 332 Masterpieces of French Literature
- FRE 334 Francophone Culture
- FRE 337 The Nineteenth-Century Novel
- FRE/CAN 340 Francophone Canadian Literature

All of the following courses
- FRE 498 Portfolio
- FRE 499 Senior Essay
- PDP 200 Preparing for Your Internship
- SNR/SNT 489 (FRE) Senior Year Internship/Project

Related Field
12 credit hours – courses chosen must have department approval and be submitted to the Academic Records Office. All related field courses must be completed with a grade of C- or better.
French Minor
A maximum of 8 hours of transfer credit, AP credit, advance-placement credit, and/or study-abroad credit can be applied to the 20 hours of coursework at the 200-level or above required for the French minor. In order to complete the French minor, students must therefore complete at least 12 credit hours of French coursework at the 200-level or above at Franklin College, including a literature or culture class.

Required Courses
- FRE 210 Intermediate French I
- FRE 211 Intermediate French II
- FRE 314 Career French
- FRE 315 Advanced Writing and Grammar

One of the following courses
- FRE 300 Topics in French
- FRE 331 French Civilization
- FRE 332 Masterpieces of French Literature
- FRE 334 Francophone Culture
- FRE 337 The Nineteenth-Century Novel
- FRE/CAN 340 Francophone Canadian Literature

FRE 499 Senior Essay

Students will be required to research, write, and revise an essay on a topic relating to their course work at Franklin College. The topic must be approved by the modern languages department. Students will be required to present their essay at a session open to the college community. Students must receive a grade of C- or better in order to pass.

LAN 120 Language Study

Upon occasion, when qualified instructors are available and student demand is sufficient, courses in languages other than French or Spanish may be offered as approved by the Vice President of Academic Affairs. These courses will apply as elective credit toward graduation requirements. Courses offered at the intermediate level or above will meet the international exploratory requirement.

LAN 300 Topics in Language

A topic of current interest in language, other than French or Spanish, will be taught. Topics will vary depending on faculty interest. Course will be offered upon the request of a faculty member and with approval of the Vice President of Academic Affairs. Depending on the topic and/or level of the course, LAN course may satisfy the international or civic learning exploratory requirement.

SNR/SNT 489 (FRE) Senior Year Internship/Project

A one-credit-hour practicum that is set up with help from the Modern Languages Department. Possibilities include, but are not limited to: working in French for a local business and helping with language programs at area schools. Students may not apply this one credit towards the 28-hours required for a major in French.
History

Department: History
Department Chair: M. Clark-Wiltz
Department Members: E. Bakhtary, M. Clark-Wiltz, L. Hurtado, K. Streit

Major: History
Minor: History

The department of history provides the means in the liberal arts curriculum by which undergraduate students learn to better understand the present and prepare for the future by studying the past.

To fulfill this mission, the department provides its students with the main outlines of European, North American, and non-Western history; cultivates in them the skills required to analyze and interpret historical phenomena; shows them how to evaluate the writings of other historians; and instructs them in the techniques of historical research and writing. As a result of this training, students majoring in history will be able to conduct historical research, write about historical topics analytically, and apply an informed historical perspective to the world in which they live. They will specifically be prepared for graduate school, employment in historical organizations, a career in teaching, or entry into professions which utilize a historical point of view combined with research and writing skills.

All history majors and minors must earn at least a C- in each of the required history courses and must earn an overall C average in all history courses. A senior competency practicum (HIS 499) is required of all history majors and includes a written and an oral examination conducted by three history professors, unless the student requests one from a related field. A grade, representing an average of the two examinations, is entered on the student’s permanent record. The senior competency practicum (HIS 499) must be passed with a grade of C in order to satisfy graduation requirements.
**History Major**

**Core Requirements**
- LA 102 The Past and Present: The World Since 1750
- HIS 120 United States History to 1877
- HIS 121 United States History since 1877
- HIS 370 Historiography
- HIS 499 Senior Competency Practicum

**Professional Development Requirements**
- HIS 200 Public History
- HIS 400 Senior Seminar (includes senior portfolio)

**One course from each category, plus one additional course from any of these categories**
*(HIS 300 topics courses may substitute for any course in the appropriate category)*

**Category A**
- HIS 231 African American History
- HIS 250 Indiana History
- HIS 325 History of American Thought
- HIS/WST 332 History of Women in the United States
- HIS 335 United States History Since 1945

**Category B**
- HIS 210 Introduction to Latin American History and Culture
- HIS 214 The South Atlantic World, 1400-1824
- HIS 230 History of Canada
- HIS 310 Modern Latin America

**Category C**
- HIS 348 Germany and Europe: 1848-1945
- HIS 350 Europe Since 1945
- HIS 356 Russian History

**Category D**
- HIS 205 World History to 1750
- HIS 340 Global Military History
- HIS 361 East Asian History
- HIS 365 History of the Middle East

**Related Field Requirement**
Twelve semester hours from related fields are to be selected in consultation with the student’s departmental advisor. (Note: the agreed list of courses must be submitted to the Academic Records Office, in writing, by the academic advisor). All related field requirements must be completed with a grade of C- or better.
**History Minor**

**Required courses**
- **LA 102** The Past and Present: The World Since 1750
- **HIS 120** United States History to 1877
- **HIS 121** United States History since 1877

**Three courses, each from different categories**

**Category A**
- **HIS 231** African American History
- **HIS 250** Indiana History
- **HIS 325** History of American Thought
- **HIS/WST 332** History of Women in the United States
- **HIS 335** United States History Since 1945

**Category B**
- **HIS 210** Introduction to Latin American History and Culture
- **HIS 214** The South Atlantic World, 1400-1824
- **HIS 230** History of Canada
- **HIS 310** Modern Latin America

**Category C**
- **HIS 348** Germany & Europe: 1848-1945
- **HIS 350** Europe Since 1945
- **HIS 356** Russian History

**Category D**
- **HIS 205** World History to 1750
- **HIS 340** Global Military History
- **HIS 361** East Asian History
- **HIS 365** History of the Middle East

</tbody>
</table>
### HIS 231 African American History

- **Credit Hours:** 4
- **Meeting:** Fall, even academic years
- **Exploratory:** Diversity

This course will examine the African-American experience from its beginnings to the present. We will study and analyze historical developments related to the process of race formation, the development of American slavery, the meanings of emancipation and freedom, resistance and civil rights movements, and cultural and community production. We will focus on the voices of African American historical actors and consider the diversity within those experiences and perspectives. This study will require placing the African-American experience in the larger context of U.S. history, understanding it as a central force that shaped and revealed other historical developments.

### HIS 250 Indiana History

- **Credit Hours:** 3
- **Meeting:** Spring, odd academic years
- **Prerequisite:** HIS 120 or 121 or consent of instructor

A study of Indiana history from prehistoric to recent times, with emphasis on the growth of a distinctive Hoosier culture. Particular areas of concentration include Indian, French and English backgrounds, frontier history, the effects of the Civil War on Hoosier social and political life, the rise of industrial and urban Indiana, and political, economic, and social developments in recent times.

### HIS 300 Topics in History

- **Credit Hours:** 3

A topic of current interest in history will be taught. Topics will vary depending on faculty interest. Course will be offered upon the request of a faculty member and with approval of the Vice President of Academic Affairs.

### HIS 310 Modern Latin America

- **Credit Hours:** 4
- **Meeting:** Fall, odd academic years
- **Exploratory:** International

This course is a survey of the history of Latin America since 1810. Major themes include the emergence of national identities, the legacies of colonialism, urbanization, industrialization, U.S. – Latin American relations, social movements, and revolutionary change.

### HIS 325 History of American Thought

- **Credit Hours:** 4
- **Meeting:** Fall, even academic years
- **Prerequisite:** HIS 120 or HIS 121 or consent of instructor

An examination of themes in American intellectual history, including systems of ideas such as Puritanism, Enlightenment thought, Transcendentalism, Social Darwinism, and Pragmatism; particular concepts such as vision of the New World, the myth of the West, and liberal versus conservative interpretations of the American experience; the lives and works of outstanding American intellectuals.

### HIS 332 History of Women in the United States

- **Credit Hours:** 4
- **Meeting:** Fall, odd academic years
- **Exploratory:** Human

This course will survey the history of women in the United States from the colonial era through the civil rights movement of the 1950s –’60s. The course will focus especially on the role of women in various social movements including: the movement to abolish slavery, the fight for women’s suffrage, reformist movements of the early twentieth century and the modern feminist movement. Students will have the opportunity to pursue a research paper on the social issues addressed in the life/work of an activist of their choosing. Same as WST 332.

### HIS 335 United States History Since 1945

- **Credit Hours:** 3
- **Meeting:** Fall, odd academic years
- **Prerequisite:** HIS 121 or consent of the instructor

This course examines major political, economic, cultural, and social developments in the U. S. from 1945 to the present.
### HIS 340 Global Military History
4 credit hours  
**Fall, even academic years** | **Diversity Exploratory**

What is war? How have war and conflict shaped the economy and politics of societies from the past and present? What is the relationship between tactics and strategy? Is there a unique Western way of fighting wars? This class discusses the relationship between the military and society across time and in different geographical scenarios, from the Ancient Greeks to the Aztecs and from the Zulu in South Africa to the Pashtun in present-day Afghanistan. The class pays special attention to the role that military innovations such as chariots, the phalanx, gunpowder, steamboats, atomic energy and terrorism, have had in shaping war and conflict, and the spread of military ideas in shaping military interactions across the globe. In this class we will use primary and secondary sources, and we will also watch war movies from different countries.

### HIS 348 Germany and Europe: 1848-1945
4 credit hours  
**Spring, even academic years** | **International exploratory** | **Prereq: LA 102 or consent of instructor**

A probe into the German bid to dominate Europe by force, beginning with the process of creating the modern German state in the mid-to-late 19th century and focusing on the two world wars, the Nazi dictatorship, and the Holocaust.

### HIS 350 Europe Since 1945
3 credit hours  
**Spring, odd academic years** | **Prereq: LA 102 or consent of instructor**

Explores the importance of the economic integration of western Europe following World War II, the creation of welfare states, the cold-war division of Europe into NATO and the Warsaw Pact countries, the collapse of the eastern block, and the integration of the eastern European countries into the modern European community.

### HIS 356 Russian History
4 credit hours  
**Fall, even academic years** | **International exploratory** | **Prereq: LA 102 or consent of instructor**

Survey of Russian history with equal emphasis on the imperial and Soviet periods. Russia’s cultural and political relationships with the West, on the one hand, and with its Asian imperial possessions, on the other hand, are prominent themes of the course.

### HIS 361 East Asian History
4 credit hours  
**Fall, odd academic years** | **International exploratory** | **Prereq: LA 102 or consent of instructor**

The history of China, Japan, and Korea, with most emphasis on the 20th-century conflict between China and Japan, World War II in the Pacific, and the Communist regime in China.

### HIS 365 History of the Middle East
4 credit hours  
**Spring, odd academic years** | **International exploratory** | **Prereq: LA 102 or consent of instructor**

The history of the Middle East from the time of Muhammad to the present. Extensive treatment is given to the 19th and 20th century roots of the present-day crises in the region.

### HIS 370 Historiography
4 credit hours  
**Fall** | **Prereq: LA 102, HIS 120, HIS 121, HIS 200 & junior standing or consent of instructor**

An introduction to the discipline of history through a study of its practitioners in Europe and North America. This course will explore the variety of approaches to the past, the conceptual and analytical tools of historians over time, and the search for patterns and laws of history. The course also includes research and writing methods for historians: choice of project; creation of a thesis question and bibliography; use of primary, secondary, and internet sources; and style and production skills.
**HIS 400 Senior Seminar**

4 credit hours

Fall

Prereq: HIS 370 & senior standing, or consent of instructor

This senior year experience allows majors to complete a substantial and original research project. The project requires students to conduct research based on primary sources, present the findings of their research in the form of an oral presentation in a conference-type setting and a written paper, and read and comment upon another student’s research findings. This course fulfills the SNR portion of the professional development requirements.

**HIS 490 Independent Study**

1-2 credit hours

Prereq: consent of instructor

Designed to encourage student initiative and to provide a degree of flexibility in the departmental program, this course may consist of special reading or research in a field of the student’s interest not sufficiently covered or appropriately covered in regular departmental courses.

**HIS 498 Senior Portfolio**

No credit

Student will create and maintain their own portfolios to be kept in the department with important written work, resumes, publicity, and any other information necessary and helpful to those from whom they ask references. The content and current nature of this portfolio will be the responsibility of the student.

**HIS 499 Senior Competency Practicum**

No credit

History majors are to present their senior research findings publicly. History faculty and students will pose questions to the student. This exercise will be graded by the history faculty, and the student will need a grade of “C” or better.
Individualized Major

An Individualized Major offers highly motivated and self-directed students an opportunity to develop a program of study tailored to meet their special talents, academic interests, and career goals. An individualized major is designed for a student who is able to document the absence of an existing major that satisfactorily meets his/her specific educational and professional objectives. A student may design an individualized major for a first or second major. However, those seeking a second major via this process may not duplicate any courses with his/her first major.

Individualized Majors are designed by students in conjunction with an Individualized Major (IM) Committee. An academic department must sponsor the proposal (see Parameter #5 below). The IM Committee is comprised of the student’s academic advisor and at least two other faculty sponsors (one of whom must be the chair of the sponsoring department). Two of these three members of this IM Committee should reflect the student’s educational objectives and career interests. Finally, a representative of the Faculty Curriculum Committee must sign at the time of approval, but is not a member of the IM Committee.

Students applying for an individualized major must meet the following requirements:
- Completed at least one full semester of college work at Franklin College.
- Minimum GPA of 2.75 prior to submitting an application.
- Class level less than junior status (< 58 credit hours). Students with junior status (58-90 hours completed) may petition the Academic Rules Committee for an exception to the academic policy. Seniors are ineligible to apply for an individualized major. Academic Rules Committee petitions are located in the Academic Records Office.

Parameters for the Individualized Major
1. As individualized majors are student specific, each student’s IM proposal must undergo all stages of the approval process.
2. The major must consist of at least 30 credits hours of core requirements with an additional 12 credit hours in a related field.
3. No more than 18 of the 30 credit hours in the major core requirements may come from an existing major at Franklin College.
4. At least 20 of the 30 core credit hours must be from courses numbered 200 or higher.
5. At least 12 of the 30 core credit hours must come from the sponsoring department.
6. No courses with an LA prefix may count toward the major.
7. No more than 6 credit hours of individualized studies may be used to complete the major.
8. The major must include a senior-level capstone experience and a senior competency practicum (499). The capstone may be an existing course or an independent study course supervised by one of the faculty sponsors.
9. Students must meet all liberal arts requirements and all other requirements for graduation.
10. All courses in the major must be completed with a grade of C- or better. Student must maintain a cumulative and major GPA of 2.00 in order to graduate with the proposed individualized major.
11. Academic courses taken for the major may not be taken on a pass/fail basis.
12. A course may not count for both the individualized major and another major.
13. This major may include regular catalog courses, immersive-term courses and experiences, off-campus courses (if approved), travel experiences, individualized studies, special topics courses, practica, and internships.
14. An individualized major must be completed within six semesters of its declaration. A student seeking an extension must gain approval from his/her IM Committee. Documentation regarding an extension must be submitted to the Academic Records Office for degree-granting purposes.
15. Any interruption, which extends beyond one semester, in a student’s academic progress toward an individualized major requires a resubmission of the IM proposal.

Development of the Proposal
1. In conjunction with the student’s IM Committee, verify that the proposed individualized major satisfies the above parameters.
2. Prepare a defense of the individualized major on the IM application, which is available in the Academic Records Office. This defense should include a rationale for the courses chosen to constitute the major and related field and an explanation of how the major will enhance the student’s educational and professional objectives. The student must explain why an existing major at Franklin will not meet these objectives. Furthermore, the student should demonstrate connections between academic interests and vocational or graduate school interests.
3. Carefully complete the individualized major application. (available in the Academic Records Office)
4. All changes to the Individualized Major must be approved by the student’s IM Committee and a representative of FCC. Any and all changes must be filed in the Academic Records Office for degree-granting purposes.

Approval Process
1. IM Committee – signatures on formal application
   o Includes academic advisor and two additional faculty members (one of whom must be the chair of the sponsoring department)
2. Faculty Curriculum Committee representative
3. Faculty supervising individualized studies, practica, experiential learning activities, etc. –if applicable
4. Academic Rules Committee Chair/Registrar – signs and files
Leadership Studies Program

Director: Chris Fleming

Minors: Leadership, Nonprofit Leadership

In our government, in our workplaces, in our places of worship, schools, and homes, people need to be better prepared to come together to solve problems, to lead, and to contribute to the group. The Franklin College Leadership Program prepares students to lead and contribute to society by providing a structured learning experience and opportunities for reflecting on and practicing leadership.

Franklin College prepares all its students to become leaders.

The Franklin College community believes that leaders must
- be self-aware,
- develop and practice ethical standards,
- work well with diverse people, and
- be willing and able to take action.

The Franklin College faculty and staff have adopted a comprehensive list of professional and leadership qualities, skills, and competencies that are incorporated in the Liberal Arts student learning plan, departmental student learning plans, and co-curricular activities. They are as follows:

**Personal Qualities**

| Integrity | Willingness to learn and change |
| A personal, ethical framework | Physical well being |
| Responsibility and accountability | Commitment |
| Personal vision and goal setting | Self awareness |

**Interpersonal Competencies**

| Appreciate diversity | Give, receive, and learn from feedback |
| Work with and in a group | Share leadership |
| Manage conflict | Initiate and manage change |
| Create a shared vision and find common ground |

**Communication Skills**

| Present ideas effectively | Attend to non-verbal communication |
| Write well | Participate in and conduct civil discourse |
| Listen well | Balance advocacy and inquiry |
| Read with high comprehension | Speak confidently in public |

**Cognitive Abilities**

| Think systemically | Transfer knowledge and create analogies |
| Practice integrative thinking | Solve theoretical and applied problems |
| Think critically | Manage complexity and ambiguity |
| Make decisions | Assess and manage risk |
| Think creatively | Exercise an awareness of international perspectives |
Technological Skills
Utilize technology to solve problems
Evaluate and use technology appropriately and effectively
Evaluate and use technological resources and documentation
Access, evaluate, and synthesize informational resources

Leadership Minor
(a minimum of 18 hours as follows, all earned with a grade of C- or better)

Core courses
LEA 100 Introduction to Personal Leadership Skills
LEA 220 Leadership: Foundations, Theory, and Practice

One of the following courses
LEA 320 Leadership, Creativity, and Innovation
LEA 330 Leadership in a Multicultural Context

One of the following immersive courses
LEA 315 Nonprofit Leadership Capstone
LEA 320 Leadership, Creativity, and Innovation (in addition to LEA 330 above)
LEA 330 Leadership in a Multicultural Context (in addition to LEA 320 above)
MAT 345 Statistical Consulting Project
POL 234 American Political Participation
POL 275 Law and Politics in American Society
Mock Trial course
Model United Nations course

To complete the 18 required hours, students can select from any courses listed above, as well as any of the following courses
ART 140 Graphic Design I
BUS 102 Development of the Entrepreneurial Mindset
BUS 371 Operations Management
MMJ/PRL 180 Publication Design
PHL 220 Principles of Ethics
POL 360 Social and Political Thought
PSY 320 Social Psychology or SOC 323 Organizations

Other classes or internships may be substituted on this list with the approval of the Director of Innovation and Leadership Studies.
**Nonprofit Leadership Minor**

All courses must be completed with a grade of “C-” or better.

**Core Requirements**
- **BUS 101** Introduction to the Business Mindset
- **LEA 100** Introduction to Personal Leadership Skills
- **NPL/SOC 222** Social Problems & Nonprofit Responses
- **NPL/SOC 230** Introduction to Nonprofits
- **NPL/LEA/SOC 315** Nonprofit Leadership Capstone

**One of the following courses**
- **BUS 371** Operations Management
- **LEA course** number 200-level or higher
- **SOC 323** Organizations
**Leadership Course Descriptions**

<tr>
<td>Fall &amp; Spring, on demand</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Students will learn about their personal leadership style and improve their skills in conflict management, decision making, goal setting, collaboration, and managing change. Experiential activities will be used to illustrate theories of leadership. Students will also explore opportunities for leadership in the campus community.

<table>
<thead>
<tr>

<tr>
<td>LEA 220</td>
<td>Leadership: Foundations, Theory, and Practice</td>
<td>3 credit hours</td>
</tr>
<tr>
<td>Spring</td>
<td></td>
<td>Human Behavior exploratory</td>
</tr>
</tbody>
</table>

In this course students will explore the research and ideas about leadership from historical and critical perspectives. Readings will include work from early history through the ages, including Machiavelli, J.M. Burns, Robert Greenleaf, Stewart Friedman and others. Students will connect their learning to field experiences and contact with leadership groups in Indiana.

<table>

</tbody>
</table>

This course provides an integrative experience linking the student’s leadership skills and liberal arts preparation to the learning in her/his major field of study. Specifically, the capstone experience will involve direct student participation working with a non-profit organization and that organization’s board. Students in the course must develop a project(s) to be carried out with the non-profit. The project will culminate with a public event or presentation. The capstone project must be reviewed and approved by the course instructor and at least one representative of the Engaged Learning Team. Total course experience brings opportunity to think independently, lead responsibly, and serve with integrity. Same as SOC/NPL 315.

A supervised, pre-approved experience that allows a student to pursue specific learning goals and/or be involved in a field experience during the regular academic semester.
Mathematics

Department: Mathematics and Computing
Department Chair: J. Boardman
Department Members: R. Beasley, J. Boardman, D. Callon, P. Fonstad, J. Gash, S. Hoehn, K. Smith, A. Walls

Majors: Actuarial Science, Applied Mathematics, Pure Mathematics, Quantitative Analysis
Minors: Mathematics, Quantitative Methods

Courses and majors in mathematics and computing are designed to provide students with fundamental knowledge of and facility with concepts and processes in mathematics and computing and to help develop interpersonal and lifetime learning skills so that they can adapt to new challenges and situations in their personal and professional lives. The department seeks to promote active learning in the classroom through the implementation of cooperative learning, discovery learning, and the incorporation of technology in a variety of hands-on experiences.

All required courses for a major or minor in mathematics or computing, including all related field and prerequisite requirements, must be completed with a C- or better. Prerequisites for non-majors must also be completed with a C- or better. Education students should consult that department for minimum requirements.

Majors in Mathematics
Students who pursue a major in mathematics may select one or more of the following curricular programs: pure mathematics, applied mathematics, actuarial science, and quantitative analysis. A 3+2 engineering program is also available in computer engineering, electrical engineering, and mechanical engineering. See the engineering section of this catalog for further details.
Pure Mathematics Major

Designed for students who are preparing for graduate school by providing a broad theoretical base

Core Requirements

- MAT 135 Calculus
- MAT 140 Introduction to the Mathematical Sciences
- MAT 142 Calculus II
- MAT 181 Discrete Mathematics I
- MAT 182 Discrete Mathematics II
- MAT 224 Basic Applied Statistics
- MAT 233 Linear Algebra
- MAT 253 Calculus III
- MAT 343 Probability Theory
- MAT 471 Senior Seminar
- MAT 499 Senior Competency Practicum
- PDP 200 Preparing for Your Internship

Pure Math Program Requirements

- MAT 361 Modern Algebra
- MAT 363 Topics in Geometry
- MAT 367 Introduction to Real Analysis

One of the following courses — satisfies the senior year experiences requirement for graduation

- MAT 450 Guided Independent Research in Mathematics
- MAT 490 Independent Study

Related Field Requirements

Computer modeling

- CMP 130 Introduction to Computing
- CMP 141 Computing I
- CMP 150 Computer Tools for Problem Solving

One of the following courses

- CMP 142 Computing II
- CMP 360 Operations Research

Three additional credit hours approved by the departmental advisor. Courses taken to meet liberal arts exploratory requirements cannot be included.
**Actuarial Science Major**

An interdisciplinary major consisting of coursework in mathematics, statistics and business designed for students interested in using quantitative methods to assess and manage risk, especially in a financial setting. Note: Not available to Quantitative Analysis majors.

**Core Requirements**
- MAT 135 Calculus
- MAT 140 Introduction to the Mathematical Sciences
- MAT 142 Calculus II
- MAT 181 Discrete Mathematics I
- MAT 182 Discrete Mathematics II
- MAT 224 Basic Applied Statistics
- MAT 233 Linear Algebra
- MAT 253 Calculus III
- MAT 343 Probability Theory
- MAT 471 Senior Seminar
- MAT 499 Senior Competency Practicum
- PDP 200 Preparing for Your Internship
- PDP 330 Big Data and the Professional Workplace

**One of the following internships**
- INT 261 Computing/Math/Statistics Internship

**Actuarial Science Program**
- MAT 344 Mathematical Statistics
- MAT 352 Financial Mathematics

**Computer Modeling Requirements**
- CMP 130 Introduction to Computing
- CMP 141 Computing I
- CMP 150 Computer Tools for Problem Solving

**Economics, Business, and Accounting Requirements**
- ACC 221 Principles of Accounting I
- ACC 222 Principles of Accounting II
- ECO 115 Principles of Economics
- ECO 221 Intermediate Microeconomics
- ECO 223 Intermediate Macroeconomics
- BUS 351 Business Finance
- BUS 352 Investments
- BUS 353 Principles of Risk and Insurance

**Recommended Course**
- ECO 380 Econometrics
Applied Mathematics Major
Designed for students interested in relating theoretical concepts with their applications in other disciplines and in industry (e.g. engineering and operations research).

