

## PRE-PROFESSIONAL PROGRAMS

Pre-dental • Pre-law • Pre-medical • Pre-medical lab science • Pre-athletic training • Pre-occupational therapy • Pre-optometry • Pre-pharmacy • Pre-physical therapy • Pre-physician assistant • Pre-podiatry • Pre-veterinary

Add a pre-professional program onto your core major as you prepare for professional school placement tests and application processes under the guidance of an adviser who is up to date on the latest admissions requirements, standards and exams.

100%

of our students complete an internship or undergraduate research.

### 12 OPTIONS

#### Pre-professional tracks

Students who begin a bachelor's program in anticipation of a career that requires an advanced degree are advised to alert their academic adviser to a pre-professional program of interest. These supplemental programs are structured so that students take all graduate school-required courses before they begin applying to programs. Each program is overseen by a faculty member and expert in the field who stays up to date on placement tests and graduate school acceptance standards. Franklin College's 11 pre-professional programs include:

- **Pre-dental:** This program is based on the requirements of leading dentistry schools and prepares students to take the Dental Aptitude Test (DAT). Students typically add the pre-dental track to a biology or chemistry major.
- **Pre-law:** This program empowers students of any major – including math, history, sociology, business and more – to prepare to apply for law school. Pre-law students also benefit from extracurricular experiences like Mock Trial Team to engage in practice before applying to programs and taking the Law School Admission Test (LSAT).
- **Pre-medical:** This program is based on the admissions requirements for most U.S. medical schools and spans biology, chemistry, physics and social sciences. This program prepares students to take the Medical College Admission Test (MCAT) and undergo the medical school application process.
- **Pre-athletic training:** This program prepares students to apply to graduate studies in athletic training, including the Franklin College Master of Science in Athletic training program. Franklin College offers accelerated 3+2 programs to complete a bachelor's degree and master's degree in five years.

## EACH PROGRAM IS OVERSEEN BY A FACULTY MEMBER AND EXPERT IN THE FIELD WHO STAYS UP TO DATE ON PLACEMENT TESTS AND GRADUATE SCHOOL

- **Pre-medical lab science:** The college operates in partnership with IU Health to offer students a unique 3+1 medical technology program. Students pursuing this track complete three years of instruction at Franklin College and one year of professional coursework in clinical laboratory science with IU Health. Graduates receive a bachelor's degree from Franklin College and a licensure through the IU Health program.
- **Pre-occupational therapy:** This program prepares students for acceptance into an occupational therapy graduate program and ensures students have taken all foundational and required courses before applying.
- **Pre-optometry:** This program is based on pre-professional requirements for admission to the Indiana University School of Optometry and prepares students for the Optometry Admission Test (OAT).
- **Pre-pharmacy:** This program prepares students to pursue a Doctor of Pharmacy Degree (PharmD). Students can choose to complete a bachelor's program or three years of pre-pharmacy study before applying to a Doctor of Pharmacy program.
- **Pre-physical therapy:** This program prepares students to take the Graduate Record Exam (GRE) and pursue a graduate degree in physical therapy. Students on this track typically major in either exercise science or biology, though no specific major is required for acceptance into most programs.
- **Pre-physician assistant:** This program prepares students to apply for physician assistant programs, including the Franklin College Master of Science in Physician Assistant Studies program.
- **Pre-podiatry:** This program prepares students to successfully complete the MCAT and apply for Doctor of Podiatric Medicine programs.
- **Pre-veterinary medicine:** This program prepares students to apply to the Veterinary Medical College Application Service (VMCAS), an organization that facilitates the application process for students seeking entrance into veterinary school.

### OUTSIDE THE CLASSROOM

#### Internships and clinical experiences

Every student who participates in a pre-professional program completes an internship, gaining practical and often clinical experience in their field of interest. Past students have interned with:

- Eli Lilly and Company
- Walmart and Kroger
- Richardson Dental Care
- Medical practices (dental, medical, physical therapy, veterinary)
- pharmacies
- Columbus Regional Health
- Johnson Memorial Hospital
- Homeview Health and Rehab
- St. Thomas Clinic
- Franklin Animal Clinic
- Franciscan Health
- Martin Orthodontics
- Freschette Eye Clinic

Pre-professional students have also taken part in travel opportunities that equip them with real-world experience, including working in a medical clinic operating room in Ghana.

## PRE-PROFESSIONAL PROGRAMS OVERVIEW

- **Medical school acceptance rate:** Franklin College's 35-year medical school acceptance rate is 85% – more than twice the national average.
- **Veterinary school acceptance rate:** Franklin College's vet school acceptance rate for the past 10 years is 90%.
- **Foundational and marketable degree:** Because these programs supplement the student's chosen major, students graduate with marketable degrees in biology, chemistry and physics, exercise science or other relevant subjects that serve them well as they pursue an advanced degree or career path.
- **Department contact information:** For more information on the college's pre-professional programs, contact Ben O'Neal, Ph.D, directly at 317.494.1729 or [boneal@FranklinCollege.edu](mailto:boneal@FranklinCollege.edu).