Core Requirements
- MAT 135 Calculus
- MAT 140 Introduction to the Mathematical Sciences
- MAT 142 Calculus II
- MAT 181 Discrete Mathematics I
- MAT 182 Discrete Mathematics II
- MAT 224 Basic Applied Statistics
- MAT 233 Linear Algebra
- MAT 253 Calculus III
- MAT 343 Probability Theory
- MAT 471 Senior Seminar
- MAT 499 Senior Competency Practicum
- PDP 200 Preparing for Your Internship

One of the following internships
- INT 261 Computing/Math/Statistics Internship

Applied Math Program Requirements
- MAT 345 Statistical Consulting Project
- PDP 330 Big Data and the Professional Workplace

One of the following courses
- MAT 256 Differential Equations
- MAT 344 Mathematical Statistics

One of the following courses
- MAT 300 Topics in Mathematics
- MAT 367 Introduction to Real Analysis

Related Field Requirements

Computer modeling
- CMP 130 Introduction to Computing
- CMP 141 Computing I
- CMP 150 Computer Tools for Problem Solving

One of the following courses
- CMP 142 Computing II
- CMP 360 Operations Research

Nine additional credit hours selected by the student and approved by a departmental advisor. Courses taken to meet liberal arts exploratory requirements cannot be included.
Quantitative Analysis Major

Designed for students interested in exploring the relationships between mathematics and either marketing, finance, or economics. The list below includes the related field requirements. Note: Not available to Actuarial Science majors.

Core Requirements
- MAT 135 Calculus
- MAT 140 Introduction to the Mathematical Sciences
- MAT 142 Calculus II
- MAT 181 Discrete Mathematics I
- MAT 182 Discrete Mathematics II
- MAT 224 Basic Applied Statistics
- MAT 233 Linear Algebra
- MAT 253 Calculus III
- MAT 343 Probability Theory
- MAT 471 Senior Seminar
- MAT 499 Senior Competency Practicum
- PDP 200 Preparing for Your Internship
- PDP 330 Big Data and the Professional Workplace

One of the following internships
- INT 261 Computing/Math/Statistics Internship

Quantitative Analysis Program – one of the following courses
- MAT 256 Differential Equations
- MAT 300 Topics in Mathematics
- MAT 345 Statistical Consulting Project
- MAT 352 Financial Mathematics
- MAT 367 Introduction to Real Analysis

Computer Modeling Requirements
- CMP 130 Introduction to Computing
- CMP 141 Computing I
- CMP 150 Computer Tools for Problem Solving
- CMP 360 Operations Research

Economics, Business, and Accounting Requirements
- ACC 221 Principles of Accounting I
- ECO 115 Principles of Economics
One of the following options

**Economics Option**
- ECO 221 Intermediate Microeconomics
- ECO 223 Intermediate Macroeconomics
- ECO 380 Econometrics

**Plus two of the following courses**
- ECO 330 Money and Banking
- ECO 350 International Business & Finance
- ECO 360 Labor Economics and Management

**Finance Option**
- ACC 222 Principles of Accounting II
- BUS 351 Business Finance
- BUS 352 Investments

**Plus one of the following courses**
- ECO 221 Intermediate Microeconomics
- ECO 223 Intermediate Macroeconomics

**Plus one of the following courses**
- BUS 353 Principles of Risk and Insurance
- ECO 330 Money and Banking

**Marketing Option**
- ACC 222 Principles of Accounting II
- BUS 361 Contemporary Marketing
- BUS 362 Consumer Behavior

**Plus one of the following courses**
- ECO 221 Intermediate Microeconomics
- ECO 223 Intermediate Macroeconomics

**Plus one of the following courses**
- ECO 380 Econometrics
- PSY 320 Social Psychology

---

**Cooperative Program in Engineering (Computer, Electrical, and Mechanical Engineering)**
Franklin College maintains a cooperative “3+2” program in engineering with the Purdue School of Engineering and Technology at IUPUI. Students in this program will earn a Bachelor of Arts degree in Applied Mathematics at Franklin College, and then a Bachelor of Science degree in Computer Engineering, Electrical Engineering, or Mechanical Engineering through the Purdue School of Engineering and Technology at IUPUI.

Students opting to pursue the degree programs in Computer, Electrical, or Mechanical Engineering will major in Applied Mathematics at Franklin College and follow the Applied Mathematics course of study given above. Some course substitutions and choices of electives are necessary to complete the engineering portion of the program; details of these and other aspects of the cooperative program can be found in the Engineering section of the catalog.
**Mathematics Minor**

A minor which provides a broad overview of some of the primary areas of study in mathematics.

**Core Requirements**

- MAT 135 Calculus
- MAT 140 Introduction to the Mathematical Sciences
- MAT 142 Calculus II
- MAT 181 Discrete Mathematics I

**Two of the following courses**

- MAT 182 Discrete Mathematics II
- MAT 224 Basic Applied Statistics
- MAT 233 Linear Algebra
- MAT 253 Calculus III
- MAT 256 Differential Equations
- MAT 300 Topics in Mathematics
- MAT 323 Mathematics for Elementary Teaching I
- MAT 324 Mathematics for Elementary Teaching II
- MAT 343 Probability Theory
- MAT 345 Statistical Consulting Project
- MAT 361 Modern Algebra
- MAT 363 Topics in Geometry
- MAT 367 Introduction to Real Analysis

**Quantitative Methods Minor**

A minor geared toward students majoring in the social sciences or humanities. Students majoring in mathematics or computer science may not elect this minor.

**The following course**

- MAT 224 Basic Applied Statistics

**Twelve credit hours from the following courses**

- CMP 130 Introduction to Computing or CMP 141 Computing I
- CMP 150 Computer Tools for Problem Solving
- CMP 360 Operations Research
- ECO 380 Econometrics
- LA 103 Quantitative Reasoning
- MAT 135 Calculus
- MAT 181 Discrete Mathematics I
- MAT 182 Discrete Mathematics II
- MAT 233 Linear Algebra
- MAT 300 Topics in Mathematics
- MAT 345 Statistical Consulting Project
- PDP 330 Big Data and the Professional Workplace
Mathematics Course Descriptions

MAT 115 Math Study Center Theory and Practice
1 credit hour
Fall
This course will prepare students to work as associates in the Math Study Center. It will include readings and discussion on the fundamentals of tutoring mathematics, mock tutoring sessions, and discussion on tutoring theory and practice. Required for all new Math Study Center associates.

MAT 131 Introduction to Quantitative Analysis
3 credit hours*
Fall and spring
Note: Placement into LA 103 based upon mathematics placement criteria
This course is designed for students who either intend to enroll in MAT 135 or MAT 181 in a subsequent semester or who intend to pursue a degree in economics, business, or accounting. Students will study families of functions and learn how to use them to solve real-world problems. The course will include the mathematics of finance, systems of linear equations and inequalities, logic, sets, and probability. These mathematics skills are essential to the areas of economics, business, accounting, and computing. The course will finish with an introduction to limits and derivatives of a function. Students wishing to pursue an Economics, Business, or Accounting degree with prior credit for MAT 135 or MAT 181 must pass a financial mathematics competency exam, earning a C- (68%) or better, for the MAT 131 requirement to be waived.
*Note: This course does not satisfy the liberal arts mathematics requirement.

MAT 135 Calculus
4 credit hours
Fall and spring
Fulfills LA 103 requirement
Note: MAT 131 or placement into MAT 135 based upon mathematics placement criteria
The concept of differentiation is developed using limits and focusing on algebraic, exponential, and logarithmic functions. Applications of derivatives in the sciences and economics are presented, and an introduction to integration concludes the course. The mathematics is presented from analytical, graphical, and numerical perspectives, with extensive use of technology.

MAT 140 Introduction to the Mathematical Sciences
1 credit hour
Fall
Prereq or coreq: MAT 135
An introduction to mathematical processes, methods of problem solving, topics of current interest in mathematics, and the role of mathematics in the workplace. Some topics will extend and supplement the content of MAT 135 Calculus.

MAT 142 Calculus II
4 credit hours
Spring
Prereq: MAT 135 and MAT 140 or consent of instructor
A continuation of MAT 135. Course material includes the rotation of functions in three-dimensional space, applications and techniques of integration, the convergence and divergence of sequences and series, and parameterization.
<table>

</tr>
</tbody>
</table>

This course provides a foundation for the study of discrete (finite) structures. The course focuses heavily on proof techniques and style, including proof by contradiction and proof by contraposition. Boolean algebra and propositional logic make up a large portion of the semester. Additional topics include introductory set theory, methods of counting, and basic probability, including the ideas of expected value and variance. There is also heavy emphasis on the use of typesetting technology, making this course attractive for those considering graduate school in mathematics, computing or the natural sciences.

The study of systems of linear equations: the determination of whether a system has no, one, or infinitely many solutions and the techniques for obtaining such solutions. The topics include Gaussian elimination, linear independence, matrix algebra, determinants, vector spaces, linear transformations and their matrix representations, spanning sets and bases, rank, eigenvalues and eigenvectors, and orthogonality and least squares. Incorporates use of Matlab software. The course also includes the development and explanation of applications of those concepts and a study of the role of proof in linear algebra with emphasis on reading and writing proofs and using mathematical results to draw conclusions.

A study of ordinary differential equations, their applications, and selected methods of solutions both in closed form and by numerical methods. Includes qualitative methods and use of computer technology.
MAT 300 Topics in Mathematics
3 credit hours
Spring, even academic years
Prereq: MAT 142 and MAT 181 or consent of instructor
A topic of current interest in mathematics will be taught. Topics will vary depending on faculty interest.

MAT 323 Mathematics for Elementary Teaching I
2 credit hours
Fall, junior year
Prereq: LA 103; Coreq: EDE 336, EDE 344, EDE 365 & EFE 384; Additional prereq: 2.50 GPA & admission to the teacher education program
This course is the first foundational course in the mathematics content area for elementary education majors. It includes problem solving, sets, functions, exploration of our number system including properties, place value, basic operations and algorithms, and basic concepts of algebra. Problem solving is stressed in each unit. The NCTM Principles and Standards and Indiana’s Academic Standards for Mathematics are introduced.

MAT 324 Mathematics for Elementary Teaching II
2 credit hours
Spring, junior year
Prereq: MAT 323; Coreq: EDE 337, EDE 345, EDE 366 & EFE 385; Additional prereq: 2.50 GPA & admission to the teacher education program
This course is the second foundational course in the mathematics content area for elementary education majors. It includes exploration of our number system including properties, basic operations and algorithms, probability, statistics, measurement, coordinate geometry, graphs, and 2- and 3-dimensional geometry. Problem solving is stressed in each unit. The NCTM Principles and Standards and Indiana’s Academic Standards for Mathematics are introduced.

MAT 343 Probability Theory
3 credit hours
Spring
Prereq: CMP 150, MAT 181, & MAT 253
An introduction to probability theory, the part of mathematics that studies random phenomena. We model simple random experiments mathematically and learn techniques for studying these models. Topics covered include a review of combinatorics, axioms of probability, discrete and continuous random variables, common probability distributions, expectations, moment generating functions, conditional probability and conditional expectations, multivariate distributions, covariance, laws of large numbers, and the central limit theorem.

MAT 344 Mathematical Statistics
3 credit hours
Fall, odd academic years
Prereq: MAT 224 & MAT 343
A calculus-based course that examines the theoretical foundations of sampling and statistical inference, together with their applications to real-life data. Topics will include sampling theory, properties of estimators, confidence intervals, hypothesis testing, and nonparametric tests. Regression analysis will be covered in-depth. The statistical package R will be used to analyze data sets.

MAT 345 Statistical Consulting Project
3 credit hours
Spring, odd academic years
Prereq: MAT/SOC 224 or MAT 331
Each student will work as part of a team to complete a statistical consulting project for a local non-profit agency or other appropriate organization. Special emphasis will be given to the development of skills in project management and consulting. Projects will be chosen to require the use of important statistical concepts such as experimental design, survey design, or regression analysis. Recommended especially for majors in the social sciences who are intending to go to graduate school or for those aiming for careers involving statistical applications. Same as ECO/PSY/SOC 345. Students may receive credit in only one of these cross-referenced courses.

</table>
### MAT 482 Mathematics Practicum

<table>
<thead>
<tr>
<th>1-2 credit hours</th>
</tr>
</thead>
</table>

A supervised, pre-approved experience which allows a student to pursue specific learning goals and/or be involved in a field experience during the regular academic semester.

### MAT 490 Independent Study

<table>
<thead>
<tr>
<th>Prereq: departmental consent</th>
</tr>
</thead>
</table>

Courses are designed to encourage student initiative and to provide a degree of flexibility in the departmental program. Normally the subject is not sufficiently or appropriately covered in departmental course offerings. Course work is planned by student and instructor jointly to meet student’s individual needs.

### MAT 499 Senior Competency Practicum

<table>
<thead>
<tr>
<th>No credit</th>
</tr>
</thead>
</table>

| Fall |
| Coreq: MAT 471 |

The senior competency practicum consists of three components. The first component, the joint written comprehensive exam, requires students working in teams to prepare written responses to a set of approximately five questions posed by an outside evaluator. Responses may require experimentation involving computer technology, writing proofs, modeling real situations, and using library and information resources. The second component is an oral examination by three faculty members involving fundamental concepts encountered in the student’s major and the relationships between them. The third component is the Major Field Achievement Test in Mathematics, a nationally-normed multiple-choice examination. Students must earn a C- on the oral component and a C or higher in the entire senior comprehensive practicum.

### PDP 330 Big Data and the Professional Workplace

<table>
<thead>
<tr>
<th>3 credit hours</th>
</tr>
</thead>
</table>

| Spring |
| Prereq: CMP 130, CMP 141, PDP 200 & MAT/PSY/SOC 224, plus junior level standing |

A course designed to provide students with experience in working with big data in a setting featuring many of the characteristics of a professional workplace. The course includes preparatory classroom instruction in data visualization and model fitting with cross-validation. Students will work in teams, each under the coaching of an alumni professional who will provide the data for the project, serve as an advisor during the project, lead discussions regarding the demands of the professional workplace, and provide individual feedback on the degree to which each student displays professional skills and dispositions. Most of the project work will be conducted in an online environment to provide students with a taste of the conditions experienced by telecommuting professionals.

### SNT 489 (MAT) Professional Development Internship in Math

<table>
<thead>
<tr>
<th>7-10 credit hours</th>
</tr>
</thead>
</table>

| Prereq: Senior standing or permission of instructor |

A semester-long internship requiring 20-30 hours per week on-site under the supervision of a practicing professional and a member of the mathematics faculty. Each student will be responsible to ensure that required reports and other submissions are completed by the scheduled dates. Grading will be on a pass-fail basis.
Medical Technology

Pre-Medical Technology Advisor: A. Thapaliya, athapaliya@franklincollge.edu

Adjunct Faculty: Carla Clem, M.S., MT(ASCP)SH^CM, Program Director, IU Health Methodist Hospital; DeAnne Maxwell, MLS(ASCP)CM, Program Director, CLS, Franciscan St. Francis Health

Franklin College maintains affiliations with the Schools of Medical Technology at IU Health Methodist Hospital and Franciscan St. Francis Health, both in Indianapolis, Indiana. Upon successful completion of a minimum of 90 semester hours (three years) of baccalaureate instruction at Franklin College and the 12-month professional course in medical technology/clinical laboratory science at IU Health or St. Francis, the student is then eligible to receive the baccalaureate degree from Franklin College and a certificate of completion from the IU Health or St. Francis program.

The medical technology courses which can constitute the fourth year in the three plus one program are:

At IU Health
Clinical Chemistry (8 hours)
Clinical Hematology (7 hours)
Clinical Immunohematology (4 hours)
Clinical Microbiology (8 hours)
Education/Management/Research (2 hours)
Serology/Virology (2 hours)
Urinalysis (1 hour)

At Franciscan St. Francis Health
Laboratory Skills (4 hours)
Chemistry (4 hours)
Hematology (5 hours)
Microbiology (5 hours)
Immunology/Serology (2 hours)
Clinical microscopy (2 hours)
Immunohematology (4 hours)
Clinical Practicum (6 hours)

Both programs include student laboratory and clinical rotation phases.

Students interested in this three-year-plus-one-year program should carefully plan Franklin College course selections after consultation with the faculty health professions advising committee.

The criteria utilized by the hospitals to select students for admission to the program include the following:

1. Science and cumulative grade point accumulative average of 2.70 (A= 4.00) or better.
2. Letters of recommendation. (see application packets for exact details)
3. Successful completion of the academic prerequisites listed below with a minimum grade of C-.
4. Completed application form.
5. Personal interview.

The application to the IU Health or the Franciscan St. Francis Health program must be completed by December 1st each year for the program which begins the following summer. Personal interviews must be completed between Oct. 1 and Dec. 15. (Schedule interview appointments prior to Dec. 1.) IU Health and Franciscan St. Francis Health participate, along with all of the medical technology programs in Indiana, in a student-school matching program. This matching program is a free service to the applicant. Application forms will be given out and explained during the interview.

Upon successful completion of the program at either hospital, the graduate will then be eligible to take the Board of Certification examination given by the American Society for Clinical Pathology (ASCP) to become certified as a Medical Laboratory Scientist (MLS).

Academic prerequisites for the medical technology program
**Biological Science:** 16 semester hours, including BIO 134, 140, and 373

**Chemistry:** 16 semester hours, including CHE 121, 122, 123, 124, 221, 223, and 334

**Mathematics:** MAT 135 or MAT 224

The minimum total of 90 semester hours required for admission to the IU Health and St. Francis programs must include all graduation requirements at Franklin College: a departmental major, six immersive term hours, and the liberal arts program requirements. Successful completion of the clinical year satisfies the required internship or senior year experience for the Biology or Chemistry major.

Tuition and fees for the professional program are handled through the tuition plan at Franklin College. The tuition charged for the hospital portion of the program will be based on the hospital’s contract for fees with the college.

For additional information about this program or about other medical technology programs, students should consult with the Pre-Medical Technology advisor at Franklin College.
Military Science
Reserve Officer Training Corps (ROTC)
Indiana University-Purdue University at Indianapolis

Through a partnership program with Indiana University-Purdue University at Indianapolis (IUPUI), Franklin College students may participate in a ROTC program which leads to a commission in the U. S. Army, the Army Reserves, or the Army National Guard. All classes are held on the IUPUI campus.

ROTC enhances a student’s education by providing unique leadership and management experiences found in few college courses. Instruction in these courses encourages the development of resource management skills, self-assurance, confidence, personal discipline, executive abilities, personal responsibility, and professional ethics, as well as physical stamina, bearing, and other fundamental qualities required of an Army officer. These same qualities acquired while participating in the ROTC program will enhance any civilian career.

Army ROTC is a collection of college electives and a summer training program. When a cadet completes the electives, the summer program and earns a Bachelor’s degree, that cadet earns a commission in the U. S. Army, the Army Reserves, or the Army National Guard.

Credit Transfer to Franklin College
Credit earned at IUPUI through ROTC is transferable to Franklin College and will count as credit outside the major field for graduation. For information on how to receive transfer credit at Franklin College for completion of this program, please see the Assistant Registrar in the Academic Records Office.

Admission Requirements
The ROTC Basic Course is open to Franklin College students without any prerequisites or allied requirements. Students who are not U. S. citizens must check with the Department of Military Science administrative office at IUPUI prior to course attendance to ensure they have the proper permission from their home country’s embassy for military training.

Basic and Advanced Courses
Basic Courses are open to all students at any academic level but are normally taken during the first and sophomore years. Advanced courses are taken during the student’s junior and senior years and require a military commitment.

Course Descriptions
For complete information on the courses, requirements and obligations please visit the IUPUI website at http://www.iupui.edu/~armyrotc/.
Multimedia Journalism &
Pulliam School of Journalism

Director: J. Krull
Department Chair: J. Cramer
Faculty: J. Cramer, J. Krull

Major: Multimedia Journalism
Minors: Multimedia Journalism, Rhetoric, Visual Communications

The Pulliam School of Journalism prepares students for careers in which news is delivered through multiple media platforms: online, on-air, in print. Through classroom, lab and professional field experiences, students are engaged and immersed in the exhilarating practice of news reporting. The multimedia focus of the major means that students become proficient in reporting, writing, editing and producing accurate, ethical and meaningful stories for print, broadcast and, especially, online/digital news outlets.

Major and Minor Requirements
All courses for the major, minor and endorsements must be completed with a grade of C- or better. A grade of C- or better is required for all pre-requisite courses regardless of academic major.
Multimedia Journalism Major

Core Requirements

- MMJ 115 Reporting, Interviewing and Newswriting
- MMJ 135 Editing for Print and Online
- MMJ 150 Introduction to Digital Photography and Audio Reporting
- MMJ 155 Video for Digital Journalism I
- MMJ 180 Publication Design
- MMJ 255 Video for Digital Journalism II
- MMJ 445 Communication Law in a Digital World

Immersion Experience
This immersive semester-long experience (during which students take only immersion experience courses) will focus on developing students’ storytelling skills. Students will work across media platforms and may be published by professional news operations. This experience will be enhanced by detailed instruction in multimedia storytelling techniques and classroom exploration of contemporary political or public policy issues. Students must have completed successfully MMJ 115, MMJ 120, MMJ 135, MMJ 150, MMJ 155, MMJ 255, and INT 119 before registering for the Immersion Experience. Additionally, there is a Political Science prerequisite (POL 110, POL 225, or POL 234). This experience includes the following courses, which are co-requisites and must be taken concurrently:

- INT 200 Multimedia Internship (6 hours)
- MMJ 210 Advanced Reporting and Database Research to Immersion (6 hours)

Professional Development

- MMJ 120 Ethics and Professional Development
- MMJ 498 Multimedia Portfolio
- MMJ 499 Multimedia Storytelling Senior Project

Activity Credits

All MMJ majors must participate and earn credit for at least THREE multimedia journalism activity experiences such as:

- MMJ 001 Student Media
- MMJ 002 Statehouse File
- MMJ 004 Radio Station
- MMJ 005 TV News
- MMJ 007 Media Manager

Related Field Requirements

Twelve semester hours from ONE field outside MMJ. All courses used to satisfy the related field requirement must be completed with a grade of C- or better.
**Multimedia Journalism Minor** (except for Public Relations majors)

**Required Courses**
- MMJ 115 Multimedia Reporting and Interviewing
- MMJ 120 Ethics and Professional Development
- MMJ 135 Editing for Print and Online
- MMJ 150 Introduction to Digital Photography and Audio Reporting
- MMJ 155 Video for Digital Journalism I
- MMJ 180 Publication Design
- MMJ 445 Communication Law in a Digital World

**Multimedia Journalism Minor** (for Public Relations majors)

*A minimum of 16 hours in any combination of the following courses*
- MMJ 001 Student Media**
- MMJ 002 Statehouse File**
- MMJ 004 Radio Station**
- MMJ 005 TV News**
- MMJ 007 Media Manager**
- MMJ 115 Multimedia Reporting and Interviewing
- MMJ 135 Editing for Print and Online
- MMJ/SPR 255 Video for Digital Journalism II
- SPR 200 Game Coverage
- SPR 301 Covering Economics and Public Policy in Sports
- SPR 302 Covering Lifestyle and Outdoor Sports
- SPR 303 Sports Information and Public Relations

*All pre-requisites for courses must be met as listed in the catalog description for each course. Courses required for the public relations major cannot be double-counted as courses for a minor in multimedia journalism. A minimum grade of C- is required in all courses counted toward the minor.

**Only one-time successful activity course completion can be counted toward the multimedia journalism minor for public relations majors, no repeat credit for an individual course. MMJ activity courses can be counted both for the minor and as total hours outside the public relations major.

**Public Relations Minor** (for Multimedia Journalism majors)

**Required Courses**
- PRL 221 Public Relations Practice Areas
- PRL 321 Social, Emerging and Traditional Media in Public Relations
- PRL 333 Public Relations Writing
- PRL 334 Learning Engagement with Public Relations Professionals
- BUS 101 Introduction to the Business Mindset
- SOC 230 Introduction to Nonprofits
Rhetoric Minor (for multimedia journalism majors)

Required Courses
- ENG 227 The English Language
- ENG 228 Advanced Composition
- PHL 210 Logic

Two of the following courses
- CWR 150 Introduction to Creative Writing
- ENG 200 Introduction to Literary Studies
- PHL 340 Advanced Logic

Visual Communications Minor

Required Courses
- ART 130 Color and Design
- ART 140 Graphic Design I
- ART 190 Digital Fine Art Photography I
- ART 240 Graphic Design II
- MMJ 150 Introduction to Digital Photography and Audio Reporting
- MMJ 155 Video for Digital Journalism I
Multimedia Journalism Course Descriptions

**MMJ 001 Student Media**
**Fall and Spring**
1 activity credit

Students will work on refining their reporting, writing and editing skills by working across media platforms for media that make use of print, audio, video and current industry software.

**MMJ 002 Statehouse File**
**Fall, Spring, and Summer**
1 activity credit

Prereq: MMJ 001 (can be satisfied concurrently with permission of advisor)

Students refine their reporting, writing, and editing skills by working across media platforms that make use of print, audio, video and current industry software. Work will appear on the Franklin College Statehouse Bureau website, www.thestatehousefile.com and with the bureau’s news partners.

**MMJ 004 Radio Station**
**Fall and Spring**
1 activity credit

Laboratory course in radio station procedures, operations, and on-air broadcasting on WFCI-FM.

**MMJ 005 TV News**
**Fall and Spring**
1 activity credit

Laboratory course in video production. Students may work on The Statehouse File newscast or other video productions as approved by the course instructor.

**MMJ 007 Media Manager**
**Fall and Spring**
2 activity credits

All student media managers must enroll in MMJ 007 in the semester(s) during which they manage a student media outlet.

**MMJ 115 Reporting, Interviewing, and Newswriting**
**Fall and Spring**
3 credit hours

This course will focus on the processes of news and information gathering making use of different media platforms. Students will learn the techniques of interviewing and will learn to challenge the information they gather. The emphasis will be on developing reporting skills so students can gather accurate information. Same as SPR 115.

**MMJ 120 Ethics and Professional Development**
**Fall and Spring**
2 credit hours

An introduction to basic aspects of professionalism required of multimedia journalists and public relations professionals. Course emphases are on professional ethics codes of journalism and public relations with an examination of case studies; basic concepts and terminology of journalism; business etiquette; multimedia and public relations career options; basics of Associated Press style; resume and cover letter preparation; and internship preparation. Same as PRL/SPR 120.

**MMJ 135 Editing for Print and Online**
**Fall and Spring**
3 credit hours

This course introduces students to copyediting, self-editing and fact-checking skills needed to publish stories for the Web, broadcast and print. Same as SPR 135.
**MMJ 150 Introduction to Digital Photography and Audio Reporting**

<table>
<thead>
<tr>
<th>Fall and Spring</th>
</tr>
</thead>
</table>

3 credit hours

The course will introduce students to the basic principles of digital photojournalism and video technologies. Students will be introduced to digital cameras, the basics of editing still photographs and the basics of audio reporting. Students will be required to create content using appropriate technology and prepare stories for distribution across multiple platforms. Same as PRL/SPR 150.

**MMJ 155 Video for Digital Journalism I**

<table>
<thead>
<tr>
<th>Fall and Spring</th>
</tr>
</thead>
</table>

Prereq: MMJ/PRL 150 or consent of instructor

3 credit hours

The course will focus on the practices and principles of shooting, editing and distributing video for multiple platforms. Topics include: shooting with DSLR cameras and dedicated video cameras; preproduction planning; lighting principles; audio for video, editing video and distributing digital stories through multiple platforms. Same as PRL/SPR 155.

**MMJ 180 Publication Design**

<table>
<thead>
<tr>
<th>Fall and Spring</th>
</tr>
</thead>
</table>

3 credit hours

This course will focus on fundamentals of typography including theory and practice in visual communication. By exploring typography, photography, layout, grids, and the principles of contrast, repetition, alignment, proximity, and hierarchy, students will create ethical, compelling, and effective two-dimensional designs. Through lectures, projects, and classroom critiques, the focus is on designing publications, information graphics and interactivity. Proficiency in Adobe InDesign and Illustrator required or willingness to learn through online tutorials. Same as PRL/SPR 180.

**MMJ 210 Advanced Reporting & Database Research to Immersion**

<table>
<thead>
<tr>
<th>Fall and Spring</th>
</tr>
</thead>
</table>

Prereq: INT 119, MMJ 115, MMJ 120, MMJ 135, MMJ 150, MMJ 155, MMJ 255, & either POL 110, POL 225, POL 234

Coreq: INT 200

6 credit hours

This course is required as part of the Immersion Experience as students learn to apply the lessons of the classroom to the reporting environment in a professionally-run news bureau located at the Indiana Statehouse. Students will develop their storytelling skills in multi-media formats as they build on their reporting, interviewing and writing skills to explore issues with more depth and range. Central to the course is learning to compile, analyze and use data from a variety of sources in the storytelling process. The students’ work will be published or presented across media platforms through www.thestatehousefile.com and its newsgathering partners. Course prerequisites are listed in the Immersion experience prerequisites.

**MMJ 255 Video for Digital Journalism II**

<table>
<thead>
<tr>
<th>Fall and Spring</th>
</tr>
</thead>
</table>

Prereq: MMJ/PRL 155 or consent of instructor

3 credit hours

Designed to introduce broadcast writing and to enhance opportunities to develop broadcast-style shooting and editing skills. This course adds onto the video skills learned in Video for Digital Journalism I. Students will learn to shoot voice overs, voice overs with sound bites and full packages suitable for broadcast featuring news and sports content. Students will also learn to produce scripts for broadcast delivery, as well as the process of creating newscast/sportscast rundowns. Video studio techniques and procedures will be taught in the PSJ video lab. Distribution of individual stories via social media will be required. Same as SPR 255.
MMJ 300 Topics in Multimedia News 3 credit hours
A topic of current interest in multimedia news will be taught. Topics will vary depending on faculty and student interest. Course will be offered upon the request of a faculty member and with approval of the Vice President of Academic Affairs.

MMJ 380 Practicum 1-2 credit hours
Fall and Spring
Experience on campus in areas directly related to the media; internships or off-campus on-the-job training. Open only to sophomores, juniors, and seniors.

MMJ 445 Communication Law in a Digital World 3 credit hours
Fall and Spring Civic Learning exploratory
Students will be introduced to First Amendment law as it relates to professional communicators. Topics will include First Amendment theory, libel law, invasion of privacy law, copyright law, news-gathering rights, public relations law and advertising law. Same as PRL/SPR 445.

MMJ 490 Independent Study 1-2 credit hours
Fall and Spring Prereq: consent of instructor
Course is designed to encourage student initiative and to provide a degree of flexibility in the departmental program.

MMJ 498 Multimedia Portfolio No credit
Fall and Spring
Each student must develop a digital portfolio containing a significant and appropriate body of work that, by the time of graduation, demonstrates to a potential employer that the student is ready to make the transition to the professional workplace. Each portfolio also must demonstrate the student’s understanding of linkages among leadership, the liberal arts, and the student’s intended career. The specific format and content of the portfolio is determined by the faculty. Students must enroll in MMJ 498 in fall or spring semester of the senior year. Portfolios will receive either a passing or failing grade by the Pulliam School of Journalism faculty. Deficiencies must be corrected before the portfolio is certified as passing.

MMJ 499 Multimedia Storytelling Senior Project No credit
Fall and Spring
Students will demonstrate and showcase the skills they have acquired through their careers at the Pulliam School of Journalism by creating an in-depth package of stories about a significant public issue that is told from multiple media platforms. In addition to the multimedia journalism skills that must be demonstrated to successfully complete this graduation requirement, students will be expected to meet all deadlines, be quickly responsive to communications from staff/faculty project supervisors, and adhere to principles of media law and ethics.
Music

Department Chair: M. Black
Music Faculty: M. Black, E. DeForest, C. Hayes, C. Longendyke, N. Ostojic, L. Honer, J. Torres, G. Wang

Major: Music
Minor: Music

The music program at Franklin College is dedicated to the cultivation of excellence in the areas of musical performance, pedagogy and scholarship. Through music theory, music history and literature courses, applied lessons, and ensemble participation, the music faculty aspires to develop student understanding of the complex systems of music, the contextual information regarding compositions, and the performance considerations inherent in each musical composition. Music students experience a variety of music at Franklin College through guest performances by music professionals, student recitals, master classes and seminars. A Franklin College student studying music is preparing for a life in music, whether as a vocation or an avocation, by further developing their musicianship and research skills.

All credit bearing music courses required of a music major or minor will receive A-F grading. All courses for music majors, minors, and endorsements must be completed with a C- or above. All prerequisites and related field courses must also be completed with a C- or above.
Music Major

Note: All prospective music majors must receive permission from the music faculty prior to formal declaration of the major. Transfer students will be asked to give a formal audition.

Also: All prospective music majors with prior piano experience may opt to take a piano placement examination to satisfy the requirements of MUS 180 and MUS 181. Regardless of placement, all music majors must pass MUS 112 prior to graduation.

Core Requirements
- MUS 110 Theory and Musicianship I
- MUS 111 Theory and Musicianship II
- MUS 112 Piano Proficiency Examination
- MUS 210 Theory and Musicianship III
- MUS 310 Conducting and Score Preparation
- MUS 330 Music History II
- MUS 331 Music History I
- MUS 499 Senior Competency Examination

Professional Development Requirements
- MUS 498 Senior Portfolio
- PDP 200 Preparing for Your Internship
- SNR/SNT 489 (MUS) Senior Recital

Ensemble Requirements – choose one performance area

Vocalists
- MUS 121 Franklin College Singers – every semester a declared major
- MUS 122 Men’s Chorus or MUS 123 Women’s Chorus – four semesters

Pianists
- MUS 121 FC Singers, MUS 124 FC Band or MUS 125 String Ensemble – every semester a declared major
- MUS 122 Men’s Chorus or MUS 123 Women’s Chorus – two semesters
- MUS 126 Piano Accompanying – two semesters

Other Instrumentalists
- MUS 124 FC Band or MUS 125 String Ensemble or MUS 127 Percussion Ensemble* – every semester a declared major
  *At least one semester must be MUS 127 Percussion Ensemble
- MUS 121 FC Singers, MUS 122 Men’s Chorus or MUS 123 Women’s Chorus – four semesters

Applied Study Requirements
- MUS SEM Performance Seminar – every semester in applied study
- MUS 180 Piano Class I – unless student passes placement exam*
- MUS 181 Piano Class II – unless student passes placement exam*
  *These courses are not required, but are available to prepare students to pass MUS 112
Literature and Pedagogy Requirements - Vocal and Piano Track*

MUS 343 Survey of Vocal and Choral Literature or MUS 353 Survey of Piano Literature
MUS 344 Vocal Pedagogy or MUS 354 Piano Pedagogy

*Students may substitute two alternative courses approved by departmental advisor.

Literature and Pedagogy Requirements - Instrumental Track

MUS 127 Percussion Ensemble (one semester)
MUS 321 Woodwind Methods and Pedagogy
MUS 322 String Methods and Pedagogy
MUS 323 Brass Methods and Pedagogy
MUS 328 Music Technology and Arranging
MUS 334 Survey of Band and Orchestra Literature

Related Field Requirements (These course requirements are waived if the student has a double major or a minor.)

One course with ART prefix
One course with THE prefix

Music Minor

NOTE: All prospective music minors with prior piano experience may opt to take a piano placement examination to satisfy the requirements of MUS 180 and MUS 181. Regardless of placement, all music minors must pass MUS 112 prior to graduation.

Core Requirements

MUS 110 Theory and Musicianship I
MUS 111 Theory and Musicianship II
MUS 112 Piano Proficiency Exam
MUS 330 Music History II
MUS 331 Music History I

One of the following courses

MUS 119 Introduction to Music
MUS 219 World Music

Ensemble Requirements - choose one performance area

Vocalists

MUS 121 Franklin College Singers – two semesters
MUS 122 Men’s Chorus or MUS 123 Women’s Chorus – two semesters

Pianists

MUS 121 FC Singers, MUS 124 FC Band or MUS 125 String Ensemble – two semesters
MUS 122 Men’s Chorus or MUS 123 Women’s Chorus – two semesters

Other Instrumentalists

MUS 124 FC Band or MUS 125 String Ensemble – two semesters
MUS 121 FC Singers, MUS 122 Men’s Chorus or MUS 123 Women’s Chorus – two semesters
**Applied Study Requirements**

MUS SEM Performance Seminar – *two semesters when registered for applied lessons*

MUS 180 Piano Class I – *unless student passes placement exam*

MUS 181 Piano Class II – *unless student passes placement exam*

*These courses are not required, but are available to prepare students to pass MUS 112

**One course with the ART or THE prefix**
### Music Course Descriptions

<table>
<thead>
<tr>
<th>Private music lessons</th>
<th>1 credit hour-majors/.5 credit hour-non-majors</th>

<td></td>
</tr>
</tbody>
</table>

Instruction in voice, piano, guitar, woodwind, brass, percussion, and strings is offered on a private-lesson basis to all Franklin College students. There is an additional $250 fee assessed per credit each semester. This fee entitles the non-Music major to take 14 half-hour lessons, and the Music major to take 14 one-hour lessons. The student may register for private lessons in as many subsequent semesters as desired.

<table>
<thead>
<tr>
<th>MUS SEM Performance Seminar</th>
<th>No credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall and Spring</td>
<td></td>
</tr>
</tbody>
</table>

The Performance Seminar is a communal learning forum for all Franklin College music majors and music minors in applied lessons, as well as the music faculty. Other students in applied lessons are welcome to enroll as well. Each week, students will perform pieces they are studying in their applied lessons for the seminar in a Master Class setting. Members of the Franklin College music faculty will provide feedback to demonstrate tools for improving performance and technique. Participants in the seminar will offer additional suggestions and may ask questions that apply to their own repertoire. Guest musicians will attend a few seminars during the semester. In addition, seminar participants are required to attend all concerts sponsored by Franklin College during the semester. Graded on a pass/fail basis.

<table>
<thead>
<tr>
<th>MUS 011 Music Activity</th>
<th>1 activity credit</th>
</tr>

</table>

Music ensemble activity, such as African Drumming Ensemble, Ukelele, and Franklin College Drumline.

<table>
<thead>
<tr>
<th>MUS 110 Theory and Musicianship I</th>
<th>3 credit hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall</td>
<td>Creative Arts exploratory</td>
</tr>
</tbody>
</table>

The study of theory and musicianship is designed to develop a student’s ability to think in musical sound. A student will learn to hear and write the patterns of music and to understand how music is organized. Theory involves the writing and analysis of music while musicianship involves the skills of ear training and sight singing.

<table>
<thead>
<tr>
<th>MUS 111 Theory and Musicianship II</th>
<th>3 credit hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Spring</td>
<td>Prereq: Grade of C- or better in MUS 110 or equivalent</td>
</tr>
</tbody>
</table>

Theory and Musicianship II is the second semester of the three-semester course sequence that is designed to develop a student’s ability to think in musical sound. This course focuses on diatonic harmony. This course continues the student’s musical development in areas of writing and analyzing music and development of ear training and sight singing skills.

<table>
<thead>
<tr>
<th>MUS 112 Piano Proficiency Examination</th>
<th>No credit</th>
</tr>
</thead>
</table>

**NOTE:** All prospective music majors and minors must pass MUS 112 prior to graduation. Successful completion of the piano proficiency examination is required of all music majors and minors. Students may be required to take MUS 180 and MUS 181 prior to the piano proficiency examination.
**MUS 119 Introduction to Music**

<table>
<thead>
<tr>
<th>Fall and Spring</th>
<th>Creative Arts exploratory</th>
</tr>
</thead>
<tbody>
<tr>
<td>4 credit hours</td>
<td></td>
</tr>
</tbody>
</table>

This introductory course in music provides students with a fundamental understanding of how music is valued in societies, how the elements of music interrelate in musical compositions, and how musical style is recognized from various historical periods and different cultures. While students come to understand and appreciate diverse styles and genres of music they also develop active listening skills and increase their ability to articulate their musical preferences.

**MUS 121 Franklin College Singers**

<table>
<thead>
<tr>
<th>Fall and Spring</th>
<th>Fulfills Creative Arts exploratory if accumulated at least four credit hours between any combinations of MUS 121-125; 127</th>
</tr>

</tbody>
</table>

Franklin College Singers is a chamber ensemble that is committed to excellence in choral singing. The ensemble performs in concert on campus, at campus athletic events, in the Franklin community, and in area schools and churches. The Franklin College Singers uphold the mission statement of the college and strive to represent the vision of the college both on and off-campus. The high performance standards established by the conductor, upheld by the college, and inherent within the choral repertoire require individual dedication, time, and positive attitude. Graded.

**MUS 122 Men's Chorus**

<table>

</tbody>
</table>

This guitar class is intended as a one-semester introduction to playing popular songs. This will involve learning basic open chords (major, minor, dominant seventh) as well as their progressions and learning to read and play single notes on the sixth, fifth, and fourth strings. Students will also learn basic rhythmic values of notes. During the second seven weeks of the class, students will learn to play bar chords, read and play single notes on the third, second, and first strings, and learn about dotted and tied rhythms. This course is subject to the availability of a qualified instructor and sufficient enrollment.

</tbody>
</table>

Prereq: MUS 170 or audition

This guitar class builds upon the skills learned in MUS 170. This course is intended for students who can comfortably play bar chords and have basic knowledge of the instrument. Students will learn how to play and build more advanced harmonies, gain basic knowledge of single line melodies and their improvisation, and start finger picking exercises for the right hand. This course is subject to the availability of a qualified instructor and sufficient enrollment.
MUS 180 Class Piano I

Fall
Together, with MUS 181, fulfills Creative Arts exploratory
2 credit hours

Open to all students, this is a beginning level piano class. Students will learn how to play the piano and how to read musical notes and rhythms. Students will learn how to build and play chords. Music styles will include folk, patriotic, and holiday songs, and other familiar tunes. Piano technique will include scales and chord progressions. Class occurs in the electronic piano lab and students will have access to piano practice rooms during the week.

MUS 181 Class Piano II

Spring
Together, with MUS 180, fulfills Creative Arts exploratory
Prereq: A grade of C- or better in MUS 180 or equivalent
2 credit hours

Open to all students, this is the second semester of beginning level piano for students who have taken MUS 180 or for students who have a little background in playing the piano. Students will continue with music reading, chord building, harmonizing melodies and improvising in addition to learning more songs. Class occurs in the electronic piano lab and students will have access to piano practice rooms during the week.

MUS 210 Theory and Musicianship III

Fall
Prereq: Grade of C- or better in MUS 111
4 credit hours

Theory and Musicianship III is the final semester of the three-semester course sequence that is designed to develop a student’s ability to think in musical sound. This course focuses on chromatic harmony, sight-singing, and macro & micro analysis.

MUS 219 World Music

Fall
Creative Arts and International exploratories
3 credit hours

A survey of Non-Western Music from across the globe. Students will develop skills for describing various musical styles and work toward understanding music’s role in cultural identity. Students will learn to play instruments from these societies in a weekly performance lab and may choose to participate in a concert on campus at the end of the semester. No prior musical experience is necessary.

MUS 300 Topics in Music

3 credit hours

A topic of current interest in music will be taught. Topics will vary depending on faculty interest. Course will be offered upon the request of a faculty member and with approval of the Vice President of Academic Affairs.

MUS 310 Conducting and Score Preparation

Spring, odd academic years
Prereq: Grade of C- or better in MUS 110 and 111
2 credit hours

This course functions to establish and develop basic conducting skills with an emphasis on simple metrical patterns, fundamental conducting technique, non-verbal communication, and the basics of score study. This course will integrate components of music theory, history and performance in such a way that each student will gain the skills that are appropriate to prepare and conduct rehearsals and performances.

This course offers students instruction on woodwind instruments and provides students with a basic knowledge of how the instruments work and how to play them properly. Through hands-on experience and further class instruction, students will also develop a knowledge of best practices in woodwind pedagogy.

This course offers students instruction on string instruments and provides students with a basic knowledge of how the instruments work and how to play them properly. Through hands-on experience and further class instruction, students will also develop a knowledge of best practices in string pedagogy.

This course offers students instruction on brass instruments and provides students with a basic knowledge of how the instruments work and how to play them properly. Through hands-on experience and further class instruction, students will also develop a knowledge of best practices in brass pedagogy.

This course will introduce music students to common technology used within the music industry, including Audacity and Finale. Students will then use the given technology to learn and apply a basic understanding of arranging music for a given ensemble, including instrument and voice range, effective voicing of chords, and providing a publishable product.

This course will introduce the instrumental music student to the major works in the band and orchestra literature. Literature will be investigated according to historical context, style, interpretation, and performance and programming issues. Instrumental music majors should take this class in conjunction with MUS 310.

This course is a survey of Western Music from its early beginnings to the Classical Era. The course will offer opportunities to become involved with music from a historical perspective, examining the cultural and societal norms which drive the creative processes of the time. A focus will be placed upon the examination of many works representing various genres within the Early, Medieval, Baroque and Galant periods.

This course is a survey of Western Music from the Classical period to the present. The course will offer opportunities to become involved with music from a historical perspective, examining the cultural and societal norms which drive the creative processes of the time. A focus will be placed upon the examination of many works representing various genres within the Classical, Romantic, and Modern/Post-Modern periods.

Neuroscience

Departments: Biology, Chemistry & Physics, and Psychology

Neuroscience, the study of the structure, development, chemistry, pathology, and function of the nervous system, can trace its origins to prehistory. In the intervening millennia, the study of the nervous system continued, with the beginning of the 20th century marking the age of modern neuroscience. Since then, the rapid advancement in medical science has fueled an exponential growth of the field.

Though some neuroscience careers require advanced degrees, there are many possible, high-paying positions for those graduating with a bachelor’s degree in neuroscience. These opportunities can range from pharmaceutical sales to clinical research, and from work in nonprofit science advocacy to law enforcement. The different concentrations in this major allow students to tailor their course work to both their interests and to their career goals. Students wishing to continue their education in neuroscience with the pursuit of a graduate degree can choose from over 52 Masters and 58 Ph.D. programs here in the United States alone.

Neuroscience Major

Core Requirements
- BIO/KIN 121 Medical Terminology & Documentation for Allied Health Professionals
- BIO 134 Principles of Biology
- BIO 140 Cell Biology
- BIO 225 Bioethics
- CHE 121 General Chemistry I
- CHE 123 General Chemistry I Lab
- CHE 122 General Chemistry II
- CHE 124 General Chemistry II Lab
- MAT 224 Basic Applied Statistics
- PSY 117 General Psychology
- PSY 210 Introduction to Neuroscience
- PSY 322 Behavioral Neuroscience

Professional Development Requirements
- PDP 200 Preparing for your Internship OR BIO 390 Professional Development Planning
- INT 425 Neuroscience Internship (at least two (2) credit hours)

Capstone Requirements
- NEU 498 Senior Project in Neuroscience
- NEU 499 Senior Competency Practicum

Neuroscience Concentration Requirements
Select FOUR (4) courses from ONE (1) concentration below
* Required course for the concentration

Biology Concentration
- BIO 210 Human Anatomy and Physiology I
- BIO 215 Human Anatomy and Physiology II

Philosophy

**Department**: Philosophy and Religion  
**Department Chair**: J. Alexander  
**Department Members**: J. Alexander, N. Dular

**Major**: Philosophy  
**Minor**: Philosophy

The Franklin College philosophy program is designed to prepare students for a life of critical examination of themselves and their society; to develop in students an ability to detect the structures, the strengths and weaknesses, and the assumptions of argumentation; and to seek to put these skills to use for the betterment of society.

To fulfill this mission, the program provides opportunities for students to understand the basic questions of all disciplines and of human existence by introducing them to the major traditions and thinkers in philosophy. The program also provides practice in sharpening the skills of logical argument and awareness of the major value systems and how they shape persons and cultures.

Students will learn to think philosophically in a variety of contexts; to seek and detect the assumptions involved in argumentation; to judge what is not only in terms of what might be, but as well in terms of what ought to be; and to understand the value of critical self-examination.
Philosophy Major
A major in philosophy is offered for those students preparing for professional careers in college teaching, law, medicine, and the ministry. As well, the area is strongly recommended for persons expecting careers involving significant amounts of decision-making, such as management, or involving the helping professions. All courses are available to all students except 300 and 400 level philosophy courses, which are not available to first-year students. PHL 470 and PHL 490 require the consent of the instructor. All prerequisites require a C- or better.

Core Requirements
- PHL 116 Introduction to Philosophy
- PHL 210 Logic
- PHL 499 Senior Competency Practicum

Professional Development Requirements
- PDP 200 Preparing for Your Internship
- PHL 498 Portfolio Development Practicum
- SNR/SNT 489 (PHL) Senior Year Experience/Project

One of the following courses
- PHL 220 Principles of Ethics
- PHL/POL 360 Social and Political Thought

One of the following courses
- PHL 230 Philosophy of Language
- PHL 314 History of Philosophy

One of the following courses
- PHL 325 Topics in Value

Nine to ten additional hours in PHL

Related Field Requirement
 Twelve semester hours to be approved by the department and submitted in writing to the Academic Records Office. All related field courses require a C- or better.

A student planning to do graduate work should acquire a reading knowledge of French.
Philosophy Minor

Core Requirements
- PHL 116 Introduction to Philosophy
- PHL 210 Logic

One of the following courses
- PHL 220 Principles of Ethics
- PHL/POL 360 Social and Political Thought

One of the following courses
- PHL 230 Philosophy of Language
- PHL 314 History of Philosophy

One additional PHL course beyond those listed above

</table>
PHL 314 History of Philosophy  
4 credit hours  
Spring, odd academic years  
Reasoning & Values exploratory  
Prereq: One additional PHL course  
This course covers key figures in the history of western philosophy. Time periods covered will include Pre-Socratic, Ancient, Medieval, Modern, and developments in the early 20th century. Will cover major works by Plato, Aristotle, Augustine, Aquinas, Descartes, Spinoza, Hobbes, Locke, Rousseau, Hume, Kant, James, Wittgenstein, Sartre, and Beauvoir. Prerequisite: one additional Philosophy course.

PHL 325 Topics in Value  
4 credit hours  
Spring  
Prereq: One additional PHL course  
This course offers a rotating topic of major concern in value theory, broadly construed. Areas within value theory include: Metaethics, Normative Ethics, Social and Political Theory, Applied Ethics, Aesthetics, and Non-Ideal Theory. This course will focus on creating students’ knowledge and understanding of the nature of value and normativity, and cultivating students’ ability to critically assess claims on what is and is not of value and what ought or ought not to be. Prerequisite: One additional Philosophy course.

PHL 360 Social and Political Thought  
4 credit hours  
Fall  
Study of social and political ideas such as the nature and justification of political power, the nature and legitimacy of governments, and related topics from Plato to the present. Same as POL 360.

PHL 365 Philosophy of Religion  
4 credit hours  
Fall, even academic years  
Persistent philosophical problems of historical religions, such as the nature of religion, religious knowledge, and the nature and existence of God, and human freedom. Same as REL 365.

PHL 470 Seminar: Themes in Philosophic Inquiry  
3 credit hours  
Prereq: consent of instructor  
A study of the theory of knowledge, metaphysics, axiology, advanced logic, or some particular thinker, tradition, or theme, depending on needs and interests of students.

PHL 482 Philosophy Practicum  
1-2 credit hours  
Prereq: instructor permission  
A supervised, pre-approved experience which allows a student to pursue specific learning goals and/or be involved in a field experience during the regular academic semester.

PHL 490 Independent Study  
1-2 credit hours  
Prereq: departmental consent  
An academic project designed to encourage student initiative and to provide a degree of flexibility in the departmental program. Normally the subject is not sufficiently or appropriately covered in departmental course offerings.

PHL 498 Portfolio Development Practicum  
No credit  
Coreq: PHL 499 and SNR/SNT 489  
Each student must develop a portfolio containing an appropriate body of work that, by the time of graduation, demonstrates the student is ready to make the transition to the professional workplace or graduate school. The specific format and content of the portfolio is determined through consultation of the student with the department and by attending appropriate sessions of PDP 200. PHL 498 is one component of the SNR/SNT 489 requirement. Portfolios will receive either a passing or failing grade.
<table>

Franklin College requires a senior year experience (SNR/SNT 489) of all graduating seniors. A portfolio, some participation in PDP 200 and a practical professional development experience related to the field of philosophy and the student’s future plans are normal components. Options for completing this requirement will be as determined for each student in consultation with the department.
The political science department provides the means by which, within the liberal arts curriculum, undergraduate students learn to understand the political process (at both domestic and international levels.) The place of political science in a liberal arts setting has been established for the better part of 3,000 years. The department offers two sets of courses: one concerned with international politics, and another concerned with American politics. Like the ancient Greek philosophers, political science is concerned both with understanding and evaluating the processes which allocate societal values. In so doing, our students will be able to appreciate and understand these two levels of the political process. The department offers core coursework within two majors, which each focus on different aspects of the study of politics.

The major in Political Science builds from a core academic and philosophical examination of politics through to practical application. Students majoring in Political Science live the connection between theory and practice as they explore the interplay of politics/law in their choice of an immersive learning experience. Throughout the rest of the curriculum students expand upon this knowledge and experience base to build a formidable resume that includes completion of their own independent research prior to graduation. As a result of this training, students will be able to think analytically about the problems that face humankind internationally and domestically. They will be prepared for such things as law school, graduate school, employment by government at the local, state, and federal levels, as well as careers in teaching.

All political science majors and minors must earn a grade of C- or better in all required political science courses. Students majoring in political science must complete the 29 semester hours of political science with a minimum graduation GPA of 2.00 (A=4.00). Students wishing to minor in political science or international relations must complete all required courses with a minimum graduation GPA of 2.00 (A=4.00).

The major in Political Economy is Franklin College’s interdisciplinary major. Coursework within the major examines the relationship between politics and economics in modern societies and focuses on problems of both domestic and international policy. Students majoring in Political Economy study the political and economic factors that affect, and are affected by, systems of production, exchange, and distribution. That is, political economy majors analyze how international and domestic political factors interact with micro- and macro-economic factors to determine outcomes in a wide variety of areas including globalization, international trade and finance, regulation, development, taxes, and income distribution. As a result, students will be able to think logically and analytically about the problems that face humankind internationally and domestically. They will be prepared for law school, graduate school and employment by private sectors and government at the local, state, and federal levels, as well as careers in teaching.

All political economy majors and minors must earn a grade of C- or better in all required coursework for the major, minor and related field. Students majoring in political economy must complete the all required major/minor courses with a minimum graduation GPA of 2.00 (A=4.00). Furthermore, regardless of major, all students taking economics courses must complete all prerequisites with a C- or better.
Political Science Major

Core Requirements
- **POL 110** American National Government
- **POL 360** Social and Political Thought
- **POL 469** Methods of Political Inquiry
- **POL 470** Senior Seminar
- **POL 499** Senior Competency Practicum
- **MAT 224** Basic Applied Statistics

One of the following courses
- **POL 410** American Constitutional Law I: Powers and Duties
- **POL 420** American Constitutional Law II: Civil Rights and Liberties

Immersive Learning Requirement – one of the following courses
- **POL 225** State and Local Government
- **POL 234** American Political Participation
- **POL 275** Law and Politics in American Society
  Any other experiential course relating to political science by approval of the Department

Two of the following courses – not the same courses as used above
- **POL 225** State and Local Government
- **POL 234** American Political Participation
- **POL 275** Law and Politics in American Society
- **POL 316** American Presidency
- **POL 317** American Congress
- **POL 336** Introduction to Public Policy
- **POL 350** Public Administration
- **POL 410** American Constitutional Law I: Powers and Duties
- **POL 420** American Constitutional Law II: Civil Rights and Liberties

Two of the following courses – not the same course as used above
- **POL 120** Introduction to International Relations
- **POL 130** Introduction to Comparative Politics
- **POL 320** International Security and Conflict Management
- **POL 341** International Law and Organizations
- **POL 355** Comparative Politics in Developed Countries
- **POL 390** American Foreign Policy

Additional POL credits, if necessary, to meet the minimum required of 25 hours beyond **POL 110**.

Professional Development Requirements
- **POL 498** Portfolio (take with **POL 470**)
- **SNR/SNT489 (POL)** Senior Internship/Project

Related Field Requirement
 Twelve semester hours in a related field such as journalism, philosophy, history, economics, psychology, or sociology (any variations must be approved by the department and submitted in writing to the Academic Records Office). Courses may be taken outside these departments for a related field only with the consent of
the chairperson of the department of political science. All related field courses must be completed with a grade of D or better.

**NOTE:** POL 110 should be taken before the completion of the sophomore year.

**Political Economy Major**

*Cannot be combined with Economics and/or Political Science majors*

**Core requirements**

**Political Science Field**
- POL 110 American National Government
- POL 120 Introduction to International Relations
- POL 130 Introduction to Comparative Politics
- POL 336 Introduction to Public Policy
- POL 360 Social and Political Thought

**Economics Field**
- ECO 115 Principles of Economics
- ECO 223 Intermediate Macroeconomics

**Statistics Field**
- ECO 380 Econometrics

**Senior Capstone Courses**
- ECO 475 Strategic Implementation Project
- ECO 499 Senior Competency Practicum or POL 499 Senior Competency Practicum

**Elective courses**

**Political Science Field** — choose three courses from the following
- POL 316 American Presidency
- POL 317 American Congress
- POL 320 International Security and Conflict Management
- POL 341 International Law and Organizations
- POL 350 Public Administration
- POL 390 American Foreign Policy
- POL 410 American Constitutional Law I: Powers and Duties
- POL 420 American Constitutional Law II: Civil Rights and Liberties

**Economics Field** — choose two courses from the following
- ECO 330 Money and Banking
- ECO 350 International Business and Finance
- ECO 360 Labor Economics and Management

**Professional Development Requirement**
- PDP 200 Preparing for Your Internship
- INT XXX Internship in Economics or related field (4 credits) or SNR/SNT489 (POL) Senior Internship/Project (4-6 credits)
- ECO 498 Portfolio or POL 498 Portfolio (take with POL 470)
Related Field Requirement

MAT 131 Introduction to Quantitative Analysis
MAT 224 Basic Applied Statistics

Two of the following courses
ACC 341 Introduction to Taxation
BUS 341 Business Law I
PHL 220 Principles of Ethics
PSY 320 Social Psychology
SOC 210 Criminal Justice
SOC 321 Criminology
Other courses approved by faculty from both political science and economics

Political Science Minor

Core requirements
POL 110 American National Government
POL 120 Introduction to International Relations
POL 130 Introduction to Comparative Politics
POL 360 Social and Political Thought

One of the following courses
POL 410 American Constitutional Law I: Powers and Duties
POL 420 American Constitutional Law II: Civil Rights and Liberties

International Relations Minor

Note: This minor is not available to political science majors.

Core requirements
POL 120 Introduction to International Relations
POL 130 Introduction to Comparative Politics
POL 341 International Law and Organizations
POL 360 Social and Political Thought

One of the following courses
BUS/ECO 350 International Business and Finance
CAN/POL 355 Comparative Politics in Developed Countries
HIS 361 East Asian History
HIS 365 History of the Middle East
PHL/REL 250 Living Religions East

Two semesters of a foreign language offered by Franklin College.
Political Economy Minor

Note: This minor is not available to political science majors or minors, economics majors or minors, or international relations minors.

Core requirements
Political Science Field
- POL 110 American National Government
- POL 120 Introduction to International Relations
- POL 336 Introduction to Public Policy

Economics Field
- ECO 115 Principles of Economics
- ECO 223 Intermediate Macroeconomics

Elective courses
Political Science Field – choose one course from the following
- POL 130 Introduction to Comparative Politics
- POL 225 State and Local Government
- POL 316 American Presidency
- POL 317 American Congress
- POL 360 Social and Political Thought

Economics Field – choose one course from the following
- ECO 330 Money and Banking
- ECO 350 International Business and Finance
- ECO 360 Labor Economics and Management

The purpose of this course is to bridge the gap between theory and practice in the field of politics. Important topics, both international and domestic, may be selected by the department. Courses will be offered upon the request of a faculty member and with approval of the Vice President of Academic Affairs.
**POL 316 American Presidency**

- **Credit hours:** 4
- **On demand:**
- **Prereq:** POL 110

Examination of the institutionalization of the presidency, as well as the topics of power, personality, public opinion, and elections. Students develop an understanding of the constraints placed on the individuals that hold the presidency as well as the manner in which the behavior of these individuals irrevocably change the institution. Students learn of the powers and imperatives of the American presidency, as well as an understanding of the president’s role in the American political order.

**POL 317 American Congress**

- **Credit hours:** 4
- **On demand:**
- **Prereq:** POL 110

Examination of the institutionalization of Congress, the theories regarding motivations of its members and how these motivations likely impact the nature of the institution itself. Topics discussed include: rules, procedures, and structures of Congress; elections; and the role of parties, leadership and interest groups. Students learn alternative ways of conceiving the motivations of members of Congress and how such motivation might impact policy, as well as the importance of information in making legislative decisions.

**POL 320 International Security and Conflict Management**

- **Credit hours:** 4
- **On demand:**
- **Prereq:** POL 120

Examination of international conflict and cooperation. A wide range of competitive situations are surveyed, including: war, global economy, terrorism and the environment. The structure and functions of international organizations and their role in the resolution of international conflicts are also examined. Students learn to critically assess international relations theory regarding the prospects of war and peace.

**POL 336 Introduction to Public Policy**

- **Credit hours:** 4
- **On demand:**
- **Prereq:** POL 110

Introduction to the elements of the American public policy process including the identification, formation, adoption, implementation, and impact stages.

**POL 341 International Law and Organizations**

- **Credit hours:** 4
- **Fall, odd academic years:**
- **Prereq:** POL 120

Nature, sources, and functions of international law with particular attention to the rights and duties of states. The new subject of international law: international organizations particularly the United Nations will be examined thoroughly.

**POL 350 Public Administration**

- **Credit hours:** 4
- **On demand:**
- **Prereq:** POL 110

Theories and processes of public bureaucracy with emphasis on alternate efficiency and accountability problems in a democratic political system.

**POL 355 Comparative Politics in Developed Countries**

- **Credit hours:** 4
- **On demand:**
- **Prereq:** CAN 130 or POL 130 or consent of instructor

This course examines the political cultures, governmental institutions, and current policy debates in Canada, France and Germany. Relations between these countries and the United States will also be examined. Same as CAN 355.

**POL 360 Social and Political Thought**

- **Credit hours:** 4
- **Fall:**

Study of social and political ideas such as the nature and justification of political power, the nature and legitimacy of governments, and related topics, from Plato to the present. Same as PHL 360.

Pre-Law Curriculum

Program Advisors: A. Fetter-Harrott, R. Smith

Program: Pre-Law

Students who plan to enter a law school upon graduation from Franklin College may complete any major. Those most prepared for the challenge of law school practice will develop an understanding of the U.S. legal system, its historical and philosophical bases, and issues central to ethical, contemporary practice. To earn a pre-law designation upon graduation from Franklin College, students must complete the following program with the guidance of the pre-law advisors.

Required courses
- POL 110 American National Government
- POL 275 Law and Politics in American Society

Category A: One of the following courses
- MAT 181 Discrete Mathematics I
- PHL 210 Logic

Category B: One of the following courses
- ENG 227 The English Language
- ENG 228 Advanced Composition

Category C: One of the following courses
- BUS 341 Business Law I
- MMJ/PRL 445 Communication Law in a Digital World
- POL 341 International Law and Organizations
- POL 410 American Constitutional Law I: Powers and Duties
- POL 420 American Constitutional Law II: Civil Rights and Liberties

Category D: 10 or 11 semester hours* from the following courses
- Any course listed in Category C above
- ACC 221 Principles of Accounting I
- ACC 222 Principles of Accounting II
- BIO 225 Bioethics
- BIO/CHE 334 Biochemistry
- BIO/CHE 392 Techniques in Biotechnology and Biochemistry
- BUS/ECO 340 Business Organization and Public Policy
- BUS/ECO 360 Labor Economics and Management
- ECO 115 Principles of Economics
- ECO 221 Intermediate Microeconomics
- ENG 333 Shakespeare
- HIS 231 African American History
- HIS 325 History of American Thought
- HIS 332 History of Women in the United States
- LEA 220 Leadership: Foundations, Theory, and Practice
- MAT/SOC 224 Basic Applied Statistics
PHL 220 Principles of Ethics
POL 225 State and Local Government
POL 336 Introduction to Public Policy
POL 360 Social and Political Thought
SOC 118 Introduction to Sociology
SOC 210 Criminal Justice
SOC 321 Criminology

*Students who take either BUS 341 Business Law I or MMJ/PRL 445 Communication Law in a Digital World to fulfill their Category C requirement must take 11 hours from Category D. All others must take only 10 hours from Category D.

Additionally, students may petition the Pre-Law Program Advisors to substitute another course not listed in the catalogue (such as a Topics, Immersive Term, or Independent Study course) to meet the 10 or 11 hour requirement.

**Internship Requirement**

Students must complete at least one high quality law-related internship approved by the pre-law advisors.

Complete course descriptions for each of these offerings may be found elsewhere in this catalog under the appropriate major headings. Note that some course may have prerequisites.
Psychology

**Department:** Psychology  
**Department Chair:** J. Bromley  
**Department Members:** J. Bromley, W. Eiler, K. Flora, R. Rush

**Major:** Psychology  
**Minors:** Psychology  
**Associated Major:** Neuroscience  
**Associated Minor:** Neuroscience  
**Cooperative Program:** Accelerated Master of Public Health

**Program Information:** Psychology is the scientific study of human behavior. Even the most introverted, isolated individuals must interact with others at some point; nobody is exempt from the findings of the field of psychology. Because most people interact with others regularly, most people use psychology on a daily basis whether they are aware of it or not. Findings from the field of psychology can be applicable to a broad range of occupations and roles, from managers to teachers to parents. Thus, psychology provides the insight to better understand ourselves and our wide network of relationships.

Operating within the strong liberal arts structure at Franklin College, the Psychology Program communicates to students that psychology offers unique ways of thinking and knowing, which have great potential for helping people identify and cope with the world’s problems. Additionally, the program aims to develop in students the compassion, command and comprehension they will need to work toward making the world a better place for all individuals to lead satisfying and productive lives.

The Psychology Program strives to:
- provide students with a broad and deep knowledge base in psychology  
- engage students in practical applications of that knowledge base  
- enable students to develop methodological competence and ethical sensitivity  
- encourage students to play an active role in their education both inside and outside of the classroom.

*All major and minor courses and prerequisites must be completed with a grade of C- or better.*
**Psychology Major**

Minimum of 30 semester hours as follows. A maximum of 9 credit hours of transfer credit may be applied to the 30 hours of coursework required for the psychology major.

**Core Requirements**
- **PSY 117** General Psychology
- **PSY 227** Introductory Statistics and Research Methods in Psychology
- **PSY 240** Abnormal Psychology
- **PSY 320** Social Psychology
- **PSY 322** Behavioral Neuroscience
- **PSY 419** Advanced Statistics and Research Methods in Psychology I
- **PSY 420** Advanced Statistics and Research Methods in Psychology II
- **PSY 422** History and Systems
- **PSY 499** Senior Competency Practicum

**Professional Development Requirements**
- **PDP 200** Preparing for you Internship
- **PSY 482** Professional Development in Psychology
- **PSY 498** Portfolio
- **SNT 489 PSY** Internship in Psychology

**One course from two of the following three categories**

*Category A – Developmental/Applied*
- **PSY 226** Lifespan Development
- **PSY 250** Industrial Organizational Psychology
- **PSY 330** Psychology and Law
- **PSY 416** Health Psychology

*Category B – Personality/Counseling*
- **PSY 310** Introduction to Counseling
- **PSY 315** Psychology of Diversity
- **PSY 421** Theories of Personality

*Category C – Cognitive/Biological*
- **PSY 210** Introduction to Neuroscience
- **PSY 324** Psychology of Learning
- **PSY 326** Psychopharmacology
- **PSY 328** Cognitive Psychology

**Related Field Requirement:** Students are required to choose ONE of the following options

*Related Field Option* - Twelve credit hours from one academic field outside of psychology as approved by the department.

*Minor Option* - A minor in an academic field outside of psychology. Students must meet the requirements of the department offering the minor.

*Double Major Option* - A second major at Franklin College. Students must meet all requirements for the second major and the psychology major.

**Sequencing Notes:** A student is strongly recommended to take PSY 227 in the first or sophomore year since PSY 227 is a prerequisite for the PSY 419/PSY 420 course sequence. Students contemplating a major or minor in psychology must receive a grade of C- or better in PSY 117 before registering for upper level classes. Another general
recommendation is that PSY 320 should be completed in the junior year. Students should pay particular attention to alternate year course offerings and carefully plan, in close consultation with their advisor, the timing for taking these courses. Undergraduate research is recommended for students planning to attend graduate school.

**Neuroscience Major**

Please see separate Neuroscience section in this course catalog.

**Psychology Minor**

**Core Requirement**

PSY 117 General Psychology

**Four of the following courses - At least one of the four courses must be a 300 or 400 level course.**

*Students should select four of the following courses best suited to supplement their major emphasis or career interest, after consultation with advisor or psychology faculty.*

- PSY 226 Lifespan Development
- PSY 227 Introductory Statistics and Research Methods in Psychology
- PSY 240 Abnormal Psychology
- PSY 250 Industrial Organizational Psychology
- PSY 310 Introduction to Counseling
- PSY 315 Psychology of Diversity
- PSY 320 Social Psychology
- PSY 322 Behavioral Neuroscience
- PSY 324 Psychology of Learning
- PSY 326 Psychopharmacology
- PSY 328 Cognitive Psychology
- PSY 330 Psychology and Law
- PSY 416 Health Psychology
- PSY 421 Theories of Personality

**Neuroscience Minor**

Please see separate Neuroscience section in this course catalog.
Cooperative Programs in Psychology
Franklin College offers an accelerated Master of Public Health (AMPH) in the form of a 3 + 2 combined Bachelor of Arts (3) and Master of Public Health (2) degree with the IUPUI Richard M. Fairbanks School of Public Health. This consists of a common core and specific courses required for each particular program. After completion of three years of college work and fulfilling Franklin College graduation requirements (except total graduation hours and completion of one of the two required diversity and international courses), students may receive a bachelor of arts degree from Franklin College upon completing one year at IUPUI, for a total of 120 semester hours. Successful completion of the first year in the cooperative program satisfies the internship or senior year experience requirement for the major. Any student following these programs who is not accepted by IUPUI after the third year could return to Franklin College and receive a bachelor of arts in psychology by completing: 1) all of the remaining requirements for the psychology major, 2) one additional diversity or international course, and 3) 120 total semester hours required for graduation. (Students with a declared enrollment in the aforementioned cooperative program will be given priority during registration in subsequent semester(s)). See the Public Health section of this catalog for more details.

Franklin College also offers an accelerated Master of Athletic Training (MSAT) in the form of a 3 + 2 combined Bachelor of Arts (3) and Master of Athletic Training (2) with the graduate program at Franklin College. A student would hold a Bachelor of Art (BA) in Psychology with an Exercise Science related field and a Master of Science in Athletic Training (MSAT) after completing the required curriculum. Students should apply by January 15 of their junior year to meet the early admission deadline. See the Athletic Training section of this catalog for more details.

<td>The human nervous system, particularly the brain, is the most complicated machine in the known universe. With hundreds of billions of moving parts, we are only now beginning to unravel its secrets. The goal of this course is to survey our current understanding of the brain using an integrative approach. Students will examine neuroscience from the perspectives of the natural (e.g. biology, chemistry, physics) and social (e.g. psychology) sciences while also examining the methodologies used in the study of the brain. In addition, we will consider the social and medical implications that evolve from our growing understanding of neuroscience. Future careers in the field of neuroscience will also be discussed.</td>

</tbody>
</table>
**PSY 250 Industrial Organizational Psychology**  
4 credit hours  
Fall, even academic years  
Prereq: MAT 224 or PSY 227

This course examines the field of industrial-organizational psychology. Topics studied include test and scale development, selection practices, job satisfaction, absenteeism interventions, turnover, organizational commitment, performance management and leadership. Using empirical evidence, students will examine current organizational practices as compared to best practices through two substantive projects.

**PSY 300 Topics in Psychology**  
3-4 credit hours  
On demand

A topic of current interest in psychology will be taught. Topics will vary depending on faculty interest. Course will be offered upon the request of a faculty member and with approval of the Vice President of Academic Affairs.

**PSY 310 Introduction to Counseling**  
4 credit hours  
Spring, even academic years  
Prereq: PSY 117

The purpose of this course is to provide an introduction to the theories, research, and practice of counseling. The history as well as the current status of the profession of counseling will be discussed. In addition, the values of the counseling field and underlying assumptions will be described. Scientific and professional aspects of counseling will be explored. Different counseling approaches, including, psychoanalytic, humanistic, behavioral, and cognitive theories, will also be introduced. Introductory active listening and interviewing skills will also be covered.

**PSY 315 Psychology of Diversity**  
4 credit hours  
Fall, even and Spring, odd academic years  
Diversity exploratory  
Prereq: PSY 117

This course will cover the study of culture in psychology and the application of cultural knowledge to the scientific study of human behavior. Areas in cultural psychology that will be covered include research methods, psychological development, health, cognition, emotion, language, and social behavior. This course will also integrate student’s previous experiences in the liberal arts curriculum in to their current understanding of their cultural self.

**PSY 320 Social Psychology**  
4 credit hours  
Spring  
Prereq: PSY 117 & junior or senior standing

Survey of laboratory and field research on the interaction of an individual with his or her social environment.

**PSY 322 Behavioral Neuroscience**  
4 credit hours  
Fall, even & spring, odd academic years  
Prereq: PSY 117 or consent of instructor

A course focused on the biological underpinnings of human behavior. Topics covered include the nervous system, endocrine system, sensation and perception, memory, language, and other basic behaviors.

**PSY 324 Psychology of Learning**  
4 credit hours  
Fall  
Prereq: PSY 117

A course focused on theories and principles of animal and human learning. Topics include innate behaviors and habituation, classical conditioning, operant conditioning, observational and motor learning.

PSY 499 Senior Competency Practicum

No credit

Spring

Coreq: PSY 422

The requirement for PSY 499 are met by the successful completion of the department’s required Major Field Test in Psychology examination, PSY 422. This will be graded as pass/fail.

SNT 489 PSY Internship in Psychology

2-4 credit hours

Prereq: PDP 200

Internship experience in a field related to the student’s chosen career field and in conjunction with professional development. Credit hours vary according to particular internship experience. May be completed after the student completes PDP 200.
Accelerated Master of Public Health

Franklin College offers an accelerated Master of Public Health Program (AMPH) in the form of a 3 + 2 combined Bachelor of Arts (3 years) and Master of Public Health (2 years) degree with the IUPUI Richard M. Fairbanks School of Public Health. Upon successful completion of a minimum of 105 credit hours (in three years) of baccalaureate instruction at Franklin College and the core requirements of the Master of Public Health degree (in the 4th year) at IUPUI (15 credit hours), the student will be eligible to receive a baccalaureate degree from Franklin College. After completion of the required credits in the MPH program, the student will then be eligible to receive the MPH degree from IUPUI.

The MPH core graduate level courses which will be part of the credits that the student will take in the fourth year (1st year at IUPUI) of the AMPH program to fulfill the final 15 credit hours required for an FC Bachelor of Arts degree are:

- S500: Social and Behavioral Science in Public Health (3 hours)
- H501: US Health care Systems and Health Policy (3 hours)
- E517: Fundamentals of Epidemiology (3 hours)
- A519: Environmental Science in Public Health (3 hours)
- B551: Biostatistics for Public Health (3 hours)

Students interested in this three-year-plus-two-year program should carefully plan Franklin College course selections after consultation with the following AMPH faculty advisors: Jason Jimerson, Allison Fetter-Harrott, and Kristin Flora.

The criteria utilized by the Richard M. Fairbanks School of Public Health to select students for admission to the program include the following:

1. Cumulative grade point average of 3.50 (A= 4.00) or better.
2. Minimum of one year of undergraduate mathematics (MAT/PSY/SOC 224 recommended).
3. Minimum of one semester human physiology biology course
4. Competent written and oral communication skills.
5. Completed application package (contact Dr. Steven Lacy at IUPUI).
6. Personal Interview

The application to the Richard M. Fairbanks School of Public Health program must be completed by July 1st of your third year at FC for the MPH program which begins the following fall.

**Academic prerequisites for the AMPH program:**

**Biological Science:** At least one semester of Human Anatomy & Physiology

**Chemistry:** At least one semester of Introductory Chemistry or higher

**Mathematics:** One year of college math including MAT/PSY/SOC 224

The minimum total of 105 semester hours required for admission to the Richard M. Fairbanks School of Public Health programs must include all graduation requirements at Franklin College: a departmental major, six immersive term hours, and the liberal arts program requirements. Successful completion of a Public Health related internship at FC will satisfy the internship requirements for the MPH program as well. Once students are admitted into the MPH program at IUPUI they will be expected to maintain full time graduate student status (at least 9 Cr Hours per
semester) and take the core courses listed above in their first year of the graduate program to allow them to obtain their FC degree at the end of their fourth year in the AMPH program.

Tuition and fees for the MPH program are paid directly to IUPUI. For additional information about this program, students should consult with the faculty advisors listed above.
Public Relations

Department: Journalism
Pulliam School of Journalism Director: J. Krull
Department Members: J. Cramer

Major: Public Relations
Minor: Public Relations

Public relations is a management function that helps business, government and nonprofit organizations reach desired outcomes by ethically and effectively building and maintaining relationships with target audiences. Deeply rooted in the liberal arts tradition of Aristotle’s *Rhetoric* teachings, PR has become an engaging, fast-paced, demanding and strategically sophisticated profession that today uses multi-media communications tactics and technologies.

Hallmarks of the profession include, but are certainly not limited to, a) a commitment to freedom of speech and expression; b) clear, concise and compelling writing; c) an understanding of and appreciation for journalism's role in a democracy; d) appreciation of and commitment to multicultural awareness; e) mass media literacy; f) critical thinking and problem-solving skills; g) adherence to the codes of ethics of the Public Relations Society of America and the International Association of Business Communicators.

Students pursue in-depth academic studies of public relations while also gaining real-world, real-time learning experiences. Graduates are well prepared to launch careers in public relations and related fields. The public relations major also serves students who plan to pursue graduate or professional degrees in communications or other areas. The public relations program encourages students to explore possibilities for double majors, and also possibilities for study abroad and study away experiences.

Franklin College is the alma mater of one of the key historical figures in American public relations – Elmer Davis, who directed the Office of War Information for President Franklin Roosevelt during World War II.

*All major and minor courses must be completed with a grade of C- or better.*
Public Relations Major

Core Requirements
- PRL 221 Public Relations Practice Areas
- PRL 222 Social Media Strategy and Tactics
- PRL 333 Public Relations Writing
- PRL 334 Learning Engagement with Public Relations Professionals
- PRL 480 Strategic Communications Campaigns
- PRL 495 Senior Seminar in Public Relations History
- PRL 498 Portfolio Development Seminar
- PRL 499 Senior Competency Seminar

Optional Course
- PRL 303 Sports Information and Public Relations

Professional Development Requirements
- PRL 120 Ethics and Professional Development
- SNT 489 PRL Senior Year Internship

Media Skills and Knowledge Requirements
- PRL 150 Introduction to Digital Photography and Audio Reporting
- PRL 155 Video for Digital Journalism
- PRL 180 Publications Design
- PRL 445 Communication Law in a Digital World

Related Field Requirements: Students are required to choose ONE of the following options
- Related Field Option – Twelve credit hours from one academic field outside of public relations. Cross-listed courses with PRL courses, such as PRL/MMJ Publication Design, cannot count toward a related field.
- Minor Option – A minor in an academic field outside of public relations. Students must meet the requirements of the department offering the minor. Courses cross-listed with PRL, such as PRL/MMJ 180 Publication Design, cannot count toward a minor.
- Double Major Option – A second major at Franklin College. Students must meet all requirements for the second major AND the public relations major. Courses cross-listed with PRL, such as PRL/MMJ 180 Publication Design, cannot count toward a second major.

Public Relations Minor (except for Multimedia Journalism Majors)

Core Requirements
- PRL 221 Public Relations Practice Areas
- PRL 334 Learning Engagement with Public Relations Professionals
- PRL 445 Communication Law in a Digital World

Three of the following courses
- PRL 150 Introduction to Digital Photography and Audio Reporting
- PRL 155 Video for Digital Journalism
- PRL 180 Publication Design
Public Relations Minor for Multimedia Journalism Majors

Core Requirements
- PRL 221 Public Relations Practice Areas
- PRL 222 Social Media Strategy and Tactics
- PRL 333 Public Relations Writing
- PRL 334 Learning Engagement with Public Relations Professionals
- BUS 101 Introduction to the Business Mindset
- SOC 230 Introduction to Nonprofits

A practical professional experience in public relations. In special circumstances, and with permission of a majority of Pulliam School faculty, a significant experience in mass media, and not specifically in public relations, may be accepted. Pass/Fail grading.
Religion

Department: Philosophy and Religion
Department Chair: J. Alexander
Department Members: J. Alexander, N. Dular

Major: Religious Studies (Optional Track: Religion and Nonprofits)
Minor: Religious Studies

The Franklin College religious studies program is designed to provide students with the opportunity to study religion as a response to the basic question of human life, to become familiar with the religious perceptions and practices in Western and Eastern cultures, and to develop their own theological understandings and responses.

The program acquaints students with the diverse traditions of the world religions, explores the various dimensions of the phenomenon of religion, and provides insights into the spiritual quest for the “Divine” or the “Holy.”

Students will gain a foundational knowledge of major religious traditions, a substantive and applied knowledge of the major religious questions, and be able to analyze religious expressions in this culture and in the global community.
Religious Studies Major
A major in religious studies is intended to prepare students for entrance into the field of church vocations (pastorate, Christian education, counseling), the nonprofit sector, or for graduate work in preparation for teaching religion on a college or university level. REL 340, 350, 470 and 490 require consent of the instructor or specified prerequisites. Courses numbered 300 and 400 are not available to first-year students. All other religious studies courses are available as electives to all students. All prerequisites require a C- or better. The major in religious studies consists of 26 semester hours in religious studies, plus 12 semester hours in supporting fields.

Core Requirements
- REL 114 Introduction to Religion
- REL 310 Historical Faith and Modern Culture
- REL 365 Philosophy of Religion
- REL 499 Senior Competency Practicum

Professional Development Requirements
- PDP 200 Preparing for Your Internship
- REL 498 Portfolio Development Practicum
- SNR/SNT 489 REL Senior Year Experience/Project

One of the following courses
- REL 220 Old Testament Life and Literature
- REL 230 New Testament Life and Literature

One of the following courses
- REL 250 Living Religions East
- REL 260 Living Religions West

Plus additional Religion coursework to meet the minimum requirement of 26 credit hours

Related Field Requirement
Twelve semester hours to be approved by the department and submitted in writing to the Academic Records Office. All related field courses require a C- or better.
Religious Studies Major – Religion and Nonprofits Track

Core Requirements
- REL 114 Introduction to Religion
- REL 310 Historical Faith and Modern Culture
- REL 499 Senior Competency Practicum

Professional Development Requirements
- PDP 200 Preparing for Your Internship
- REL 498 Portfolio Development Practicum
- SNR/SNT 489 REL Senior Year Experience/Project

One of the following courses
- REL 220 Old Testament Life and Literature
- REL 230 New Testament Life and Literature

One of the following courses
- REL 250 Living Religions East
- REL 260 Living Religions West

One of the following courses
- REL 215 Religion in America I: History of Religion in America

Historical development, cultural influences, and contemporary expression of Hinduism, Buddhism, Confucianism, Taoism, and Shinto. Same as PHL 250.

Historical development, cultural influences, and contemporary expression of Judaism, Christianity, and Islam studied through primary as well as secondary sources.

A topic of current interest in religion will be taught. Topics will vary depending on faculty and student interest. Course will be offered upon the request of a faculty member and with approval of the Vice President of Academic Affairs.

Emergence and expressions of Christian faith in the history of Western and world cultures. Attention given to major personalities; interaction between religion and science, church and state in the modern era.

This course explores the various anthropological, psychological, and sociological theories for the presence of organized religion throughout the world; moreover, this course serves to educate students regarding the rise of religious studies as a unique discipline apart from theology and philosophy. Special attention will be given to the work of Sigmund Freud, Carl Jung, William James, Emile Durkheim, Max Weber, and Clifford Geertz, among other scholars.

A study of what the critical tools of literary criticism, form criticism, and redaction criticism can tell us about the historical Jesus; the formation of the Synoptic gospels and John, and Christological formulation in the New Testament.

An exploration of themes and issues in the thought of significant 20th and 21st century Protestant, Roman Catholic, and Orthodox theologians.

Persistent philosophical problems of historical religion, such as the nature of religion, religious knowledge, and the nature and existence of God and human freedom. Same as PHL 365.

Topics in the biblical, historical, or theological area of religious inquiry, depending upon interests of students.
### REL 482  Religion Practicum

| 1-2 credit hours | Prereq: consent of instructor |

A supervised, pre-approved experience which allows a student to pursue specific learning goals and/or be involved in a field experience during the regular academic semester.

### REL 490  Independent Study

| 1-2 credit hours | Prereq: Departmental consent |

An academic project designed to encourage student initiative and to provide a degree of flexibility in the departmental program. Normally the subject is not sufficiently or appropriately covered in departmental course offerings.

### REL 498  Portfolio Development Practicum

| No credit | Coreq: REL 499 and SNR/SNT 489 |

Each student must develop a portfolio containing an appropriate body of work that, by the time of graduation, demonstrates the student is ready to make the transition to the professional workplace or graduate school. The specific format and content of the portfolio is determined through consultation of the student with the department and by attending appropriate sessions of PDP 200. REL 498 is one component of the SNR/SNT 489 requirement. Portfolios will receive either a passing or failing grade.

### REL 499  Senior Competency Practicum

| No credit | Coreq: REL 498 and SNR/SNT 489 |

Taken concurrently with SNR/SNT 489 (REL), but may include at the department’s discretion a multiple-hour comprehensive essay examination covering topics in religious studies (biblical studies, historical theology, systematic theology, comparative religions, and philosophic theology) depending on the student’s transcript. A grade of C or better is required for graduation.

### SNR/SNT 489  REL Senior Year Experience/Project

| 2 credit hours | Coreq: REL 498 and REL 499 |

Franklin College requires a senior year experience (SNT 489) of all graduating seniors. A portfolio, some participation in PDP 200 and a practical professional development experience related to the field of religion and the student’s future plans are normal components. Options for completing this requirement will be as determined for each student in consultation with the department.
Sociology

**Department:** Sociology  
**Department Chair:** J. Jimerson  
**Department Members:** C. Crane, J. Jimerson, Z. Tang

**Major:** Sociology (Optional Track: Criminal Justice)  
**Minors:** Nonprofit Leadership, Sociology

Sociology students study how people interact. They also learn how social interactions influence individual actions (such as suicide) and vice versa. By learning to scientifically analyze, evaluate, and interpret social phenomena, students gain skills that will benefit themselves and others.

The Franklin College Sociology Department teaches students the fundamentals of sociology. First, Introduction to Sociology presents new ways of looking at the world. Next, intermediate courses teach students to analyze institutions, such as Marriage and Family, as well as phenomena, such as Stratification. In our final courses, such as Sociological Theory and Research Methods, students learn to integrate and apply what they have learned. These courses prepare sociology students for a variety of activities and careers by giving them a deep and a broad education.

Sociology students may also specialize in Criminal Justice or Nonprofit Leadership. To specialize in Criminal Justice, students must take Criminal Justice, Criminology, Corrections, and related courses. To specialize in Nonprofit Leadership, they must take Introduction to Nonprofits, Social Problems and Nonprofit Responses, and the Nonprofit Leadership Capstone in addition to other courses. These courses prepare students for more specific careers.

Finally, sociology students participate in professional development activities, internships, and other co-curricular or community-based experiences. Sociology students obtain skills that give them competitive advantages over others.

*All courses must be completed with a grade of C- or better.*
Sociology Major

Core requirements
- SOC 118 Introduction to Sociology
- SOC 224 Basic Applied Statistics
- SOC 227 Inquiry in the Social Sciences
- SOC 422 Sociological Theory
- SOC 425 Research Methods I
- SOC 427 Research Methods II
- SOC 499 Senior Comp Practicum

One course from each of the following categories

Category A
- SOC 319 Gender and Sexualities
- SOC 325 Power, Wealth, and Poverty
- SOC 330 Global Transformations

Category B
- SOC 230 Introduction to Nonprofits
- SOC 221 Marriage and Family
- SOC 323 Organizations
- SOC 340 Corrections

Category C
- SOC 220 Gerontology
- SOC 222 Social Problems and Nonprofit Responses
- SOC 321 Criminology

Senior Year Experience
- PDP 200 Preparing for Your Internship
- SNT 489 Senior Year Internship
- SOC 482 Sociology Practicum

Related Field requirements
Note: Students who declare a minor (in Nonprofit Leadership or any other minor) OR the Criminal Justice Track do NOT need additional related field requirements. Students who do NOT declare one of these options must complete a minimum of 12 semester hours 200-level or above from a related field defined in consultation with his/her advisor and approved by the Registrar. A grade of C- or better is required for all related field courses.
Sociology Major: Criminal Justice Track

Core requirements
Same as for the sociology major listed on preceding page minus the related field requirements

All of the following courses
- POL 110 American National Government*
- POL 420 American Constitutional Law II
- SOC 210 Criminal Justice
- SOC 321 Criminology
- SOC 340 Corrections

One of the following courses
- POL 225 State and Local Government
- POL 275 Law and Politics in American Society
- PSY 240 Abnormal Psychology
- PSY 320 Social Psychology
- SOC 323 Organizations

Sociology Minor

Core Requirements
- SOC 118 Introduction to Sociology

Four additional SOC courses, two of which must be 300-level or higher

Nonprofit Leadership Minor

Core Requirements
- BUS 101 Introduction to the Business Mindset
- LEA 100 Introduction to Personal Leadership Skills
- NPL 222 Social Problems & Nonprofit Responses
- NPL 230 Introduction to Nonprofits
- NPL 315 Nonprofit Leadership Capstone

One of the following courses
- BUS 371 Operations Management
- LEA course number 200-level or higher
- SOC 323 Organizations
## Sociology Course Descriptions

**SOC 118 Introduction to Sociology**  
4 credit hours  
Fall and Spring  
Human Behavior exploratory  
Methods, theories, principles, and concepts that have resulted from the scientific analysis of human interaction. Emphasis is given to the structural and cultural aspects of society and to the complex ways in which various environments influence human development and behavior. Not an appropriate exploratory course for junior and senior non-majors. Prerequisite for most other courses in sociology.

**SOC 210 Criminal Justice**  
4 credit hours  
Fall  
Diversity & Civic Learning exploratories  
Prereq or coreq: SOC 118  
This course introduces students to this history, philosophy, structure, functions, and operation of the U.S. criminal justice system. This course also examines how that criminal justice system interacts with race, class, gender, and other forms of social stratification.

**SOC 220 Gerontology**  
4 credit hours  
Spring, odd academic years  
Prereq: PSY 117 or SOC 118  
An analysis of the process of aging, which will utilize social, psychological, and structural approaches to gain an understanding of the unique problems which confront the elderly in modern society. Course goals also include the development or refinement of specific skills and techniques for studying or working with older adults through a substantive experiential learning component. Same as PSY 220.

**SOC 221 Marriage and the Family**  
4 credit hours  
Fall, odd academic years  
Prereq: SOC 118  
The institutions of marriage and family are explored. Special consideration is given to the social, cultural, and economic forces that influence trends in family structure and family functioning. Cross-cultural and subcultural comparisons are often made to show the socially constructed aspects of family.

**SOC 222 Social Problems and Nonprofit Responses**  
4 credit hours  
Spring, even academic years  
Prereq: SOC 118  
An analysis of the nature, causes, and responses to social and cultural problems such as hunger, homeless, illiteracy, drug addiction, or domestic violence. Attention will be paid to framing of these phenomena as problems. Will also address major role of the nonprofit sector in alleviating these problems with attention to effectiveness of service programs. Same as NPL 222.

**SOC 224 Basic Applied Statistics**  
3 credit hours  
Fall and Spring  
Fulfills LA 103 requirement  
Prereq: one of the following: CMP 130, LA 103, MAT 131, MAT 135, MAT 181, or placement in MAT 135/181  
An introduction to statistical reasoning for students in life and social sciences using the computer as a tool to analyze data. Data reduction, probability concepts, sampling theory, hypothesis testing, estimation, chi-square, t-test, analysis of variance, correlation and regression, and some non-parametric tests are included. Does not count towards a mathematics major. Same as MAT/PSY 224. Students cannot receive credit for both.

</tbody>
</table>
SOC 321 Criminology 4 credit hours
Spring
Prereq: SOC 118 or consent of instructor
A study of the social, cultural, and psychological process involved in the creation of deviance; attention is given to the nature of criminal law, to the various forms of social control which society uses in its attempts to cope with and prevent crime, and to the consequences of social typing on those so typed.

SOC 323 Organizations 4 credit hours
Spring
Prereq: SOC 118 or consent of instructor
An introduction to the study of formal or complex organizations; the variables which affect the structure of formal organizations; types of organizations, the relationship between formal and informal organization and alternative organizations.

SOC 325 Power, Wealth, and Poverty 4 credit hours
Spring, even academic years
Prereq: SOC 118
An examination and analysis of major concepts, theories, methods, and research findings in the field of social stratification. Stratification is presented as a result of unequal distribution of everyday life necessities such as social and political power, land, food, and shelter.

SOC 330 Global Transformations 4 credit hours
Spring, odd academic years
International exploratory
Prereq: SOC 118
This course examines the historical, political, and economic factors contributing to globalization, as well as the social consequences of recent political, economic, and environmental change. It focuses in particular on how new forms of global production and networking are transforming the traditional role of the nation-state, creating new dynamics of wealth distribution in the global economy, influencing international migration patterns. Additionally, it examines the way in which globalization processes are generating new sources of social conflict and collective action, including transnational social movements.

SOC 340 Corrections 4 credit hours
Fall
Prereq: SOC 118 & either SOC 210 or SOC 321
History, philosophy, practice, and evaluation of noncustodial and custodial sanctions in formal social control systems. This course studies a wide range of correctional treatments such as diversion programs and restorative justice, probation/parole and intermediate sanctions, incarceration, and the death penalty. Special attention will be given to juvenile corrections and cross-cultural perspectives.

SOC 422 Sociological Theory 4 credit hours
Fall
Prereq: SOC 118
A consideration of the nature and purpose of sociological theory and its relationship to empirical research. The course will consider the theories of major sociological thinkers, past and present. Students should take this course during the junior year.

SOC 425 Research Methods I 4 credit hours
Fall
Prereq: SOC 118 & SOC 227
An introduction to the design and methods employed in modern sociological research. Students are required to plan a research project and to conduct an intensive review of the literature on that topic.

SOC 427 Research Methods II 4 credit hours
Spring
Prereq: SOC 224, SOC 227 & SOC 425
Continued consideration of the design and methods employed in modern sociological research begun in SOC 425. Students are required to carry out the research project proposed in SOC 425, under the supervision of the instructor.
### SOC 482 Sociology Practicum

**1 credit hour**

**Spring**

A thoughtful reflection on an internship experience. Designed to provide students the opportunity to communicate their sociological interpretations of their real-world learning. This course meets the senior year portfolio requirement for graduation.

### SOC 490 Independent Study

**1-2 credit hours**

**Prereq:** departmental consent

Courses are designed to encourage student initiative and to provide a degree of flexibility in the departmental program. Normally the subject is not sufficiently or appropriately covered in departmental course offerings.

### SOC 499 Senior Competency Practicum

**No credit**

Students are required to develop a written report which requires the application of sociological concepts, sociological theory, and social methods to a current social issue. A grade of C- or better is required for graduation.

### SNR/SNT 489 (SOC) Senior Project/Internship

**3-12 credit hours**

This course provides professional development, usually off-campus. Students gain practical experience by performing edifying tasks in specialized settings. Students must obtain approval prior to beginning an internship, keep a written record of observations and activities for each day at the internship, and write an analysis of the internship that must be given to his or her advisor. Students may receive one-hour of credit for every thirty hours of work at the internship site.

### GEO 220 Human World Geography

**3 credit hours**

**Fall and spring**

Diversity & Human Behavior exploratories

Explores the nature of human social behaviors through the study of “diverse focus countries” recognizing recurring patterns in behavior and the forces that shape them. Students will understand how people as well as countries communicate ideas and attempt to solve problems. This course is taught through a lens of current events in the 21st century examining various diverse regions around the globe and how the cultures within those regions live and interact. Human elements of population, cultural inheritance, and accomplishments are studied as these interrelate with the physical elements. Education majors will create a project using the five themes of geography (location, place, human/environmental interaction, movement, and regions).

### Nonprofit Leadership Courses

### NPL 222 Social Problems and Nonprofit Responses

**4 credit hours**

**Spring, even academic years**

An analysis of the nature, causes, and responses to social and cultural problems such as hunger, homeless, illiteracy, drug addiction, or domestic violence. Attention will be paid to framing of these phenomena as problems. Will also address major role of the nonprofit sector in alleviating these problems with attention to effectiveness of service programs. Same as SOC 222.
NPL 230 Introduction to Nonprofits  
4 credit hours  
Fall  
This course provides an overview of the nonprofit sector in American society. Attention will be given to the widely varied roles that nonprofit organizations play in responding to social issues and the interplay between nonprofits, business, and government in this broad mission. Students will be introduced to the functions and operation of a nonprofit organization including program development and measurement, fundraising, volunteer management, board governance and management of staff and finances. Same as SOC 230.

NPL 315 Nonprofit Leadership Capstone  
4 credit hours  
Spring, odd academic years.  
Prereq: NPL/SOC 230 & LA 101, 102, 103, 111, & 201  
This course provides an integrative experience linking the student’s leadership skills and liberal arts preparation to the learning in her/his major field of study. Specifically, the capstone experience will involve direct student participation working with a non-profit organization and that organization’s board. Students in the course must develop a project(s) to be carried out with the non-profit. The project will culminate with a public event or presentation. The capstone project must be reviewed and approved by the course instructor and at least one representative of the Engaged Learning Team. Total course experience brings opportunity to think independently, lead responsibly, and serve with integrity. Same as SOC/LEA 315.

NPL 485 Communications Consulting Project  
3 credit hours  
Fall, senior year  
Civic Learning exploratory  
An examination of the ways in which students can apply their skills in the workplace and serve their communities. Students will work in teams on a communications consulting project for a local nonprofit or similar organization. Special emphasis given to professional development skills, particularly communication, project management, and consulting. Same as ENG 485.
Spanish

Department: Modern Languages
Department Chair: S. Colburn-Alsop

Major: Spanish
Minor: Spanish

The challenges of today’s world require men and women educated within a multilingual and multicultural perspective.

The department of modern languages is dedicated to meeting those challenges by offering programs that open career opportunities in journalism, international business, law, Foreign Service, social and medical services, tourism, and teaching.

The department offers majors and minors in French and Spanish. The possibility of pursuing an individualized minor in language studies or other related areas can be investigated through the individualized minor program.

One semester of a modern foreign language at the 210 course level or higher will satisfy the international exploratory requirement. One semester of a modern foreign language at the 211 course level will satisfy the diversity exploratory requirement.

Advanced Placement
Students who upon matriculation do not demonstrate proficiency equivalent to satisfactory completion of a Franklin College foreign language course numbered 111 or higher or the equivalent at another institution must complete such a course prior to graduation. If a student takes the French or Spanish placement test and places above the first-semester level, the student is eligible to receive credits for the courses below the level into which they placed, provided they successfully complete with a C- or above, at Franklin College, the course into which they placed. Students may earn up to 12 hours for French or Spanish placement. Example: Students who place into the 300 level of Spanish will receive 12 credit hours for SPA 111, 210 and 211 upon the successful completion of a 300-level course by earning a grade of C- or better. Students who place into the 200 level of Spanish will receive eight credit hours for SPA 110 and 111 upon the successful completion of a 200-level course by earning a grade of C- or better. Credits for SPA 210 and 211 count toward the Spanish major and minor and toward the 120 credit hours required for graduation. Advanced Placement credit for SPA 210 will fulfill the International exploratory, and Advanced Placement credit for SPA 211 will fulfill the Diversity exploratory. Credits for SPA 110 and SPA 111 only apply toward the 120 credit hours needed for graduation.

Helpful Notes
• Majors and minors must receive a grade of C- or better in all classes.
• The Advanced Skills courses (AS) can be taken in any order.
• The prerequisite for any Advanced Culture/Literature (CL) course is SPA 315, unless the student receives departmental approval.
• SPA 300 Topics in Spanish may be taken more than once as long as topic differs. Depending on topic, it may count as Advanced Skills or Advanced Culture/Literature, as indicated in the individual course description.
Spanish Major
The minimum requirement for a foreign language major is 28 semester hours, numbered above 111. The advanced courses, SPA 300 and above, are structured in two tiers, Advanced Skills (AS) and Advanced Culture/Literature (CL), which are designated in the list below. Students must take at least two Advanced Culture/Literature courses (CL) on the Franklin College campus or an approved campus exchange course and must receive a grade of C- or better in all 28 semester hours. The courses chosen by the student for the related field requirement must have department approval.

A maximum of 8 hours of transfer credit, AP credit, and/or advance-placement credit can be applied to the 28 hours of coursework at the 200-level or above required for the Spanish major. In order to complete the Spanish major, students must complete at least 20 credit hours of Spanish coursework at the 200-level or above at Franklin College, including two Culture/Literature classes. A Spanish major completing a semester or more of approved study abroad can apply up to 8 additional credit hours-as determined by the department-toward the total 28 credit hours required for the major. Only 4 of the possible 8 hours can be applied to the Culture/Literature requirement; the remaining 4 must be completed at Franklin College.

Minimum of 28 credit hours from the following

Required Courses (AS = Advanced Skills, CL = Culture Literature)
- SPA 210 Intermediate Spanish
- SPA 211 Intermediate Reading, Writing, and Discussion
- SPA 315 Advanced Grammar and Composition (AS)

Four courses from this group, two of which must be CL courses:
- SPA 300 Topics in Spanish (AS)
- SPA 312 Pronunciation for Communication (AS)
- SPA 313 Altruism and Civic Engagement in Latino Communities (AS)
- SPA 314 Spanish in the Work World (AS)
- SPA 316 One-Act Plays for Fluency (AS)
- SPA 317 Hispanic Visual Arts (AS)
- SPA 318 Hispanic Civilization and Culture (AS)
- SPA 330 Border Crossings (CL)
- SPA 331 Uncovering Latin America: Getting to Know the Unknown (CL)
- SPA 332 Love, Lust, God: Masterpieces of Spanish Literature (CL)
- SPA 334 Masterpieces of Spanish-American Literature (CL)
- SPA 337 Golden Age of Spanish Literature (CL)

All of the following courses
- PDP 200 Preparing for Your Internship
- SNR/SNT 489 SPA Senior Year Internship/Project
- SPA 498 Portfolio
- SPA 499 Senior Essay

At least one of the following immersive experiences
- SPA 313 Altruism and Civic Engagement in Latino Communities (AS)
- SNT 489 Program-approved internship/project requiring direct engagement with Spanish language and/or Latino culture
- Program-approved study abroad in a Spanish-speaking country
**Related field**

12 credit hours - courses chosen must have department approval and be submitted to the Academic Records Office. All related field courses must be completed with a grade of C- or better.

**Spanish Minor**

*The minimum requirement for a Spanish minor is 20 semester hours, numbered above 111.* The advanced courses, SPA 300 and above, are structured in two tiers, Advanced Skills (AS) and Advanced Culture/Literature (CL), which are designated in the list below. Students must receive a grade of C- or better in all 20 semester hours.

A **maximum of 8 hours** of transfer credit, AP credit, advance-placement credit, and/or study-abroad credit can be applied to the 20 hours of coursework at the 200-level or above required for the Spanish minor. In order to complete the Spanish minor, students must complete **at least 12 credit hours** of Spanish coursework at the 200-level or above at Franklin College.

**Required Courses** (AS = Advanced Skills, CL = Culture Literature)

- SPA 210 Intermediate Spanish
- SPA 211 Intermediate Reading, Writing, and Discussion
- SPA 315 Advanced Grammar and Composition (AS)

**Two courses from this group**

- SPA 300 Topics in Spanish (AS/CL)
- SPA 312 Pronunciation for Communication (AS)
- SPA 313 Altruism and Civic Engagement in Latino Communities (AS)
- SPA 314 Spanish in the Work World (AS)
- SPA 316 One-Act Plays for Fluency (AS)
- SPA 317 Hispanic Visual Arts (AS)
- SPA 318 Hispanic Civilization and Culture (AS)
- SPA 330 Border Crossings (CL)
- SPA 331 Uncovering Latin America: Getting to Know the Unknown (CL)
- SPA 332 Love, Lust, God: Masterpieces of Spanish Literature (CL)
- SPA 334 Masterpieces of Spanish-American Literature (CL)
- SPA 337 Golden Age of Spanish Literature (CL)
Spanish Course Descriptions

**SPA 110 Elementary College Spanish I**
4 credit hours
Fall
Designed to provide students with a basic knowledge and comprehension of Spanish, with some degree of facility in conversation. Emphasis on Hispanic culture.

**SPA 111 Elementary College Spanish II**
4 credit hours
Spring
Prereq: C- or better in SPA 110 or equivalent
Continuation of SPA 110.

**SPA 210 Intermediate Spanish**
4 credit hours
Fall
International exploratory
Prereq: C- or better in SPA 111 or equivalent
Spanish 210 is the first course at the intermediate level of university Spanish. This course will focus on fomenting and polishing speaking, listening comprehension, reading, and writing skills in the target language.

**SPA 211 Intermediate Reading, Writing, and Discussion**
4 credit hours
Spring
Diversity exploratory
Prereq: C- or better in SPA 210 or equivalent
Designed for students continuing study in Spanish language and literature, will focus on speaking, listening comprehension, reading, and writing skills in the target language through a wide variety of large-group, small-group, and individual activities. Special attention will be devoted to discussion and analysis of short Hispanic literary pieces and films, culminating in the opportunity to learn how to write an organized, thoughtful literary essay about one of the reading or film selections. Strongly recommended by the department as part of a related field for students whose major is in the humanities and who plan to pursue graduate work.

**SPA 300 Topics in Spanish**
2-4 credit hours
Prereq: C- or better in SPA 211 or consent of instructor
A topic of current interest in Spanish will be taught. Topics will vary depending on faculty interest. Course will be offered upon the request of a faculty member and with approval of the Vice President of Academic Affairs.

**SPA 312 Pronunciation for Communication**
4 credit hours
On demand
Prereq: C- or better in SPA 211 or equivalent
Combines study and practice of the sounds of the Spanish language with the development of communicational fluency through activities, such as tongue twisters, reading aloud, conversations with native speakers via Skype, etc. Fee: $60 for Skype conversation partner arrangement.

In this course we will meet two days per week (50 minutes) to read and discuss various essays, short stories, and novels from Hispanic literature that relate the subject to altruism and service. The readings will prepare students for their participatory experience in an organized service-learning activity that develops student civic responsibility and allows them to reflect on the service learning in such a way as to gain further understanding of the concept of altruism, an enhanced sense of personal responsibility and a better culture understanding of the Latino individuals with whom they work and collaborate. Class time will also be used to discuss the students’ reactions and reflections on the service-learning experience and how they relate their respective experiences to their class reading assignments. Note: The approach does not regard literature as sermons or didactic tests! The readings simply provide a platform for students to relate their own personal experiences to analysis of the literary works.

<td>Spring, even academic years, Prereq: C- or better in SPA 211 or equivalent</td>
</tr>
</tbody>
</table>

This course links the study of Spanish with many professions in business, communications, social services, education, health care, law, and much more. We will examine specific career options that encompass the Spanish language and study the corresponding work environment, culture, etiquette, and vocabulary associated with these areas. Each student will have the opportunity to explore how Spanish fits into his/her potential career choice.

This course expands students’ understanding and appreciation for Spanish-speaking cultures and communities through the study of the visual arts. It examines the ways in which the visual arts reflect history, society, class, and gender issues, and develops the understanding of art forms within specific cultural contexts. Students will develop all four language skills through analysis and discussion of the different cultural aspects studied, while further developing their historical and cultural knowledge.

Sports Communication

**Director:** J. Krull  
**Department Chair:** J. Cramer  
**Faculty:** J. Cramer, J. Krull

**Major:** Sports Communication  
**Minors:** Multimedia Journalism, Rhetoric, Visual Communications (See Multimedia Journalism section)

The Pulliam School of Journalism prepares students for careers in which news is delivered through multiple media platforms: online, on-air, in print. Through classroom, lab and professional field experiences, students are engaged and immersed in the exhilarating practice of news reporting. The multimedia focus of the major means that students become proficient in reporting, writing, editing and producing accurate, ethical and meaningful stories for print, broadcast and, especially, online/digital news outlets.

**Major Requirements**  
All courses for the major must be completed with a grade of C- or better. A grade of C- or better is required for all pre-requisite courses regardless of academic major.
**Sports Communication Major**

**Core Requirements**
- SPR 101 Sports in Society
- SPR 115 Reporting, Interviewing and Newswriting
- SPR 135 Editing for Print and Digital Online
- SPR 150 Introduction to Digital Photography and Audio Reporting
- SPR 155 Video for Digital Journalism I
- SPR 180 Publication Design
- SPR 200 Game Coverage
- SPR 255 Video for Digital Journalism II
- SPR 301 Covering Economics and Public Policy in Sports
- SPR 302 Covering Lifestyle and Outdoor Sports
- SPR 303 Sports Information and Public Relations
- SPR 445 Communication Law in a Digital World

**Professional Development**
- SPR 120 Ethics and Professional Development
- SPR 498 Senior Portfolio
- SPR 499 Senior Project

**Plus two courses from the following:**
- PED 333 Coaching Baseball and Softball
- PED 334 Coaching Basketball
- PED 335 Coaching Football
- PED 336 Coaching Volleyball
- PED 337 Coaching Track and Field
- PED 338 Coaching Soccer
- PED 339 Coaching Swimming

**Related Field Requirements**
- Twelve semester hours from ONE field outside SPR. All courses used to satisfy the related field requirement must be completed with a grade of C- or better.
**Sports Communication Course Descriptions**

Same as MMJ/PRL 155.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
**SPR 180 Publication Design**  
3 credit hours  
Fall and Spring  
This course will focus on fundamentals of typography including theory and practice in visual communication. By exploring typography, photography, layout, grids, and the principles of contrast, repetition, alignment, proximity, and hierarchy, students will create ethical, compelling, and effective two-dimensional designs. Through lectures, projects, and classroom critiques, the focus is on designing publications, information graphics and interactivity. Proficiency in Adobe InDesign and Illustrator required or willingness to learn through online tutorials. Same as MMJ/PRL 180.

**SPR 200 Game Coverage**  
3 credit hours  
Fall and Spring  
Prereq: SPR 101 & MMJ/SPR 115 or consent of instructor  
Fundamentals of and hands-on practice in deadline reporting/writing about games, matches, and meets commonly covered in the mass media. Topics include preview stories, rules reviews, coverage preparation, in-game note/statistic-taking, and post-game interviews with coaches and players. Focus in on writing accurate, clear, insightful and objective game stories for print, broadcast and social media. Games covered will vary based on season/semester. Some travel may be required.

**SPR 255 Video for Digital Journalism II**  
3 credit hours  
Fall and Spring  
Prereq: MMJ/PRL/SPR 155 or consent of instructor  
Designed to introduce broadcast writing and to enhance opportunities to develop broadcast-style shooting and editing skills. This course adds onto the video skills learned in Video for Digital Journalism I. Students will learn to shoot voice overs, voice overs with sound bites and full packages suitable for broadcast featuring news and sports content. Students will also learn to produce scripts for broadcast delivery, as well as the process of creating newscast/sportscast rundowns. Video studio techniques and procedures will be taught in the PSJ video lab. Distribution of individual stories via social media will be required. Same as MMJ 255.

**SPR 301 Covering Economics & Public Policy in Sports**  
3 credit hours  
Fall and Spring  
Prereq for SPR: SPR 101, MMJ/SPR 115, & MMJ/PRL/SPR 120 or consent of instructor  
The study of the ways financial considerations and government policies affect athletics. Features a series of in-depth interviews/discussions with decision-makers in sports, business and government. Focus will be on developing a deep understanding of the frameworks within which viable sports organizations and leagues operate.

**SPR 302 Covering Lifestyle and Outdoor Sports**  
3 credit hours  
Fall  
Prereq for SPR: SPR 101, MMJ/SPR 115, & MMJ/PRL/SPR 120 or consent of instructor  
This course will help students learn to cover recreational and competitive outdoor sports. Students will explore policy issues related to public recreation and personal hobby sports.

<tr>
<th>Course Title</th>
<th>Credit Hours</th>
<th>Term</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>No credit</td>
<td>Fall and Spring</td>
</tr>
</tbody>
</table>

Each student must develop a digital portfolio containing a significant and appropriate body of work that, by the time of graduation, demonstrates to a potential employer that the student is ready to make the transition to the professional workplace. Each portfolio also must demonstrate the student’s understanding of linkages among leadership, the liberal arts, and the student’s intended career. The specific format and content of the portfolio is determined by the faculty. Students must enroll in SPR 498 in fall or spring semester of the senior year. Portfolios will receive either a passing or failing grade by the Pulliam School of Journalism faculty. Deficiencies must be corrected before the portfolio is certified as passing.

### SPR 499 Senior Project

<table>
<thead>
<tr>
<th>Course Title</th>
<th>Credit Hours</th>
<th>Term</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>No credit</td>
<td>Fall and Spring</td>
</tr>
</tbody>
</table>

Students will demonstrate and showcase the skills they have acquired through their careers at the Pulliam School of Journalism by creating an in-depth package of stories about a significant public issue that is told from multiple media platforms. In addition to the multimedia journalism skills that must be demonstrated to successfully complete this graduation requirement, students will be expected to meet all deadlines, be quickly responsive to communications from staff/faculty project supervisors, and adhere to principles of media law and ethics.
Theatre

**Department:** Theatre  
**Department Chair:** G. Strain  
**Department Members:** N. Crisafulli, R. Roberts, G. Strain

**Major:** Theatre  
**Minor:** Theatre

**Program Information:** The fine arts division at Franklin College provides theoretical and practical education in three programs, each of which explores one of society’s creative traditions: art, music, and theatre.

The theatre department, through curricular offerings and co-curricular productions, aspires to develop students’ appreciation of theatre as an art form by expanding their understanding of the position of theatre in society and to develop their opportunities for participation in theatre, avocationally or vocationally, by increasing their competence in theatrical skills and abilities. The theatre program also administers the college’s required course in public speaking, which focuses on the preparation and delivery skills required in public address.

*All major and minor courses, related field courses, and prerequisites must be completed with a grade of C- or better.*
Theatre Major

Required courses
- THE 125 Script Analysis and Theory
- THE 135 Stagecraft
- THE 170 Theatre History
- THE 205 Acting
- THE 220 Directing I
- THE 236 Production Design
- THE 375 Dramatic Literature I
- THE 376 Dramatic Literature II
- THE 499 Sr. Competency Practicum

Three of the following courses
- THE 235 Scenic Painting
- THE 245 Playwriting
- THE 305 Acting II
- THE 325 Directing II

Professional Development Requirements
- THE 200 Professional Development
- THE 498 Portfolio
- SNR/SNT 489 Senior Experience

Related field requirements
- One course with ART prefix
- One course with MUS prefix (Must be 3-4 credit hours)
- Plus SIX additional semester hours - this is waived for students with a minor or a second major
  - The remaining credits may be any sequence of related-area courses outside the THE prefix. Courses must be approved by the department and submitted to the Academic Records Office.
Theatre Minor

Required courses
  THE 125 Script Analysis and Theory
  THE 135 Stagecraft
  THE 205 Acting
  THE 220 Directing I

One of the following courses
  THE 170 Theatre History
  THE 235 Scenic Painting
  THE 236 Production Design
  THE 245 Playwriting
  THE 305 Acting II
  THE 325 Directing II

One of the following courses
  THE 375 Dramatic Literature I
  THE 376 Dramatic Literature II

One of the following courses
  One course with ART prefix
  One course with MUS prefix (Must be 3-4 credit hours)
### Theatre Course Descriptions

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>THE 001</td>
<td>Theatre Activity</td>
<td>1</td>
<td>Activity credit given for work on theatre productions. Graded on a pass/fail basis.</td>
</tr>
<tr>
<td>THE 110</td>
<td>Theatre Appreciation</td>
<td>3</td>
<td>A study of the development of theatre as an art form within the liberal arts, including its functional theories, principles, methods, and historical context. Emphasis is on the role of the audience and the understanding and appreciation of the nature of theatre to provide students with a background, framework, and vocabulary for seeing and discussing live theatre events. Additional production work required.</td>
</tr>
<tr>
<td>THE 125</td>
<td>Script Analysis and Theory</td>
<td>3</td>
<td>Examines both traditional and nontraditional (Aristotelian and non-Aristotelian) approaches to the analysis of dramatic literature and explores literary and theatrical techniques used by significant playwrights through the ages with a focus on diverse playwrights. In addition, students will gain a critical perspective on the ways society explains the nature of the theatrical experience and the various structural approaches that create and communicate meaning in the theatre.</td>
</tr>
<tr>
<td>THE 135</td>
<td>Stagecraft</td>
<td>3</td>
<td>An introduction to the fundamentals of scenic construction, scene painting, stage properties, lighting and sound technology, and mechanical drafting. Additional production work is required. Additional fees for required materials.</td>
</tr>
<tr>
<td>THE 170</td>
<td>Theatre History</td>
<td>3</td>
<td>A tracing of the development of the institution and art of the theatre from its ancient origins to the present day, examining drama, acting, design, directing, theatre architecture and critical theory. The theatrical arts will be studied in the context of the cultures which they reflect and interpret. Research paper required.</td>
</tr>
<tr>
<td>THE 190</td>
<td>Film Appreciation</td>
<td>3</td>
<td>Film Appreciation will sharpen your ability to evaluate and discuss films critically and to recognize cinematic techniques and genres.</td>
</tr>
<tr>
<td>THE 200</td>
<td>Professional Development</td>
<td>1</td>
<td>A course designed to help theatre majors develop the necessary skills to make a successful transition into the professional world or graduate school.</td>
</tr>
<tr>
<td>THE 205</td>
<td>Acting</td>
<td>3</td>
<td>A study of the fundamentals of the acting craft, including practical analysis of play, scene, and character; work on stage voice and movement; and practical applications of these areas to the development of characterizations in scene work and monologues.</td>
</tr>
</tbody>
</table>
THE 220 Directing I 3 credit hours
Spring, odd academic years Prereq: THE 205 or consent of instructor
Principles and theories of play selection, analysis, and conceptualization; auditioning, casting, and rehearsing; stage composition, picturization, and movement; and overall production management.

THE 235 Scenic Painting 3 credit hours
Fall, even academic years Prereq: THE 135 or consent of instructor
This course will provide basic skills needed for theatrical scene painting. Students will learn how to create paint elevations and then translate an elevation to a full scale stage. Students will understand how to approach a picture, break it into “layers” or steps and then translate that to the stage. Additional production work required. Fee: $100 nonrefundable for materials.

THE 236 Production Design 3 credit hours
Fall, odd years Prereq: THE 135 or consent of the instructor
This is a studio class that will focus on the theories and practices of production design in collaborative situations, and how to communicate effectively with a group and as a group in a theatrical setting. Fee: $50 nonrefundable for materials.

THE 245 Playwriting 3 credit hours
Spring, even academic years
A course in the theoretical knowledge and beginning skills in writing a short play for the stage. The first half of the semester deals with the essential nature of drama, and the second half looks at how the various elements of dramatic structure are used to make a play effective theatrically.

THE 300 Topics in Theatre 3 credit hours
A topic of current interest in theatre will be taught. Topics will vary depending on faculty interest. Course will be offered upon the request of a faculty member and with approval of the Vice President of Academic Affairs.

THE 305 Acting II 3 credit hours
Spring, odd academic years Prereq: THE 205
Specialized work on voice and movement technique skills, especially as related to works of various styles and periods of theatre and drama. The class will focus on pre-modern styles and modern non-realistic styles.

THE 325 Directing II 3 credit hours
Spring, even academic years Prereq: THE 220 or consent of instructor
A further exploration of the skills acquired in Directing I including conceptualization of period and non-realistic plays; continuing development of leadership skills with actors, and collaboration skills used with playwrights, designers, and producers. Additional production work is required.

THE 375 Dramatic Literature I 4 credit hours
Fall, odd academic years Prereq: ENG 117, THE 110, or THE 125 or consent of the instructor
Reading and analysis of selected significant plays from ancient times through the Renaissance. Same as ENG 375.
THE 376 Dramatic Literature II  
4 credit hours  
Spring, odd academic years  
Prereq: ENG 118, THE 110, or THE 125 or consent of the instructor

Reading and analysis of selected significant plays from around the world from the 17th century to the present. Same as ENG 376.

THE 482 Advanced Practicum  
1-2 credit hours  
Prereq: consent of instructor

A supervised, pre-approved experience which allows a student to pursue specific practical learning goals and/or be involved in a field experience during the regular academic semester.

THE 490 Individualized Study  
1-2 credit hours  
Prereq: departmental and instructor consent

A course designed to encourage student initiative and to provide a degree of flexibility in the departmental program. Normally the subject is not sufficiently or appropriately covered in departmental course offerings.

THE 498 Senior Portfolio  
No credit

Each student must develop a portfolio containing an appropriate body of work that, by the time of graduation, demonstrates the student is ready to make the transition to graduate school or the professional workplace.

THE 499 Senior Competency Practicum  
No credit

Students will take a written exam which covers information from core requirements for the major. Students must earn a C- or better.

SNR/SNT 489 (THE) Senior Experience  
1 hour credit  
Fall and spring  
Coreq: THE 499

This senior year experience is fulfilled by completing a significant acting, playwriting, directing, design, or research project. An internship with an arts organization may also be used. The student must complete at least 70 hours of documented time in practical application and/or research and will meet weekly with the practicum advisor. Students must earn at least a grade of C.
Women’s Studies Program

**Department:** Sociology/History  
**Director:** M. Clark-Wiltz

**Women’s Studies Individualized Minor**  
Students can minor in Women’s Studies by proposing a personalized 15-credit hour plan. This plan includes WST 101 (required), Introduction to Women’s Studies, and courses and coursework in other disciplines that focus on issues of relevance to women’s studies (e.g., Women and Leadership, Women Photojournalists). Upon approval and completion of the proposed individualized plan, the minor appears on the student’s transcript.

A journalism major with an interest in women’s studies might propose the following:  
- **WST 101** Introduction to Women’s Studies (4 hours)  
- **WST/SOC 319** Gender and Sexualities (4 hours)  
- **WST/MMJ 490** Independent Study/Advertising to the Woman (1-2 hours)  
- **PLUS:** 5-6 hours in other Journalism courses where work focuses on women/gender

**Women’s Studies Course Descriptions**

An overview of major issues raised by the range of women’s situations and experiences in Western and non-Western societies. An examination of analytical perspectives that feminist critics in a variety of disciplines use to explore these issues.

Reading and analysis of selected works through the lens of gender and sexuality. Same as ENG 236.

A topic of current interest in women’s studies will be taught. Topics will vary according to faculty interest. Course will be offered upon request of a faculty member and with approval of the Vice President of Academic Affairs and the director of women’s studies.

This course provides an overview of theoretical and empirical work in the sociology of sex, gender, and sexuality. The course will also address various facets of the subject including ways that social, cultural, and legal status influence individual experiences and outcomes. Attention is paid to the social construction/control of gender, transgender, and multiple sexualities. Same as SOC 319.

This course will survey the history of women in the United States from the colonial era through the civil rights movement of the 1950s–’60s. The course will focus especially on the role of women in various social movements including: the movement to abolish slavery, the fight for women’s suffrage, reformist movements of the early twentieth century and the modern feminist movement. Students will have the opportunity to pursue a research paper on the social issues addressed in the life/work of an activist of their choosing. Same as HIS 332.
Franklin College Graduate Policies & Programs

The policies and procedures listed in this section of the catalog are specific to graduate students. For a complete list of policies and procedures, please refer to the Academic Policies and Procedures section of this catalog. If a policy or procedure is not specifically listed in the graduate section of the catalog, then the policies and procedures stated in the Academic Policies and Procedures section of this catalog apply to graduate students.

Admissions Policy
Application for admission is program specific. Please see details for the program in which you are applying. Further, graduate students should refer to program specific student handbooks for more detailed information and program policies.

Tuition and Fees
Tuition is specific to each graduate program; however, both graduate programs are billed by semester based on credit hours.

Master of Science in Athletic Training tuition policy
- Once admitted a $250 deposit is due upon acceptance to ensure your place in the MSAT is reserved.
- Once admitted into and enrolling in the MSAT Program, regardless of whether you are completing the 3+2 or two-year professional program, ALL students are required to pay the credit hour tuition rate for graduate studies throughout the duration of the MSAT curriculum.
  - Tuition rates for the 2020-21 academic year are $655 per credit hour.
  - Total tuition for the July 2020 cohort is $43,885
  - Tuition may be adjusted annually, but will remain constant for each cohort
  - Tuition billing and due dates for 2020-21 are as follows:

<table>
<thead>
<tr>

### Fees
- Graduate students are required to pay the annual Franklin College student activity fee of $200 billed each spring semesters.

### Tuition Refund Policy

All tuition refunds are based on the date of official withdrawal or drop as recognized by the Dean of the College, the Dean of Students, and the records office.

In full semesters (Spring, Summer, Fall for MSPAS and Spring and Fall for MSAT), tuition refund schedule will be as follows:

- Prior to the first day of class: 100%
- During the first week of class: 90%
- During the second week of class: 70%
- During the third week of class: 50%
- After the third week of class: 0%

In short semesters (Winter terms for MSPAS and Winter and Summer terms for MSAT), tuition refund schedule will be as follows:

- Prior to the first day of class: 100%
- During the first week of class: 75%
During the second week of class 50%
After the second week of class 0%

Financial Aid
- To determine your eligibility for financial aid the Free Application for Federal Student Aid (FAFSA) is required. The FAFSA can be filed at fafsa.gov and is available October 1st each year. MSPAS students must file or update the 2020-2021 FAFSA and submit by December 1st.
- Beginning March for MSAT and mid-October for MSPAS, financial aid awards will be available for enrolled students via the online financial aid system.
- Financial Aid questions can be directed to the financial aid office at finaid@franklincollege.edu or 317-738-8075.

Please note that students enrolled in graduate programs are NOT eligible for Franklin College scholarships/grants as these awards are restricted to undergraduate enrollment.

Master’s orientation
All graduate students will be required to attend a master’s program orientation prior to the start of program courses. A detailed description of orientation events will be sent to students in advance of starting coursework.

Course hour definition
For financial aid purposes, graduate students must be enrolled in a minimum of 10 credit hours during fall and spring semesters for full-time status. During summer and/or winter terms the requirement for full time status is enrollment in at least three credit hours.

Course numbering
500-level courses are intended for first year students in graduate programs and for MSAT students completing their undergraduate degree in conjunction with a graduate degree. MSAT students may count up to 12 credit hours of 500-level courses towards completing the requirements of their undergraduate degree if they are completing both degrees in a 3+2 program at Franklin College. 600-level courses are intended for second year graduate level students.

Graduation Requirements
To successfully graduate from the MSAT or MSPAS Program, students must:
1. Complete the entire program within three and one-half (3.5) academic years; and
2. Successfully complete and pass all required courses, rotations, and program requirements with a grade of C or better and have a minimum cumulative GPA of 3.00.

Degree application
An application for degree and appropriate degree templates must be filed with the Academic Records Office before the student is considered for graduation. The application should be completed and filed by October 1st prior to the next calendar year graduation date.
Grading
The Graduate Programs require a minimum 3.0 cumulative grade point average ("GPA"). While 70% is considered passing, the expected level of performance in graduate programs is a “B” average or above. The grading system for the MSAT and MSPAS program is defined below.

<table>
<thead>
<tr>

Master of Science in Athletic Training

Program Director: Tiffany Franklin
MSAT Faculty: K. Eiler, K. Remsburg, S. Shruck, J. Williams

The Master of Science in Athletic Training (MSAT) program is a professional program designed for students who do not hold a bachelor’s degree in athletic training but who want to pursue athletic training credentials by the Board of Certification (BOC) and pursue a career as an athletic trainer. Franklin College athletic training is accredited by the Commission on Accreditation of Athletic Training Education (CAATE). A degree from a CAATE accredited program is necessary for students to be eligible for the BOC exam.

Program Options

Two options are available for the MSAT:

1. 3+2 program for entering first-year students or potential undergraduate transfer students
2. Two-year professional program for students who already hold a bachelor's degree

Regardless of the program option, coursework specific to the MSAT is completed over one summer session (classes begin in July) followed by coursework over fall, winter, and spring semesters for two years.

3+2 Program

The 3+2 (five years total) program is intended for entering first-year students, transfer students or students who change majors early in their undergraduate education. During the first three years, each student will complete the MSAT program prerequisites and bachelor’s degree requirements for the major of their choice (exercise science is recommended). Upon acceptance into the graduate program, students will begin coursework for the MSAT during summer session prior to their fourth year. At the end of the student’s fourth year, he or she will receive a bachelor’s degree. At the end of successful completion of the fifth year, each student will earn a Master of Science in Athletic Training degree.

Two-Year Professional Program

The two-year program is intended for students who have already earned a bachelor’s degree and have completed required prerequisite courses for the MSAT program. This program is appropriate for college graduates who may want to change careers; those students who decided athletic training as a career option late in their undergraduate studies; or those who did not have time during their undergraduate years to major in athletic training.

MSAT Admission Requirements

Applications for the MSAT will be submitted through the Athletic Training Centralized Application System (ATCAS), or via email to the program director if ATCAS is closed, and are due no later than January 1 for consideration of early admission into the MSAT program. Should we not reach a full cohort of students from early admissions, we will continue to accept and review applications on a rolling basis. Admission to the MSAT at Franklin College is competitive. The following is a list of minimum requirements for application. Meeting these minimum requirements does not ensure admission into the program.

- Completed ATCAS application
- Evidence of a C or higher in the following prerequisites courses (within the past 7 years):
  - Anatomy
  - Biology
  - Chemistry
  - Nutrition
  - Physics
  - Physiology
- Psychology
- Statistics or Research Methods

- Completion of a minimum of 50 hours of observation under the direct supervision of a certified athletic trainer; Submit to “Observation Hours” directly on ATCAS
- Verification of a health assessment, physical examination, and immunization record with HBV and TB information will be completed prior to the start of summer term coursework
- Copy of current First Aid and CPR for the Professional Rescuer or BLS Healthcare Provider certification; Submit to “Licenses and Certifications” directly on ATCAS
- Verification that the MSAT program’s Technical Standards for Admission can be met
- Personal Statement
- Current Resume
- Completion of program specific questions
- Two letters of recommendation/evaluations. One from a faculty member and one from a certified athletic trainer, physician, or other health care provider
- The committee reserves the right to interview each applicant via video-chat, phone, or in-person on a case-by-case basis

Franklin College 3+2 students have an option to apply for early admittance into the MSAT program. Students are eligible to apply for early admittance after the completion of the following:

**Early Admittance for MSAT application requirements**

- ANAT 210 or BIO 210
- One additional prerequisite course
- Grade of “C” or higher in all prerequisite courses completed at the time of application
- Minimum prerequisite course GPA of 3.4
- Minimum overall GPA of 3.4
- 25 hours of observation with a certified athletic trainer
- Personal Statement
- Two letters of recommendation: One from a faculty member and one from either a certified athletic trainer, physician, or other healthcare provider
- Current resume

**Information for students applying to Exercise Science and the MSAT simultaneously**

For those students completing a 3+2 with Exercise Science, applications for early admittance to the MSAT may be completed at the same time as application to the major program. However, even though the application process is happening simultaneously, acceptance to the Exercise Science program does not ensure acceptance to early admittance for the MSAT. The requirements for students applying to both programs simultaneously are as follows:

**Exercise science application requirements**

- Grade of "C" or higher in EXE 234 and EXE 244
- Personal Statement
- Current resume

**Additional MSAT application requirements**

- Minimum overall GPA of 3.4
- 25 hours of observation with a certified athletic trainer
- Two letters of recommendation: One from a faculty member and one from either a certified athletic trainer, physician, or other healthcare provider
Retention Requirements for Early Admittance to the MSAT

Students who earn early admittance will be reviewed at the end of each semester to ensure they are continuing to meet the following benchmarks:

- Grade of “C” or higher in all prerequisite courses
- Minimum overall GPA of 3.4
- 10 hours of observation with a certified athletic trainer each semester after the completion of the initial 25 hours required for application

Early admittance will be revoked from students who do not continually meet the required benchmarks. If early admittance is revoked, a student may reapply to the MSAT via the traditional route through ATCAS, if and when he/she becomes eligible.

The MSAT program is a rigorous and intense program that places specific physical and intellectual demands on students. Because of this, students must submit completed medical and program forms. These forms ensure students meet the stated technical standards, such as the physical and mental demands of the MSAT program, with or without accommodations. Additionally, the technical standards ensure compliance with accreditation standards. The complete technical standard document is available on the Franklin College Master of Science in Athletic Training webpage and with program application materials. Students who have questions about this document should inquire with the Director of the Academic Resource Center. These technical standards meet the requirements set forth by the American Disabilities Act (ADA) of 1990. Further, upon acceptance students will receive a program-specific health questionnaire, physical, and immunization record form, including flu shot, HBV and TB information. This form must be completed, signed by a health care provider, and submitted to the program director prior to beginning coursework in July.

Transfer Policy

Transfer students with prior graduate-level athletic training education are evaluated on an individual basis. In direct consultation, the student and the MSAT Program Director develop a plan of study that builds on previous learning, addresses necessary content and skill requirements, and ensures the student’s complete incorporation into the Franklin College MSAT. Transfer students are required to provide the MSAT program director with course descriptions and appropriately dated syllabi for all graduate-level athletic training specific courses prior to approval for transfer credit. Transfer students are held to all application requirements and must complete the application process through ATCAS. As per Commission on Accreditation of Athletic Training (CAATE) requirements, students must be enrolled in a CAATE accredited professional-level master’s program for a minimum of two calendar years prior to graduation in order to meet graduation requirements. The MSAT Program reserves the right to request prospective transfer students participate in “placement testing” to determine their knowledge and skill in various athletic training domains of practice. Additionally, once admitted should deficiencies in skills or knowledge be determined by program faculty, transfer students may be required to audit courses where transfer credit was received, as part of a remediation plan.

Requirements for Progression and Academic Standing

The MSAT program requires a minimum 3.0 cumulative grade point average (“GPA”). While 70% is considered passing, the expected level of performance in the program is a “B” average or above.

Each student within the MSAT Program must maintain a minimum 3.0 (4.0 scale) cumulative GPA to maintain good standing in the program. Student progress in the program will be discussed continually by the program faculty at regularly scheduled faculty meetings and at the conclusion of each semester. If a student’s cumulative GPA falls below the 3.0 (4.0 scale) minimum, he/she will be placed on academic probation. Students will have one semester to improve his/her cumulative GPA to acceptable standards (minimum 3.0) to avoid being dismissed from the MSAT Program following an evaluation of student progress by the Program Director and the faculty. If a student’s cumulative GPA is
such that it is mathematically impossible to raise to a 3.0 after one semester, the student will automatically be dismissed from the MSAT program.

A grade of “C” or higher is required for all required courses within the MSAT program. If a student receives below a “C” in a course required by the program, the course must be repeated and the student is placed on academic probation. The student will be removed from probation when he/she has successfully repeated the course with a “C” or higher. The MSAT student will be allowed a maximum of two (2) total opportunities to successfully pass each course. They will be permitted to repeat a failed course only as part of a detailed remediation plan. Failure to pass a course on the second opportunity will result in academic dismissal from the program.

Courses within the MSAT program are sequential and are prerequisites for subsequent semester courses. The MSAT courses are only offered once a year so any course that must be repeated will result in deceleration of the student from the current cohort and will result in a delay in graduation. The MSAT program faculty and staff make every effort to provide support and access to appropriate assistance to help all students restore good academic standing.

As clinical coursework is included in the MSAT academic program, all academic requirements apply to clinical coursework. MSAT students meet regularly with preceptors during each clinical experience rotation to discuss his/her personal and professional evaluation. The evaluation encompasses skills, techniques, proficiencies and behaviors appropriate to athletic training. The purpose of the evaluation is for the student to receive feedback from his/her preceptor and the preceptor to receive feedback from the student. Preceptors may request more frequent evaluations if they feel students are not performing adequately in the clinical portion of the program. If additional meetings are required, the student and preceptors will discuss the concerns and come to a mutual agreement on a plan for improvement.

If a student demonstrates persistent inappropriate behavior during a clinical experience, or his/her clinical evaluation average falls below a 3 on a 1 to 5 scale, the MSAT program director reserves the right to place a student on probation from clinical experience rotations until the student can show progress towards improving skills, techniques, proficiencies and/or behavior. Consequences of this probation (including but not limited to enrollment in subsequent Clinical Education in Athletic Training courses) will be determined in each situation depending on the probation reasoning.

If a student is placed on probation a second time, either for unsatisfactory GPA, failure of a course, or demonstrating inappropriate behavior during clinical experience, the student will be automatically dismissed from the MSAT Program and graduate studies.

The Franklin College MSAT program consists of several clinical experience rotation requirements. Some clinical experience rotations are completed at off-campus clinical settings in Franklin, Whiteland, Greenwood, Columbus, and Indianapolis. In order to fulfill the requirements of these rotations students must have access to transportation.

Further, due to the nature of athletic training being a health care profession, students must submit completed medical forms and documentation of up-to-date vaccinations as part of the application process.

**Athletic Training Program Expenses**
Students enrolled in the MSAT will incur required expenses throughout the duration of the program. Below is a list of expenses required above and beyond college tuition and fees, and individual course fees.

This course will provide information related to the kinematics and kinetics of human locomotion through the study of functional, orthopedic anatomy. The goal of the course is for each student to be able to identify musculoskeletal, articular, nervous, and vascular systems of the human body and to understand the functional contribution of such structures to pathologies related to physical activity.

Students will develop strategies and programs to prevent the incidence and/or severity of injuries and illnesses while optimizing patient overall health. Emphasis is placed on the prevention of injuries to physically active individuals in the areas of conditioning, pre-participation screening, nutritional concepts, and environmental risk factors. The appropriate use of and fit for protective equipment, and proper application of wrapping, taping, braces and orthotic devices will be practiced. Laboratory experiences are used to supplement classroom instruction.

Development of knowledge and skills in the evaluation and immediate management of acute injuries and illnesses. Focus is on planning for, examining, and managing immediate, emergent and acute situations particularly for physically active individuals. Immobilization, splinting, transporting, wrapping and taping techniques for managing acute injuries will be practiced. Additionally students will demonstrate emergency care skill consistent with National Athletic Trainers’ Association position statements. Laboratory experiences are used to supplement classroom instruction.

Instruction on assessment procedures and evaluation techniques for lumbosacral and lower extremity injuries. It includes an in-depth inquiry into the anatomical and physiological effects associated with the occurrence of injuries to physically active individuals and the process and components of an injury evaluation. Students learn to perform and interpret the results of structural and functional tests in order to accurately diagnose injury and determine appropriate differential diagnoses. Students will develop clinical decision making skills through the integration of evidence-based medicine. Clinical outcomes assessment including patient self-report measures will be an integral part of this course.

Assessment procedures and evaluation techniques for cervical, thoracic, and upper extremity injuries. It includes an in-depth inquiry into the anatomical and physiological effects associated with the occurrence of injuries to physically active individuals, and the process and components of an injury evaluation. Students learn to perform and interpret the results of structural and functional tests in order to accurately diagnose injury and determine appropriate differential diagnoses. Students will develop clinical decision making skills through the integration of evidence-based medicine. Clinical outcomes assessment including patient self-report measures will be an integral component of this course.

</tbody>
</table>
MSAT 552 Clinical Experience in Athletic Training III
1.5 credit hours
Winter
Prerequisite: MSAT 550
A clinical course which provides students an opportunity to gain experience in an off-campus orthopedic setting working directly with an orthopedic physician and observing surgical procedures. Students will complete one, two-week experience at the same clinical setting. Clinical experience hours will be augmented with a seminar on basic practices necessary to become a successful athletic trainer.

MSAT 553 Clinical Experience in Athletic Training IV
3.5 credit hours
Spring
Prerequisite: MSAT 550
A clinical course designed to provide experience under the direct supervision of a preceptor. A demonstration of proficiency in skills up to and including prevention and care of athletic injuries and clinical exam and diagnosis of injuries is required. The incorporation of evidence-based practice principles will be emphasized. Further foundational behaviors in the context of real patient care will be assessed. Clinical experience hours will be augmented with a seminar on methods to enhance clinical skills. Students are responsible for costs associated with travel to and from their clinical experiences.

MSAT 610 Internship in Athletic Training
0 credit hours
Summer
Prerequisite: MSAT 551 or MSAT 553
An elective clinical course which provides students an opportunity to gain experience under the direct supervision of a preceptor at a pre-approved off-campus site. This will be an individualized experience, allowing a student to pursue learning goals specific to the experience.

MSAT 625 Healthcare Administration
2 credit hours
Spring
Prerequisite: Second Year Status in MSAT
Exploration of organizational and administrative aspects of athletic health care management for various employment settings. Emphasis is placed on students developing an understanding of human resources, risk management, healthcare delivery mechanisms, insurance, reimbursement, documentation, patient privacy, and facility management.

MSAT 631 Clinical Pathology and Medical Interventions
4 credit hours
Fall
Prerequisite: MSAT 530 & MSAT 531
An advanced course for athletic training students to build a foundational understanding of disease, disorders, illness and other general medical conditions affecting the health of physically active people across the lifespan. Students learn to recognize signs, symptoms and predisposing factors of pathology along with appropriate interventions for treating medical conditions. Additionally students gain skill in analysis of evidence in relation to patient care while performing standard techniques and procedures for clinical examination and establishing appropriate referral. Laboratory experiences will be used to supplement classroom instructions.

MSAT 634 Concepts in Therapeutic Interventions II
4 credit hours
Fall
Prerequisite: MSAT 534
Content will build upon concepts of therapeutic interventions established in MSAT 534. Students will develop an integrated approach to the treatment of injuries. Focus will be on the indications, contraindications, and operational protocols for therapeutic interventions relative to progressing through healing and restoring normal function and a highly competitive state for physically active individuals. Treatment effectiveness, patient satisfaction, and critical assessment of evidence in relation to patient care will be emphasized. Laboratory experiences will be used to supplement classroom instructions.
MSAT 637 Professional Preparation in Athletic Training  
| Spring | 2 credit hours  
| Prerequisite: Semester of or just prior to graduation  
A focus on advanced concepts in professional development. Students complete a self-assessment and construct a plan for continued professional development. Preparation for the Board of Certification exam is emphasized. Strategies related to enhancing leadership skills and the promotion of athletic training will be explored.

MSAT 638 Advanced Therapeutic Interventions  
| Spring | 3 credit hours  
| Prerequisite: MSAT 634  
An advanced course that allows for examination of in-depth therapeutic interventions including movement pattern development and advanced manual therapy techniques. Practical application of current concepts and research-driven rehabilitative protocols are emphasized. The course also addresses trends in sports medicine surgical procedures, research behind new rehabilitative techniques, and effective mechanisms for evaluating clinical relevance of new products. Fee: $150 nonrefundable.

MSAT 643 Research Seminar  
| Fall | 1 credit hour  
| Prerequisite: MSAT 544  
Students will complete a written manuscript and poster in preparation for presentation. Oral presentations may occur both on and off campus to peers and professionals. Emphasis is placed on written and oral communication skills.

MSAT 650 Clinical Experience in Athletic Training V  
| Fall | 4.5 credit hours  
| Prerequisite: MSAT 550  
Advanced clinical experience where students are responsible for assisting in the healthcare of patients during practices, games, treatments, and rehabilitation under the direct supervision of a preceptor. Demonstration of proficiency in skills up to and including clinical exam and diagnosis of injuries and basic therapeutic interventions is required. The incorporation of evidence-based practice principles including critical assessment of patient self-report measures will be emphasized. Further, foundational behaviors in the context of real patient care will be assessed. Clinical experience hours will be augmented with a seminar on methods to enhance clinical skills. Students are responsible for costs associated with travel to and from their clinical experiences.

MSAT 651 Clinical Experience in Athletic Training VI  
| Spring | 4.5 credit hours  
| Prerequisite: MSAT 550  
Advanced clinical experience where students are responsible for assisting in the healthcare of patients during practices, games, treatments, and rehabilitation under the direct supervision of a preceptor. Students are required to integrate knowledge, skills, and clinical decision-making into actual client and patient care. Demonstration of proficiency in skills up to and including psychosocial strategies and advanced therapeutic interventions is required. The incorporation of evidence-based practice principles including critical assessment of patient self-report measures will be emphasized. Further foundational behaviors in the context of real patient care will be assessed. Clinical experience hours will be augmented with a seminar on methods to enhance clinical skill, including administrative and leadership attributes.

MSAT 652 Immersive Clinical Experience in Athletic Training  
| Winter and Summer | 2 credit hours  
| Prerequisite: MSAT 650  
An immersive clinical experience, under the direct supervision of a preceptor, that provides a practice-intensive experience to allow students to experience the totality of care provided by athletic trainers. Students must participate in the day-to-day and week-to-week role of an athletic trainer for a four-week period.
Master of Science in Physician Assistant Studies

Program Director: T. Meehan  
Medical Director: G. Strock  
MSPAS Faculty: J. Cheeseman, B. LaBonte, M. Moore, M. Sever

The Master of Science in Physician Assistant Studies (MSPAS) program is a professional program designed for students who hold a bachelor’s degree and want to pursue board certification as a PA by The National Commission on Certification of Physician Assistants (NCCPA) and licensure to practice medicine as a PA. Franklin College MSPAS received Accreditation-Provisional status from the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA). A degree from an ARC-PA accredited program is necessary for students to be eligible for the NCCPA Physician Assistant National Certifying Examination (PANCE).

Accreditation Statement
The Higher Learning Commission has granted approval for Franklin College to offer the Master of Science in Physician Assistant Studies.

The ARC-PA has granted Accreditation-Provisional status to the Franklin College Physician Assistant Program sponsored by Franklin College.

Accreditation-Provisional is an accreditation status granted when the plans and resource allocation, if fully implemented as planned, of a proposed program that has not yet enrolled students appear to demonstrate the program’s ability to meet the ARC-PA Standards or when a program holding Accreditation-Provisional status appears to demonstrate continued progress in complying with the Standards as it prepares for the graduation of the first class (cohort) of students.

Accreditation-Provisional does not ensure any subsequent accreditation status. It is limited to no more than five years from matriculation of the first class.

25-Month Professional Program
The MSPAS program is a 25-month, 111 credit full-time course of study. The curriculum is divided into a 12-month didactic phase, a 12-month clinical phase, and a 1-month capstone phase. The program begins a new cohort of students in January each year.

As the program is sequential, students must take all courses each semester and a part-time option is not available.

Advanced Placement and Transfer Policy
The Franklin College MSPAS program does not accept advanced placement or transfer credit for required curricular components. No credit will be awarded to students for prior work experience.

Additional Estimated Program Expenses
In addition to the above tuition/fees, the following are estimated expenses that are the responsibility of the student during the course of the program.

- Criminal Background Check/drug screen – $200
- Text books and course resources – $1000-$1500
- Laptop computer – $1500
- Diagnostic medical equipment – $800-$1000
- Memberships – $195 (IAPA $20, AAPA $75)
- Required certifications (BLS, ACLS) – $250
- Estimated housing and living expenses per year
Upon completion of the MSPAS Program, students are responsible for the costs associated with the PA National Board Certifying Examination and the initial licensing fee in their chosen state for practice.

MSPAS Admissions Process

Step 1: Review the admission requirements and technical standards listed below
- Applicants will not be considered for an interview if they do not meet all of the requirements.

Step 2: Apply to the PA Program
- Applications for the cohort of students to begin in January 2021 will be accepted through the Central Application Service for Physician Assistants (CASPA) beginning April 30, 2020.
- Application deadline: September 1 with “Completed” status.
- It is the applicant’s responsibility to ensure that all application and supporting documents are submitted directly to CASPA by the deadline. Application materials sent directly to the program will not be accepted.
- Applications will not be considered if the application is not designated as “Complete” by CASPA prior to the deadline. Application, payments, transcripts, and at least two letters of reference must be received by 11:59 pm ET on the deadline date. To ensure items arrive on time, try to send all documents to CASPA several weeks before the deadline.
- The PA program conducts rolling admissions and it is possible that all interview slots may be filled prior to the application deadline. For this reason, it is recommended that applicants submit early in the application cycle.

Step 3: On-campus interviews
- Each completed and verified application is reviewed by the PA Program admission’s committee to evaluate a student’s qualifications for admission. Qualified applicants are invited to an on-campus interview which will assess knowledge of the PA profession, communication and interpersonal skills, and commitment to the mission of the PA program.

Step 4: Admission Decisions
- At the end of each interview session, applicants will be notified of admission decisions (accept, wait-list, denial) within 2 weeks of their on-campus interview. The PA program admits on a rolling basis.

Step 5: Pay your deposit
- Accepted students will have 2-3 weeks to accept or decline the offer. Upon acceptance of an offer, a $1000 non-refundable enrollment deposit must be made (Link) to hold the applicant’s spot in the class. The total deposit will be applied to the first semester tuition once the student matriculates.

Step 6: Prior to matriculation
- Obtain a physical exam and provide documented proof of program and college required immunizations. Program required immunizations are based on current Centers for Disease Control (CDC) recommendations for health professionals (https://www.cdc.gov/vaccines/adults/rec-vac/hcw.html). Proof of physical exam and immunizations should be submitted to the Student Health Center (http://franklincollege.edu/student-life/health-center/) for verification.
- Submit to a criminal background check through the agency selected by the PA program as required by clinical training sites and state licensing boards. Students will be subject to drug screens as required by clinical training sites. Cost of both of these screenings are the responsibility of the student and paid directly to the agency providing the screening.
• Provide documentation of current certification for American Heart Association (or equivalent) Basic Life Support (BLS) for Health Care Providers.

Admissions Requirements

➢ A Bachelor’s degree from a regionally accredited United States institution prior to matriculation into the PA program. Official transcripts conferring degrees completed after submitting the application through CASPA must be sent directly to the PA program at Franklin College.

➢ A minimum cumulative GPA of 3.0 is required. A minimum BCP GPA (biology, chemistry, and physics) of 3.0 as calculated by CASPA is also required. No individual course grades below a “C” may be counted for a pre-requisite course. Admission to MSPAS programs is highly competitive and a much higher GPA than the minimum is normally required for admission.

Required Classes

All pre-requisite course work should be completed prior to September 1st in the year before the January program start. However, a student should still apply early in the cycle with in-progress pre-requisite course(s). An applicant may complete a maximum of 1 course after September 1st. Official transcripts for any courses completed after submitting the application through CASPA must be sent directly to the PA program at Franklin College and demonstrate a “C” or better in the required course. Course/grade substitution may be requested only after a completed CASPA application is received.

• Chemistry (3)
  o General Chemistry with labs (2 semesters)
  o Organic Chemistry with lab (1 semester)

• Biology (5)
  o General Biology with labs (2 semesters)
  o Human Anatomy & Physiology with labs (2 semesters)
  o Microbiology with lab (1 semester)

*Chemistry and biology course work should be completed within 7 years of matriculation. Biology and chemistry courses designed for science majors are preferred. Non-science major and online lab courses, while accepted, are not preferred.

• Social Sciences (2)
  o General Psychology (1 semester)
  o 1 additional behavioral/social science class (1 semester)

• Statistics/Biostatistics (1)
  o Any course (1 semester)

• Composition/Communications (1)

• 1 composition or communications course (1 semester)

Recommended Classes

• Medical terminology
• Biochemistry
• Bioethics
• Cell Biology
• Genetics

Patient Care Hours

A minimum of 200 documented patient care hours under the supervision of a licensed health care professional is required.
• Direct, hands-on patient care hours are intended to demonstrate the applicants experience working in a healthcare setting. Assessment of the quality of the patient care hours will be based upon the description of the applicant’s duties performed in terms of patient contact and interaction with other healthcare providers. Examples of direct patient care include but are not limited to nurse, certified nurse assistant (CNA), medical assistant, EMT, paramedic, emergency room tech, scribe, surgical tech, athletic trainer, PT aide, etc.

**Physician Assistant Shadowing**
We encourage you to observe (“shadow”) a PA in the field. We prefer PA shadowing in multiple specialties. Note: shadowing hours are recorded in CASPA and should not count towards your patient care hours.

**Letters of Recommendation**
Applicants must provide three letters of recommendation. One from a professor/instructor and one from a physician or other healthcare provider. The third letter is of the applicant’s choosing.

**Special Consideration**
The following admission and enrollment practices are followed.

• Franklin College students and graduates are at an advantage in the admission process. Any current Franklin College student or recent graduate (<5 years) that has met all of the standards for admission AND has a CASPA calculated cumulative and BCP GPAs of 3.4 or above will be guaranteed to move onto the interview phase of the admissions process. They are still required to submit an application to Franklin College through CASPA. Any Franklin College graduate that does not meet the above GPA requirement may still apply through CASPA and be considered for admission to the PA program.

• Applicants who meet any of the following criteria will receive additional consideration in the admissions process for each criterion met. Students must declare on their CASPA application under the Franklin College section that they wish to be considered.

  o Applicant is a graduate of Franklin College’s Professional Development Certificate Program
  o Applicant is from a medically underserved area or population in Indiana as designated by the Indiana State Department of Health.
  o Applicant is a member of an underrepresented in medicine populations as determined by the American Academy of Medical Colleges.
  o Applicant is a current or former member of the US military.

**MSPAS orientation**
All graduate students will be required to attend a master’s program orientation prior to the start of Winter (January) courses. A detailed description of orientation events will be included with students’ acceptance letters.

**Graduation Requirements**
To successfully graduate from the PA Program, students must:

(1) Complete the entire program within three and one-half (3.5) academic years; and

(2) Successfully complete and pass all required courses, rotations, and program requirements with a grade of C or better and have a minimum cumulative GPA of 3.00.

**Academic Requirements**
Students must complete and pass all semester courses before they can progress to the next semester of the program. Successful completion of a course is defined as the ability to demonstrate competence in course content. Criteria for successful completion of each course are conveyed to the student via the course syllabus.

Each student within the PA Program must maintain a minimum 3.0 (4.0 scale) cumulative GPA to maintain good standing in the program. Student progress in the program will be discussed continually by the program faculty at regularly
scheduled faculty meetings and at the conclusion of each semester. If a student’s term OR cumulative GPA falls below the 3.0 (4.0 scale) minimum, he/she will be placed on academic probation. Students will have one semester to improve his/her term AND cumulative GPA to acceptable standards (minimum 3.0) or risk being dismissed OR decelerated from the MSPAS Program following an evaluation of student progress by the Program Director and the faculty.

- A grade of “C” or higher is required for all required courses within the MSPAS program. If a student receives a “F” or below in a course required by the program, the course must be repeated and the student is placed on academic probation. The student will be removed from probation when he/she has successfully repeated the course with a “C” or higher. The MSPAS graduate students will be allowed a maximum of two (2) opportunities to successfully pass each course or rotation. They will be permitted to repeat a failed course or rotation only as part of a detailed remediation plan. Failure to pass a course or rotation on the second opportunity will result in academic dismissal from the program.

- All courses within the MSPAS program are sequential and are prerequisites for subsequent semester courses. MSPAS didactic courses are only offered once a year so any course that must be repeated will result in deceleration of the student from the current cohort. During the clinical year, repeated courses may result in a delay in graduation. The MSPAS program faculty and staff make every effort to provide support and access to appropriate assistance to help all students restore good academic standing.

- If a student is placed on probation a second time, either for low cumulative GPA or failure of a course, the student will be automatically dismissed from the MSPAS Program and graduate studies.

</tbody>
</table>
MSPA 515 Intro to Clinical Pharmacology 1 credit hour
Winter
Prereq: Admission to MSPAS
Develops an understanding of the theoretical concepts surrounding pharmacology, such as drug classifications, the pharmacokinetics and pharmacodynamics of drugs, adverse effects of drugs, the concepts surrounding pharmacotherapy, and the rationale for therapeutic use of prescription and nonprescription medications. The course will also explore the drug discovery and regulation process through integrating the Lilly “Making Medicine” module.

MSPA 520 Applied Patient Care I 2 credit hours
Winter
Prereq: Admission to MSPAS
In the first of a four course series, this course will prepare students by developing skills in physical exams and documentation. In this lecture and laboratory based course, students will learn and practice the physical exam techniques necessary for patient care. Lectures will focus on the components of a comprehensive physical exam and laboratory sessions will focus on developing and practicing, towards a defined level of proficiency, the skills needed to complete a head to toe physical exam. Patient-centered communication skills will be incorporated throughout the course series.

MSPA 521 Applied Patient Care II 2 credit hours
Spring
Prereq: All winter term courses
In the second of a four course series, this course continues to prepare students to begin patient care through developing skills in history taking, physical exams, and documentation of a full history and physical exams. During the term, students will complete a comprehensive head to toe screening exam. Advanced physical exam and special tests will be included based upon the body systems covered in the clinical medicine courses during the semester. The focus will be on developing a differential diagnosis using problem-based small group cases. Patient-centered communication skills will be incorporated throughout the course activities.

MSPA 522 Applied Patient Care III 2 credit hours
Summer
Prereq: All spring term courses
In the third of a four course series, this course continues to prepare students to begin patient care through developing skills in history taking, physical exams, appropriate diagnostic test ordering, and documentation during chief complaint focused visits. Advanced physical exam and special tests will be included based upon the body systems covered in the clinical medicine courses during the semester. The focus will on refining the differential diagnosis using problem-based small group cases and standardized patients. Patient-centered communication skills will be incorporated throughout the course activities.

MSPA 523 Applied Patient Care IV 3 credit hours
Fall
Prereq: All summer term courses
In the final of a four course series, this course finishes preparing students to begin patient care through developing skills in history taking, physical exams, appropriate diagnostic test ordering, and documentation during chief complaint focused visits. Advanced physical exam and special tests will be included based upon the body systems covered in the clinical medicine courses during the semester. The focus will on refining the differential diagnosis using problem-based small group cases and standardized patients. Additionally, the clinical skills necessary for patient care will be covered including surgical prep, splinting/casting, suturing, and IV’s. Patient-centered communication skills will be incorporated throughout the course activities.

MSPA 530 Intro to Evidence-based Practice 1 credit hour
Spring
Prereq: All winter term courses
Introduces students to evidence-based medicine and provides an in-depth review of research methods used in clinical medicine. Emphasis is placed on clinical questions typically encountered in PA practice and the tools available to answer them.
In the first of a three course series, this course examines major classes of pharmacological agents, with special attention to mechanisms of therapeutic and adverse effects, including molecular, cellular, physiological, psychological, and pathological phenomena. The focus of this course is the immune system, infectious disease, hematology, integumentary system, HEENT system, and pulmonary system covered in the clinical medicine courses.

In the second of a three course series, this course examines major classes of pharmacological agents, with special attention to mechanisms of therapeutic and adverse effects, including molecular, cellular, physiological, psychological, and pathological phenomena. The focus of this course is the cardiovascular system, renal system, genitourinary system and musculoskeletal system covered in the clinical medicine courses.

In the final of a three course series, this course examines major classes of pharmacological agents, with special attention to mechanisms of therapeutic and adverse effects, including molecular, cellular, physiological, psychological, and pathological phenomena. The focus of this course is the gastrointestinal system, endocrine system, nervous system, behavioral and mental health, gynecological, obstetrics, and pediatrics covered in the clinical medicine courses.

Systems-based course addressing anatomy, physiology, pathophysiology, clinical medicine, and diagnostic testing involving the hematology and infectious disease across the lifespan. This course will include modules on the structure of the immune system and a review of the microbiology of organisms. Appropriate ordering and interpretation of diagnostic tests as related to the disease states presented will be included.

In conjunction with the Applied Patient Care II course, students will be provided the opportunity to apply their newly learned medical knowledge regarding conditions and disease states in this organ system along with evidence based medicine approaches and health promotion and disease prevention concepts to the ongoing development of their history taking and physical examination and critical thinking skills in case based learning sessions.

Systems-based course addressing anatomy, physiology, pathophysiology, clinical medicine, and diagnostic testing involving the HEENT system across the lifespan. Appropriate ordering and interpretation of diagnostic tests as related to the disease states presented will be included.

In conjunction with the Applied Patient Care II course, students will be provided the opportunity to apply their newly learned medical knowledge regarding conditions and disease states in this organ system along with evidence based medicine approaches and health promotion and disease prevention concepts to the ongoing development of their history taking and physical examination and critical thinking skills in case based learning sessions.
MSPA 562 Clinical Dermatology  
1.5 credit hours
Spring  
Prereq: All winter term courses
Systems-based course addressing anatomy, physiology, pathophysiology, clinical medicine, and diagnostic testing involving the integumentary system across the lifespan. Appropriate ordering and interpretation of diagnostic tests as related to the disease states presented will be included.

In conjunction with the Applied Patient Care II course, students will be provided the opportunity to apply their newly learned medical knowledge regarding conditions and disease states in this organ system along with evidence based medicine approaches and health promotion and disease prevention concepts to the ongoing development of their history taking and physical examination and critical thinking skills in case based learning sessions.

MSPA 563 Clinical Pulmonology  
4 credit hours
Spring  
Prereq: All winter term courses
Systems-based course addressing anatomy, physiology, pathophysiology, clinical medicine, and diagnostic testing involving the pulmonary system across the lifespan. Appropriate ordering and interpretation of diagnostic tests including chest x-ray and chest CT as related to the disease states presented will be included.

In conjunction with the Applied Patient Care II course, students will be provided the opportunity to apply their newly learned medical knowledge regarding conditions and disease states in this organ system along with evidence based medicine approaches and health promotion and disease prevention concepts to the ongoing development of their history taking and physical examination and critical thinking skills in case based learning sessions.

MSPA 570 Clinical Cardiology  
5 credit hours
Summer  
Prereq: All spring term courses
Systems-based course addressing anatomy, physiology, pathophysiology, clinical medicine, and diagnostic testing involving the cardiovascular system across the lifespan. Appropriate ordering and interpretation of diagnostic tests including ECG, cardiac markers, radiographic imaging, and stress testing will be covered.

In conjunction with the Applied Patient Care III course, students will be provided the opportunity to apply their newly learned medical knowledge regarding conditions and disease states in this organ system along with evidence based medicine approaches and health promotion and disease prevention concepts to the ongoing development of their history taking and physical examination and critical thinking skills in case based learning sessions.

MSPA 571 Clinical Nephrology and Urology  
3 credit hours
Summer  
Prereq: All spring term courses
Systems-based course addressing anatomy, physiology, pathophysiology, clinical medicine, and diagnostic testing involving the renal and urinary systems across the lifespan. Appropriate ordering and interpretation of diagnostic tests including urinalysis, ultrasound, and CT scan as related to the disease states presented will be covered.

In conjunction with the Applied Patient Care III course, students will be provided the opportunity to apply their newly learned medical knowledge regarding conditions and disease states in this organ system along with evidence based medicine approaches and health promotion and disease prevention concepts to the ongoing development of their history taking and physical examination and critical thinking skills in case based learning sessions.
MSPA 572 Clinical Orthopedics and Rheumatology  
**4 credit hours**

**Summer**  
Prereq: All spring term courses

Systems-based course addressing anatomy, physiology, pathophysiology, clinical medicine, and diagnostic testing involving the orthopedics and rheumatic systems across the lifespan. Appropriate ordering and interpretation of diagnostic tests including x-ray, MRI, joint fluid analysis, and laboratory markers as related to the disease states presented will be covered.

In conjunction with the Applied Patient Care III course, students will be provided the opportunity to apply their newly learned medical knowledge regarding conditions and disease states in this organ system along with evidence based medicine approaches and health promotion and disease prevention concepts to the ongoing development of their history taking and physical examination and critical thinking skills in case based learning sessions.

MSPA 580 Clinical Gastroenterology  
**3 credit hours**

**Fall**  
Prereq: All summer term courses

Systems-based module addressing anatomy, physiology, pathophysiology, clinical medicine, and diagnostic testing involving the gastroenterology across the lifespan. Appropriate ordering and interpretation of diagnostic tests including abdominal x-ray, CT scan, endoscopy, colonoscopy, liver function tests, and other laboratory markers as related to the disease states presented will be covered.

In conjunction with the Applied Patient Care IV course, students will be provided the opportunity to apply their newly learned medical knowledge regarding conditions and disease states in this organ system along with evidence based medicine approaches and health promotion and disease prevention concepts to the ongoing development of their history taking and physical examination and critical thinking skills in case based learning sessions.

MSPA 581: Clinical Endocrinology  
**2 credit hours**

**Fall**  
Prereq: All summer term courses

Systems-based module addressing anatomy, physiology, pathophysiology, clinical medicine, and diagnostic testing involving the endocrine system across the lifespan. Appropriate ordering and interpretation of diagnostic tests as related to the disease states presented will be covered.

In conjunction with the Applied Patient Care IV course, students will be provided the opportunity to apply their newly learned medical knowledge regarding conditions and disease states in this organ system along with evidence based medicine approaches and health promotion and disease prevention concepts to the ongoing development of their history taking and physical examination and critical thinking skills in case based learning sessions.

MSPA 582 Clinical Behavioral Medicine and Neurology  
**4 credit hours**

**Fall**  
Prereq: All summer term courses

Systems-based module addressing anatomy, physiology, pathophysiology, clinical medicine, and diagnostic testing involving the behavioral medicine and neurology systems across the lifespan. Appropriate ordering and interpretation of diagnostic tests as related to the disease states presented will be covered.

In conjunction with the Applied Patient Care IV course, students will be provided the opportunity to apply their newly learned medical knowledge regarding conditions and disease states in this organ system along with evidence based medicine approaches and health promotion and disease prevention concepts to the ongoing development of their history taking and physical examination and critical thinking skills in case based learning sessions.
### MSPA 583 Clinical Gynecology and Obstetrics  
3 credit hours  
*Fall*  
Prereq: All summer term courses

Systems-based course addressing anatomy, physiology, pathophysiology, clinical medicine, and diagnostic testing in gynecology and obstetrics. Appropriate ordering and interpretation of diagnostic tests as related to gynecology and prenatal screening will be covered.

In conjunction with the Applied Patient Care IV course, students will be provided the opportunity to apply their newly learned medical knowledge regarding conditions and disease states in this system along with evidence based medicine approaches and health promotion and disease prevention concepts to the ongoing development of their history taking and physical examination and critical thinking skills in case based learning sessions.

### MSPA 584 Clinical Pediatrics  
3 credit hours  
*Fall*  
Prereq: All summer term courses

Systems-based course addressing development, clinical medicine, pathophysiology, and diagnostic testing in the pediatric population. The course builds upon the knowledge attained in previous clinical medicine courses and applies it to the recognition, evaluation, treatment and management, including referral of common clinical conditions and diseases seen in the pediatric population.

In conjunction with Applied Patient Care IV course, students will be provided the opportunity to apply their newly learned medical knowledge regarding conditions and disease states in this population along with evidence based medicine approaches and health promotion and disease prevention concepts to the ongoing development of their history taking and physical examination and critical thinking skills in case based learning dynamics.

### MSPA 590 Research Methods  
2 credit hours  
*Fall*  
Prereq: All summer term courses

Introduces students to research methods and application in the clinical setting. Covers basic concepts of epidemiology and statistics related to medical practice. Prepares students to complete capstone Community Engagement Project.

### MSPA 630 Bridge to Clinical Practice I  
1 credit hour each  
*Spring*  
Prereq: All didactic year courses

Provides students with the opportunity to reflect on their clinical experiences and to share best practices related to being a practicing physician assistant. Focuses on students’ work in collaborative, inter-professional, patient-centered teams, and the development of problem solving and medical decision-making skills. Students will present evidence-based medicine cases in a grand rounds format.

### MSPA 631 Bridge to Clinical Practice II  
1 credit hour each  
*Summer*  
Prereq: All didactic year courses

Provides students with the opportunity to reflect on their clinical experiences and to share best practices related to being a practicing physician assistant. Focuses on students’ work in collaborative, inter-professional, patient-centered teams, and the development of problem solving and medical decision-making skills. Students will present evidence-based medicine cases in a grand rounds format.

Assists students with the transition of becoming a clinically practicing physician assistant. Provides information on how to prepare for the new career, including obtaining certification, licensure, malpractice insurance, laws and regulations, and other essential items needed before beginning practice. Students will also spend significant time preparing for the PANCE exam.

This is a five-week required clinical rotation for a second-year PA student which focuses on the role of the physician assistant in general surgery. The rotation is designed to provide students with supervised medical and clinical practice experiences enabling them to meet program expectations (outcomes) and acquire the competencies needed for entry-level clinical PA practice.

Under the supervision of a surgery clinical preceptor designated by the PA program, the student will gain experience focusing on the care of the surgical patient and the role of the physician assistant in the surgical patient management team to include the pre-operative, intra-operative, and post-operative care and management. In addition, students will work toward expanding their knowledge of surgical care as well as their surgical skills through active participation and engagement as part of the surgical team both within the hospital and operating room settings. For the Surgery Clinical Course, the program-determined preceptor will be a physician who is board certified in general surgery or a PA that is supervised by a board certified surgeon.

The student will actively engage in applying medical knowledge and clinical skills gained during the didactic year and demonstrate continued development of interpersonal, clinical and technical skills, professional behaviors, clinical reasoning and problem solving as applied to the evaluation and management of problems encountered in the inpatient surgical setting.

</table>

This is a five-week required clinical rotation for a second-year PA student which focuses on the role of the physician assistant in internal medicine. The rotation is designed to provide students with supervised medical and clinical practice experiences enabling them to meet program expectations (outcomes) and acquire the competencies needed for entry-level clinical PA practice.

Under the supervision of an internal medicine clinical preceptor designated by the PA program, the student will gain experience in the diagnosis and treatment of adult diseases in the hospital/ inpatient setting which will allow the student to focus on the management of more complex patients requiring hospitalized care. For the Internal Medicine Clinical Course, the program-determined preceptor will be a physician who is board certified in internal medicine or a PA that is supervised by a board certified internal medicine physician.

The student will actively engage in applying medical knowledge gained during the didactic year and demonstrate continued development of interpersonal, clinical and technical skills, professional behaviors, clinical reasoning and problem solving.
This is a five-week required clinical rotation for second year PA students which focus on the role of the physician assistant in the emergency department setting. The rotation is designed to provide students with supervised medical and clinical practice experiences enabling them to meet program expectations (outcomes) and acquire the competencies needed for entry-level clinical PA practice.

Under the supervision of an emergency medicine clinical preceptor designated by the PA program, the student will gain knowledge and experience in the rapid and methodical assessment, evaluation, stabilization and treatment of acutely ill, traumatic, urgent, life threatening and/or emergent pediatric, adult and geriatrics patient patients and work as a member of the emergency department team. For the Emergency Medicine Clinical Course, the program-determined preceptor will be a physician who is board certified in emergency medicine or a PA that is supervised by a board-certified emergency medicine physician.

The student will actively engage in applying medical knowledge gained during the didactic year and demonstrate continued development of interpersonal, clinical and technical skills, professional behaviors, clinical reasoning and problem solving to the evaluation and management of acute, urgent and emergent problems commonly encountered in emergency medicine.

This is a five-week required clinical rotation for a second-year PA student which focuses on the role of the physician assistant in family medicine. The rotation is designed to provide students with supervised medical and clinical practice experiences enabling them to meet program expectations (outcomes) and acquire the competencies needed for entry-level clinical PA practice.

Under the supervision of a family medicine clinical preceptor designated by the PA program, the student will gain experience in the evaluation, treatment, and management including referral of common diseases and conditions encountered in an outpatient family medicine setting emphasizing adolescent, adult, and geriatric patients. Students will perform history and physical exams, obtain/interpret diagnostic testing and develop differential diagnosis/treatment plans. Students may perform clinical procedures at the discretion of the preceptor. For the Family Medicine Clinical Course, the program-determined preceptor will be a physician who is board certified in Family Medicine or a PA that is supervised by a board-certified Family Medicine physician.

The student will actively engage in applying medical knowledge gained during the didactic year and demonstrate continued development of interpersonal, clinical and technical skills, professional behaviors, clinical reasoning and problem solving.
MSPA 654: Women’s Health Clinical Course 4 credit hours
Spring, Summer, Fall Prereq: All didactic year courses
This is a five-week required clinical rotation for a second-year PA student which focuses on the role of the physician assistant in women’s health. The rotation is designed to provide students with supervised medical and clinical practice experiences enabling them to meet program expectations (outcomes) and acquire the competencies needed for entry-level clinical PA practice.

Under the supervision of a women’s health clinical preceptor designated by the PA program, the student will gain experience in the evaluation, treatment, and management of common diseases and conditions encountered in gynecology and obstetrics care. Students will perform history and physical exams, obtain/interpret diagnostic testing and develop differential diagnosis/treatment plans. Students may perform clinical procedures at the discretion of the preceptor. For the Women’s Health Clinical Course, the program-determined preceptor will be a physician who is board certified in obstetrics and gynecology or a PA that is supervised by a board certified ob/gyn physician.

The student will actively engage in applying medical knowledge gained during the didactic year and demonstrate continued development of interpersonal, clinical and technical skills, professional behaviors, clinical reasoning and problem solving.

MSPA 655: Pediatrics Clinical Course 4 credit hours
Spring, Summer, Fall Prereq: All didactic year courses
This is a five-week required clinical rotation for a second-year PA student which focuses on the role of the physician assistant in pediatrics. The rotation is designed to provide students with supervised medical and clinical practice experiences enabling them to meet program expectations (outcomes) and acquire the competencies needed for entry-level clinical PA practice.

Under the supervision of a pediatrics clinical preceptor designated by the PA program, the student will gain experience in the evaluation, treatment, and management including referral of common diseases and conditions encountered in an outpatient pediatric setting emphasizing infants, children, or adolescent patients. Students will perform history and physical exams, obtain/interpret diagnostic testing and develop differential diagnosis/treatment plans. Students may perform clinical procedures at the discretion of the preceptor. For the Pediatrics Clinical Course, the program-determined preceptor will be a physician who is board certified in pediatrics or a PA that is supervised by a board certified pediatric physician.

The student will actively engage in applying medical knowledge gained during the didactic year and demonstrate continued development of interpersonal, clinical and technical skills, professional behaviors, clinical reasoning and problem solving.

MSPA 656: Behavioral Medicine Clinical Course 4 credit hours
Spring, Summer, Fall Prereq: All didactic year courses
This is a five-week required clinical rotation for a second-year PA student which focuses on the role of the physician assistant in behavioral medicine. The rotation is designed to provide students with supervised medical and clinical practice experiences enabling them to meet program expectations (outcomes) and acquire the competencies needed for entry-level clinical PA practice.

Under the supervision of a behavioral medicine clinical preceptor designated by the PA program, the student will gain knowledge and experience toward the refinement of skills needed for the unique medical, physiological, behavioral and psychosocial components and issues common to the practice of psychiatry, behavioral and mental health. Students will work to adapt the standard medical history, physical examination, diagnostic and treatment plans to the psychiatric patient. For the Behavioral Medicine Clinical Course, the program-determined preceptor will be a physician who is board certified in psychiatry or a PA that is supervised by a board certified psychiatrist.

The student will actively engage in applying medical knowledge gained during the didactic year and demonstrate continued development of interpersonal, professional behaviors, clinical reasoning and problem solving.
MSPA 657 Elective Clinical Course | 4 credit hours each  
Spring, Summer, Fall  
Prereq: All didactic year courses

Each student is granted the opportunity to complete two five-week elective rotations designed to facilitate the student’s ability to evaluate health-related problems encountered in an area of medical interest. It can include the choice to obtain additional experience in one or two of the core rotation disciplines or other medical specialties.

Under the supervision of a clinical preceptor designated by the PA program, the student will gain knowledge and experience in the evaluation, treatment, and management including referral of common diseases and conditions encountered in the chosen discipline or medical specialty. During one of the elective rotation blocks, the student will have a rotation deliverable, which will be an inter-professionalism project.

The student will actively engage in applying medical knowledge gained during the didactic year and demonstrate continued development of interpersonal, clinical and technical skills, professional behaviors, clinical reasoning and problem solving.

MSPA 658 Elective Clinical Course | 4 credit hours each  
Spring, Summer, Fall  
Prereq: All didactic year courses

Each student is granted the opportunity to complete two five-week elective rotations designed to facilitate the student’s ability to evaluate health-related problems encountered in an area of medical interest. It can include the choice to obtain additional experience in one or two of the core rotation disciplines or other medical specialties.

Under the supervision of a clinical preceptor designated by the PA program, the student will gain knowledge and experience in the evaluation, treatment, and management including referral of common diseases and conditions encountered in the chosen discipline or medical specialty. During one of the elective rotation blocks, the student will have a rotation deliverable, which will be an inter-professionalism project.

The student will actively engage in applying medical knowledge gained during the didactic year and demonstrate continued development of interpersonal, clinical and technical skills, professional behaviors, clinical reasoning and problem solving.

MSPA 665: Community Engagement | 2 credit hours  
Summer, Winter  
Prereq: All didactic year courses

Students will select a health promotion/disease prevention topic of interest and design and create a methodology and curriculum for an educational presentation. Students will collect and analyze data and present results to faculty, staff, community partners, and fellow students.
**Academic Calendar 2020-2021**

**MS Athletic Training Summer Session • 2020-2021**
- Orientation .................................................. July 10
- Classes begin & Self Service registration closes ............. July 13
- Last day of classes ........................................ Aug. 21

**Fall Semester • 2020-2021**
- New students arrive ........................................ Aug. 27
- Bell Ceremony ................................................ Aug. 28
- Returning students arrive .................................. Aug. 30
- Classes begin & Self Service registration closes .......... Aug. 31
- Labor Day, college closed .................................. Sept. 7
- Last day to add a class or declare audit or pass/fail .... Sept. 8
- Last day to drop a class ..................................... Sept. 22
- Winter & Spring classes posted on Self Service .......... Oct. 6
- Early alert grades for new students due by noon .......... Oct. 6
- Senior Competency period begins .......................... Oct. 12
- Incomplete grades from Spring & Summer due .......... Oct. 13
- Mid-term grades due by noon .............................. Oct. 20
- Fall Break ...................................................... Oct. 22-23
- Last day to add second half semester classes .......... Oct. 27
- New students register for winter term ..................... Oct. 29
- Registration for Winter & Spring begins ............... Nov. 2
- Last day to withdraw from a class ........................ Nov. 3
- Senior Competency period ends ............................ Nov. 13
- Last day to drop second half semester classes .......... Nov. 13
- Thanksgiving break ........................................ Nov. 25-27
- Last day to submit Incomplete grade requests ............ Nov. 25
- Last day of classes .......................................... Dec. 11
- Final exam period ............................................ Dec. 14-17
- Holiday break begins after exams ......................... Dec. 17
- Final grades due by noon .................................. Dec. 21

**Immersive Term • 2020-2021**
- First day of classes .......................................... Jan. 4
- Last day to add a class or declare audit & pass/fail ..... Jan. 5
- Last day to drop a class ..................................... Jan. 7
- Last day of classes .......................................... Jan. 22
- Final grades due by noon .................................. Jan. 26
- No Classes/“Pivot” ........................................... Jan. 25-29

**Spring Semester • 2020-2021**
- Classes begin & Self Service registration closes ........ Feb. 1
- Last day to add a class or declare audit or pass/fail ..... Feb. 5
- Degree applications due .................................. Feb. 19
- Last day to drop a class ..................................... Feb. 19
- Summer & Fall classes posted on Self Service .......... Feb. 22
- Senior Competency period begins .......................... Mar. 15
- Registration for Summer & Fall begins .................. Mar. 15
- Incomplete grades from Fall & Winter due ............. Mar. 16
- Mid-term grades due by noon .............................. Mar. 22
- Spring Break .................................................... Mar. 29-Apr. 2
- Last day to add second half semester classes .......... Apr. 6
- Last day to withdraw from a class ........................ Apr. 9
- Senior Competency period ends ............................ Apr. 23
- Last day to drop second half semester classes .......... Apr. 23
- Scholars Day – No Classes (tentative date) ............. May 4
- Senior tentative grades due ................................. May 10
- Last day to submit Incomplete grade requests ........ May 14
